New bodies of like import among druggists have sprung up within a short time within the State of Ohio, and one or two of them have had a phenomenal growth, notably the Northern Ohio Druggists' Association and the Ohio Valley Association, the former with headquarters at Cleveland and the latter at Cincinnati. It has been more than intimated that these societies are to absorb the Ohio State, and that the latter will go into liquidation. We do not believe this is the purpose of the members or officers of either of these more recently organized associations; there is plenty of room for all of them and a wide open opportunity for the old original body to show its power and influence in the interests of the retail drug trade of Ohio as it has not done in the twenty-four years of its history.

Every year is making it more evident that all such associations are of inestimable benefit to the retail druggist. The new societies emphasize this fact more and more. They are the result of this feeling of necessity among retail druggists themselves, else they would not have come into existence. So far as we are concerned we are glad they are here; we are thankful that they are making a strong effort for members and are keeping the pharmacal pot near the boiling point all the while. Let them do their best, then when the time arrives for the annual meeting of the State Association at Dayton let the members all come together and have a grand rally, such as Ohio has not seen among retail druggists in many years.

There are a great many "old faces" which have not put in an appearance at a State meeting for several years. We hope to see them strongly in evidence again, for there are some grand old men among them. A note recently received from Professor Young, President of the Ohio State, says that the prospects are for the largest meeting for many years. Let it be so! Dayton is a great city, and every visitor will have a good time. —W. R. O.

WHERE IS THE REPORT?

FOR several months inquiries have been reaching this office from Ohio pharmacists as to why they had not received the annual report of the Ohio Pharmaceutical Association for 1900. We have not answered these inquiries publicly, for we supposed that the report would be forthcoming probably before our investigation of the cause for the delay had been started. It is eight months since the meeting of the Ohio Association, and the members are making preparations for the next meeting, and still the report of the last one is not out. We do not believe there is a sufficient reason for such delay; if there is the pages of THE MIDLAND are always at the service of the officers for any statement they desire to make. It is our opinion that the report of an annual meeting, if printed at all, should be in the hands of the members within sixty days after the session adjourns, and if it cannot be so placed within that period it should not be published at all. There may be some good reading in a magazine eight months old, and a few stray items of interest may be culled from a daily newspaper of a month past, but men do not search among old rubbish for matters of keen interest.

By the way, it appears as though the Ohio Association within the past three or four years had received a cocaine injection in the spinal canal, resulting in anaesthesia, at least from the waist down. The meetings have not been well attended, the topics for discussion have not elicited much interest and a general feeling of *malaise* has characterized the entire organization. It should not be so. The coming meeting should be the largest and best which the society has ever known. The Association has done a great deal for Ohio druggists in the past; it has held a high place among such bodies in the country, and it should not be permitted to pass into obscurity. We shall continue from now until the next meeting to use our space freely toward an old-fashioned revival of interest in this time-honored association. Meantime let us have the report. —W. R. O.

THE TOOTH BRUSH A CIVILIZER.

BOOKER T. Washington is writing an autobiography which is being published in serial form in the *Outlook*. It is a very interesting and graphic story of the author's rise from slavery to a position of power and influence throughout the land, and illustrates what it is possible for one to accomplish when he sets about it in the right manner. He lays strong emphasis upon the tooth-brush as a factor in civilization, his theory being that the first step toward civilization from a condition not far remote from barbarism should be to come into possession of a tooth-brush and learn how to care for those important organs of the human anatomy—the teeth.

It is not a bad theory. There is undoubtedly mental, moral and spiritual power in the tooth-brush, the bath-tub and a cake of good soap. In proportion to the extent these important articles are in use a higher degree of virtue will be found to exist in a community other conditions being equal. The pharmacist is therefore in a peculiarly responsible position with regard to the welfare of his fellows for he is the chief purveyor to the people in such articles as those mentioned which are important factors in bringing men up to their normal plane of living. He should see to it that his stock of tooth-brushes is ample for the needs of his patrons, that he has an abundant supply of good soaps, all of which he is ready to dispose of at a reasonable advance on the cost price. He should display these and kindred articles where the attention of those visiting his store will be constantly directed toward them. He might, indeed, inquire of many who call for tobacco, cigars, cigarettes, snuff and the like if the family owns a tooth-brush or if there was any toilet soap in the house ready for any emergency. In this manner he would be pushing along the car of human progress and doing his share toward bringing in that period when no man shall say to his neighbor or friend, "Hast thou a tooth-brush, or a cake of bath soap?" but when all, from the least to the greatest, shall regard these articles as essential elements in decent living.

Mr. Washington states that one of the conditions required of the colored students who wish to enter the Tuskegee Institute is that each shall own and use a tooth-brush, and one item in the curriculum of that school is the daily bath.

Superb! If such conditions were demanded in all our colleges and universities of the students in attendance we would find a wonderful uplift in many dull lives. We have seen some retail drug stores in which the owner would, from the appearance of his shop, have been a success if he had taken the course at Tuskegee and learned how to use soap and water with effect. Fortunately these are rapidly growing smaller in number each year and will soon become extinct. One of the most enterprising drug journals of the country has for its motto, "Keep sweet." It is a good motto if a little effeminate. If we were to attempt a substitute we would offer as a rather more rugged one, "Keep clean."

"RED POTTAGE."

WE beg to submit as appropriate for the opening exercises of the next meeting of the National Association of Retail Druggists the reading of a chapter from an ancient volume not extensively perused by men in modern commercial pursuits. This book has some good stories in it and as a specimen of literary power it has not been and will not soon be surpassed.

The chapter to which we allude is a story of a certain young man, by chance the first born among his brethren, who came in one day from a long hunting expedition exceedingly hungry at the time when his younger brother had a meat stew with lentils and perfumed with garlic all ready for home consumption. The odor from that pot was more than the famished hunter could withstand, and he knew then and there that unless he secured immediately a satisfactory portion of the contents of the steaming pot he was a dead man. So he said of what use is a birthright to a dead man? I will barter mine for a good dinner. So away it went, and the sequel shows that he sought with great diligence an opportunity for a return of his surrendered inheritance but none was ever given him.

No matter whether this record be one of history or tradition the story points a moral that the delegates to the next annual convention of retail druggists should remember. At the Detroit meeting of 1900 a proposition on the pottage plan was temptingly displayed before the greedy eyes of some of the delegates and this proposition was to donate to the treasury of the N. A. R. D. one dollar from each ten dollar order received for a certain line of proprietary remedies.

Digitized by Google

The report of proceedings of that meeting does not show that any discussion followed a motion to accept said proposition. It simply shows that a prominent delegate from Western New York moved that the proposition be accepted and it was carried without debate. The net result of the acceptance of this offer to the treasury of the N. A. R. D. to Jan. 1st, 1901, was FOUR THOUSAND FIVE HUNDRED DOLLARS or more, and a banquet was given the officers of the N. A. R. D. early in January at Chicago in celebration of this auspicious event during which the money was handed over. We venture the statement that the menu at this banquet was something more than a meat pie flavored with garlic, since it was given by the proprietary company which had reaped such a glorious harvest through the advertising medium of the National Association.

Of course, what has been done cannot be helped by any amount of protest or criticism but we hope that a good many of our readers will be delegates to the next annual meeting of the National Association of Retail Druggists, and it is to these that we desire specially to speak. At the initial meeting of this delegated body of Retail Druggists in October, 1898, the indications pointed strongly in the direction of an organization independent of any other organization or class of tradesmen, that it was to be a dignified, self-sustaining, self-respecting body of men whose aim was to be of practical benefit to retail druggists and to these alone. The consensus of opinion at that meeting was that if any good was to come to the retail druggists of these United States it must come through a strong, independent, determined body of delegates which should be in a position to demand certain considerations from those who had been reaping a monetary harvest from the retailer without any consideration whatever for the just reward to which he was entitled. As long as this view of the mission of the N. A. R. D. is kept prominent, as long as the organization works along its own lines and keeps itself free from any alliances of any kind whatsoever, as long as it maintains its own individuality and pays its own expenses from the money contributed by the retail druggists of the country just that long will it be able to accomplish its purpose and no longer. If the retailers will not furnish the necessary funds to successfully prosecute the work in hand then the organization is doomed to failure. If they will not organize local bodies all over the states which will affiliate with the National body and contribute through these local organizations the needed money to carry out the original plans that fact may as well become known without delay and the responsibility for failure placed where it justly belongs.

Be it known to all persons that the MIDLAND is a staunch supporter of the N. A. R. D. Our space is at the command of the Executive Committee or the officers of the organization and our columns are open to a free discussion of any question which comes under the jurisdiction of that body. We would especially request frequent expressions of opinion from retail druggists upon the acts, duties, work or responsibilities of the N. A. R. D. But we want it also known that "we view with alarm" any disposition toward a surrender of any of the spirit of independence and self-reliance which was characteristic of this body at its first meeting in 1898 for a cash consideration or any other purpose than that with which its career was begun.

—W. R. O.

APPARENTLY JUST.

THE coroner's jury holds Tarrant & Co., of New York, responsible for the death of seven persons as the result of the explosion in their building some months ago. The following is the verdict:

"The said seven persons came to their death on October 28th, 1900, at 273 Greenwich street, by incineration caused at the time and place aforesaid as the result of an explosion and fire. We find that the said explosion was occasioned by the storage of combustible chemicals in excess of the quantities permitted by law, and we hold Tarrant & Co. criminally responsible for the deaths of the deceased."

Two of the members of the firm were held to await the action of the Grand Jury.

In this inquiry by the coroner the inspector of combustibles of the city of New York testified that the first explosion was probably the result of the ignition of dust particles and this induced the second and greater explosion among the chemicals stored in the building. He stated that even after the fire he found in the basement a large amount of alcoholic spirits, as well as turpentine, muriatic acid, etc. Representatives of different firms testified that enormous quantities of sulphur were stored

Digitized by Google

in the building, one firm alone having about 35,000 pounds there, while the limit allowed by law was 1,000 pounds in any one building. The representatives of these firms testified that they were assured that Tarrant & Co. had the proper permits to store such chemicals.

Basing an opinion solely upon the official inquiry, which is public property, we think the authorities should proceed with all diligence in the criminal prosecution of those guilty of such a crime as this in order that the lives and property of citizens of a great city shall have some assurance of safety and not be wholly at the mercy of the reckless and unscrupulous whose thought is for the securing of revenue regardless of the well-being of their fellow-citizens. The finding of the coroner's jury paves the way for civil suits for damages from the loss of property and life, which will, no doubt be begun and vigorously prosecuted.

—W. R. O.

NO RELIEF FROM STAMP TAX.

THE present indications are that Congress will not remove the stamp tax from patent medicines and other articles sold by druggists. The House passed a bill before the holiday recess practically abolishing Schedule B, but the Senate Finance Committee has just reported to that body a bill which only makes a reduction of 50 per cent. in the tax on patent medicines. Meantime the reckless and extravagant appropriations which the present Congress is about to make has alarmed the Treasury officials, and the Secretary of the Treasury has bluntly told the Finance Committees that one of three things confronts them: either less waste of the public money, a deficit instead of a surplus in the revenues of the Government or no reduction whatever in the war revenue taxes.

Apparently the greatest menace to the permanent welfare of this country is its great prosperity. This leads to useless expenditure of the money collected from the people by the officers to whose charge an abundance of public money is committed, and who should disburse it with fidelity to the welfare of the common people. A breach of trust in this matter leaves an unjust burden of taxes upon the toilers of the land, and the merry dance goes on. Some sweet day the "plain people" will not have it so. The proposed Senate bill, so far as it concerns druggists, is worse than the law as it now stands. It will result in no reduction whatever in the price they have to pay the manufacturer, and the Government will be deprived of that much revenue. The representatives of the drug trade, both wholesale and retail, have made a noble fight for the repeal of this unpopular tax, and deserve all praise for their heroic service. The final result is awaited with great interest, but the outlook is discouraging.

—W. R. O.

TO OUR READERS.

YOU can do THE MIDLAND a great service at this time by recommending it to your fellow-druggists. It would not be fair to lay upon you the burden of helping to circulate an unworthy publication, but we wish to say here that the many commendations which we constantly receive confirm us in the opinion that we are putting out a high-toned drug journal and seeking to make it of profit to every person who reads it. While commendatory letters are very encouraging, we have hitherto refrained from publishing them. We believe that they have performed their well intended mission when we have been stimulated by them to greater endeavor in making this a magazine whieh which will delight and profit our subscribers.

When you pay your money for a subscription you become a part of the journal.

It is to your interest to help extend its circulation; it is to your interest to communicate to us any item of news or any result of your own research, or any difficulty which you have been unable to overcome in your profession. We can not guarantee always to help you, for the sum total of human knowledge is not great, and the amount possessed by any two or three individuals is indeed minute, but we will promise to spare no effort to furnish such information as you desire, and for the rest we will frankly say we do not know.

Every retail druggist should take at least one drug journal and read it. THE MIDLAND has a wide field surrounding it, and we are ambitious to place a copy of our publication in the hands of every druggist in the territory which in a sense we regard as our own. WILL YOU HELP US?

—W. R. O.

Truth is eternal, but Time changes it from day to day so that its own mother wouldn't know it.

Laxative Bromo Quinine

**Is a Valid Trade Mark,
And Must Not Be Imitated.**

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana. from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞ NOTICE!—Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need not now be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "**NAVICULINE**" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "**NAVICULINE,**" Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

EDITORIAL NOTES.

THE medical profession is running as much towards fads as swell society people are doing in the social world. The latest is the "salt solution," by means of which, when injected into the venous system, the dead are revived and the incurable are cured of their maladies. It is a saving idea all around and is creating a sensation in the newspapers at least. Of course it will go the way of all previous fads, for there has not been nor will there be found a method by which man's days on earth will be indefinitely prolonged, nor one by which the hand of disease will be generally stayed. The Christian Scientists alone have a monopoly on this sort of business, and they are working it to fine advantage so far as profit is concerned. That reminds us that we saw a curious itemized account of a Christian Science healer recently, who had rendered an account for almost two hundred dollars for medical treatment. There was a specified number of "present" treatments at so much per, and a larger number of "absent" treatments at a smaller price by about twenty-five cents. The patient died, of course, and the account was rendered to the administrator of the estate. We would like very much the "absent" plan of treatment if in that business. One could awake at night and if he felt the necessity of making a few dollars he could give a few treatments of this variety to his patients, turn over and go to sleep with the sense of a beneficent act performed and his treasury richer by a goodly sum. "Absent" treatments are fine!

* * *

A DISTRESSING accident is reported from the Columbus State Hospital (for insane patients), resulting in the death of a young man, an inmate of that institution. Two kinds of medicine were in the patient's room, one of them being a liniment, poisonous as most of them are, and the other a mixture for internal administration. The attendant gave the patient a dose from the bottle of liniment, and although the blunder was speedily detected, all efforts to counteract the effects of the dose failed, and the man died within a few hours.

No censure can be reasonably laid upon the management of the hospital, and the accident is simply one of those unfortunate errors which men are prone to commit. It is, however, an open question whether an element of carelessness did not enter into the matter. It appears that the light was not good in the patient's room, the time when the dose was given being early in the evening, and the attendant should have been sure that he had the right bottle before he gave the dose, no matter what trouble he had to take to satisfy himself on that point. A pharmacist should never take any article from its container until he is sure he has the bottle containing the article he desires, and no one should give or take a dose of any article or preparation until he knows beyond peradventure that he has the proper one. With the amount of reckless handling of drugs by persons in general the surprise is, not that such mistakes occur, but that there are not ten where one is reported.

* * *

WE are repeatedly requested to furnish a list of States wherein Ohio certificates of registration are recognized in lieu of an examination. It is not possible to do this for the reason that there is no settled arrangement by which a general interchange of certificates of registration may be effected. The Ohio pharmacy law permits the Board of Pharmacy to register persons without examination when such persons are registered by examination as pharmacists in other States, but the restrictions by which the Board of Pharmacy is held are such as to limit narrowly the number of persons who may be registered from other States. An applicant must be at least 21 years of age; he must have at least four years' experience in the practice of pharmacy; he must be registered in a State where the standard for examination is at least as high as that of Ohio; such State must recognize the holders of Ohio certificates on an equal basis.

For instance, the Michigan Board of Pharmacy will register a pharmacist who has passed an examination in Ohio, provided he shows a grade of not less than eighty per cent. on general average, consequently the Ohio Board must require an applicant from Michigan to show at least eighty per cent. before it can register him without examination on his Michigan certificate. Again, the matter of interchange rests entirely with some of the Boards, and as the personnel of these Boards change from year to year, there is no certainty when a change will take place in refusing the courtesy of exchange after it has once been done. To all

Digitized by Google

inquiries of this kind we can only say that each individual case has to be decided upon its merits after all the facts are known, and we can not say with any certainty what State or States will recognize Ohio certificates.

* * *

IN a recent examinatlon by one of the Boards of Pharmacy there were twenty questions given on the subject of pharmacy, and the examiner in that branch had a new experience in about fourteen years of service as a member of the Board. He found one applicant who gave answers to each of the twenty questions and not one answer was approximately correct, and this applicant claimed to be a graduate from a school of pharmacy.

The applicant's paper was reviewed a number of times before the examiner could convince himself fully that any person could write answers to twenty questions and fail to tally at least one as his grade, but no amount of lenient construction could be made to work in his favor. We are permitted to quote one question and give the reply simply to show the general trend of the paper submitted. "Q. Should tinctures be prepared from fluid extracts? Give at least three reasons for your answer. Ans. I have found just as good results in making them that way. They are quicker made; less work; no graduates, mortars or funnels to clean."

There is little doubt but this person was greatly surprised that he failed to pass, and yet there is small hope that a pharmacist can ever be made from that sort of material.

* * *

A SEQUEL to the accidental poisoning of a child in Cleveland, which was editorially considered in THE MIDLAND for November, 1900, is the arrest of the drug clerk who dispensed the aconite tincture on the charge of failing to label the bottle poison. The defense is that the poison label law does not require that physician's prescriptions containing poisons should bear a poison label.

The Court withheld a decision, and has announced that it will be rendered on February 13th, which is too late for this issue. The decision will be awaited with keen interest by all Ohio pharmacists. If the Court holds that the clerk should have labeled the bottle poison an appeal should be taken, even if it requires the co-operation of all the pharmacists of the State to test a question so important to druggists in the Supreme Court. The universal custom is not to label a prescription of a physician poison unless he so directs, and there is good cause for such custom. A majority of physicians' prescriptions are poisonous when improperly administered, and a label on every one compounded indicating a preparation of a poisonous character would not be tolerated by physicians, nor would it be well for the patients who take the remedies. There would be no end of alarm and distress, misunderstandings and explanations required by such procedure, and it is hoped that the Courts may see the question from the professional standpoints of both the pharmacist and the physician. Should the Courts hold that prescriptions must be labeled poison, then the obsolete poison laws of the State of Ohio should be amended at the next session of the Legislature. The laws relating to poisons in this State have never been of such a nature as to be understood either by the Courts, people or professional gentlemen, and they should have been re-cast many years ago.

The richest belt of sulphur in the world it is stated, has been found in Trans-Caspia, Russia, 100 miles from Khiva. The ore is sandstone and contains 60 per cent. of sulphur. It is estimated that the mound contains 9,000,000 tons of sulphur.

ADA, OHIO, January 30th, 1901.

Editor Midland Druggist:

Having had a number of applications for forms of by-laws to use in the organization of local and county Associations, and knowing the splendid success of the Allen County Association, I have obtained from their Secretary a copy of their by-laws to use, and through the MIDLAND hope to give the same the widest possible distribution among the druggists of Ohio.

My personal acquaintance with many of the members of the Allen County Association and the many expressions of approval I have personally received from them as to the success of the Association in controlling and maintaining prices, in regulating and handling of prescriptions, the good feeling existing among the members, and the general "get together" disposition manifest, convinces me that their plan is to be commended, and when their condition is compared with the conditions existing in many other cities and counties, serves to impress the fact that others have too long delayed in organizing locally.

With the view of assisting in effecting this work the by-laws of the Allen County Association are presented to the druggists in localities where there is no local organization with the recommendation that they serve as the nucleus for immediate work in this direction.

From the local organization it is only a step to the State Association and every druggist owes allegiance to that body. Every protection now enjoyed by the druggists of Ohio is the outgrowth of the state organization; many proposed laws which would have affected the condition of every druggist in the State have been effectually modified or passage prevented by the efforts of those who compose the State Association; Statutes are now in force in Ohio which should demand our attention during the next session of the State legislature and every druggist should give his support through the State organization to this work.

The next annual meeting will be held in Dayton, a city of central location and a railroad center, offering every possible advantage for those who can arrange to attend; special railroad rates will be given.

Perfect your local organization NOW and arrange to take a short outing together, attending the next meeting of the Ohio State Pharmaceutical Association.

Fraternally yours,

BRIG S. YOUNG,

Pres. O. S. P. A.

* * *

THE ——— COUNTY RETAIL DRUGGISTS' ASSOCIATION.

CONSTITUTION.

OBJECT.

1. The creation and promotion of social feeling.
2. The protection of our interests, mercantile and scientific.
3. The dissemination of Pharmaceutical information.
4. The prevention of adulteration of medicines and foods.

ARTICLE I.

This society shall be known as THE ——— COUNTY RETAIL DRUGGISTS' ASSOCIATION.

ARTICLE II.—QUALIFICATION FOR MEMBERSHIP AND FEES.

SECTION 1. All druggists of good moral and professional standing, who are proprietors or managers of retail drug stores, may become members. Each firm shall be considered as individuals and shall be entitled to send a proxy if necessary.

SEC. 2. Application for membership must be made in writing, accompanied by an initiation fee of $2.00, and, on receiving a favorable vote of two-thirds of those present, the applicant will become a member, after signing the Constitution.

SEC. 3. Each member shall pay an annual fee of $1.00.

ARTICLE III.—OFFICERS AND THEIR DUTIES.

SECTION 1. The officers shall be a President, a Vice-President, a Secretary, a Treasurer and an Executive Committee consisting of three members.

SEC. 2. These officers shall be elected annually by ballot, at the regular annual meeting, a simple majority of those present being necessary to choose.

SEC. 3. The President shall preside at all meetings. He shall call special meetings upon request of three members. He shall sign all orders on the Treasurer.

SEC. 4. The Vice-President shall assist the President, and preside in his absence.

SEC. 5. The Secretary shall keep a record of the meetings, do the corresponding for the Association, and keep on file and preserve all correspondence, and notify members of each meeting.

SEC. 6. The Treasurer shall receive all funds and disburse them under the direction of the President. He shall keep a correct account of the funds, and the financial standing of the members, and notify them of their indebtedness. He shall make a full report of his accounts at the annual meeting.

SEC. 7. All bills shall be paid by the Treasurer when approved at a regular meeting of the Association and signed by the President.

SEC. 8. The Executive Committee shall hear all complaints of violation of the rules and agreements of the Association, and adjust them if possible.

Digitized by Google

SEC. 9. Committees not provided for by the Constitution shall be appointed by the presiding officer, when deemed necessary.

SEC. 10. All officers shall serve until their successors are elected and installed.

ARTICLE IV.—MEETINGS.

The Association shall meet on the third Wednesday of January, April, July and October, at such time as appointed by the Secretary. The annual meeting shall be held on the third Wednesday in July, of which the Secretary shall notify each member.

ARTICLE V.

Any member losing his membership by delinquency of dues, or conduct, shall also lose all claim on the funds of the Association.

ARTICLE VI.—QUORUM.

Eight members shall constitute a quorum, which quorum shall represent not less tham three towns in the county.

ARTICLE VII.

Cushing's Manual shall be the parliamentary guide.

ARTICLE VIII.

If any changes or revision of the Constitution are deemed necessary, the request is to be made in writing, and the President shall call a special meeting, stating the cause, so that every point may be carefully weighed and debated.

ARTICLE IX.

Relates to Order of Business.

AGREEMENT.

We, the undersigned druggists of ——— County, Ohio, hereby agree and bind ourselves to adhere, in good faith, to the scale of prices on Proprietary Medicines and Pharmaceutical Preparations advertised by the proprietors, and on Prescriptions as agreed upon by The ——— County Retail Druggists Association.

We further agree and bind ourselves not to enter into or encourage any contract or scheme which will constitute or imply any rebate on the price of goods sold, whether a direct rebate in cash or an indirect rebate in the form of premiums on the purchase of a stated amount of goods. We agree, and bind ourselves, not to buy from or sell to any house or firm, local or foreign jobbers or manufacturers, which after having been notified, sells Proprietary Medicines or Phrrmaceutical Preparations to any Druggist or Pharmacist who sells such preparations or medicines at less thaa the price list of the ——— County Retail Druggists Association.

We also agree. and bind ourselves, not to buy any goods of any house or firm, local or foreign, jobbers or manufacturers of Drugs, Medicines, Proprietary Medicines or Pharmaceutical Preparations, (Druggists' Sundries excepted,) which sells to any Dry Goods dealer, or any other *Retailer*, not a Druggist or Pharmacist, in the County of ———, Ohio, except in such localities where there are no drug stores, and then only on the condition that they do not undersell the prices adopted by this Association.

It is further agreed that in case any of the signers knowingly violates the adopted scale of prices, either directly or indirectly, such person or firm shall upon conviction, forfeit the sum of $10.00, one-half of which shall be paid to the informant and one-half to the ——— County Retail Druggists Association.

This agreement shall take effect on and after being signed.

Can Life be Restored in Cases of Death From Suffocation.

In a paper by Dr. Prus are detailed some experimental reselts of Dr. Prus on attempting to restore dogs partially killed. As soon as possible after the death of the animals by suffocation, some of the rib cartilages in front of the heart were removed and the heart exposed. Artificial respiration was started. The heart was then grasped in the right hand, compressions being made to imitate, as much as possible, the systolic and diastolic phases of the heart action. In thirty-one cases, or seventy per cent., life was restored. In chloroformed dogs under the same general conditions seventy-six per cent. and in dogs shocked by the electric current fourteen per cent. were brought to life again. An attempt to try the massaging of the heart was made on the body of an alcoholic who had committed suicide by hanging, but resulted fruitlessly.

—*Treatment.*

Somehow the author of his hero story never sees the wart on the nose of his hero or the freckles on the face of his heroine.

You Make Money
SELLING
BAR-BEN
By accepting our Special Offer.

With an order for three dozen "Bar-Ben" at $4.00, we will give you one dozen free, and mail you signs and window display. This enables you to double your money, without carrying a large stock, and every box you sell makes a customer for more. Order from your jobber at once or direct, but be sure and specify the wholesale druggist through which you want goods shipped. "Bar-Ben" is the best nerve, brain and blood builder on the market today.

Sell your customers a box and see if they do not tell you so.

The Bar-Ben Remedies Co.,
CLEVELAND, OHIO.

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid to anonymous communications, although the name of the sender of such news will not be published.]

—

Among recent callers at the office of the MIDLAND we mention:

Mr. Baird, Pataskala, Ohio.

A. E. Benedict, Utica, Ohio.

M. L. Dumble, Marion, Ohio.

Mr. Scribner, Mt. Vernon, Ohio.

W. G. Holloway, Springfield, Ohio.

Dr. Charles Stewart, Ashville, Ohio.

Lyman Gardner, Worthington, Ohio.

A. S. Lehman, Canal Winchester, Ohio.

———

Joseph Schindler, druggist, Toledo, Ohio, is dead.

The drug firm of West & Phillips, Toledo, has been dissolved.

The firm of Kinnaman & Yerk, Tiffin, Ohio, has dissolved.

A. M. Thomas, of Wapakoneta, Ohio, has made an assignment.

F. W. Conrad, Toledo, Ohio, has been succeeded by Gust. Hein.

Dr. Stacey succeeded the firm of Stacey & Adams, Highland, Ohio.

A. C. Swimley, Forest, Ohio, has sold his drug store to J. E. Gasson.

Herman H. Koehnken, druggist, Cincinnati, has made an assignment.

The drug store of Fred. L. Hoch, Syracuse, Ind., has been burnt out.

A. H. Dean, of Waverly, Ohio, was a recent visitor in Chillicothe, Ohio.

J. W. Slater, of Ironton, has been on the sick list for two weeks or more.

H. P. Berry & Co. succeed to the business of W. F. Volk, Westerville, Ohio.

Uncle Doc. Downar, Cambridge, Ohio, is convalescent after a severe illness.

The drug firm of C. R. McCullough & Co., Fremont, Ohio, has been dissolved.

George H. Chapman, Zanesville, Ohio, is slowly recovering from a severe illness.

Mr. Sol. Cline, of Cline & Son, still continues very ill at his home at Albany, Ohio.

O. H. Finnical, Cadiz, Ohio, is able to be in his store after an illness of several days.

T. F. Rogers has moved his drug store from Greenville, Ohio, to New Madison, Ohio.

Mrs. D. M. Hawthorne, Cambridge, Ohio, has gone to Florida for the remainder of the winter.

Brooke Sutton, with J. W. Shoff, Cambridge, Ohio, is back to the store after a severe attack of grip.

J. C. Cope, Steubenville, Ohio, has bought the interest of his partner and is now sole owner of the business.

John Seigrist, of Seigrist & Williams, Coshocton, Ohio, has been quite ill for several weeks with the grip.

H. M. Danly, of Danly & Co., Racine, spent a few days with friends at Cheshire, Ohio, the first of tho month.

The drug store owned by the estate of Mrs. Buckland, Fremont, Ohio, has been purchased by Smith & Cochran.

The firm of Hoberman & Sharpless, of Marion, Ohio, has been dissolved, Mr. Hoberman succeeding to the business.

Harry Christopher, a leading druggist of Greenfield, Ohio, is all smiles and "happy as a big sunflower." It's a boy. Have a cigar?

Mr. L. Steinfeld, of Columbus, Ohio, is taking a few weeks' vacation and enjoying a much needed rest at Cleveland and eastern cities.

D. L. Aldrich, Jerry City, Ohio, has lost his drug store by fire. The loss is estimated at $2,000 and is said to be covered by insurance.

Will Wendt, manager for F. J. Heer, was in Cleveland a few days this month, to see how the drug business in th at city is conducted.

J. G. Bell, with Gooderl & Co., at Washington C. H., is rejoicing over the arrival of a girl baby at his home about the 1st of February.

L. E. Eyman, Lancaster, Ohio, has just returned from a short visit with his brother, at Massillon, feeling much improved by the short rest.

Rumor has it that A. T. Barton, lately retired from active business at Pomeroy, Ohio, will go on the road in the pharmaceutical line.

Digitized by Google

Mrs. R. J. Case, wife of Dr. F. L. Case, of Twenty-second street, is lying very ill at the Protestant Hospital, this city.

E. J. Mathews has purchased a half interest with R. B. Roe, at Elyria. Store will be conducted under the firm name of Roe & Mathews.

Mrs. R. J. Hooker is quite ill at her home, at Roscoe, Ohio. Mrs. Hooker has been identified with the drug business at Roscoe since '64.

Mr. W. H. Cary, for a iong time with Tschannen Bros., Upper Sandusky, Ohio, has accepted a position with F. M. Gallagher & Co., at Racine, Ohio.

Thos. Eubanks has moved his drug store from New Madison, Ohio, to Greenville, Ohio. It looks like he had exchanged places with T. F. Rogers.

Mr. L. E. Bowman, of Bowman Bros., Canton, Ohio, is doing relief work for Seigrist & Williams, at Coshocton, during the illness of Mr. John Seigrist.

The friends of Orlando Miller, of the firm of Miller & Son, Newark, Ohio, are congratulating him upon his recovery from a severe attack of la grippe.

George A. Beers, of George A. Beers & Co., Newcomerstown, Ohio, made a trip to New Philadelphia the first of the month, making his report of delinquent taxes for his district.

Mr. Cecil Fouts, son of A. L. Fouts, West Lafayette, Ohio, at present taking the classical at Ohio Wesleyan University, will spend the short Spring vacation at his home, at West Lafayette.

B. M. East, who has been managing the East Side Pharmacy, Newark, Ohio, for some time past, has purchased an interest in the same. The MIDLAND wishes the new firm all kinds of success.

Mr. Butte, of Covington, Ohio, has accepted a position with the Wood drug store at Mt. Sterling, Ohio, while Mr. Naddy, the former clerk, has gone with the City Hall Drug Store, in Columbus, Ohio.

Mr. Jess Moody, of Lancaster, Ohio, has just closed a deal for the purchase of a fine new soda fountain, and promises to give some of the older druggists there a hustle for the soda trade this summer.

The Pittsburg factory of Armstrong Cork Co. was destroyed by fire February 9th. This is considered the largest cork factory in the United States. The firm was ready for business two or three days after the fire.

Dr. A. A. Peasley has purchased the drug store at the corner of Spruce and Park streets, Columbus, Ohio, from F. L. Case & Co. The Doctor is quite popular in that neighborhood and the MIDLAND predicts a bright future for him.

O. N. Garrett and wife, of Hillsboro, Ohio, have just recently recovered from an attack of grip and they claim it was given them by a certain drug visitor, who came there afflicted the same way. Other druggists had better look out.

Frank Amann, of Portsmouth, spent several days in Columbus and made the MIDLAND a pleasant call. It is hinted that Frank is looking up his chances of appointment to the Pharmacy Board, to which position he has been recommended by the State Association.

Mr. J. M. Coram has purchased the C. M. Innis Pharmacy at Oak and Eighteenth streets, Columbus. Mr. Coram was formerly with the Col. Pharm. Co., and has a host of friends in this city. The MIDLAND wishes him all kinds of success in his new location.

The business of the Phenic Oil Company, owned by Carey B. Paul, recently deceased, has been acquired by a stock company bearing the same name. It is stated that the business will be vigorously pushed and the well known Phenic remedies made more popular than ever.

The monthly meeting of the Columbus section of the American Chemical Society was held on the evening of February 6th. The paper of the evening was by Dr. C. C. Howard, who gave the results of some interesting experiments in the separation of acetanilid and caffein.

Mr. Remmick Hughey, of Frankfort, Ohio, was a recent visitor at Oxford, Ohio. Some say there is a feminine attraction there that makes him very uneasy for about a week before he goes, and after he gets started the train seems to run very slowly. Maybe he will explain.

They say there is always room at the top, and with that idea in mind the enterprising firm of Ort & Klostermeyer, of Charleston, W. Va., is putting on the market a line of patent medicines that they claim will win a place with the best. They are rapidly getting things in shape and hope before long that all surronnding druggists will be having calls for some of Williams' famous remedies. We wish them great success in their new enterprise.

Digitized by Google

Gaddis Henry, son of W. A. Henry, of Greenfield, Ohio, one of the best known druggists in Southern Ohio, has gone to Cincinnati, where he accepted a position with his uncle in the wholesale lumber business. Our best wishes go with Gaddy.

Mr. Frank Kienzle has sold his drug store at the corner of Twenty-second and Long streets and retires from the drug business after long years of faithful service in that line. Mr. Kienzle is one of the oldest druggists (not in age, but service) in this city. R. J. Case purchased the store.

J. J. Weimer, the druggist of Stoutsville, Ohio, recently had quite a serious burn from phosphorus. He was attempting to put a piece into another bottle and the stuff took fire, burning his hand severely, also the face and clothes of a bystander. He says the next time he will handle it under water only.

Mr. Ben Fields, proprietor of Fields' Pharmacy, Charleston, W. Va., has decided to improve the appearance of his store and has torn out all the old show cases and substituted a lot of beautiful plate-glass, oak cases of new design and style. He expects at some time to have a store to be proud of indeed.

The dread disease smallpox it seems is no respector of persons, for recently it attacked a druggist. Mr. H. C. Hubbell, of Spring Valley, Ohio, has been down with it, but at last report he was doing nicely. The board of health of the town immediately quarantined every one exposed, but no new cases have been reported.

Spurgeon & Leighton are about to open a new drug store at Sabina, Ohio. Mr. Spurgeon has been clerk for J. C. Burnett, of that town, for the past ten years and is therefore well acquainted with the trade. Both gentlemen favored the MIDLAND with a call while in the city looking up stock. We wish them success in their venture.

A. W. Seebohm, the veteran pharmacist of Pomeroy, a familiar figure to the populace of Meigs county, is still very much in evidence about his store on the corner. Seebohm's store is a mecca for river men, all the captains being personally known to the Doctor, and when the tow-boats pass Pomeroy the crews are all on the alert for Seebohm's megaphone, through which they seldom fail to get some kind of message, either as to gauge of river, news from home or simply a pleasant greeting and "bon voyage."

Dr. Geo. W. W. Walker, of Roseville, Ohio, has gone to Texas, where he is the owner of a tract of 240 acres of land in the oil belt. Dr. Walker has been offered a handsome sum for his holdings and his errand to the "Lone Star" is to dispose of his property at the best possible figure. We congratulate the Doctor on having the right end of it.

Miss Lucy Harvey, O. S. U., 1900, has purchased the Court street pharmacy, at Pomeroy, Ohio, established by A. T. Barton. Miss Lucy is a finished pharmacist and deservedly popular among her many friends in Pomeroy and Meigs county. The MIDLAND bespeaks for her a generous share of the trade. The store will be known as Lucy M. Harvey's Court Street Pharmacy.

By request we publish again the names of those recommended at the last meeting of the State Association to the Governor of Ohio from which he is requested to appoint one to the vacancy on the Ohio Board of Pharmacy for the term beginning March 31st, 1901: W. H. Miller, New Philadelphia; C. W. Tobey, Troy; J. H. Von Stein, Upper Sandusky; W. H. Styer, Marietta; Frank Amann, Portsmouth.

LOOK OUT FOR HIM.—We are advised by Lloyd Brothers, of Cincinnati, that a party giving his name as George Reynolds has victimized several druggists of the State by borrowing small sums of money under the representation that he is connected with the popular Cincinnati house and is in immediate need of a few dollars. Lloyd Brothers state that the party is a rank swindler, and we caution the trade to be on their guard.

F. H. Dunn, of Bainbridge, Ohio, another victim of the terrible la grippe, has just returned from Cincinnati, where he has been in Dr. Holmes' hospital for some weeks back suffering from ear trouble. Mr. Dunn is satisfied that the grip settled in his ear and would have caused him no end of trouble if he had not had it operated on at once. We hope to see him as well as ever soon.

The infant daughter of Alden Moon, of Moon & Lash, Blanchester, Ohio, has been very low with lung fever, but we trust by this time is on the highroad to recovery. This has kept Mr. Moon away from business and thrown it all on his partner, Mr. Lash, and now he has the grip, and was forced to go home, so things were in a very troubled state around the Moon & Lash pharmacy. We trust all will come around safely again.

Color Changes in Medicines.

THIS paper refers to liquid plant preparations and to prescriptions made therefrom. The subject concerns both the pharmacist and the physician, and appears at frequent intervals, to confound both. Whoever makes a plant preparation, whoever prescribes one, must expect now and then to be told by the consumer that "the medicine is different from the last." Since we must all meet this question, or rather this assertion, let us see how we do so in fairness to the aggrieved person and in justness to ourselves.

Upon inquiry you will find that the person who makes the complaint, as a rule, has been careful and truthful. He has placed the full bottle of new medicine beside that which is left in the old one, and compared them. They are not of the same color; they may differ in consistence or in the amount of sediment. Any of these differences leads to suspicion, and to complaint.

I contend that such complaints are proper. If there be a doubt concerning the remedy, that remedy will not give satisfaction. Dissatisfaction with the remedy leads next to distrust of the physician or of the pharmacist. Then a change is made. Better by far that a question be asked, an investigation made, and a fair answer returned, than to have the germ of suspicion grow into settled distrust. Speaking for myself, I will say that no greater pleasure do I find than in answering such letters of inquiry. My correspondence is voluminous; hundreds of letters on pharmaceutical and technical subjects come to my desk each week, and yet to each questioner, who seeks for information, I send a reply that gives me pleasure in the writing, and I hope carries to the recipient as great a pleasure. Some of these letters refer to a difference in color between the last of the preceding bottle of medicine and the succeeding full one.

As a rule, it will be found that the complaint is just, for often there is a difference. The liquid in the bottle from which the physician uses day after day, may gradually alter in color, in consistence, in the amount of sediment. The change is imperceptible, but yet when the last fraction is reached, it has, in the aggregate, been a marked one. Then the unopened bottle is placed beside the portion left, and the change noticed. Next follows the letter of inquiry. Be it said to the credit of the medical profession, never yet have I known a questioner to be other than gentlemanly. Never have I known an answer to be taken in an unfair spirit. The question is asked, the answer is given, the subject is closed, if the parties understand each other. I take it the same rule holds good, when patients complain to physicians about the prescriptions. It is a common thing for complaints of this kind to come before prescription pharmacists.

But, in some cases, there is just ground for the assertion that a remedy is not, and was not, the same color. It is well known now that most coloring principles in plants are of no therapeutical value. Consequently, a shade difference in the color of a plant preparation is not considered a vital point, providing the valuable constituents are not altered. Sometimes it is necessary to make one batch of a preparation a shade darker, or lighter, than a preceding batch in order to maintain a certain standard of excellence. In such cases the physician may actually get two bottles, full bottles, from different batches, but of varying intensity of color. This sometimes occurs, and gives rise to a question which demands a fair explanation, and a fair explanation is all that any intelligent man asks.

Again, there are instances in which alterations in color occur from keeping medicines in full bottles. Even if securely sealed such color changes occasionally occur. All chlorophyl bearing plants yield green products. Some of these gradually change to brown, or yellowish brown, or yellowish red. The new batch of such preparations is green, but it is likely to undergo the alteration as did the preceding one. Thus, for example, when a physician keeps a bottle of pulsatilla over a season, he may find the next bottle very much greener in color. But this fact is too well known to require further attention.

As a rule it will be found that any complaint that may arise concerning the color of a plant preparation will find its answer in one of the foregoing sections.

J. U. Lloyd, in Medical Gleaner.

The Art Preservative—As a Side Line.

A HISTORY of the success attained by a man in a certain line of business oftentimes serves to generate enthusiasm in the mind of those contemplating engaging in the same line. For this reason I purpose to give this short resume or history of photographic goods as a side line worked up to an actual paying basis by a few wide awake druggists. The biggest success is that of one of the leading druggists in a Massachusetts manufacturing city of 50,000 population. Eight years ago this druggist carried barely $200 worth of photographic goods regularly in stock. Some object lesson occurred which revealed to this druggist the possibilities of this class of goods as a side line and he determined to give this department a little more time and attention. Contrary to the usual method this druggist did no advertising, but arranged the goods attractively and prominently in his store, exerting special effort to procure everything he had a call for. In this way, and in a short time he had increased his stock so that it assumed quite decent proportions and yet it was healthy and enabled him to turn over his money at the rate of three or four times a year. The great secret of this man's success was that he kept in stock everything that he had demand for. It did not take long for this fact to get out among the amateur photographers of the city. A year ago this man moved into an elegant new store. He increased the stock of photographic goods materially adding a full and complete line of cameras of all prices where before he only carried a few of the more popular sellers. This photographic stock was given a prominent position in the new store and in less than three months after the opening it required three experienced men to handle the photographic department. This is an exceptional case, I'll admit, but I believe that it is quite an object lesson to the thinking druggists. Every druggist can achieve as big a success commensurate with the volume of trade or business he has to draw from.

Another instance I have in mind is that of one or two druguists in a town of 3,500 inhabitants—a representative New England town of the more conservative type. Before this druggist put in photographic goods there was no depot for such goods in the town. As a matter of fact only a few had cameras and therefore the demand for such goods was comparatively limited and the demand was either filled from a limited stock in the adjoining town, or from the larger stocks in the neighboring city twenty miles away. This druggist stocked very lightly and cautiously at first, getting one person after another interested in the art. So long as there was means handy to furnish the supplies, etc., those who had owned cameras, used them now, much more than they had before, and then the demand for supplies, etc., made by the new devotees built the nucleus for a fine, clean business. After all, these instances mean nothing unless the druggist who wants to add photographic goods as a side line is willing to devote some time and attention to telling his customers about the goods. The matter of making a success of any side line resolves itself into that fundamental principle which is the basis of all successful business—strong personality, the kind that attracts people and interests them and makes them visit your store in preference to your competitors'.

Here is a good thing to know, especially for the amateur as necessarily he is without the burnisher of the professional photographer which prevents all curving or blistering.

To overcome the difficulties in mounting photographic prints and to prevent them from curving when dry a paste must be used containing as little water as possible, as this is due to the contraction of the print after having been distended by the water. The following formula is recommended: Common gelatin, 2 parts; water, 4 parts; alcohol, 8 parts. The alcohol is added slowly as soon as the gelatin is well dissolved in the water, and the vessel turned continually to obtain a homogeneous mixture. The solution must be kept hot during the operation, and should be applied quickly, as it soon dries; the print must be placed exactly the first time, as it adheres at once. The solution keeps for a long time in well-corked bottles; when used it is heated on a water bath.

Experiment with the following formulæ with a view to getting a satisfactory flash-light powder. Exercise proper caution as, like all easily combustible mixtures, it is explosive if incautiously exposed to flame. I know of a case where a druggist worked up quite a local business on a flash-light powder made after one of the formulæ given below:

Digitized by Google

Magnesium	3 parts
Potash, chlorate	6 "
Antimony, sulphide	1 "

Use from 75 to 150 grains of the mixture at a time.

Potassium, chlorate	25 parts
Potassium, ferrocyanide	3 "
Sugar, powdered	2 "
Aluminum, powdered	10 "
Potassium, chlorate	25 parts
Potassium, nitrate	5 "
Antimony, sulphide	4 "
Aluminum, powdered	10 "
Barium, peroxide	1 "
Potassium, chlorate	2 "
Magnesium, powdered	2 "

By Harry M. Graves, in The Spatula.

WHAT ARE WE COMING TO?

The press dispatches of February 7, contain the following:

"CRAZY ZIONITES

TRY TO CARRIENATION A NUMBER OF CHICAGO DRUG STORES

CHICAGO, Feb. 7.—Crying out that drugs were the agents of the devil, a half dozen women followers of Dowie adopted the tactics of Mrs. Carrie Nation yesterday and wrecked a number of drug stores on the West Side. In some instances there were hand-to-hand fights with the druggists. Armed as they were with pitchforks, umbrellas and canes, the women came out the victors in nearly every encounter, and succeeded in destroying property wherever they went. Drug stores visited by the crusaders and the damaged were Charles G. Foucek, Sixteenth street and Centre avenue. Three rows of bottles containing drugs knocked from the shelves and destroyed, damage $50. The women were chased from the drug store by a clerk with a bucket of water.

B. Lowenthal, Twelfth and Robey streets, drugs knocked from the shelves, damage $25; crusaders forced from the drug store at the point of a revolver in the hands of the proprietor. Leo L. Mrazek, Ashland avenue and Eighteenth street, several bottles broken, damage nominal.

Herman Liberman, 515 Halsted street, women driven out after a small damage had been done.

O. Shapire, Twelfth and Jefferson streets, one bottle and an electric light globe broken. The women were mostly middle-aged and well dressed. Four of them wore long automobile coats, under which they carried their implements of destruction while in the street. One woman was dressed in a flaming red golf coat and another wore a long seal skin jacket. On leaving a drug store they invariably sang "Praised be the Lord" or "Zion Forever."

Policemen saw them in the street but attached no significance to their actions and no arrests were made."

There is both a comical and a serious side to the conditions here described. If our stores are liable to visitations of this sort we should be on our guard and prepared to use means for self-protection. We suggest a few syringe fulls of strong ammonia squirted about promiscously as an effective means of putting an end to such an attack.

The serious consideration is the state of the public mind as bearing on the drug store.

Is it true that the public is coming to consider the druggist as in the same class with the keeper of the saloon? If true, do we deserve it? If we do not deserve it, what can be done to correct the trend of public opinion? These are the questions which the recent disturbances raise and which should receive careful thought.

To be sure conditions out in Kansas are *peculiar*, but it is not so in Chicago, and in the latter place the venom of the extremite seems to go out against the drug store rather than the saloon.

We invite comment on this matter.

ON THE OLD RELIABLE

FLECK'S EASTER EGG DYES

COMBINATION PACKAGES | **42 FIVE CENT PACKAGES FOR ONE DOLLAR** | **PAPER DYES**

Outfit No. 1

Contains 42 5-cent packages. Each 5-cent package contains six plain colors and six sheets Paper Dyes, that will make Plain Colors, Pictures, Patriotic Designs, Fowls, Rabbits, Brownies, Marbled, Calico, and other effects, by following simple directions on the package.

Outfit No. 2

Contains 42 5-cent packages Fleck's Paper Dyes for decorating Easter Eggs. Each 5-cent package contains **24 Sheets,** assorted colors and new designs. Forty-eight eggs can be decorated with a 5-cent package, as the dye papers can be used a second time if carefully removed from the eggs.

Price per box, Either kind, 42 5-cent Packages, **$1.00.** **10% Discount on six box lots.**

To Introduce Our 10c. Goods We Offer Outfit No. 3 containing - - -

	COST	SELLS
2 doz. Jim Crow Corn Salve @ 65c	$1 30	$2 40
1 doz. Crow Toothache Remedy @ 75c	75	1 20
1 doz. Fleck's Toothache Gum @ 65c	65	1 20
1-12 doz. Anti-Bacco Chewing Gum @ 65c	05	10
36 5-cent package Dyes	Free	1 80

Attractive Boxes, Six-color Labels, Hangers, etc. Cost $2.75; sells $6.70. 140% Profit. . . . . .

Order through any Wholesale Druggist, or Outfits will be sent by express, charges prepaid, to nearest express office, on receipt of price.

J. J. FLECK SOLE MANUFACTURER TIFFIN, OHIO

MIGHT HAVE BEEN SERIOUS.

Quite an amusing incident, but at the same time one that might have resulted disastrously has been reported to us recently by a druggist in one of the smaller towns of the state. A customer came into his store and purchased a small vial of strychnine, which was properly labeled and the sale registered according to law, also, as the customer was known to be a very careless man, he was particularly cautioned in regard to the nature of the poison. Of course he had bought the drug many times before and in a measure resenting the druggist's advice, placed the vial in his vest pocket and paid his bill. This was the last seen of him for several days, when he came back and told his experience.

A few days afterward he discovered a broken vial in his vest pocket, and never thinking of the contents he had cast it out, absentmindedly, a piece at a time. That evening he complained to his family that he was not feeling well and thought that he had better retire. He had no more than reached the top of the stairs when his jaws suddenly closed, and deciding that it was a case of lockjaw thought the proper thing to do was to separate them. This was accomplished by grabbing his chin whiskers and jerking down his lower jaw, quite a number of hairs remaining in his fingers after the operation. Suddenly his right arm shot out in one direction and his left in another, and there were also violent spasms in the muscles of his legs. Becoming thoroughly alarmed by this time, he called to his wife who at once sent for the family physician. He was rather slow in coming, and by the time he reached the house the effects of the drug had worn off. Soon the symptoms being described to him, the physician pronounced it strychnine poisoning. This gave the patient a clew, and he remembered that he had placed the strychnine in the same pocket with his tobacco, and in chewing his favorite cud had absorbed a quantity of the poison.

"I see that the enemy broke into the Scotch line to-day," said the Duke of Wellington to the commander of a Highland regiment.

"Aye, sir,', was the response; "but they didna break oot again."

NICHOLAS · RICHMOND'S · PULMONARY · PILLS.

By Charles Battell Loomis.—(*Saturday Evening Post.*)

MILLER & BLAKE'S was as dingy a store as you could find in lower New York. It stood on John street, not far from William, and at its uncompromising front with four rows of dirty windows were a grim hoistway and a gloomy doorway, covered with dangling signs of Leverett's Hair Rejuvenator, Baird's Bloom of Health, and Ritter's Carbolic Face Powder. Its dark and gloomy interior was filled with littered desks and cases of patent medicines and a pervading odor of carbolic acid, reinforced on certain days by the sickening fragrance of pepsin in the making—it was not the sort of place to promote the building of air castles.

And yet when Nicholas Richmond, fresh from school, and fresh besides with an innocence and gayety that endeared him to women and made men more than tolerate him, came there as clerk, he supposed that in course of a weary time he would become a partner in the concern; and then he would retire with alacrity and live on the profits that would everlastingly flow in. All business was lamentable, he thought; but unless a man could make a fortune as well as a name in letters, trade was a less bitter dose.

Nicholas' father had been "Harry Rockdale," famous in the days of the Knickerbocker Magazine and Pfaff's, when Poe was yet alive. But although Mr. Richmond had made a good deal of money, his day had passed when Nicholas came on the scene, and the boy did not remember the time when his mother had not had to skimp and manage in order to run the house. Both parents died within a few months of each other. Nicholas put away his ambition to go to college and become a writer, and determined to go into business. Although the genial Henry Richmond had always affected a contempt for business, Nicholas' mother had said that five dollars a week sure was better than a hundred dollars a month that you never got. Mrs. Richmond had a way of putting things that might have been valuable if she, like her gifted husband, had held the pen of a ready writer.

How carefully Nicholas had expressed himself in his reply to the advertisement of Miller & Blake for an office boy! He made four attempts before he felt satisfied:

"In this morning's Tribune I noticed an advertisement to the effect that you were in need of a strong, willing boy in your business. I am he. Hoping to get the situation, as I need the salary, I am,

"Yours truly,

"Nicholas Richmond."

Miller, who was short and stout and jolly, tossed the letter over to his partner, Blake, who was tall and lean, and whose face wore an expression of perpetual surprise, owing to the distance between his eyes and his eyebrows.

"I'll give this lad a chance," said Miller. "A boy with a sense of humor gets along better than a dull boy."

"If he ain't too funny," growled Blake. "That boy's too fresh."

"Well, he won't be fresh long if he comes here," said Miller, with his silent chuckle. And of a truth, the patent medicine business is a great dispeller of freshness.

Someone, probably Tupper, has said that our inability to read each other's thoughts causes many misapprehensions. To Miller & Blake, and to most of the force of clerks in the establishment, Richmond was simply an office boy, who was paid two dollars a week and who probably didn't earn it. That he was the son of "Harry Rockdale," no one knew; indeed, it is not likely that any of the patent medicine crowd had ever heard of "Harry Rockdale" and his Tales of Old New York.

On the other hand, Nicholas felt that he was conferring a favor upon the house in coming. To speak in a paradox, he looked down on the tall Blake and the dumpy Miller from the bottom of his heart.

There was bald-headed Peter Mallon, who had made a fortune out of Mallon's Hair Restorer, but had been too busy to restore his own thatch; there was grizzled Doctor Onderdonk, who dealt in some abominable pill; there was—and he was not so bad—red-headed and uproarious Captain Simpson, of the Hypatia, wo came in to see Miller at the end of each trip. Human beings all, thought Nicholas, but not a gentleman in the lot.

After one month in the dull store, Richmond knew that all he had imagined business to be was more than true, and he determined to mitigate the drudgery as much as possible. When he came to the

Digitized by Google

Just then Miller, self-satisfied and smiling, waddled into the office.

"Shall I pay Nicholas his royalty, Mr. Miller?"

Miller was feeling good. He had been dining with Captain Simpson at Gerrish's chop-house.

"Yes, pay him, pay him. It's all he'll ever get out of his pills." And with his characteristic chuckle he went into his office.

"Sign that receipt," said Mr. Sutcliff, after a few minutes that seemed long to Richmond, who expected Blake to return any moment.

Nicholas took it and read it. It was a receipt for $567.32! His heart gave one sharp leap and he choked. He signed his name while phlegmatic Mr. Sutcliff took the check into the inner room for Miller's signature.

He heard a whistle, and then the little man hustled out with twinkling eyes and said warmly, "I congratulate you, my boy; but I tell you frankly you never earned it. How much are you getting a week?"

"Four dollars," said Nicholas briskly. "I'll be frank with you, Mr. Miller. I thank you very much for this, and I want to say that business is all right for those that like it, but I can't make myself think I like a thing I know I don't like. I want to resign and go to college."

It was astonishing, and it really hurt Nicholas to see how pleased the little Miller was at the idea.

"Go, my boy, and good luck to you. You're no fool, but you'll never set John street afire."

As Nicholas left the office with a little package of his personal effects and his wages and royalty in his inside pocket he saw Blake turning the corner from William street. Richmond quickened his pace and disappeared down Gold street, wondering which he should choose—Yale or Columbia.

The litigation between The Hugh S. Stewart Company, manufacturers of Dr. Stewart's Cough Drops and Dr. Stewart's Laxative Quinine Tablets, and Stewart Brothers, who are manufacturing a cough drop and quinine tablet which the Stewart Company claims is an infringement of their remedies, is still in the Court. In the suit formerly brought by Hugh S. Stewart against the Stewart Company it was decided that the Hugh S. Stewart Company had the exclusive right to manufacture and sell Dr. Stewart's Cough Drops and Dr. Stewart's Laxaeive Quinine Tablets. The present suit is brought by The Hugh S. Stewart Company against Stewart Brothers, a firm controlled by Hugh S. Stewart. A temporary injunction was issued against Stewart Brothers using imitation of the trade mark of The Hugh S. Stewart Company. This injunction seems to have been disregarded by Stewart Brothers and the Court has issued an order citing them to appear for contempt. We will note the result of the hearing in our next issue.

Cremeline.

was the name adopted by us some years ago so as to distinguish our brand of Pure Petrolatum. "Cremeline" is well and favorably known to the drug trade of the United States. We are the originators of the idea of using screw-top bottles and we flatter ourselves that we have always put up our goods with a little bit more "style" and "neatness" than the many imitators who bob up serenely.

Prices for the various sizes of Cremeline, will be found under the list of "druggists sundries." Goods supplied by Wholesale Druggists.

Ohio State University Pharmaceutical Association.

The meetings the past month have been very interesting and instructive and the papers have shown that the members are taking great interest and giving much time to their preparation. The quizzes have been very lively and each meeting many points which puzzle the pharmacist are discussed. Following is a list of some of the more important papers which have been presented this month: "Cinchona and Its Alkaloids," R. W. Funk; "Manufacture of Mineral Acids," E. J. Higgins; "Opium and Its Preparations," A. W. Black; "Incompatibility," C. H. Young.

Prof. Sandacre addressed the Association one evening on "The Need of the Ordinary Druggist Doing his own Manufacturing."

PERSONALS.

Two members of our association, Mr. E. J. Eberle and Mr. H. L. Morris, passed the state board examination last month. Mr. Eberle is not in college this term but is doing relief work at Steinfeld's pharmacy.

Mr. Rodney D. Moore, '98, who has been with F. F. Mott, Garrettsville, Ohio, has accepted a position as head prescription clerk with a firm in Youngstown, Ohio.

The following is taken from a Pomeroy paper. Miss Harvey graduated here last year:

"A deal in business circles was closed last Friday by which L. M. Harvey purchased the Barton pharmacy from A. T. Barton. Mr. Harvey bought the store for his daughter, Miss Lucy, and the proprietress took charge Saturday morning. Miss Harvey holds a diploma in pharmacy from the Ohio State University, is a registered pharmacist and is well qualified for the work. She is a very popular young lady and has a host of friends who will be pleased to hear of her good fortune."

Mr. C. J. Naddy, '99, formerly of Mt. Sterling, is at present in the employ of the City Hall drug store, Columbus.

The following was read at the last meeting of O. S. U. P. A.:

INCOMPATIBILITY.

The subject of incompatibility, although an old one and one about which much has been written, is, nevertheless, such an important one in the practice of pharmacy that a little review of the subject will, I think, prove helpful to the student as well as to the drug clerk.

In the short time allotted me it will be impossible to give more than a few examples of the more important and most frequently occurring cases of incompatibility. Incompatibility is the term used to express the effects produced in pharmaceutical mixtures by chemical decomposition, physical dissociation, or therapeutical opposition. In other words, it may be simply expressed as the interference of the constituents of a prescription with each other. Hence it may be further divided into three classes, viz.: chemical, pharmaceutical and therapeutical. In chemical incompatibility one or more ingredients entering into the prescription are invariably decomposed, reacting upon each other in such a way as to form entirely new compounds. It must not be thought, however, that this decomposition is always unintentional on the part of the prescriber, for a prescription may be chemically incompatible and yet be just what the physician desires. Many prescriptions which are therapeutically correct come under this head; for example, the chloride of mercury and limewater; acids and alkalies; zinc sulphate and acetate of lead. In such cases the chemical reaction is understood and is just what is wanted by the prescriber. It is the duty of the pharmacist to guard against incompatibilities which occur between the ingredients of prescriptions which were overlooked by the physician, or were unknown to him. The pharmacist with quite a number of years' experience should be able in most cases to distinguish quite readily a case of intentional from one of unforeseen incompatibility.

The sub-divisions of chemical incompatibility as given by Remington, of the most frequently occurring forms are:

1. Through the precipitation of an insoluble salt, produced by the addition of one solution or salt to another.

2. By the decomposition of a salt in solution containing a base united with a weak or volatile acid, by the addition of a strong acid.

3. Through the decomposition of a salt in solution containing an acid united with a weak or volatile base by the addition of a strong alkali.

4. By the precipitation of alkaloidal salts by the addition to their solutions of alkalies, alkaline salts, or salts which produce insoluble compounds.

Digitized by Google

5. By the unsightly discoloration or precipitation due to the formation of inky compounds, produced by bringing astringent solutions containing tannin or similar substances in contact with ferric salts.

6. By the decomposition of a solid substance without precipitation, because of the formation of products which are soluble in the liquid.

Incompatibility resulting from No. 1 may come about either intentionally or unintentionally. Chemical incompatibility is often misunderstood. It requires good judgment on the part of the pharmacist to judge when such a mixture should be dispensed and when not. It does not follow that because precipitation ensues the decomposition was not intended.

As an example of No. 1 we have the following:

℞ Plumbi Acetat.....ʒss
Zinci Sulphat.....gr. xv
Aq. Rosæ.....fʒiv
M. Sig. Use as an injection.

At first sight one would be apt to imagine that the physician had made some mistake in writing or else was very deficient in chemical knowledge, not to know that double decomposition would result with the formation of the insoluble lead sulphate and that the astringency of the salts would be destroyed. However the experienced pharmacist would know at once that the precipitated lead sulphate is the important agent and it should not be filtered, but should be dispensed with a shake label.

One is often confronted with the problem of when to filter a mixture and when not. This is quite often perplexing, but when in doubt before filtering apply the following simple rule given by Remington. He says: "A solution may be filtered and dispensed as a transparent liquid when the removal of the excess does not interfere with the medicinal properties and action of the medicine, nor conflict with the obvious intention of the prescriber."

In the following prescription,

℞ Argenti Nitratis.....gr. v
Tincturæ Opii.....fʒiss
Aquæ Cinnamonii.....q. s. ad fʒii

the silver nitrate is reduced to the metallic state when brought into contact with organic substances.

℞ Hydrargyri Chloridi Corrosivi.....gr. i
Liquoris Calcis.....fʒviii
M. Ft. Lotio.

This forms the well known "Yellow Wash" or "Aqua Phagedaenica." The yellow precipitate formed consists of mercuric oxide, which should not be filtered off.

℞ Liq. Plumbi Subac. Dil.....fʒiv
Extracti Opii Aquosi.....gr. xx
M. Ft. Lotion.

The extract of opium should be very finely powdered and should be triturated with the lead water gradually added. The turbid mixture formed sould not be filtered.

The second form of chemical incompatibility is very common, as the production of various excellent febrifuge solutions is brought about by the intentional decomposition of an alkaline carbonate by citric, tartaric or acetic acids.

℞ Ac. Carbolici..... 5.00
Sodii Bicarbonatis..... 20.00
Sodii Biboratis..... 30.00
Glycerini.....360.00

To the uninitiated this simple prescription might prove to be an eye-opener. In case he would weigh out the powders, place them into the bottle, and then add the liquids and give a shake or two, he would need a half-gallon container to hold the effervescing liquid. The glycerine reacting with the borax combines with part of the boric acid to form glyceryl metaborate and sodium metaborate. The glyceryl metaborate in presence of water, resolves itself into glycerine and boric acid, this reacting with the sodium bicarbonate liberating carbon dioxide, thus causing the copious effervescence.

℞ Bismuthi Subnitratis.....ʒi
Sodii Bicarbonatis.....gr. xxx
M. Fiat pil. No. xx.

In this prescription the pills after being made swell considerably and disintegrate. This is due to the evolution of carbon dioxide, caused by the reaction between the subnitrate and bicarbonate. Unlooked for decomposition most frequently occurs from the use of vinegars or syrups containing acetic acid, together with an alkali carbonate, the presence of the acid having been overlooked or unknown to the prescriber. The following is a common example:

℞ Ammon. Carb.....gr. xx
Ammon. Chlor.....gr. xxx
Syr. Allii.....fʒi
Aquæ.....q. s. ft. fʒii

Here the trouble arose because of the acetic acid in the syrup of garlic reacting upon the carbonate with the same result as those just given. Explosions have occurred in filling just such prescriptions as this, brought about by securely corking the bottle after the ingredients had been placed therein.

No. 3. This condition does not occur so frequently as the others. When ammonia

Digitized by Google

alum is mixed with potassium hydrate to form an astringent caustic, gaseous ammonia is liberated through decomposition.

No. 4. This form of incompatibility is quite common and is one which should be particularly guarded against, for it is one of the most dangerous that is likely to be encountered. The alkaloids are extensively used, and the majority of them are violent poisons. Owing to the difficulty of solubility of the alkaloids themselves their salts are usually prescribed. Now, on combining an alkali or alkaline salt with the salt of an alkaloid, the result is to throw the alkaloid out of solution.

℞ Cocainæ Hydrochloratis.....2 Gm.
Sodii Biboratis.....5 Dg.
Aquæ Distillatæ.....100 cc.
M. Ft. Sol.
Sig. Apply as directed to the eye.

The cocaine is precipitated by the borax. If boracic acid had been used instead this would not have happened.

℞ Strychninæ Sulph.....gr. i
Potassii Bromid.....ʒvii
Aquæ.....q. s. ft. fʒviii

To an inexperienced pharmacist this prescription would seem perfectly simple because a transparent solution would be obtained without difficulty, which would be dispensed without the least misgiving, but which, in all probability, would produce disastrous results. In a short time the greater part of the strychnine salt would deposit as an insoluble bromide. Almost the entire amount of the strychnine would be taken with the last couple of doses unless the bottle had a shake label on it. Too much care cannot be taken in regard to prescriptions of a nature similar to these just mentioned.

No. 5. The most frequent cause of such incompatibility is caused by the extensive employment of liquids containing tannin with iron salts. A black, inky-looking mixture is certain to result. Preparations of cinchona bark with iron are probably the best illustrations of this class.

℞ Ferri. Sulph.....gr. xx
Tr. Cinch. Comp.....fʒii

No. 6. It is very important that one should possess an intimate knowledge of the physical properties of chemical substances in order to avoid incompatibility of this sort.

Let us now take up for a few minutes the subject of pharmaceutical incompatibility. This is usually divided into two classes, dependent upon whether or not the constituents separated are active or inert. In the first case skillful treatment is usually demanded. Pharmaceutical incompatibility is usually produced by combining resinous tinctures or oily liquids with aqueous liquids, or alcoholic solutions containing volatile oils, chloroform, ether, etc., with aqueous liquids, or by the addition of acids to solutions containing quinine with a preparation of licorice. As an illustration of the first class we have the following:

℞ Quininæ Sulph.....gr. xxx
Acidi Sulph. Dil., q. s.
Ext. Glycyrrh. Fld.....fʒii
Syrupi.....fʒiv
Sig. Give a teaspoonful three times a day.

Without a doubt this is a quinine mixture intended for a child. The acid has evidently been added to aid in the solution of the quinine sulphate. It was evidently unknown to the prescriber, or else forgotten, that the acid also precipitates the glycyrrhizin, the sweet principle of the licorice, thus destroying its sweetness. Thus we see that the object of using the licorice preparation is entirely defeated by the addition of the acid.

The second class is illustrated in the following prescription:

℞ Extracti Buchu Fluidi.....
Extracti Cubebæ Fluidi.....aa fʒiss
Aquæ Cinnamomi.....fʒiii
M. Sig. To be well shaken.

This forms a very unsightly mixture, owing to the separation of the resinous and oily matter when the fluid extracts are added to the cinnamon water.

We now come to the last class—Therapeutical Incompatibility. This occurs where there is an antagonism of physiological action, one ingredient being, as it were, an antidote to the other. Difficulties arising from this source do not require the aid of the apothecary but lie solely within the power of the physician to correct.

Many times the order in mixing the ingredients of a prescription plays an important part in determining whether they are incompatible or not. Often a prescription is compounded in a certain order, resulting in an incompatibility, but as soon as the order is changed the prescription can be dispensed without any trace of incompatibility.

But do not be satisfied with knowing a little about this all-important subject. Remember, that in order to become a qualified pharmacist one must understand his business thoroughly, and, in order to attain this end, be assured that a thorough knowledge of this subject, a little of which I have tried

Digitized by Google

to present to you to-night, will aid you in attaining that position as much as any one subject which might be investigated.

C. H. YOUNG.

In the December issue of the MIDLAND reference was made to a fire which occurred recently in one of the local drug houses, due to the action of nitric acid on a rubber stopper. In the article referred to the statement was made that the explosion was due to the liberation of nitric oxide, but as we had made only a hurried examination we were unable to give any satisfactory explanation. Recently, however, we have made a more careful examination of the sample and have found the cause of the trouble.

On burning a sample of the stopper we found a little over sixty per cent. of inorganic matter used as filler, which was composed of about equal parts of barium sulphate and zinc oxide. This gave no clue, as neither of the substances give such a reaction with nitric acid.

On treating the rubber stopper with hydrochloric acid hydrogen sulphide was liberated, showing that the zinc was originally contained as a sulphide, but that it was changed by heat into the oxide.

Zinc sulphide when treated with concentrated nitric acid is decomposed into zinc nitrate and hydrogen sulphide $ZnS+2(HNO_3)=Zn(NO_3)_2+H_2S$. Hydrogen sulphide is decomposed by the nitric acid into sulphur and nascent hydrogen; the latter then attacks the nitric acid and reduces to the lower oxides, nitric oxide and nitric peroxide. These lower oxides of nitrogen collecting in the bottle caused the explosion.

In connection with this work we examined another make of stopper and found it to contain almost sixty per cent. of filler, principally zinc carbonate. This sample, when in a finely divided state, liberated carbon dioxide freely with either hydrochloric or nitric acid, but when a smooth surface was exposed to the action of the acid, as when a stopper is placed in a bottle, a slight reaction occurred, ceasing in a short time.

From these experiments it would appear that a stopper filled with a carbonate is comparatively harmless, since very little gas is liberated, while with the zinc sulphide tho reaction continues till enough gas is liberated to burst the container by its pressure.

W. A. L.

BOTTLE WASHING MADE EASY.

So simple a process as bottle washing seems, at first thought, to be hardly of sufficient importance to devote time and space for its discussion, but we will venture the attempt and leave the reader to judge of its value.

Modern methods of manufacture have so cheapened production that we often overstep ourselves in little matters of economy, or in other words the very economical person sometimes wastes much time that could be used to better advantage in saving some article of little value. For instance, we are reasonably sure that the majority of drug store apprentices would agree that they waste much valuable time in cleaning old bottles which are of little value when they have finished with them. In some cases they would no doubt be correct in their judgment, but if bottle washing is approached in an intelligent and we might say scientific way the results will be quite different.

The subject is often dismissed by drug clerks and students of pharmacy with the remark, "Oh, I expect to employ a porter to do such work, and therefore do not care to learn." However, if intelligent drug clerks do not know how to attack the problem how can they expect the porters to solve it? And we might say that several years' experience with porters will convince one that they do not know very much about the subject.

We recall one porter who persisted in mixing muriatic acid and sal soda for bottles which were especially difficult to clean. The same man would invariably place essential and fixed oil bottles in the same pan with fluid extract and comparatively clean bottles and then expect them to be clean.

It is a well-known fact that if an employer wishes work well done he should know how to do it himself.

The method which we have found so useful is applicable not only to common prescription vials but may be used to cleanse containers varying in size from a drachm vial to a fifteen-gallon carboy and chemical apparatus of all kinds. The articles used are the following: Three wide mouth pint bottles containing respectively muriatic acid, solution of caustic soda and coarsely ground emery. Place a funnel in the bottle to be cleansed and invert the bottle containing the emery over the funnel, by giving a rotary motion the emery,

Digitized by Google

being very heavy, will slowly descend into the lower container. Now, by swinging the bottle in a circle in such a way as to bring the bunch of emery in contact with the sides of the container, any matter adhering thereto will be rapidly removed. The emery, being very heavy and having sharp, cutting edges, removes any adhering particles as readily as if the hand were inserted into the container.

For bottles containing substances of a vegetable or organic nature, as extracts, oils, etc., the caustic soda solution may be used and for mineral substances the acid may be used afterwards, returning them to their respective bottles. Of course, the judgment of the operator must be used as to the nature of the substance to be removed and here is where a little knowledge of chemistry comes handy. It may sometimes be advisable to use nitric acid, sulphuric or oxalic acid in preference to hydrochloric and the soda solution may be replaced by benzine, alcohol or some other solvent, none of these having any effect on the emery. The same method may be applied to delicate chemical apparatus and many pieces be properly cleansed which would be broken by using sticks and glass rods.

Oil bottles should be allowed to stand several days in a solution of caustic soda, in order to saponify the fat.

The students in the pharmacy laboratory are given an outfit of the above description and much time is saved by its intelligent use. We hope our readers will give the method a trial, so that this article will not have been written in vain. W. A. L.

It isn't work that kills a man. It's usually scheming how he can put in the most time on a short job that saps up the human energy.

Prosecutions Under the Zimmerman Law.

Dr. T. J. Casper, the well-known druggist of Springfield, Ohio, filed a second motion in probate court January 29th to dismiss the suit brought against him by John T. Norris wherein he is charged with selling liquor without a license.

The prime object to be attained in the filing of this motion is to ascertain whether or not Norris has the right to bring proceedings of this kind against the druggists since he has no interest in the case other than that of being a detective. Should this case be dismissed other cases of a similar character which Norris threatens to file against several local druggists will no doubt suffer a like fate.

In his motion for dismissal, the doctor sets forth three reasons why this should be done, the first and most important of which is that there are no proper parties to the proceeding. As a second defense he says the proceeding is not instituted in the name of the real party in interest. For a third reason he says there are no adversary parties.

Judge Goodwin now has the motion under advisement and his decision in the matter will be awaited with a great deal of interest by all parties concerned, since it may have the effect of entirely disposing of the case.

Paris Postage Stamp Exhibition

Paris is holding its first postage stamp exhibition and the stamp exhibits are insured for $400,000. M. Mirabaud has sent a small part of his collection, including a complete set of Swiss stamps from 1844 to 1852. His whole collection is valued at $420,000. For two Mauritius stamps shown in a glass case, a one penny and a two penny of the original issue, the owner has refused to take $10,500.

In the

BARRY TWIN-BULB THERMOMETER

the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.
If you want to be "right in line" you can get any quantity of these from your jobber—we know he has got them.

A Chinese Medicine "Ad."

China is a happy hunting ground for quacks. Appended is a translation of an "ad." typical of its class:

"Our recipe has come down to us from a physician of the Ming dynasty. A certain mandarin was journeying in the hill country when he saw a woman passing southward over the mountains as though flying. In her hand she held a stick, and she was pursuing an old fellow of a hundred years. The mandarin asked: 'Why do you beat that old man?' She answered: 'He is my grandson, for I am 500 years old and he 114. He will not purify himself by taking his medicine, and so I am beating him.' The mandarin alighted from his horse, and knelt down and did obeisance to her, saying: 'Give me, I pray you, this drug, that I may hand it down to posterity for the salvation of mankind.' Hence, it got its name—'Fairy Receipt for Lengthening Life.' Take it for five days, and the body will feel light; take it for ten days, and your spirits will become brisk; for twenty days, and the voice will be strong and clear and the hands and feet supple; for one year, and white hairs will become black again, and you move as though flying; take it constantly, and all troubles will vanish, and you will pass along life without growing old. Two dollars per bottle."

Needless to remark, there is no law of libel in China. The celestial publicly heaps abuse on his neighbor, and the latter retorts to the full extent of his vocabulary. It is a delightful system of give-and-take.

—*London Express.*

Immense Collection of Mosquitoes.

There has been added to the Natural History Museum in South Kensington a collection of more than 3,000 specimens of mosquitoes, gathered from the colonies of the British Empire. When in 1898 a committee was appointed by the Colonial Secretary, in conjunction with the Royal Society, to supervise a scientific investigation of malaria, it was suggested, in view of the connections between malaria and mosquitoes, that it would be desirable to obtain exact knowledge of the different species of mosquitoes in our tropical colonies. Mr. Chamberlain, acting on the suggestion, at once issued a circular, dispatched to colonial governors, requesting them to take the necessary steps in the matter. The result is the remarkable collection of dead insects at Kensington.—*Exchg.*

SHE RECOGNIZES THE WORTH OF 'EM.

A Rockford, Ill., merchant advertised a portion of his wares with an anatomically incomplete cut, only one side being represented, in the *Register-Gazette* of that city:

DRAWERS

The new umbrella, Loie Fuller, Trilby and extra wide effects—handsomely trimmed with lace.

In response he received the following letter, which certainly shows no half-hearted appreciation of his enterprise:

deer Sur: I seen yure advurtizmunt in the Redistur-Gazet of the One Leged Drawers. i want a pare of lef leged ones and hear is 25 sence my leg aint very big or very long, but have em wide between jints. i don't care for the umbrella kind in dry weather. du you hev one leged stockins tu at half prise. i am glad Sumbodies gon intu this One Leged Business caws thare aint no yuse in byin tu leged cloase for One Leged Peepul eny more'n thare is for a Bald Hedded Man tu pay ful prise for a Hare Cut. send them tu Peckatowniki. thares a man hear with a rite leg and he sez we ot tu git hitched and make a pare, and purhaps we wil. du yu keap rite leged pants. his leg is biggern mine. how du you sel yure she meas. i hev generaly wore she meas insted of Drawers caws i cuddent bare the idee of payin fer tu legs and only yuseing one.

send by male. Yures trooly,
AMANDY JONES.

p s.—be sure and send the rite leged one; its fer the lef leg.

WHAT IS THE BEST COURSE TO PURSUE TO REPRESS THE SALE OF PROPRIETARY ARTICLES THAT YIELD NO PROFIT? *

BY JOHN F. PATTON.

THE answer to this query is simplicity itself: Don't sell them.

Your profits must bear some relation to your expenses or you will soon reach the limit of your capital and then the sheriff will kindly assist you to close your business.

There is probably no small business so expensive to conduct as that of a pharmacy. The expenses will average at least 25 per cent. of the gross sales. Your help must be of the kind that will not only satisfy the pharmacy board that he possesses the requisite qualifications, but he must inspire your customers, as well as yourself, with confidence.

The exacting duties, close confinement and long hours all demand commensurate compensation. But clerk hire is only one of the many things that go to make up the expense account.

The next best thing to not selling goods that pay no profit is to enter into competition articles of like character of your own manufacture. If you can furnish a better article at a lower cost for which there is a demand you will be rendering a service to the public that will not fail of recognition and reward.

In the matter of serving the public, what a valuable member of society is the Knight of the Mortar and Pestle. How willing, and even anxious, is he to render service. He manifests a deeper concern and goes to greater lengths to accommodate and serve the people than those engaged in any other profession, occupation or calling.

The spirit and mind of service is so general among our craft and so universally recognized by the public that it would not be inappropriate to have a sign emblazoned with the old German motto, "*Ich dien*," in every drug store.

For information, both medical and otherwise, the use of the directory and telephone, small change for large bills, postage stamps, a comfortable place to wait for a street-car—the drug store is sought with the assurance of service born of confidence that never suffered disappointment.

Is all this gratuitous service to the public a part of pharmacy inherent, or has it grown up as the result of that innate goodness, generosity and spirit of human kindness of the devotees to pharmaceutical science?

This sort of uncompensated service has continued so long and has become so firmly fixed in the public mind that a polite refusal would be regarded as an outrage.

People, however, usually appreciate that which costs them something, either in time, effort or money. Is it not possible that that which begins as a favor to the public may end by being regarded as a right? We often have instances of that. It is not good policy to so cheapen either your service or what you have to sell as to lessen their value. Nor is it wise to encourage the mean and sordid spirit influencing so many people in their desire to get something for nothing.

To serve the public is one thing, to be a public servant quite another thing. It is a mistake to seek the smallest trade and descend to the bargain counter scheme to attract business.

The public estimate of an individual is pretty generally correct. If you are regarded as one who lives by sufferance and not by an inherent right, is this not due to the spirit of too much subserviency on your part?

When you advertise your willingness to do so many things for the public free of cost, are you not seeking the patronage of those whose trade is not worth having? The ability and willingness to pay for what they get is the sort of trade that you want to cultivate. Drug stores cannot be successfully conducted on the basis of philanthropic institutions. It is urgent need that sends people to the drug store. The office of the pharmacist is to supply this want for the sick and afflicted, and just in proportion as the articles to meet this demand come out of your own laboratory as evidence of your skill and ability to produce, just to that extent will your reputation be enhanced and your business become more firmly established.

The foregoing may seem irrelevant as an answer to this query. There is but one way in which you can repress the sale of goods that yield no profit and that is by

* A paper read at the last annual meeting of the Pennsylvania Pharmaceutical Association. Reprinted from the proceedings.

Digitized by Google

competing with articles of like character of your own manufacture.

Then the next thing is to acquaint the public with the merit of the articles. In other words, advertise them.

Druggists' advertising is a subject that has received a good deal of attention in recent years. The pharmaceutical press has taken it up and set aside a portion of their papers as a special department presided over by a special editor whose duties involve criticising copy of druggists' advertising and making suggestions along that line of a helpful nature. Some of this counsel and advice might be of service to a neophyte; but much that is commended seems trivial, sensational and undignified.

Our calling or occupation does not admit of anything that savors of the surprising. The practice of pharmacy is in no wise sensational, but eminently sober, practical and even prosaic. All advertising announcements in the public press or otherwise should be along the line of that which is plain, simple and dignified.

The medical profession in their code of ethics prohibit advertising beyond a mere professional card, which emphasizes their estimate of the high humanitarian spirit of their calling. The pharmacist should regard no less highly the importance, the value and dignity of his occupation.

It is inadvisable that his name should appear in connection with the advertising of any nostrum. You will gain in public esteem by the omission of this sort of publicity. What do you think of the physician who writes patent medicine testimonials?

Advertise in the newspapers; advertise by legitimate means, but let it always be in the interest of something you make. Samples of the article, judiciously placed, usually make a good return on the outlay.

It is not good policy to spend money to advertise that which sells for small amounts. The impression already exists that the drug store is the place where you can get the smallest possible quantity of anything.

Much has been said about window dressing and displays as a means of advertising. Chemical apparatus as well as pharmaceutical manipulations always attract attention. Crude drugs in liberal quantities, or arranged in small cases with glass front, labeled with name, habitat and medicinal properties, afford interest and instruction and will be looked at and commented on.

A wooden-hooped cask or half barrel, had of any wine dealer, placed in the window and labeled Bay Rum, Witch Hazel, etc., creates a good impression.

A clock with a twelve-inch diameter dial placed at an angle in the window with a nicely painted bright-colored card sign 8 x 20 inches, advertising some one of your preparations, placed immediately above or below the clock and changed every few days will prove an excellent and attractive advertising medium. Everybody looks at a clock, and, under these conditions, they cannot help but see your sign.

To sum up the whole matter, sell as few of the nostrums that pay no profit as possible. Compete along the same line with remedies of your own manufacture and promote their sale by all legitimate means. Supply what is called for without comment, but at the same time give a sample of your own remedy intended for the same disorder. Don't advertise that you don't substitute, and don't be too anxious to serve the dear public without compensation.

We don't want to forget that much of our popularity depends upon what people don't know about us.

YOUR WINDOW

Will attract or repel trade. It all depends how you dress it. We can help you make it attractive. Our "**Palmo Tablet**" displays are novel, unique and original. We furnish them to only one dealer in a locality.

Palmo Tablets **is the new Nerve Tonic, which costs you $4.00 per dozen, retails for 50 cents, and is not cut.**

Particulars for the asking.

PHARMACEUTICAL CRIPPLES.*

My experience on the Board of Pharmacy brings me in constact contact with many pharmaceutical cripples—young men who go hobbling along, stumbling and blundering because they are too indolent or too self-indulgent to make the effort and sacrifice needed to secure themselves a pharmaceutical education. When I see a young man less than thirty years of age with no one dependent upon him for support, ignorant of the principles of chemistry, knowing only such pharmaceutical technique as can be picked up in the drug store, with little definite scientific knowledge of any kind and he tells me that he can't go to college because he hasn't the money, as a general thing I do not believe him. If he has a thorough determination to master his profession and has good health, I tell him that "where there's a will there's a way." Assidious industry and rigid economy will enable such a young man in these days to secure a pharmaceutical education. He may have lacked early advantages at school. This loss can be made up by utilizing his spare hours and minutes. If he has had a fair preliminary education and is thoroughly in earnest in his endeavor to go to college, some way will present itself, provided he be industrious and economical.

There is another class whom I will call voluntary cripples, who, because they do not like some branch of science which is essential to the well-rounded pharmacist's education, deliberately refuse to study it. Even in college I have found young men who found chemistry difficult and therefore would skim it all they could, and others who, claiming that they were not going to be botanists but druggists, almost refused to study botany; and so with other subjects.

They are voluntary cripples because they are willing to remain in ignorance of a portion of the pharmacist's equipment while fair students in other branches, preferring to trust to their good fortune in being able to find some one who can help them out should they ever need assistance in those matters which they have failed to study, instead of mastering them themselves. They remind me of those two men who used to ride tandem on a bicycle in an eastern city. One had lost his right arm and left leg and the other had lost the left arm and right leg. By dint of long continued, persevering practice these two men could get along as the average man by joining their forces together on a tandem wheel; but anyone can see that for all cycling purposes each of these was only half a man. These half men we have in our colleges and sometimes in our drug stores. They are voluntary cripples, because they have deliberately refused to study that which was difficult or uncongenial. How much better for each man, when he has the opportunity, to develop his powers in all needed directions, so that he may become a well-rounded pharmacist. And what shall we say to the young man who, by cramming with quiz compends, examination questions and other subterfuges for legitimate study, supplemented by no little cribbing, has managed, partly by good-luck and partly by cunning, to get through the State Board, and rejoices in the possession of a certificate as a full-fledged licentiate? Too often he thinks he knows it all. His case is the most hopeless that we have to deal with. He is like the blind man who has no sense of color. He does not know how much he loses by not seeing what others see, and it is hard for any one to tell him. He is beyond hope. Unlike the man who knows his own defects, he makes no effort to overcome them.

But there is another class of cripples, fortunately not so hopeless, whom I often meet in my capacity as dean of the College of Pharmacy. I refer to young men who wish to acquire a knowledge of pharmacy, but are crippled by reason of their defective general education. For almost a generation I have watched such young men and have seen how handicapped they have been in their efforts to learn their profession after they have set about it in good earnest. Often we see them hobbling along as indifferent students, because they find they do not make as good progress as others. This discourages them, and after a time they drop out altogether, having wasted time and money in a fruitless effort to build the top story before they had laid the foundation. I am not speaking of those who never were disposed to study and consequently made but little progress in the public schools and less in a school of pharmacy. Such persons are not fitted for any calling in which success depends largely upon the acquisition of scientific knowledge. These young men sometimes enter drug stores with erroneous views as to what will be required to make them successful pharmacists. Being adverse to study they acquire no more than a smattering of

*Address on "Cripples," by Prof. W. M. Searby, of the California College of Pharmacy.

Digitized by Google

knowledge. It is scarcely to be expected under these conditions that they should persevere until graduation. Frequently they drop out after attending college a few months. Our best opportunity of serving the future pharmacists occur whenever we have an opportunity of inducing youths to postpone entering drug stores until after they have completed their high school course. By doing this we not only render them a service, but also promote the cause of legitimate pharmacy.

NOT TO BE TRUSTED YET.

It is reported that Tarrant & Co., whose executive officers are now out of jail under heavy bail bonds, held on a coroner's jury verdict of criminal responsibility for causing the death of seven persons, are about to occupy for their peculiar manufacturing purposes some warehouses at Erie Basin in the Brooklyn borough.

This concern should not be given a permit for the use or storage anywhere of a single grain or drop of combustibles or explosives until it has either purged itself of the charge under which it now stands or has paid the penalty of the law for its criminal acts. Human life along the Brooklyn water front is just as valuable as anywhere else in the world—quite as much so as at Warren and Greenwich streets in Manhattan, albeit the Tarrants themselves placed little or no value on it at that point, according to the finding of the coroner's jury.

Persons whose recklessness and defiance of law destroy seven human lives and vast property values should not have engines of death and destruction placed in their hands again by the municipal authorities—not, at least, until they have proved that they can be intrusted with them; and this Tarrant & Co. have not done up to date, surely.

—*N. Y. Com.*

"Your narrative is too highly colored," remarked the editor, returning the bulky manuscript.

"In what way?" inquired the disappointed author.

"Why," replied the editor, "in the very first chapter you make the old man turn purple with rage, the villain turn green with envy, the hero turn white with anger, the heroine turn red with blushes, and the coachman turn blue with cold."

The Overuse of Quinine.

The overuse of quinine by the laity is deprecated by W. T. Church in the *British Medical Journal*. He thinks the drug is given too much and it would be better if the laity knew less about it, as well as about some other drugs. He reviews the testimony as to the physiologic effect of quinine and names some of the evil consequences that sometimes have followed its use, such as blindness, headache, nervousness, etc. He says that quinine is contraindicated in inflammation of the middle ear and labyrinth, in renal irritation, in acute inflammation, of the gastrointestinal tract, and in still other cases it is not well borne.

Dr. A. Bilhardt and John H. VonStein, of Upper Sandusky, both called on the MIDLAND recently. They came to the city to attend the meeting of the State Board of Health. Since his return from Moscow Dr. Bilhardt has paid but little attention to the details of the drug business, leaving the affairs of the store largely in the hands of his sons. We have an idea that sly Johnny Von took advantage of his visit here to boost his claim for position on the State Pharmacy Board. He also has the endorsement of the State Association for that position.

AJAX TABLETS

(Aphrodisiac.)

Nerve Tonic and Blood Builder.

For all cases of Nervous Debility and Sexual Weakness recommend AJAX TABLETS, the old reliable standard preparation, which has stood the test of years.

Every Druggist, can, without reserve, positively guarantee AJAX TABLETS to cure or money refunded, and we make the guarantee good.

AJAX TABLETS aid digestion and stop unnatural drains.

$4.00 per dozen. **50 Cents per Box.**

THE PATENT MEDICINE BUSINESS.

The death recently in Lynn, Mass., of one of the best known owners and managers of proprietary medicine enterprises brings sharply into the public eye again the marvellous growth of this branch of business in recent times, the vast fortunes made in it, and the greater ones, perhaps, that are sunk in it.

The patent medicine business has some very curious features, and it's a bold man who professes to know it thoroughly. Fifteen years ago one of the acknowledged experts in this country said that it costs fully $50,000 a year to create a demand, and by spending that sum, he declared, he would sell bottled spring water labeled "fever tonic" and make a big fortune.

"That cynical assertion," remarked an old-time New Orleans druggist the other day, "may have been true in 1885, but it needs revision to bring it up to date. To begin with, it costs a great deal more than $50,000 now to put a proprietary remedy 'before the public,' as the saying goes. The secretary of one well-known concern told me only last Spring that his house spent $250,000 on its specialty before the sales paid for the bottles and wrappers. The following year, however, the profits were enormous—something like 40 per cent. Another firm spent $180,000, to my positive knowledge, for purely 'introductory advertising,' all in about nine months. During that time the sales were next to nothing; then, all of a sudden, for no discernible reason, a tremendous demand set in.

"Experienced patent medicine men admit the impossibility of predicting when the turning point will be reached in booming any new remedy. The amount sunk in exploiting two articles before returns come in may vary $100,000. In my opinion the name has a good deal to do with getting a demand started. If it is hard to remember or hard to pronounce, it is undoubtedly a serious handicap and, on the contrary, a catchy, simple title, just odd enough to stick in ones memory, is in itself an advertisement worth thousands of dollars. I have a house in mind that spent a good sized fortune trying to popularize a tablet preparation with a queer Indian title that no two people pronounced in exactly the same way. It was a good thing and cleverly put before the public, and it failed solely, I think, because people were reluctant to ask for it for fear of making themselves ridiculous by butchering the pronunciation. That's a point about which the average customer is very sensitive. When the demand for a patent medicine is once started it doesn't do to assume that the booming may be relaxed. That has been tried disastrously over and over again, and experience has shown that the advertising must be continued in full blast; but, at the same time, merit plays an important part in sustaining the 'after sales.' In other words, you may create a demand for 'bottled water' masquerading as fever tonic, but you can't keep it up."

—*N. Y. Commercial.*

One of the things a man has to be thankful for is the failure of some of the most ambitious efforts of his youth.

Formulae.

COLD CREAM.

A satisfactory cold cream of the proper consistency and of unexceptionable keeping quality is said to result from the following formula:

White Wax	1½ oz.
Spermaceti	1½ oz.
Oil Sweet Almonds	4 oz.

Fuse over a water bath, to which add:

Powdered Borax	½ dr.
Rose Water	5 drs.
Oil Lemon	20 drops.
Oil Rose	10 drops.

Dissolve the borax in the rose water with the aid of heat; add whilst hot; add to the melted wax and spermaceti, and lastly, add the perfume, and stir until cold.

REMEDY FOR CHILBLAINS.

1. Citrine Ointment	240 gr.
Camphor	30 gr.
Oil Turpentine	1 dr.
Olive Oil	2 dr.

Apply with gentle friction before the chilblains break.

2. Ichthyol	10 gr.
Resorcin	10 gr.
Tannin	10 gr.
Camphor Water	1 oz.

FOR UNBROKEN CHILBLAINS.

White and Yolk of Egg	1
Diluted Acetic Acid	8 ozs.
Spirit of Camphor	1 oz.
Oil of Turpentine	½ oz.
Tincture of Arnica	1 dr.

Directions: Soak the affected parts in hot water and dry them; shake the lotion well and rub it in, and allow it to dry before the fire.

ELIXIR OF CASCARA.

Ground Cascara Sagrada	℥vi
Alcohol	Oi
Maderia Wine	Oii
Syrup	℥xx
Water, qs. to make	Ovi

Percolate the Cascara with the mixed fluids.

ELIXIR OF BUCHU, JUNIPER AND POTASSIUM ACETATE.

Fld. Ext. Buchu	12 fl. dr.
Fld. Ext. Juniper Berries	4 fl. dr.
Potassium Acetate	192 grn.
Alcohol	1 fl. oz.
Simple Syrup,	1 fl. oz.
Simple Elixir	12 fl. oz.

Let mixture stand for 24 hours, after which filter through talcum.

SKIN CREAM.

Quince Seed	℥iss
Boric Acid	℥i
Water	℥iv

Macerate three hours and strain; then add:

Glycerite of Starch	℥ii
Tinct. Benzoin	℥i
Cologne Water	℥iii
Quince Seed	℥ii
Borax	℥ii
Water	℥iv

Macerate four hours, strain and add:

Woolfat	℥iv
Cologne Water	℥i
Tinct. Benzoin	℥i

LIP SALVE.

1. Paraffin	400 Parts
Cacao Butter	400 Parts
Petrolatum	500 Parts
Rosin	1 Part
Oil Rose	

Dissolve the last two ingredients in the minimum quantity of alcohol required, and add to the others when melted.

2. White Wax	1 oz.
Expressed Oil Almonds	2 fl. oz.
Carmine	1 grn.
Oil Rose	1 drop
3. White Wax	1 oz.
Spermaceti	1 oz.
Liquid Petrolatum	6 fl. dr.
Tinct. Benzoin	2 fl. dr.
Alkanet Root	120 grn.
Oil Rose	1 drop

Melt the Wax and Spermaceti, add the liquid petrolatum and the alkanet root, macerate the latter with the melted fats for about one-half hour—strain, allow to cool somewhat, and incorporate the tincture and oil of rose.

4. Paraffin	2 oz.
Cacao Butter	2 oz.
White Petrolatum	2½ oz.
Eosin	3 grn.
Oil Rose	3 drops

Dissolve the last two ingredients in a little alcohol, and add to the fats when melted.—*Merck's Rep.*

BLACK INK FOR RUBBER STAMPS.

Nigrosin	oz. 1
Glycerin	drams 2
Tannin	drams 4
Silica solution (water glass)	q. s.
Water to	ozs. 8

The tannin and soluble glass prevent the ink running in the fibre.

RED INK FOR RUBBER STAMPS.

Fuschin	drams 2
Distilled Water	drachms 10
Acetic Acid	drachms 2
Alcohol	drachms 12

The "Allcock" Plasters
ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

ALLCOCK MFG. COMPANY, (Successors.) Salesrooms—274 Canal St., New York.

LITTLE LIVER PILLS.

Resin Jalap	grains 10
Aloin	grains 10
Podophyllin	grains 20
Gamboge	grains 20
Soap, Castile	grains 20
Oil Caraway	drops 5

Make into a mass with sufficient water and divide into 100 pills.

WITCH HAZEL CREAM.

Quince Seed	ozs. 4
Hot Water	ozs. 16
Glycerin	ozs. 32
Witch Hazel Water	ozs. 128
Boric Acid	ozs. 6
Rose Extract	ozs. 2
Violet Extract	oz. 1

Macerate the quince seed in the hot water; add the glycerin and witch hazel, in which the boric acid has been previously dissolved; let the mixture stand for two days, stirring occasionally; strain and add the perfume.

Influence of Light on Chemicals Placed in Different Colored Bottles.

M. v. Madsen placed various substances in bottles of different colors (orange, red, green and colorless) and exposed them to the action of light. He noted the changes of color and other alterations which took place during the time of exposure, which varied according to the substance used; sometimes the experiment was continued during a year.

The substances used were: bitter almond water, chloroform, etherial tincture of digitalis, solution of chloride of iron, solution of cocaine, hydrochloride (1 part in 100), the powders of digitalis, stramonium and fennel, solution of silver nitrate (1 part in 100), pencils of silver nitrate, pyrogallic acid, iodide of mercury, sulfate of quinine, oils of peppermint and eucalyptus, and water and alcohol variously colored.

As a result, the substances in red bottles were, with few exceptions, better preserved than those in colorless ones. Thus, creosote, syrup of iodide of iron, and the solutions of cocaine, silver nitrate and ferric chloride were preserved better in white bottles.

The red bottles are to be preferred as a rule, but especially so in the cases of pyrogallic acid, silver nitrate, and bitter almond water.

For some time bottles of green glass have been employed in certain countries and the results of the author with glass of this color show it to be nearly as efficient as orange for all general purposes.

In time all medicated substances will be tested to ascertain in what colored containers they may best be stored.

A Cruel Suggestion.

She (after two and a half hours of chatter)—"They call the owl the bird of wisdom. Now, I wonder why?"

He—"I don't know, but I suspect it is because the owl knows enough to keep still occasionally."

And then he wondered why the temperature fell twenty-six degrees at one drop.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

THE CLEVELAND ACONITE CASE.

OUR readers are already familiar with the details of this case, and the decision of Judge Fiedler is of such great importance to retail druggists, particularly in Ohio, that we are pleased to publish the same entire. So far as we know it is the first decision of a court of record in this State upon the question as to whether or not the poison label law applies to physicians' prescriptions. Judge Fiedler's decision is in clear terms and he shows a grasp of the subject which reflects great credit upon him for having carefully weighed the points at issue. Had the prosecution been sustained in this action the next step would have been a suit for damages against the proprietor for the death of the child.

The following is the decision:

"This is a prosecution under Section 4364–54 of the R. S., which is in terms as follows: 'Whenever any *pharmacist*, druggist or other dealer in *poisons*, *chemicals*, *medicines* and *drugs*, whether wholesale or retail, shall sell any *drug* or *chemical*, an indiscriminate use of which would be destructive of human life, such dealer shall affix to each bottle or package of such *drug*, *chemical* or *poison* a label printed in red ink, having on it the name of the article by which it is commonly known, the cautionary emblem of the skull and cross-bones, the wards 'caution' and 'poison,' and in addition thereto, at least two of the most readily obtainable effective antidotes to such poisonous article.'

"The testimony showed that the father, J. B. Morrow, called at the drug store of the defendant for some cough drops for

Digitized by Google

his child and while there met Dr. Oelhoff who volunteered to come next morning and see the child, which he accordingly did. He thereupon returned to the drug store and prescribed tincture of aconite, directing the defendant to put upon the bottle the directions as follows: 'Ten drops in a glass of water and then a teaspoonful every hour.'

"Pursuant to these instructions the medicine was put up in a bottle and labeled in the usual manner with the above directions for use upon the label, but no poison label, as required by Section 4364-54. The testimony showed that this medicine was taken home and by some unfortunate misunderstanding on the part of the mother the entire glass of medicine was given to the child at one time and was followed up later on by a teaspoonful of the pure aconite, resulting in the death of the child. J. B. Morrow, father of the child, testified that he called at the drug store and asked for his medicine which had been prescribed by the doctor.

"The question is, was this a sale within this section of the Statute.

"A sale in legal contemplation is a transaction between two persons, wherein one party, the vendor, transfers to another some specific article for a price. The relation between the druggist and his customers is two-fold.

"1. When he sells an article purely and simple, where his professional skill is not brought into account, as for example, where a customer purchases 15 cents worth of tincture of aconite. In this case we have a purely commercial transaction, that is, a sale, and Section 4365-54 applies.

"2. Where a customer brings a prescription, or as in our case, the prescription is left by the physician and the customer calls for the medicine, a different relation exists between the parties in this latter case. There are three parties necessary, the physician, druggist and purchaser. The physician examines his patient and decided what shall be used—the patient has no choice in the matter whatever—he takes what is given him. He relies upon the skill of the physician and having received his prescription he relies upon the druggist to follow the directions therein set forth. He must have confidence in the ability of each of them, that of the physician to diagnose the case and that of the druggist to execute the directions of the physician in compounding and dispensing the drugs, chemicals and poisons into a medicine. When once compounded or dispensed these drugs, chemicals and poisons lose their identity. They are not so much aconite, morphine, alcohol, water or whatever the ingredients may be, and however poisonous the mixture thus compounded may be, it is a medicine and nothing but a medicine.

"The physician must be the best judge of the proper remedy and must know how that remedy should be applied. He directs the druggist what to use and in what proportion, and he tells him just how that compound should be used. It is an extremely delicate and dangerous operation, and any variation even in the slightest degree from the directions so given, may, and in most cases of dangerous illness undoubtedly would prove fatal. In the case before us it did prove fatal. For the performance of this service the druggist charges as any other professional. This is no more a sale of that medicine, as the law contemplates a sale, than it is a sale when a lawyer charges his client for writing a letter or a contract. His charge is not for the paper and material used, but for his professional services.

"The first and most elementary rule of construction is, that it is to be assumed that the words and phrases are used in their popular and common acceptation, unless the subject matter indicates that they are used in a technical sense, as when used in reference to a particular trade, business or transaction. (23 Encyc. of Law 298.)

"The words of a Statute are to be construed with reference to the subject matter of the enactment and the object sought to be attained. (23 Encyc. of Law 322-323.)

"Technical words when used in referring to a technical subject are to be given the meaning which they have when applied to the particular art or science with reference to which they are used; i. e., their technical meaning. So an act relating to commerce is interpreted according to the vocabulary of merchants and it naturally follows that an act relating to druggists and physicians must be interpreted according to their vocabulary. (23 Encyc. of Law 324.)

"In the vocabulary of druggists this was clearly not a sale, but was a dispensing, and when a medicine is composed of several ingredients it is a compounding.

"In the opinion of the Court this was not a sale of any drug or chemical or poison within the meaning of Section 4264-54 and the defendant is accordingly discharged."

OUR PLATFORM.

"Better a little with righteousness than great revenue without right."—*Prov.*

THESE words are accredited to an ancient ruler, philosopher, moralist and man of the world. He had a wide range of experience, a profound insight into human character and formulated a code of ethics which has not been equalled in any later period. We are not unmindful of the fact that there is a surface cynicism widely prevalent which puts aside sentiments such as this and assumes that there is but one standard by which success may be measured in any sphere of human effort, and that but one object need be held before the mind's eye in order to meet all the conditions necessary to a prosperous career. So firmly has this taken hold upon the thoughts of many men that to attempt to controvert it places one in the position of being laughed at for his pains. It has grown into a habit to make light of the substantial; to say that the common things bring success; that the people love to be humbugged and deceived; that in order to succeed one's standards must not be too high; that you must seek to pander to the selfish interests of men if you would win their support, no matter what sacrifice of principle must be made. In support of this theory incidents are given of temporary success, and experiences are related of how adherence to the higher motives has ended in disappointment and failure. But the objection to conclusions drawn from such experience is that they have been taken at too short range. Who are the men, after all, who have reached middle life and are known as the successful men, those whose integrity in the commercial and social world is established and who are men of influence and character in their respective communities? Invariably they will be found to be those who have not only served a toilsome apprenticeship in the ascending steps of their chosen occupations, but whose entire business careers have been characterized by dealing honorably and squarely with their fellows, even when such a course has not at the time appeared to be in their own interests.

Once upon a time, in a certain large town, were two drug stores located within a half block of each other on the principal business street. Their capital and financial resources were about equal. For several years it was a "neck and neck" race between them as to which did the larger business. One kept open all day Sunday and each night until eleven o'clock. The other closed from Saturday night until Monday morning and each evening at nine o'clock. The one was ostentatious, if not "loud," the other conservative, if not plain. The motto of one was, "Make money off your enemies if you can, off your friends if you must, but make money;" that of the other, "Do a square business, keep only first-class goods, give every customer, as nearly as possible, the worth of his money, sell nothing poor or cheap, and get an honest profit on every sale." Thirty years passed, the man who was continually "doing" his patrons when opportunity offered is long since out of business without means and minus the respect or confidence of his associates or neighbors. The other establishment is doing a larger business than ever, the older members having retired with a competence and their successors are conducting the store in the same location upon the same general business principles which characterized it for more than a generation. "Which wins?" The one flourished like a gourd vine, the other stands like an oak in the forest.

Out of a February storm fluttered a little bird into our study and softly whispered that in the opinion of some who were in a position to judge the policy of the MIDLAND in criticising sharply those acts of individuals, organizations or combinations closely linked with the retail drug trade was a mistaken policy, if success, as that word is in common use, was to be expected, for to antagonize these or to speak plainly and forcibly in opposition to certain false or unwise methods or policies as they appeared to our vision was to render the result of a new enterprise more than problematic; that it could not be sustained without the patronage or support which it was within the power of these combinations or organizations to bestow or withold, and that the veil of obscurity might with propriety be permitted to rest upon many things which from the standpoint of idealism would not bear close inspection.

We have no ambition to become either reformers or martyrs. The former usually have "rough sledding" while engaged in the work of reform without accomplishing large results, and the latter are hurried off the stage too suddenly for ultimate attainment. We would rather construct than destroy. An incendiary with a torch can consume more property in an hour than a thousand toilers can build in a year.

Digitized by Google

But whether we live long or die soon we purpose living up to our conceptions of what is true and right and to conduct a journal in the interests of the retail druggists, as those interests in the highest sense appeal to our reason and judgment. We expect to place before our readers the advantages of fidelity to sound principles in all their relations to human affairs, so that the pharmacist may continue to be a self-respecting member of society, occupying a highly useful and honorable place among professional men. If we are permitted to accomplish anything whatsoever in this direction we will be content.

NOT THE PROPER REMEDY.

IN the annual report of the Ohio Food and Dairy Department the commissioner, in touching upon the difficulty in securing convictions in the courts for the fraudulent sale of oleomargarine for butter, lays the blame for the failure to enforce the law upon the juries before which trials are in these cases heard.

He further recommends that the legislature pass a law that will prevent these and perhaps similar cases coming under the jurisdiction of his department from being tried to juries.

There is no doubt great reason for complaint on the part of the commissioner and he has occasion for a feeling of disgust with the jury system as it has been seen in the trial of cases which were undoubted violations of law, but which resulted in failure to secure conviction by the juries before which the hearing was conducted. Nevertheless the remedy which the commissioner advocates is at least a questionable one. The right of trial by jury is a sacred right and especially in criminal cases, such as come within the scope of the Food Department, it is extremely doubtful if such a proposition should receive consideration by any State legislature. The defendant in one of these cases has the advantage of the State in a trial before a jury by reason of his being usually a neighbor, a fellow-citizen, perhaps a friend to one or more of those chosen to hear the testimony in his case and to determine upon his guilt or innocence, and the sympathies of these are enlisted in his behalf to the extent that the judgment of the persons composing a jury is so warped that a righteous verdict is difficult to secure. On the other hand, there is equal or greater danger that a person under the charge of a crime in a trial therefor before a court will fail to secure that degree of justice in the hearing to which he is entitled. While juries, it has been said, "are secured to acquit," it may also be said with perhaps equal force that courts are certain to convict. In such event the last state is worse than the first.

The difficulty is further back than the mere matter of the selection of a jury, or the jury system itself. In the first place, there are too many useless and obsolete laws which have been hastily and recklessly enacted in the interests of some one class of persons, or without any necessity existing for their enactment. Again, the people in a government such as this have been constantly educated into a disregard of many special laws, and this culture has developed into a growing disregard of all law. This contempt for law is really an alarming feature in the governmental problems of the time. In Kansas it crops out in the destruction of property under the guise of moral reform and religious enthusiasm, as though the illegal conduct of a saloon in that State could be legalized by like illegal destruction of the same by ill-guided and fanatical women. In Chicago it manifests itself in the malicious destruction of drug stores by another clique of fanatics who have become insane from lack of self-restraint and proceed on the principle that the administration of drugs is "the work of the devil" and the works of the devil must therefore be destroyed. In Colorado and other states the same spirit is found in the cremating of negroes by mobs for an alleged crime, and thus the school is conducted by what are supposed to be respectable people giving to the young of the land admirable instruction in the science of lawlessness.

A foolish notion appears to be abroad, that all the evils and many of the discomforts of life may be abolished or ameliorated by law and there are laws to regulate every conceivable condition under the stars. If most of them had never been framed and the few that are absolutely necessary for the regulation of social and political affairs were held in high esteem and the people taught to reverence and respect law, while officers of such were planning not how to circumvent but to impartially enforce law there would be no necessity for advocating the abolishment of the jury system.

Digitized by Google

GROCERS AND PATENTS.

THE retail druggist is, in some sections of the country at least, just at this moment, face to face with a tough proposition. We believe that many of them do not realize this fact, others are still in a Rip Van Winkle slumber of twenty or more years, and still others are indifferent. But the frozen truth is, that while attention has been directed largely to the "department store" and the "aggressive cutter" in the ranks of the retail druggists, there is a still more dangerous foe to be met in the grocer, wholesale and retail. The grocers in many localities have for several years been selling some patent medicines, not particularly for the profit there is in them, for the average grocer has no conception of what constitutes a legitimate profit, but because he wanted to sell something else beside the goods embraced in his own line, whether his profit was large or small. He has taken from the druggist in large degree the trade in spices, baking powder, cream of tartar, soda, flavoring extracts and a large number of such articles, and he is now reaching out to gather into his fold the trade in patent medicines. This desire is fostered and encouraged by the wholesale grocers, some of whom are and have been for several years buying patents from proprietors, *and continue to do so regardless of any contracts or agreements to the contrary.*

This matter has reached the acute stage and one of the perplexing problems confronting the National Association of Retail Druggists is this very question, as to whether or not proprietors shall include wholesale grocers in their list of jobbers to whom their preparations are to be sold. It is not necessary to state that prices are not, and will not be maintained if patents are sold direct to jobbing grocers. It is not a part of their scheme to see that full prices shall be maintained, either on their part or the part of the retailer to whom they distribute their goods. It also stands as a fact that the retail grocer in any case cannot be relied upon to get full prices for proprietary medicines. If he attempts to do this his sales would not justify him in handling them at all, since he expects to get this trade *only by underselling the retail druggist.*

In view of these facts will the trinity, composed of the National Association of Retail Druggists, the National Wholesale Druggists' Association and the Proprietary Association of America, consent that the proprietors of patent medicines shall continue to sell to wholesale grocers regardless as to whether their contracts under the tripartite agreement permit them to do so? Wholesale grocers are not in the list of distributing jobbers, to whom alone the proprietors have signed agreements to sell, and there is evidence sufficient to establish beyond question the fact that *proprietors since they have signed the agreements involved in the tripartite plan continue to supply to jobbing grocers their preparations on the same terms and conditions exacted of those on the approved list of jobbers.* How then are prices to be maintained? Of what use are all the efforts to regulate the sale of patent medicines on the part of these large and powerful combinations if one of them violates in the smallest particular the solemn agreement into which it has entered?

Meantime the retail druggist in many sections slumbers on to let some one else fight his battles for him. If there was an almost unanimous sentiment among this class to support in full the National Retail Druggists' Association in this desperate contest to win out against all classes of tradesmen who are very much in earnest to get the business of the druggist we believe without doubt that complete success would be assured. Unfortunately it seems difficult if not impossible to get this fact into the minds of the majority of the retailers. It is time to wake up. It is high time to show a more united front; it is time to lay aside personal interests and wage war for the common good, for if these things are not done, and done along the lines now laid down by which their purposes may be realized the bulk of the business now done by druggists in patents will be taken from them before five years. This is no idle dream but a prophecy based upon a knowledge of some facts not in possession of many in the retail drug trade.

One formidable state organization of wholesale grocers has recently announced the intention of those engaged in that line of business to carry stocks of patents and they are planning now the best method by which their supplies may be secured, and some very interesting developments may be anticipated in this direction in the near future.

The bold and agressive stand taken by representative retail druggists in convention assembled in 1898 at St. Louis resulted in the recognition of their demands by the

Digitized by Google

National Wholesale Druggists' Association and the Proprietary Association and the forming of the present agreement between the three bodies to control the prices of patent medicines. If the retail druggists wish to see the completion of the job begun three years ago under favorable auspices it is within their power to prevent the sale of these preparations extensively and at reduced prices by either the wholesale or retail grocer, but they must act promptly and with vigor or the game will be lost. The whole subject is with greater force than ever before close up to the retailer. What is he going to do with it?

THE DOCTORS DO NOT AGREE.

THE *Bulletin of Pharmacy* has been publishing for several months the views of men prominent in the pharmaceutical realm upon the question of what should be the proper attitude of the schools of pharmacy with regard to entrance qualifications of students and the general requirements of a pharmaceutical education.

These opinions form quite an interesting collection treating the subject from a great variety of standpoints. To our thinking there is a striking similarity in expression that some uniformity of plan, necessitating important changes in present conditions relating to pharmaceutical education should be agreed upon, but a great lack of practical suggestions as to how such a plan may be put into operation. This, however, should excite no surprise if due consideration is given the fact that the whole field of vision, so far as pharmacy is concerned, is, just at this period, out of focus. The profession of pharmacy and the commercial phase of the retail drug business are two shows under the same tent, both departments being of equal importance, and the properly equipped man for the dual establishment is the man who is well trained for the duties of either side of the house. Those connected with the schools, unless they have come up from the ranks, regard the professional training as all that is necessary, and those in the actual conduct of the retail drug stores look with a certain degree of contempt upon the colleges and their alumni, because of their failure to appreciate the practical or commercial side of the occupation.

Here is the city pharmacist, largely a man of practical business experience, and, no matter how well qualified professionally, giving the larger part of his time and thought to the business phase of his establishment. This is imperative if he is seeking either to win success primarily or to maintain prosperous conditions already secured through much labor and sacrifice. Usually he employs a pharmacist thoroughly qualified by education and experience who is held responsible for the scientific and professional work of the pharmacy, thereby relieving the proprietor of the anxiety incident to that important department in order that his mind may be free for other and equally important duties. This chief must not only be a competent pharmacist, but he must be much more. He must be active, alert, a man with executive ability, not putting in his time in scientific research, but keeping a keen eye upon the acts of two or more subordinates, for whose movements in detail he is in a measure responsible. This proprietor and this superintendent represent, we will say, the highest types of men actually in the occupation of the pharmacist at this day, and from these we have them in all descending grades, both proprietors and assistants, down to the man in the small town who deals in general merchandise, and in whose place of business may be found almost anything from Hyosciamine to lawn mowers. The teacher in the school of pharmacy, unless he has shared in the different gradations of the actual work, has no conception of the needs of men in retail drug stores and he is utterly unable to see what methods of education would best qualify men for what they are expected to do. The average professor in pharmacy would be absolutely submerged in his efforts to fill the place of one of these men unless he has been through the same routine, as indeed, few of them have been. And yet these teachers are inclined to confront the conditions of practical commercialism and professionalism in combination with the pedagogy of the schoolroom and the entertaining play of laboratory experiments.

It requires some courage, in the face of theorists of wide research and profound scientific attainments, to stand and present the side of the men who are performing the actual work required of them in these hard places. Such defense will be regarded as in opposition to higher education in a very important calling; nevertheless, there are 50,000 retail druggists in the United States and with all their limitations in education there is little doubt but that they

Digitized by Google

could be less easily spared than the schools of pharmacy and the teachers therein.

For ourselves we wish the time was ripe for universal requirement that no student should be admitted to any school of pharmacy who did not have the minimum of a high school education, that no college should confer a degree in pharmacy whose curriculum did not comprise at least three years of nine months each, and that none but graduates from one such college should be eligible to an examination as pharmacist by any State board. But with what degree of equity can such standards be set up when the alumni of these schools after such a course are to go out to find employment at a less wage than is given a motorman on a trolley-car?

Nor would the problem even then be solved, for no matter what preliminary training has been enjoyed there still remains the large question of "adaptability," as one of the *Bulletin's* correspondents very sensibly puts it. In this discussion the responsibility for insufficiently qualified pharmacists is in some cases laid at the doors of boards of pharmacy, but it must be remembered that these boards are compelled to take a broader view as to what constitutes a qualified pharmacist than can be obtained from the school room. With all proper respect for the opinions of professors in pharmacy, many of whom we admire and a few of whom we love, we have further to say that we have seen examinations of state boards which would make many a professor "hump himself" to secure a passing grade. Nor is this said to prove the quality of the examination. The entire problem is not of easy solution, and with all the great men in pharmacy which America has produced no Moses has yet appeared who has tarried at the burning bush long enough to get an inspiration that would enable him to lead the pharmacal hosts out of the wilderness of doubt in which they are wandering. The discussion of the question is of great value, and a notable feature of it is that the most judicious suggestions as to methods of improvement come from those actively engaged in the practice of pharmacy and from those teachers in the schools who have been through the "hard knocks" of a retail drug store long enough to be able to appreciate that phase of the subject.

It is not easy to begin to build at the top and work downward. When the time comes that pharmacy may be divorced from merchandise, when the number of pharmacies may be restricted by concessions from the government, as in most European countries, and the selling of articles now sold by druggists is largely eliminated, then most any sort of educational requirements may be demanded without serious question. But such restrictions savor of paternalism in government which with our sort of free and easy ideas of liberty are not to be anticipated until after the present doctors of pharmacy have gone to their reward.

A New Method of Spraying Antiseptics.

Guilmeth (*Bull. Comm.; Pharm Jour.*) has directed the attention of the Academie de Medecine de Paris to a new method of spraying antiseptics on to wounds. The drug is suspended or dissolved in ethyl chloride boiling at 11° C., and, contained in a suitable vessel, is heated to 20° C., then sprayed by its own pressure over the surface of the wound. The antiseptic is thus brought into most intimate contact with the whole surface, and the vehicle, being a good solvent of fatty matter, aids the process. The method is stated to have given excellent results in the hands of surgeons, particularly in the case of osseous wounds.

is unsurpassed for purity, beautiful in appearance, and supplied in "Flake" and "Cube" form. The "M.C.W." Morphine costs no more than other brands, and is guaranteed to give entire satisfaction.

CODEINE "M. C. W."

and the various Salts of Codeine, including Phosphate, Muriate, Nitrate and Sulphate, are all of superior quality, and will meet the most critical requirements of pharmacists and physicians.

COCAINE "M. C. W."

is supplied in three forms, LARGE CRYSTALS, SMALL FLAKY CRYSTALS and POWDERED. The "M. C. W." Cocaine is a strictly chemically pure Salt, and generally preferred by careful pharmacists and physicians.

Your jobber can supply our chemicals, and when you specify "M. C. W." on your orders you will get strictly reliable goods at lowest prices.

Mallinckrodt Chemical Works,

ST. LOUIS. NEW YORK.

Liquid Air.

For obtaining an exact idea as to liquid air, there is a very simple method, in the opinion of M. Robert Pitaval, who makes this observation in *L'Aluminum*, and that is to consider it as the extreme limit of compressed air, when one can easily conceive that it may be employed as a refrigerating agent, as motive power, and as explosive force. Again, its composition sufficiently indicates that it may be a source of oxygen which, as is well known, has many uses; but the success of all these applications depends upon a principal factor, which is the sale price, and consequently the cost price of liquid air. This substance may in fact, serve to afford liquid oxygen owing to the differences of volatility in the two elements which compose it. By evaporating one-half a given mass of liquid air a concentration of oxygen to 85 per cent. is obtained, and, on pushing the evaporation further, nearly all the nitrogen may be eliminated.

The total production of crude carbolic acid per annum in the United Kingdom is estimated to amount to 1,800,000 gallons, value about £247,000, of which 800,000 gallons is exported in the crude state to Germany. The remaining 1,000,000 gallons, according to Dr. Rose (Stuttgart), is converted within the United Kingdom into 2,000 tons purified phenol, worth about £175,000, which except for a small amount retained for the British chemical industry, is exported.—*Pharm. Journal.*

Digitized by Google

EDITORIAL NOTES.

PIQUA, Ohio, appears to be the champion town for carbolic acid, if the press reports are authentic. A few months ago a citizen of that city drank from a bottle supposed to contain whiskey, but the coroner decided that it was carbolic acid. Not long afterward another case of poisoning by the same agent was reported, then one or two cases of suicide followed, and last of all a mother is stated to have given two of her children a bath in which carbolic acid largely entered, with serious results to one of the infants. We suggest to the pharmacists of this flourishing and presumably intelligent community that they secure a hall and deliver a course of lectures in turn to the benighted inhabitants on "Carbolic Acid—its uses and misuses." The situation is becoming alarming.

* * *

THE Ohio Board of Pharmacy was recently appealed to revoke the certificate of a registered pharmacist by a person who alleged that the pharmacist had made a mistake which seriously injured one of the members of the applicant's family. The Board declined to revoke a certificate on such ground for the reason that the law specifies the causes for which the Board shall be able to revoke and a mistake in compounding is not one of them. Moreover, any one, no matter how competent, is liable to make a mistake. It is true, a pharmacist ought not to make a mistake, but that does not preclude the possibillity of his doing so.

The Attorney-General of the State sustained the secretary of the Board in his construction of the law and his ruling in this case. The complainant, when asked what recourse he had for a matter, which to him was serious enough, was told that he could recover damages in a civil action if he could make out his case in the courts.

* * *

THERE is one impressive point in the decision of Judge Fiedler, of Cleveland, in the Aconite poisoning case which pharmacists would do well to weigh carefully. In speaking of the filling of a prescription the court says: "This is no more a sale of that medicine, as the law contemplates a sale, than it is a sale when a lawyer charges a client for writing a letter or contract. *His charge is not for the paper and material used but for his professional services.*" The italics are ours, and it is a pity that so many professed pharmacists have such a low estimate of their own professional ability as to be ready, sometimes anxious, to compound a prescription, taking all the risks incident to such a responsible duty, for the mere cost of the medicine itself. It is this depreciation of his own skill that has had much to do with the demoralization of the professional claims of the pharmacist, and it is a real joy to find a member of another honorable profession placing such an cstimate upon the difficult and dangerous duties devolving upon the pharmacist in his work as a dispenser of medicines.

* * *

ON another page we give a communication from an Ohio firm engaged in the retail drug business. Although not requested to do so, we, in the exercise of our own judgment, withold the name of the firm sending us this letter. We are inclined to think that the extent to which the liquor business is illegally carried on by retail druggists is overdrawn by our correspondent, for we are slow to believe that the conditions are such as are portrayed. It is our custom to invite communications upon any subject of interest to the persons engaged in retailing drugs, and we will publish all such without assuming any responsibility for the opinions expressed in these letters. We will be glad to hear from others on either side of the liquor question, for it is one that seriously affects the position of the pharmacist as a citizen as well as representative of a very responsible occupation.

* * *

ESSENCES AND WOOD ALCOHOL.—In our January issue we recounted a case of poisoning by which four persons died, supposedly from drinking essence of Jamaica ginger. The deaths occurred in a mining settlement of Eastern Ohio and the essence of ginger was obtained at a company store and it was reported to have been prepared by a Baltimore concern which puts up for the trade articles of this nature. We suggested at the time that the symptoms reported as prominent in these cases indicated the probable use of wood alcohol in making the essence of ginger. We since observe accounts of similar cases in Baltimore and vicinity of the same nature and with like symptoms from the use of essence of ginger which was proven to have been prepared from wood alcohol. We publish on another

Digitized by Google

page an article by Dr. Herbert Harlan, of Baltimore, on "Blindness and Death from Essences, etc., due to Wood Alcohol," believing it to be of interest to all pharmacists. This article was read recently at the semi-annual meeting of the Maryland Medical Faculty and this with other accounts from the same locality where the essence of ginger was prepared which caused the deaths of the four Ohio miners leaves scarcely a doubt that our surmise of a few months ago as to the cause of the deaths of these persons was correct. We suggest to the drug inspector of the Ohio Food Department that here is a good field in which to labor since the Ohio pharmacy law permits the sale of essences by any dealer, no matter whether he is a pharmacist or not.

* * *

STAMP TAX REPEALED.—After July 1st there will be no 'need for placing revenue stamps on patent medicines, chewing gum, perfumery and toilet articles or bank checks. The House of Representatives early in the month of December passed a bill reducing the tax on many articles to the amount of $40,000,000 and in this bill the noted Schedule B was almost obliterated. The Senate, instead of concurring in the bill passed by the House, enacted a measure of its own, which left the tax on patents and other articles in Schedule B, but reduced them about forty per cent. Neither house would agree to the measure passed by the other and a committee of conference was called, which, after wrestling with the two bills, gave no hope of agreement. In the closing days of the session, however, the Senate members of the conference committee gave indications of yielding on some points and to the surprise of those who had been making a strong fight in the interests of the drug and proprietary medicine trades finally gave in so far as the articles enumerated above were concerned and the bill was passed. The outcome of this struggle, so far as druggists and their interests are concerned, simply shows what persistent effort will accomplish even in the face of the most discouraging prospects. We congratulate the drug trade on the victory.

* * *

THE Congress which has just adjourned failed to enact the bill to prevent the sale of oleomargarine or butterine by putting a tax on the colored product to the extent that it could not be sold as cheap as dairy butter. This is one of the few sensible things that this Congress has done. It is right and proper that butter should be sold for butter and oleomargarine for what it really is, and to our thinking it would not be difficult for Congress to make a law that would fully protect the consumer from being deceived as to what he was buying. But to legislate out of existence a valuable food product which is largely consumed by the middle and poorer classes in order to foster an industry which has perpetrated more fraud on the people than almost any other, is an intolerable proposition.

Everybody knows from experience the difficulty of getting good, sweet, wholesome country butter and when it is found it commands a fancy price, while between rancid butter and properly manufactured butterine most people prefer the latter by all odds. Make it a penal offense to sell oleomargarine for dairy butter if need be, but until dairymen learn to make clean, sweet butter instead of the vile stuff that is in many cases palmed off as butter let the people have the opportunity of eating clean artificial butter at a moderate price. We rejoice that at least this one attempt to "protect" the dear people by fostering one fraud in order to overthrow another has met with disaster. A blunt writer in a journal of medicine a few months since estimated the amount of stable manure consumed each year by the residents of New York city in the milk, cream and butter from filthy dairies as aggregating several hundred tons. His figures may be a little high but the fact of the existence of animal refuse to some extent is not disputed. As between oleo and cow manure let us eat the former by all means.

* * *

AFTER the forms were made up and ready for the press in getting out the February number, we received the annual report of the Ohio State Pharmaceutical Association for 1900.

RED CLOVER BLOSSOMS

And Fluid and Solid Extracts of the Blossoms.

The BEST BLOOD PURIFIER KNOWN

Cures Cancer, Catarrh, Salt Rheum, Eczema, Rheumatism, Erysipelas, Whooping Cough, Sick Headache, Dyspepsia, Constipation, Piles and all Blood Diseases. This is the preparation to Push and recommend.

We will CHEERFULLY keep you SUPPLIED with advertising matter with your imprint on.

D. NEEDHAM'S SONS, CHICAGO, ILLS.

Digitized by Google

Communications.

CINCINNATI, FEB. 25TH, 1901.

Editor Midland Druggist:

We are glad to see an article in the February MIDLAND under the caption "Where is the Report?" meaning the report of the proceedings of the Ohio State Pharmaceutical Association for 1900. If said report continues to come out eight or nine or ten months after the meetings in our opinion the association will soon have to raise the membership dues first to three and then to four dollars a year in order to raise money for its expenses. Certainly no member wants to pay even one dollar a year as his dues if he does not get the report of the proceedings in a reasonable time after the meeting is over. Only a small percentage of the retail druggists think it worth the time or expense or can make it convenient to attend the meetings of the association annually, but they would like to know within a short time what was done there. If they are not informed within a reasonable period all interest in the association is lost. By reference to the reported membership and annual attendance we find that about twelve to fifteen per cent. of the members attend the annual meetings, the other eighty-five per cent. learn little or nothing of what was done until all interest in the matter has died away. There is no doubt that the general interest in the State Association is dying out, and this should not be the case. We believe a prompt issue of the proceedings would tend toward a revival of this interest. Who of the members want to put in two or three months time in preparing an original paper that he knows will not reach the members for eight or ten months after it is read in the meeting?

By reference to the membership from 1884 when there were 813 Ohio members apparently all in good standing with 171 in attendance, we find that the membership was kept up by accessions to 860 in 1890, but in 1895 it had declined to 825 with only 392 in good standing. Two years ago the annual dues were increased to two dollars in order to meet expenses. Every reputable druggist in the state ought to be a member of the Central Association, and if the affairs of the association were so conducted as to make profitable to them most of them would become members and be willing to pay one dollar a year for the report when they could not be present in person. If the meetings of the Ohio State Association are mere outings conducted at general expense without benefit to those who can not attend them the membership will of necessity dwindle down to a very few.

Yours truly,

—W. J.

* * *

LIBERTY CENTER, O., March 5, '01.

Editor, Midland Druggist:

DEAR SIR—Thinking the following incident might prove interesting to others as it was very amusing to us, I submit it to you:

We had displayed our entire stock of pills in the window, many of which are wrapped in bright red paper. As the school children passed the window one boy of nine or ten years came in the store, "Say, Jim.," said he, "what are them—fire-crackers?" "Yes," said Jim. Just as the door closed behind him he called to a boy on the other side of the street, "Say, Charlie, come look at the fire-crackers." Several men were standing before the window, and as they began laughing the boy read a sign. "Oh, the're just pills," said he, as he hurried along the street.

—Z.

Had a call last fall from a little girl for a bottle "brown sulphur." After some of questioning, I sold a bottle of bromo seltzer, which proved to be what was wanted.

—Z.

* * *

Editor Midland Druggist:

DEAR SIR:—Permit me to make a few comments on the article of February 7th headed "What are we coming to" you question viz: "Is it true that the public is coming to consider the druggist in the same class as the keeper of the saloon?" I think can be answered in the affirmative. Of course this will not apply to all sections of the country but from what I hear from traveling men the consensus of opinion is *that the druggist is entirely too free in the illegal sale of intoxicants* a great number deriving a large share of their business from this source. Its illegal and undiscriminate sale by druggists is so near universal that it is no longer a great surprise that the public does class us with the more respectable saloonkeepers. I am severely opposed to the methods taken in Chicago in the way of reform, but I do think that the time is ripe for *drug journals* to sound a note of alarm

Digitized by Google

on the saloon side of the drug business. The innocent must suffer with the guilty. I have been in towns in "Old Ohio" where public sentiment was so pronounced against druggists in general that I was actually ashamed to let the people know my occupation. These are not day dreams but *cold facts* and are more disastrous and less talked of (in drug circles) than any other one thing pertaining to the interests of pharmacy.

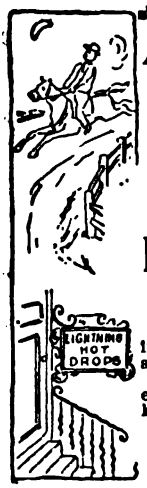
Hoping to see something in the columns of the MIDLAND DRUGGIST upon this subject, we are most respectfully,

Simplicity in Medicine.

"The battle against poly-pharmacy, or the use of a large number of drugs (of the action of which we know little, yet we put them into bodies of the action of which we know less) has not yet been fought to a finish. There have been two contributing factors on the side of progress—the remarkable growth of the sceptical spirit fostered by Paris, Vienna and Boston physicians, and above all the valuable lesson of homœopathy, the infinitesimals of which certainly could not do harm, and quite as certainly could not do good; yet nobody has ever claimed that the mortality among homœopathic practitioners was greater than among those of the regular school. A new school of practitioners has arisen which cares nothing for homœopathy and less for so-called allopathy. It seeks to study rationally and scientifically the action of drugs, old and new. It is more concerned that a physician shall know how to apply the few great medicines which all have to use, such as quinine, iron, mercury, iodide of potassium, opium and digitalis, rather than a multiplicity of remedies the action of which is extremely doubtful.

"The growth of scientific pharmacology, by which we now have many active principles instead of crude drugs, and the discovery of the art of making medicines palatable, have been of enormous aid in rational practice. There is no limit to the possibility of help from the scientific investigation of the properties and action of drugs. At any day the new chemistry may give to us remedies of extraordinary potency, and of as much usefulness as cocaine. There is no reason why we should not, even in the vegetable world, find for certain diseases specifics of virtue fully equal to that of quinine in the malarial fevers."

—*Dr. Wm. Osler.*



A Wild Ride
in the dead of night for
LIGHTNING HOT DROPS.
A sudden attack of Cholera Morbus.
ALWAYS KEEP
Lightning Hot Drops
in the house, and save time and suffering.
Cures all Stomach and Bowel Troubles, and Pains of all kinds.
NEVER FAILS.
50c bottle holds 2½ times as much as 25c bottle.

To the Trade:—

A glance at the prices below will convince you that the

LIGHTNING REMEDIES

pay the dealer as large a per cent of profit as any proprietary article on the market.

THEY GIVE UNIVERSAL SATISFACTION.

Then, why not include some of them in your next order to your jobber?

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid to anonymous communications, although the name of the sender of such news will not be published.]

—

S. H. Lederer, Cleveland, Ohio, has sold out.

G. P. Curry, East Palestine, Ohio, has sold out.

D. A. Smith & Co., Akron, Ohio, have sold out.

J. Chas. Schaffer was a recent visitor in Colnmbus.

A. N. Thomas, Wapakoneta, Ohio, has made an assignment.

Mrs. Henry Bevard, Canal Fulton, has sold her drug store.

W. D. Jennings, Franklin, Ind., has been succeeded by D. D. Miller.

Long & Staley, Lebanon, Ind., have been succeeded by Long & Etter.

Patrick Malcom, of Norwalk, has been succeeded by Kent Woodard.

Frank Dusenbury, Sunbury, Ohio, is laid up with a bad case of rheumatism.

Dr. Geo. W. W. Walker, Roseville, Ohio, has returned from a trip to Texas.

Mowren & Thumm, Alliance, Ohio, have been succeeded by Mowren & Antram.

Henry B. Fuelling, of the firm of Nachtrieb & Fuelling, Decatur, Ind., is dead.

Forgey & Co., of New Carlisle, Ohio, have been succeeded by Mrs. E. C. Cole.

O. N. Garrett, of Hillsboro, has been confined to his home with a severe attack of grip.

W. R. Parker, Beverly, Ohio, has returned from a visit to Columbus and Cincinnati.

Will Newton, of Springfield, Ohio, has accepted a position with W. P. Kirkpatrick, Utica, Ohio.

John Seigrist, of Seigrist & Williams, Coshocton, is back to the store, after a severe illness of typhoid.

Mr. Walter Parker, with W. R. Parker at Beverly, Ohio, was made a 32° at the late reunion of Cincinnati Consistory.

Will Hursh, Mansfield, Ohio, has completed his course at Ada, and from now on will be with his brother Arthur, at Mansfield.

A. H. Dean, of Waverly, Ohio, has closed his store for the last few days, owing to the death of his mother-in-law.

Tom Lewis, who has been out of the drug business for several years, is about to get his old store at Jackson, Ohio, back again.

Chas. D. Kerr, Gallipolis, Ohio, accompanied by his wife, attended the reunion of Cincinnati Consistory Scottish Rite, held at Cincinnate in February.

Spurgeon & Lightner, of Sabina, Ohio, have opened up their new drug store and report a good business. They, certainly, have a pretty store to attract trade.

Dr. O. R. Sifrett has recently purchased the Odaffer drug stock at Marion, Ohio, and moved it to La Rue, Ohio, where he proposes to conduct a general drug business.

Harvey Iler, with Will Martin, Mansfield, Ohio, spent the week at Washington City, in attendance at the inauguration; it wouldn't have been a success if Harvey had not been there.

Dr. Harry Bertolette, Shreve, Ohio, went to Washington City with the Eighth Ohio. Harry is surgeon, and had to go along to take care of his boys—thus combining duty and pleasure.

The MIDLAND has been lately favored with several pleasant calls, among them being: Okey Wyker, of Fredericksburg; R. C. Caslow, Canal Winchester, Ohio; J. H. Moody, Lancaster, Ohio.

C. E. Hildebrand, New Washington, Ohio, is operating a new National Cash Register. Charlie says the drug business is so good that he has to have something to count his cash for him nights.

J. Halliday Cline, Athens, Ohio, has returned from a tour of Florida coast points. The trip was made in the car of the Ohio Fish Commission and was, Mr. Cline states, a thoroughly enjoyable journey.

Walter Kirby, proprietor of India Spice and Drug Company, has purchased the Putnam street store of W. H. Styer at Marietta, Ohio, and will conduct same under the name of The Kirby Drug Company. Mr. Kirby is well known in Marietta and Washington county, and the success of the new company is not doubtful.

Digitized by Google

Morg. Williams, with the Davis pharmacy, at Mt. Sterling, Ohio, was a recent visitor at New Vienna, Ohio, his old home. It is whispered that Morg. has other attractions in New Vienna besides old friends.

On February 24th, at Bellville, Ohio, occurred the marriage of Miss Daisy Switzer, of Bellville, and Edgar Crute, of Columbus. The happy couple left on the evening train for their future home in Columbus.

Reinhard Wissler, of Chillicothe, Ohio, not wanting to get behind, has just finished papering his store with elegant wall paper, of latest design, which does much toward making his store a thing of beauty.

Mr. James Lytle, of Beagle & Lytle, Marietta, Ohio, has returned from Colorado. Mr. Lytle was called to Denver by the illness of his brother-in-law, Mr. Clell. Latchlaw, whose illness terminated fatally.

S. D. Povenmire, of Ada, Ohio, has purchased the drug store of W. G. Dawson, Laurelville, Ohio. Mr. Povenmire is well known to the drug trade and we predict a bright future for him in that thriving little town.

And still they continue to improve, and among the rest is Chas. Ridgway, of Cedarville, Ohio. Charlie has just completed a very artistic job of papering, which adds a great deal to his already attractive drug store.

E. C. Fleming, the veteran druggist of Xenia, Ohio, is confined to his home with an attack of heart trouble. When last heard from he was some better, but his friends have been quite uneasy. We hope to hear soon of his recovery.

Geo. Giffin and Dr. Mackall have purchased the store of Hornbrook, Son & Co., Barnesville, Ohio. Mr. Giffin has been the manager of the Hornbrook pharmacy for several years and patrons of the store will find nothing changed but the name.

"King Grippe" has played havoc with the drug trade lately. Among the victims have been: J. A. Kumler, Baltimore, Ohio; F. M. Paul, Basil, Ohio; F. P. Hale, Bellevue, Ohio; V. O. Peters, Shelby, Ohio; Will M. Barton, Mansfield, Ohio, and P. H. Reed, London, Ohio.

W. B. Foye, the druggist, of Marion, Ohio, who for many years conducted a store in that thriving city, and who was well known to the drug trade generally, is dead. Mr. Foye will be missed greatly, his peculiarities in personality having made him a man of much force.

T. J. Webber, Plymouth, Ohio, after a severe siege of typhoid fever, has been able to be around the store for a couple of weeks. On the sixth he had to quit again, tonsilitis having grabbed him this time. Mr. Webber has been having more than his share of sickness this winter.

The American Soda Fountain Company, of Boston, has issued a very handsome illustrated pamphlet, which they are mailing to the drug trade in this section. Those of our friends who are contemplating any changes in soda water apparatus will do well to give it careful attention.

We wish to express our sympathy for J. A. Herlehy, of Chillicothe, Ohio, who has recently lost his father, aged eighty-four years; also for Mr. Will Sulzbacker, manager for R. H. Lansing & Co., of Chillicothe, Ohio, who recently lost his mother. She had a severe attack of paralysis, which later caused her death.

C. N. Lorey, of Washington C. H., has sold his store to R. M. Hughey of that city, and the business will be continued under the name of Hughey's drug store. He has secured the services of Homer Corn, formerly with C. B. Henderson, Athens, Ohio, and D. V. Donan, who has been with Mr. Lorey. These gentlemen are well known in Washington and we predict their efforts will be successful.

R. H. Birnie, of Marietta, Ohio, familiarly known as "Bob," has purchased the store of J. S. Snyder, at Macksburg, Ohio. Mr. Birnie was for a long time with J. W. Dysle & Co., at Marietta, and for a time "pharmacist in charge" with Styron, Beggs & Co., at Newark, Ohio. Mr. Birnie brings youth, energy and ability to an old store, and will doubtless conduct a pharmacy the citizens will appreciate.

L. L. Dittoe, Somerset, Ohio, had a narrow escape from serious injury about the middle of February. He was standing on a ladder when the ceiling, which had become loosened, fell on him. The only thing that saved him was the fact that he had gone half way to meet it. After standing on his head and shaking a half-bushel or so of plastering out of his clothes he found he was none the worse for the experience.

We very much regret to state the death of Norman T. Boggess, son of T. N. Boggess, of Huntington, W. Va., which occurred Thursday, February 28th, at 6:30 P. M., from typhoid fever. Norman was a

Digitized by Google

young man of exemplary habits and high ability. His loss will not only be felt by his parents and friends but the drug business of Huntington has lost one of its brightest and best pharmacists. Our sincere sympathy is extended to his bereaved parents.

We regret to chronicle the death of Luther Dennison, which occurred at Waldo, Ohio, on February 25th. Mr. Dennison has been long engaged in the drug business most of the time at Marion, Ohio, and has been well and favorably known in the trade. He recently took charge of a store opened by W. H. Mohr at Waldo, where he remained until his death. Mr. Dennison was a druggist of the old school, a man of high character, whose place will not be filled. He belonged to a type of pharmacists which is disappearing and which the conditions at the present time do not tend to perpetuate. We extend our sympathy to Mr. Dennison's close friends in their bereavement.

COLUMBUS NOTES.

Mr. L. Steinfeld has returned from an extensive visit to Baltimore, Md., and other eastern cities.

George Myers, who formerly conducted a drug store at Milo, Ohio, is now clerking for Wm. G. Wright, at Cleveland avenue and Long street.

Mrs. Rose Case has so far recovered from her recent illness as to be removed from the Protestant Hospital to her home, at Long and Twenty-first streets.

Theo. B. Ellis, the enterprising druggist, at Champion avenue and Main street, is about to open a new store, at Ohio avenue and Oak street. The new place will be fitted out with the very latest drug store furniture and a complete line of drugs, toilet articles, etc.

G. Lindeman's drug store, on High street, Columbus, was visited by a disastrous fire on the night of February 28th. The stock and fixtures were so badly damaged by both fire and water that they will be a total loss. Mr. Lindeman carried about $500 insurance. The fire was of mysterious origin.

FIRE CAUSED BY SUN'S RAYS.—"Old Sol" caused a startling and peculiar disturbance in the show-window of the drug store of C. F. Beck, at High and Fulton streets, at noon on Tuesday. His rays were refracted by a large blne display globe, which was inadvertently placed at an angle where it received them direct. In a few minutes a pile of advertising matter in the window was blazing and the flames were rapidly making their way toward the windows. Mr. Beck was looking toward the front door, when his attention was called to the windows by a tiny stream of smoke issuing from several large pasteboard advertising boxes. Thoroughly surprised, he at once stepped up to the smoking articles and attempted to pick them up, but instantly withdrew his hand in consternation, for he had received a painful burn without coming near or in contact with a flame. Investigation soon disclosed that he had passed his hand between the boxes and globe in such a way as to receive the refracted rays and the consequent intense heat. He then pushed the boxes from the window and easily smothered the flames. Had Mr. Beck been behind the prescription case when the articles became ignited the incident might have assumed a more serious phase. Mr. Beck suggests that his fellow druggists profit by his experience and exercise care as to the location of the customary drug store display globe.

—*Ohio State Journal, Feb. 22.*

-NAVICULINE-

Every Horseman Knows its Merits.

I will guarantee Professor Mannington's Celebrated Naviculine To cure lameness, no matter how caused, quicker than any other preparation in the market. It is the most powerful paint that has ever been used for Splints, Spavins, Curbs, Bowed Tendons, Knuckling, Weak Kidneys, Shoulder Lameness, Buckshins, Quittor, Navicular Disease, Sprung Legs, Ringbone, Saddle Galls, Shoe Boils, Farcy, Windgalls, Founder Scratches, Grease Heels, Overreach, Thoroughpin, and all bony enlargements, etc. This paint has been used at Newmarket, England, G. B., with immense success; it penetrates muscles, membrane, and tissues to the very bone itself.

☞ **NOTICE!**—Horses entered in valuable stakes may continue their regular work whilst using this valuable preparation. It will not blemish or destroy the hair on any part to which it is applied. Horses need not now be kept standing in the stable eating their heads off through lameness; it is absorbent and exercise assists action thereof.

Blisters, Liniments and Embrocations are counter-irritants, not absorbents, being composed mostly of grease; it is impossible for them to reach the muscles, tendons, joints, and absorbent glands. "**NAVICULINE**" will reach them all; it does not contain any grease. Ask your druggist to order it for you; he will do so; it is invaluable to Horsemen, Trainers, Stockraisers, Farmers, etc. Be sure and ask for Professor Mannington's Celebrated "**NAVICULINE,**" Yellow Label.

Many well known Owners and Trainers have used this valuable preparation, and will testify to its merits.

PRICE, $3.00 PER BOTTLE.

OHIO BOARD OF PHARMACY.

The next examination of this board will be held at the Chittenden Hotel, in Columbus, on Tuesday and Wednesday, May 14th and 15th, 1901.

Applicants for this examination will take due notice that no applications for it will be accepted unless they reach the office of the board by six o'clock on Thursday, May 9th. Application blanks and circulars of information may be obtained from the secretary.

W. R. OGIER,
Columbus, O.

ANSWERS TO QUERIES.

"B." Springfield—A normal solution is one in which the molecular weight of the substance dissolved represents the number of parts of the substance in 1.000 parts of distilled water. For example, the molecular weight of Potassium hydroxide is approximately 60, and a normal solution should contain 60 parts of that substance to 1.000 parts of distilled water.

"J. J. M." Cleveland—If you have served three years in the U. S. Hospital service and during that time have been actually engaged it the dispensing of medicines you may receive credit for the time so spent on the four years legal requirement for examination as pharmacist by the Ohio Board of Pharmacy. Satisfactory evidence of service as above would be required from commandants of posts wherein you have served showing the capacity in which you were engaged.

NORTHERN OHIO DRUG ASSOCIATION NOTES.

Lively Row—Druggists' Association and W. G. Marshall are Fighting.

W. G. Marshall, druggist, at 261 Superior street, and the Cleveland Druggists' Association are in a fight. Marshall has announced that he will pay no further attention to the association's price list, but will sell at any price he sees fit. Marshall says the association has begun its end of the fight. He declared Monday the Cleveland jobbers would not supply him with goods any longer.

The association is composed of nearly all the druggists in Cleveland. It makes a price on everything handled by druggists.

—*Cleveland Press, Feb.* 11.

[SEQUEL TO FOREGOING.]

Resolved, That all Cleveland district members of the N. O. D. A. be permitted to meet all cut prices until further notice.

Resolved, That it is the sense of this meeting that no member be allowed to use the words "Cut prices" or "Cut rates" in any manner of advertising that he may employ, and that he shall *not* publish said prices except by signs attached to goods in window display, and provided further, that members *be permitted* to advertise goods by bulletin *inside* window or store.

* * * *

The fact that you may meet competition in prices does not imply that *you* are to sell *your* goods at cost. It simply means, use your own judgment in meeting cut prices and quote such figures as will be most satisfactory to *yourself* and to *your* trade.

The uniting into District Clubs, for maintaining local prices is most strongly urged.

* * * *

Cards are now issued to *all* firms who place themselves on record with this association.

When a salesman fails to produce the current N. O. D. A. card it is an indication that his firm is opposed to protecting your interests. When a special salesman (who has association card) fails to obtain the membership stamp on each order, it shows that his firm is not living up to their contract, and should be a warning to you to protect your interests. Please *demand cards*, and please *stamp all orders* given to special salesmen *who have cards*.

* * * *

IT IS WELL—
To have patience,
To have faith,
To have confidence,
And to be loyal.

Prospects were *never brighter* than they are *at present*, and trivial obstacles cannot retard the course of events.

Remember, that the question of prices is passing beyond the control of cutters into the hands of manufacturers and courts of record.

A member in the Knockers Club pointed out a lady who was passing the Boston Oyster House and said: ,'I owe a great deal to that woman." We afterwards learned that the woman was not his wife or his mother, but his landlady.

JUST AS GOOD WEST OF THE MISSISSIPPI AS IN NEW YORK.

People everywhere are interested in the New York Rapid Transit Tunnel.

Give your customers a chance to get better acquainted with the greatest undertaking of the age. The progress of New York in the matter of Rapid Transit, is being watched by the entire world. This window display will give any one a clear idea of the most important station of the system.

Our facsimile of the 23d Street Station of New York Rapid Transit Tunnel is the most remarkable window display ever offered the retail drug trade. If you care to increase your trade this window display will do it for you.

In actual size this window display cut out is five feet long by three feet high. It is an exact reproduction in fourteen colors of the 23d Street and 4th Avenue Station of the New York Transit Tunnel.

Send us an order through your wholesaler for one gross of small size Abbey's Salt, or its equivalent in the larger sizes, and we will include in the order one of the cut outs.

ABBEY'S SALT is sold in three sizes, retailing at 25c., 50c., and $1.00 per bottle.
Trade List on application.

THE ABBEY EFFERVESCENT SALT CO., 9-15 Murray Street, New York.

TINCTURE OF OPIUM.

By F. G. Butler, Ph.G., *Bulletin of Pharmacy.*

The Pharmacopœia for 1900 should and no doubt will contain more practical, lucid, and sensible formula for the preparation of tincture of opium. In the first place, we should have a formula that would represent the medicinal properties of opium, without the narcotic and odorous principles and the unnecessary coloring matter. In the second place, assayed, granulated opium should be substituted for the powdered opium now used.

Opium contains twenty or more alkaloids, and one of these is narcotine. It exists in opium chiefly, at least, in the free state, and left behind in considerable quantity when the drug is macerated with water. It is white, tasteless, insoluble in cold water, and soluble in alcohol and ether. It is present in opium to the extent of from 6 to 9 per cent. It is true that water extracts narcotine partially from opium in consequence of the acid which the drug contains, either free or combined with narcotine; but this is but small percentage.

Narcotine is said to be the most depressing and nauseating of all the constituents of opium, and is a very objectionable constituent of the present tincture of opium. Besides the alkaloids, opium also contains an odorous principle, wax, and some fatty and resinous matter of high color but of medicinal inactivity; and these are all extracted by the present official formula, resulting in a very black tincture of disagreeable odor and taste.

The last revision gave us the formula for tincture of opium as follows:

Powd. opium (No. 80 powder)	100 Gm.
Precipitated calcium phosphate	50 Gm.
Water	400 Cc.
Alcohol	400 Cc.
Diluted alcohol.....sufficient to make	1000 Cc.

Rub the powders in a mortar, with the water previously heated to 90° C., and macerate for twelve hours; then add the alcohol, mix thoroughly, and transfer to a percolator, etc.

The calcium phosphate is added to aid in disintegrating the opium and to assist in the process of percolation, but the quantity used has little or no effect and percolation is almost impossible. Besides, the addition of alcohol before percolation is unnecessary, for opium yields all its virtue to water and by adding the alcohol then the inert resinous and coloring matter, and all the narcotine, are extracted. Therefore, I recommend the following formula:

Assayed granulated opium	100 Gm.
Cold water	500 Cc.
Alcohol	500 Cc.

Macerate the opium for twenty-four hours with 400 Cc. water; transfer this to a percolator and allow percolation to proceed slowly, adding sufficient water to make the finished percolate measure 500 Cc. To this percolate add the 500 Cc. of alcohol and mix the whole.

A tincture made in this way will be light-colored; inodorous, palatable, and of the same strength as the present tincture; and, moreover, it will not produce the depressing and nauseating effect characteristic of the present tincture.

Free Want Column.

Notices for sale, wants, etc., will be published free of charge for three months. After the expiration of that time we will have to make a charge of ten cents per line. If parties wish the same to continue, we ask that they kindly advise us.

Answers, to receive attention should be directed to the addresses given.

Advertisers will please notify us to discontinue advertisements, if their "wants" have been supplied prior to three months.

The Midland Druggist is constantly having inquiries for Registered Pharmacists. Those wishing positions of this nature will find it advantageous to avail themselves of these free columns.

WANTS.

WANTED—A reliable registered pharmacist, good salesman, experienced. One that can speak German preferred. In large town of Central-Southern Ohio. Good wages to right party. Address, with references, J. M., care Midland Druggist. Jan.-3t

WANTED—To exchange drug store with line of mixed paints, wall paper and school books, located in small town, invoice about $1,500, for a city store or located in a larger place. Will pay cash difference not to exceed $2,000 additional. Or will move present stock to new location in larger place. Address T. E., care Midland Druggist. Feb.-3t

WANTED—Drug stores to sell on commission. No charge made to those wishing to buy established drug stores. Registered Pharmacists furnished free. Correspondence invited. Enclose stamp for reply. National Drug Agency, Lima, Ohio. Feb.-3t

WANTED—Pharmacist, Registered in Ohio. Accustomed to work in a small town. Give age, experience and references. Address H. A. M, care Midland Druggist. Feb.-3t

WANTED—A first-class, experienced, registered pharmacist to manage a good store in a town of 10,000. Prefer a man 30 to 40 years of age. Good salary to right party. Address with references, J. W. M., care Midland Druggist. Mar.-3t

WANTED—A registered pharmacist about April 1st. A reliable, experienced man required. References wanted. Address S. Ph., care Midland Druggist. Mar.-3t

WANTED—An honest, energetic assistant pharmacist in a town of Southern Ohio near Cincinnati. Address with reference, F. B., care Midland Druggist. Mar.-3t

WANTED—A reliable, registered pharmacist with experience. In one of the best towns in Northern Ohio. Address G. J. K., care Midland Druggist. Mar.-3t

WANTED—An established drug business in Ohio town of 2,000 to 5,000. Give particulars as to sales, expenses, etc. Address C. S. T., care Midland Druggist. Mar.-3t

WANTED—Assistant drug clerk; young man; need not be registered; salary reasonable; eastern Ohio. Address C. C. B., care Midland Druggist. Mar.-3t

WANTED—A power ice crusher and two steel or copper fountains. Address R. D. Co., care Midland Druggist. Mar.-3t

FOR SALE.

FOR SALE—An old established drug store in town of 1,300 in Northwestern Ohio. Best location in town. The only soda fountain. Telephone and laundry agency. No cut prices. Invoice about $1,800. Address B. B., care Midland Druggist. Jan.-3t

FOR SALE—Drug store and physician's residence in Dayton, Ohio. Store at invoice about $1,500. Property a double brick of 13 rooms, office and store room. Heated by hot water; bath, both kinds of gas, etc. Reason for selling, death of the doctor. Address M. H., care Midland Druggist. Jan.-3t

FOR SALE—Drug store in town of 500. Good opening for physician. New railroad being built. Address T. M. B., care Midland Druggist. Feb.-3t

FOR SALE—Only drug store in town of 800 in Northern Ohio. Established 40 years. Modern stock and fixtures. Best location and room in the town. Retirement from business cause for selling. Address E. S., care Midland Druggist. Feb.-3t

FOR SALE—Drug store in Dayton, Ohio. Corner room, plate glass front, good neighborhood. On paying basis. Excellent chance for increasing business. Good soda stand. No unsalable stock. Rent reasonable. Will invoice $2,000. Reason for selling, ill health and other business. Address P. W., care Midland Druggist. Feb.-3t

FOR SALE—Drug store worth $1,000 in good town of 800 people, on C. H. & D. Railway. Health and outside affairs compel the sacrifice. Address E. A. S., care Midland Druggist. Feb.-3t

FOR SALE—Drug store in town of 13,000, doing a good business, an old established stand. Reason for selling, sickness. Address W. W. S., care Midland Druggist. Feb.-3t

FOR SALE—Drug store in good county seat town, doing a fair business. Rather of a neighborhood store but quite steady. Reason for selling, want to practice medicine. Address C. E. S., care Midland Druggist. Feb.-3t

FOR SALE—Drug Store. Central Ohio. Good business. Reason for selling, ill health. Modern furniture; fresh stock. Invoice $3,000. Liberal discount for cash, or will invoice for part cash, balance payments. Address R. C., care Midland Druggist. Mar.-3t

FOR SALE—Drug Store in town of 3,000 in Northwestern Ohio. Complete, fresh stock of drugs, wall paper, books. Soda fountain if wanted. Good schools, churches, trunk railroad, water works, electric lights, paved streets. Will invoice about $3,500. Will sell at a bargain if soon. Address F. D., care Midland Druggist. Mar.-3t

FOR SALE—A set of modern recess label shelf ware in good condition; one engraved, show globe, three sections; show case; prescription scales, etc. Address E. W., care Midland Druggist. Mar.-3t

FOR SALE—Drug Store, only one in town of 2,500, near city. Good location; paying business. Will invoice $2,000. Will sell at a bargain. Address P. P. W., care Midland Druggist. Mar.-3t

Digitized by Google

FREE WANT COLUMN—Continued.

FOR SALE—Drug Store; recently refitted with modern fixtures. In one of the best towns in Central Northern Ohio. Will invoice about $4,000. Will sell at a bargain. Address J. W. M., care Midland Druggist. Mar.–3t

FOR SALE—Two soda fountains, one 8 syrups and one 26 syrups, with tanks, counters, holders, marble slabs, complete. Address J. F. M., care Midland Druggist. Mar.– t

FOR SALE—Drug Store in small town in Northwestern Ohio. Good farming community. Established cash business. No competition. Invoice about $1,500. Address J. H. C., care Midland Druggist. Mar.–3t

FOR SALE—Drug Store in a town of 500; a medical resort. Room 18x40 feet; residence of 8 rooms in rear. Will rent both for $100 per year. Will invoice $800 or $900. Will sell for $600. Must sell on account of ill health. Worth investigating. Address H. M. F., care Midland Druggist. Mar.–3t

FOR SALE—Three eight foot, glass front, marble top counters with show cases, rounded front and metal frames. In good condition. Will sell cheap. Address H. L. B., care Midland Druggist. Mar.–3t

FOR SALE—Drug Store in good country town, about 1,200, one other store; business fair but could be trippled. Will run about $1,200. Address S. J. P., care Midland Druggist. Mar.–3t

FOR SALE—At a bargain, 2 four section 3 gal. show bottles, engraved; Wayne pattern. Also 2 plain 2 gal. pineapple shape show bottles. Address S. H. M., care Midland Druggist. Mar.–3t

FOR SALE—Soda fountain, originaly cost, $1,200. Good condition. Tanks and everything complete for starting. Will sell cheap. Address A. B. H., care Midland Druggist. Mar.–3t

SITUATIONS WANTED.

SITUATION WANTED—By a registered pharmacist, several years experience, thoroughly competent. Reference furnished. Address H. R., care Midland Druggist. Jan.–3t

SITUATION WANTED—By a practical druggist of over five years experience as proprietor and manager. Have recently sold store. Best reference furnished. Address E. T. A., care Midland Druggist. Jan.–3t

SITUATION WANTED—By a registered pharmacist, 24 years of age. German and English. Experienced as clerk, manager and proprietor. Address W. J. F., care Midland Druggist. Jan.–3t

SITUATION WANTED—By a registered pharmacist; young, married. 7 years experience in city and country. Best of references. Address H. T. K., care Midland Druggist. Jan.–3t

SITUATION WANUED—By a pharmacist registered in Ohio and Indiana. Long experience. First class references. Single. Address L. M. T., care Midland Druggist. Jan.–3t

SITUAUION WANTED—By an assistant pharmacist. Expect to be full registered at January examination. Experienced. Address T. A. M., care Midland Druggist. Jan.–3t

SITUATION WANTED—By young man as drug clerk, has had two years experience in a retail drug store. Best of reference furnished. Address F. W. S., care Midland Druggist, Columbus, O. Feb.–3t

SITUATION WANTED—By a registered assistant pharmacist, four years experience, graduate of Ada College of Pharmacy. Reference furnished. C. L. W., care Midland Druggist. Feb.–3t

SITUATION WANTED—By a registered pharmacist in wholesale house, or as clerk or manager in retail store. Graduate. Nine years experience as clerk and proprietor, and two years in banking. Toledo, Columbus and local references. Address J. H. M., care Midland Druggist. Feb.–3t

SITUATION WANTED—By a young man, registered. Wholesale preferred. Will do any kind of work for a start. Reference furnished. Address SO_4, Palace Drug Store, Kenton, Ohio. Feb.–3t

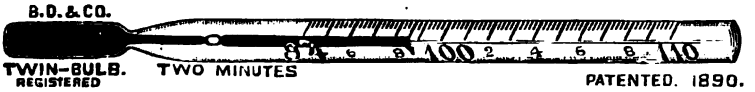
SITUATION WANTED—By a middle aged, registered pharmacist. Several years experience. Address G. W. R., care Midland Druggist. Mar.–3t

SITUATION WANTED—As traveling salesman for wholesale drug firm. Have had 20 years experience in drug business. Address G. K., care Midland Druggist. Mar.–3t

SITUATION WANTED—By a young man; 4 years experience in retail pharmacy. Have completed junior course at Ada college pharmacy. Reference furnished. Address R. C. C., care Midland Druggist. Mar.–3t

In the

BARRY TWIN-BULB THERMOMETER



the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.

If you want to be "right in line" you can get any quantity of these from your jobber—we know he has got them.

Ohio State University Pharmaceutical Association.

O. S. U. Notes.

The pharmacy students have accepted an invitation from Parke Davis and Company, of Detroit, to visit their extensive manufacturing plant. Quite a number have already signified their intention of making the trip, and it is hoped that a sufficiently large number will go in order to get a reasonable rate. We hope to leave here about Friday noon and arrive in Detroit in the evening, spend Saturday forenoon in visiting the factory and the afternoon in seeing the sights of the beautiful city of Detroit, arriving home some time Saturday evening. The trip from Toledo to Detroit will be made on the lake. The trip will be taken the latter part of May, and if any of our readers desire to go with us, please communicate with W. A. Landacre, Dept. of Pharmacy, O. S. U.

—

We received a communication this week from Mr. Charles F. Easterday, '91 (with Harrison and McGee), Wellston, Ohio, where he has been employed for a number of years. Glad to hear of his continual success.

—

Mr. C. J. Logsdon, of the class of '98, was a caller at the University several days ago and left his subscription for THE MIDLAND. We are glad to have old students call and do likewise, but if it is not convenient, enclose your subscription in a letter and let us know where you are and what you are doing. Mr. Logsdon is with J. C. Miller, pharmacist, Dayton, Ohio.

—

About twenty-five members of the Association went down to Elliott's Art Gallery last week to have a group picture taken for the college annual, *The Makio*. The Association then visited the Columbus Pharmacal Company's laboratory and were kindly showu through the departments by Mr. Block, a former student of the University.

—

The members of the Association are well pleased with the pins which were received some time since from New York. The emblem, which is a special design adopted by the Society, is made of gold and enameled with the college colors and presents a very neat and attractive appearance.

Mr. Alva M. Cromley, '97, Circleville, Ohio, was a recent visitor at the University.

—

Mr. Louis Eberle, who has been doing relief work for Mr. Steinfeld, is now permanently located in the prescription department of the Columbus Pharmacal Co.

—

The Department wishes to complete its file of the Druggists Circular and would be pleased to communicate with anyone having the following numbers for sale: August, '93, and February and March, '94.

☆☆☆

The O. S. U. Chemistry Class and members of the O. S. U. P. A. had a most interesting and pleasant trip to Lancaster, Ohio, to study the processes of glass manufacture on March 2nd.

The party numbered about three hundred (300), going by special train, which left the Union Station via the Hocking Valley about 7:30 A. M. Mr. L. W. Buckmaster, City Pass. Agt., personally conducted the party.

The first stop was at the works of the Cole Window Glass Company. The special waited on their siding until everyone had become thoroughly informed as to both chemical and mechanical methods of window glass manufacture. The crude materials are arranged in bins (sodium carbonate, sodium sulphate, sand, arsenic for decoloring, pulverized coke and limestone). It will be noticed that these ingredients give a practical working of the famous "Leblanc process" for soda in the results obtained without the expense necessary if the finished sodium carbonate were used exclusively as an ingredient. If one has special aptness, in three years he can learn the art of blowing the huge glass cylinders which eventually become finished window glass. An expert is expected to blow sixty in a day's work of six hours. These cylinders are allowed to cool, then have their rounded ends broken off by means of a hot glass collar quickly applied, followed by a touch of cold iron. They are next split lengthwise along one side by a hot iron. These split cylinders next go to an oven or furnace, where after a gradual heating they are spread on a large, smooth table of fire clay, which revolving takes them into the annealing oven, then slowly passing in to the cold they are finished by being dipped into hydrochloric acid, which makes them clean and glossy. Everyone was now eager to see glass pressed into various useful shapes.

Digitized by Google

The special next proceeded to the factory of the Ohio Flint Glass Company. Work had been suspended for repairs, but several blowers amused the students by blowing out curious shaped bits of glass, and giving each a chance to try his lack of skill in the art. But here again the numerous details of manufacture must be left to the memory or to the imagination of the uninitiated.

After an hour's ramble about quaint Lancaster, our cars were transferred to the little railroad going to the Boy's Industrial School. Few persons realize how beautifully and picturesquely this is located among its hills, or the completeness of its appointments. Mr. Hillis personally guided a number of the party to the different points of interest, adding to the pleasure by his wit, his careful explanations and patient answers to questions.

The school has thirteen buildings, with about eight hundred and fifty boys, in ages from eight to sixteen ; foreman and attendants raise this number to about one thousand. The boys drill, study and do printing, tailoring, laundering, carpentering, shoemaking, butchering, farming, cooking, etc., in short all the necessary work of the place.

That the Superintendent, with Booker T. Washington, appreciates the value of the "tooth brush as a prime factor in civilization," is evidenced by his recently purchasing twelve hundred for the use of the boys. As a further proof that the institution is thoroughly progressive, it may be mentioned that in four months' time only two boys have tried to run away.

But at last our special returned to Lancaster, and from there to Columbus, and discharged its jolly crowd, each wishing his hearty thanks to those who made the trip so successful. —E. N. W.

☆ ☆ ☆

A regular meeting of the O. S. U. Chemical Association was held on February 14th. Mr. Gore, Assistant in Chemistry at O. S. U , gave an interesting paper on "The Desilverization of Lead."

Mr. Poto also had a paper, entitled, "Recent Advances in Industrial Chemistry." Both papers were valuable, but not of great importance to the pharmacist, so will not be discussed.

The last meeting was held on Thursday, February 28th. The main portion of the evening was given to Professor Weber, who gave a talk on "Oleomargarine." Mr. Kern had a minor paper on "The Utilization of Blast Furnace Slags and Gases." Professor Weber's talk was highly instructive and interesting, and as readers of THE MIDLAND can profit by it, a portion will be given here. In part, Professor Weber said that at the present time the subject of oleomargarine is of great importance, owing to its extensive use and the law pending in Congress to regulate the sale of it. Previous to 1885 four out of five samples sold for butter, on analysis, proved to be oleomargarine. Since then, however, the pure food laws and food commissioners have reduced its illegal sale to a minimum, however, much is sold and used for butter. In 1869 a French chemist made an imitation and it has since been used as a butter substitute, but somewhat modified.

The best fats of beef, the caul fats were taken and extracted at a temperature of 120F. It is known that at higher temperatures a decomposition takes place and the fat becomes strong and rancid ; however, at 120F. the most fusible fats, mostly olein and stearin were extracted ; these, according to the chemist, were then mixed with pig's or sheep's stomachs, to digest the fibren, as he said, but later it was found that it played no part, and at present no such addition is made. The fats were mixed with watered milk and well churned and the produce separated was supposed to be synthetic butter. This is not true, and although not much actual difference occurs in the products—butter and oleomargarine, yet the composition of the fats entering into their formation differ widely. Butter contains eight percent of fats of the volatile acids, mainly butyrin and other fatty acids, which may be estimated by distilling with sulphuric acid. None of the above acids are present in oleomargarine, but it contains olein, palmatin and stearin.

The fats of butter, butyrin, etc., emulsify and break up much easier than olein, stearin and palmatin, and are therefore much more readily digested. In addition, butter fats fuse (or melt) at a lower temperature than oleomargarine fats, hence when taken into the stomach the butter fats melt and are immediately acted upon by digestive fluids, while oleomargarine fat remains for some time in lumps, unmelted and resist the action of digestion.

This is really the objection to oleomargarine as a food, for if once assimilated, it has the same nutrient value as butter. Tests of artificial digestion showed that butter would emulsify in four hours, while oleomargarine did not emusify for over twelve hours.

Digitized by Google

The same fats that are contained in oleomargarine are eaten daily in porter house steaks, etc., but these are cooked, and by the heat become much more digestible than in oleomargarine, where a high heat is not applied and hence the fats are raw. As to the likelihood of bearing germs of disease, the fats of the stomach linings, etc., are more apt to be infected than the product from the milk glands, moreover affidavits can be seen from former employees, that all fats, even trimmings and refuse fats, were used.

The oleomargarine factories are generally very neat and clean, but the original fats are not prepared at the local factory, but are shipped from large packing houses and worked over, colored and sold. The coloring does not seem to be injurious, for annatto color and others not harmful are used, and most butters are also colored. No decomposition takes place in olemargarine and hence the rancidity and strong taste which results from the decomposition of butyrin into butyric acid, never occurs.

It is not advisable perhaps to use oleomargarine if good butter can be obtained, but immense quantities are used, as may be seen by the fact that six million (6,000,000) pounds are consumed in Ohio annually, and the manufacture and demand seem to increase in spite of the revenues, taxes, laws and bad reputation which are laid upon it.

—C. H. K.

To Avoid Mistakes in Filling Prescriptions.

Of course the way to avoid mistakes in filling prescriptions is to keep your mind on your work, or in short, to attend to your business and not think of anything else at the time.

This is very well, but all drug clerks know they cannot always shut themselves up in a private room when filling prescriptions. They are interrupted continually, especially in small stores where they are at times without help.

At a meeting of the O. S. U. P. A., held March 4th, Mr. E. E. Harrold, Manager of the Chemical Store Room, gave a very interesting talk on "What a Pharmacist should be and do to make a success in life," and among other things called particular attention to care in the filling of prescriptions.

As an aid to prescription clerks, who are compelled to leave their work before completion, he suggests the following method of proceedure: After carefully reading the prescription and noting doses, etc., get all the apparatus necessary for the work in hand and then place all the ingredients on the right side of the apparatus. Then as they are used, check them on the prescription and place them on the left side.

In this way, if the clerk should be called away from his work, he could, on returning to it, see at a glance what had been done, and in a store where it is the rule to have prescriptions checked by another clerk, the method could be followed to advantage.

Some clerks like a certain amount of formality so that they can go over the work in the order followed.

No doubt some of our readers will prefer some other method of proceedure, and we must insist that no method will make up for lack of concentration of ones mind on the business in hand.

We offer the suggestion as made by Mr. Harrold, and leave the matter with our readers. We might say that the gentleman has been so situated that it was necessary to fill several hundred prescriptions a day, so that his plan is at least worthy of consideration.

—W. A. L.

Application of Physics in Pharmacy.

When the average young man entering a College to take a course in Pharmacy sees Physics in the list of studies on his card, he will wonder why he has to take it, and what benefit it will be to him. As he takes up Pharmacy in its detail, he will soon appreciate the value of Physics. This science is used in every branch of Pharmacy and to be a skilled Pharmacist a knowledge of it is very essential.

Much of the apparatus used in pharmacy is constructed on a definite principle of physics. The difference in the size of drops of different liquids as compared to a minum is caused by cohesion existing between the molecules of liquids.

Crystallization is the principle that certain solids when forming under circumstances that give freedom of motion to the molecules will take certain definite forms called crystals. From this principle is derived the science of Crystallography. The recognition of a body by its crystalline form is at times a very distinguishing test. To the pharmacist who has a chemical laboratory, the value of a knowledge of crystallography can not be over estimated.

The principal of capillary attraction enters into many operations, sometimes a

Digitized by Google

help, sometimes a hinderance to us. The meniscus of a fluid enclosed in a vessel is the common example.

The common practice of placing freshly burnt charcoal in a room where there is a bad odor, for the purpose of having the charcoal take up the gases, is an application of the principle of absorption.

The process of dialysis is much used in post mortem examinations when seeking for poisons and in other important chemical operations. This process is an application of the principle that crystalline bodies when in solution in the presence of bodies that have no crystalline structure, or colloids, will separate from these colloidal bodies when allowed to diffuse through a porous membrane. The crystalline bodies passing through in solution leaving colloidal bodies as gums, starches, etc., on the membrane.

The balance on the prescription counter and the balance on the dispensing counter are separate examples of the lever. The scissors and pliers are also examples.

The common screw press used for expression is an application of the mechanical advantage of the screw.

The hydraulic press is an application of Pascal's law of transmission of pressure in enclosed fluids.

The distilled water tank is placed on the top floor of the building and water is piped to the laboratory below, thereby utilizing both the principle of liquids seeking their level, and the principle of pressure in a liquid due to gravity.

The barometer is an application of the principle that the atmospheric pressure will sustain a column of liquid.

The common siphon is the principle of liquid seeking a level. Applied percolation involves this principle.

The force pump is a common example of applied physics.

The principle of Archimedes is applied in the important operations of taking the specific gravity of a substance. These related operations are familiar to the pharmacist.

A knowledge of heat and its application in pharmaceutical processes is essential to every well trained pharmacist and many of the most common pieces of apparatus in the laboratory are designed to apply it effectively and economically.

There are quite a number of utensils constructed to make use of the principle of evaporation and boiling.

Every one is familiar with the principle of fusion or melting of solids, and the disappearance of heat during liquification and solution, and evolution of heat during solidification.

The pharmacist should have a knowledge of batteries and the various fluids used in them and how to prepare these fluids.

Using a microscope entails a knowledge of lenses and light rays.

Most well equipped laboratories possess spectro scopes, making necessary a knowledge of spectrum analysis.

The most of these principles are so common as to be unnoticed, but many of them may be recognized when attention is called to them and I think the few I have mentioned are enough to prove the necessity of the study of physics as a part of a course of instruction in pharmacy.

W. S. HANCOCK.

N. A. R. D. Notes.

CHICAGO, March 4, 1901.

It is a pleasure to state that since the publication of Bulletin No. 9, on August 10th last, the "Tripartite Plan" has been adopted by the following proprietors: Allcock Mfg. Co., New York City; Brandreth Co., New York City; Dr. B. J. Kendall Co., Enosburg Falls, Vt.; Donald Kennedy, Roxbury, Mass.; Laxakola Co., New York City; Malt-Diastase Co., (Maltzyme), New York City; Mactine Co., Brooklyn, N. Y.; Medico-Malt Co., Syracuse, N. Y.; Theo. Metcalf Co., Boston, Mass.; A. C. Meyer & Co., Marshall, Mich.; Smith, Kline & French Co., Philadelphia, Pa.; C. W. Snow & Co., Syracuse, N. Y.; Tonsoline Co., Canton, Ohio; Trommer Co., Fremont, Ohio; Vapo-Cresoline Co., New York City; Wells & Richardson Co., Burlington, Vt.; B. O. and G. C. Wilson, Boston, Mass. A complete list of proprietors who have adoted this plan (they number now nearly a hundred) will be furnished upon application to the secretary of the N. A. R. D. "Each of these proprietors has individually stated that he will confine his sales at best prices strictly to a uniform list of jobbers, whom he has selected as his distributing agents; and that his wholesale agents must not sell his goods at any price to aggressive cutters or brokers, either directly or indirectly. The penalty prescribed by each proprietor for the violation of his terms in this or any other respect is his refusal to longer supply his goods to any jobber who may be found guilty of such violation. It is also hoped that the operation of this plan will be extended to proprietary medicines generally by each jobber individually."

—

The proprietors who have adopted the "Tripartite Plan" and thus given evidence of their purpose to lend their powerful aid in minimizing the ruinous cut-rate evil, are entitled to the active support and the hearty co-operation of the wholesale and retail drug trade of the entire country. It is earnestly recommended and confidently expected that both wholesalers and retailers will show their appreciation of this action by furthering the interests of such proprietors. Reciprocity is a time-honored principle, and it is especially appropriate in business matters.

"Other proprietors who have not yet adopted the "Tripartite Plan" are respectfully urged to do so, in the firm belief that the interests of both themselves and the drug trade will be mutually advanced. This movement has already resulted in a material improvement of trade conditions in various localities. Its practicability and efficiency have been thoroughly demonstrated. It is growing stronger and becoming more widespread every day."

—

To any who may be inclined to doubt the efficiency of the tripartite agreement we commend the following extract from the recent letter of a prominent eastern proprietary manufacturer: "There is never a week passes but some party not recognized by your Association as a jobber comes to us, money in hand, offering to buy as much as 100 gross of our preparation, but no amount of money or influence can change us from our course. As you well know there are various underhand ways in which people with easy consciences evade agreements, but there is positively no way to buy our preparation direct except to pay the fixed price, and the purchaser's name must appear upon the confidential list issued with the consent and knowledge of your organization. We are with you from beginning to end."

—

The magnanimous gift of $1,342.00 recently made by the Sterling Remedy Co., in accordance with the easy terms of the offer presented by this firm to the N. A. R. D. at its Detroit convention, is enabling the organization to carry out some plans which the executive committee has long realized were of paramount importance, particularly the work of sending trained organizers into localities where at present no organization of druggists exists. This work is proceeding slowly because the committee considers it necessary that only the very best men attainable should be selected for the work, but it will be pushed vigorously, and from present indications the results will be a source of agreeable surprise to the well-wishers of the movement.

—

In accordance with the usual custom at the beginning of the year, the Secretary is collecting new statistics of the affiliated associations. Prompt attention to the matter of supplying the statistics will be greatly appreciated.

Digitized by Google

Copies of the Constitution and By-Laws, containing all the changes made by the Association at its last convention, will be sent by the Secretary, free of expense, to associations or individual druggists desiring them.

—

As a result of recent vigorous work on the part of the N. A. R. D. a number of aggressive cutters have become convinced that it is to their interest to desist from the hurtful practices hitherto indulged in by them and are now co-operating with neighbors in the trade for mutual advantages.

—

Proceedings for 1900 have been received from the following State Associations: Alabama, Connecticut, Georgia, Illinois, Indiana, Iowa, Massachusetts, Missouri, Nebraska, New Jersey, New York, North Carolina, North Dakota, Oklahoma, Pennsylvania, Tennessee, Vermont, Washington and Wisconsin. Secretaries of other State Associations are urgently requested to send copies of their proceedings to the Secretary of the National Association, Thomas V. Wooten, 153 La Salle St., Chicago, Ill.

—

The fourth by-law adopted by the National Association at its Detroit convention is as follows: "The fiscal year shall be identical with the calendar year, and the dues of the affiliated associations shall be payable at the beginning of the fiscal year. The collection of dues is placed in the hands of the Executive Committee." As the Executive Committee is now planning its work for the coming spring and summer a knowledge of the financial resources it may rely upon is essential. It is hoped prompt attention will be given by associations to this important matter.

—

Again has organized effort triumphed! February 28th the bill reducing war revenues passed both branches of Congress. As is well known, this measure provides for the total repeal of revenue taxes on proprietary medicines, perfumes and cosmetics. Not to detract from the worthy efforts of others, the lifting of this burden of taxation from the shoulders of the drug trade is due to the unremitting labor of the N. A. R. D. Ceaseless agitation on the part of this organization has resulted in the forwarding of such numerous protests by individuals, by groups of druggists and by associations to the National legislature that, although the repeal of the tax on proprietaries was at first regarded with disfavor, the pressure exerted became irresistible. The truth of this statement is well illustrated in the fact that at a time when many interests were clamoring for an audience with the committee of the House and Senate having the matter in charge, the drug trade was the first to receive attention and both Representatives and Senators spoke (in some instances with considerable feeling) of the numerous letters received by them from druggist constituents.

—

An especial meed of praise is due to the work of President Anderson, Chairman Gallagher of the legislative committee, Geo. P. Englehard of Chicago, Chairman M. N. Kline of the N. W. D. A. legislative committee, and Attorney Geo. L. Douglass, who assumed the duties of Chairman DeWitt of the legislative committee of the P. A. of A. All the pharmaceutical journals deserve credit for their help, while the vigorous and well-timed efforts of the *Pharmaceutical Era* should have special mention. To this list should be added also the individual proprietors who contributed to the fund for distributing literature, etc.

Since its organization the N. A. R. D. through its executive officers and individual members has worked indefatigably for the repeal of the stamp tax on proprietaries and if at this time it should toss its cap into the air and relieve its pent feelings by delivering itself of a few yells of satisfaction there should be none to say it nay.

—

Local associations have recently been formed in the counties of Cass, Grant, Wells, Huntington and Vigo, Indiana, by organizers employed by the National Executive Committee. It is the intention to organize thoroughly every populous county in the State. The work has also been started in Southern Illinois and it is expected that the efforts now being made will result in every druggist in the State becoming actively identified with some local organization.

—

Gratifying reports are being received from all points where the good effects of the N. A. R. D. mediation are being felt. A leading druggist of Knoxville, Tenn., writes: "We are getting along finely here. Druggists are maintaining prices to the

Digitized by Google

letter." Knoxville was formerly one of the worst cut-rate towns in the South. The following is from Kansas City, Mo., where for years the druggists have had their own troubles with price cutting: "We have accomplished great work here, and every one is feeling good over the prospects. Aggressive cutting has been eliminated and the word "cut-rate" has been, we think, erased from our dictionary. We hope the good work will become contagious over the country and that the N. A. R. D. will meet with glorious victories everywhere."

—

The work of organization is proceeding in an encouraging manner in all sections of the country. Since last report the following societies have become members of the National Association: Birmingham, Ala., Association of Retail Druggists; Wilmington, Del., Retail Druggists' Association; Cass County, Ind., (Logansport) Druggists' Association; Grant County, Ind., (Marion) Association of Retail Druggists; Hamilton County, Ind., (Carmel) Druggists Association; Huntington County, Ind., (Huntington) Association of Retail Druggists; Vigo County, Ind., (Terre Haute) Druggists' Association; Wells County, Ind., (Bluffton) Association of Retail Druggists; Bay County, Mich., (Bay City) Retail Druggists' Association; Patterson, N. J.. Retail Druggists' Association; Hempstead, N. Y., Retail Druggists' Association; Utica, N. Y., Retail Druggists' Association; La Crosse County, Wis., (La Crosse) Retail Druggists' Association; Berks County, Pa., (Reading) Retail Druggists' Association; Montgomery County, Ind., (Crawfordsville) Retail Druggists' Association.

When you speak in your own praise you add nothing to your reputation.

Powdered Extracts.

Discussing powdered extracts, L. E. Sayre stated that in his experience they will retain their pulverent form with ordinary care if they are perfectly desiccated before bottling. Drying over the water-bath was not sufficient, while drying over sulphuric acid or calcium chloride proved satisfactory. Lyons' plan of making scale extracts is also favorably spoken of.

In order to ascertain the quality of some of the powdered extracts now upon the market, a few were assayed by C. C. Malcolm. A powdered extract of nux vomica assayed 15.5 percent total alkaloids, a powdered extract of belladonna yielded 1.49 percent alkaloids, a powdered extract of aconite contained 1.8 percent total alkaloid and a powdered extract of hyosciamus contained 0.38 percent.—*Druggists Circ.*

"I do not believe in telling a child ghost stories to frighten him when he is naughty. When Clifford is naughty I explain the germ theory to him, and have him look through a microscope at bacteria. It frightens him terribly, and at the same time inculcates scientific knowledge."

The "Allcock" Plasters
ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

CLERKS AND THEIR WAGES.

An esteemed contemporary, *Profitable Advertising*, made an interesting reply to a young man who wrote to it as follows:

"I have a good position and am receiving a fair salary; but being anxious to make more money, I would like to know how I should proceed to secure promotion and a higher remuneration."

The answer was: Let the question of remuneration occupy a second place in your thoughts and work for your employer instead of for your salary. You will not rise to a very exalted position as long as you consider the check you receive on pay-day the only object for which you labor, nor can you reasonably expect promotion while your mind is occupied chiefly with schemes for securing an increase of salary. Success in any branch of industry means close attention and considerable study. It is the reward of intelligent and indefatigable application only, and it is not apt to come to the employee who constantly divides his thoughts between his work and his remuneration.

Many young men and young women make the serious mistake of regarding the performance of the duties of their positions merely as an ignoble means to a noble end, whereas the truth is that the end—the obtaining of money—is really the ignoble part of the transaction; while the means—the proper performance of duty—is the most noble feature of life. The employee who recognizes this important fact is already on the highway to success. He is the individual for whom every employer in the land is searching, and he may rest assured that he is laying a most substantial foundation for the future. He may not be the most able worker in his line, but great ability is of less moment than devotion to duty.

The individual who occupies a salaried position is prone to be jealous of what he calls his "rights." He figures out to his own satisfaction exactly what duties his salary covers, and refuses to go beyond that. If he is asked to do a bit of work outside of his department he quickly observes:

"But I don't get paid for that!"

And if for any reason he is requested to put in a few more hours than usual, he immediately inquires:

"How much will I get for it?"

The natural result of such a policy is that he never advances, but his life becomes one long still-hunt for a position, and he is always wondering why he has no "luck."

In the case of our correspondent, he must first cease scheming to make his position of more value to himself and turn his attention to making himself of more value to his employer. Then he will win the good will and confidence of the latter, and there will be no difficulty about his services receiving adequate recognition in a financial way.

EXAMINATION QUESTIONS—MINNESOTA BOARD OF PHARMACY.

1. How do medicated wines differ from tinctures? How many wines are official? What kind of wine is used in preparing medicines and how is this wine made? From what is vinum ferri amarum made? How much opium in one fluid ounce vinum opii?

2. Describe process of percolation. Why is a narrow percolator preferable for making liquid extracts? What is repercolation, and what is its principal object? Give an illustration where repercolation is desirable. What is dialysis and how is dialyzed iron prepared?

3. How much arsenous acid in 1000 Cc. Fowler's solution? How much spirits of camphor could be prepared from 50 G. camphor? How much bichloride of mercury would you use in preparing 3 pints solution 1 in 1500?

4. Having one-half pound official blue ointment, how would you proceed to make "ung. hydrarg ½" and how much could you make? How much 4 per cent. solution of cocaine can be prepared from 2 oz. of 10 per cent. solution? Reduce 15° C. to F.

5. What is litmus paper, and how are the different colors made and for what used? What is antitoxin and how administered?

6. (*a*) State the difference between a physiological and a chemical antidote. (*b*) Give an example of each. (*c*) Name the antidote and state to which class the antidote belongs for the following poisons: (*d*) Corrosive sublimate; (*e*) acetate lead; (*f*) strychnine; (*g*) arsenic; (*h*) atropia; (*i*) nitrate silver; (*j*) oxalic acid; (*k*) morphine.

7. Give the official names and chemical formula of the following: (*a*) Green vitriol; (*b*) blue vitriol; (*c*) white vitriol; (*d*) oil vitriol. (*e*) From what source are the following acids obtained: (*f*) Carbolic; (*g*) lactic; (*h*) tartaric; (*i*) salicylic; (*j*) oxalic?

8. Define: (*a*) Acid; (*b*) alkali; (*c*) salt. (*d*) Name three examples of each; (*e*) give outline of how each is made.

9. Why does U. S. P. direct—(*a*) Citrine ointment to be prepared without the use of a metallic spatula? (*b*) liq. potassa to be in bottles with stoppers coated with paraffine? (*c*) to avoid trituration or pressure in making troches of pot. chlorate? (*d*) that permanganate of potassium should not be brought in contact with organic substances?

10. State whether the following are simple or chemical solutions: Liq. calcis; liq. ferri chloride; liq. ferri tersulph; liq. hydrarg. nitrat.; liq. iodo compositus; liq. magnes. citrat.; liq. pot. arsenitis.

1. How many grains in one ounce troy? How many in one pound?

2. How many grains in one ounce avoirdupois? How many in one pound?

3. How many ounces in one gallon wine measure? How many minims?

4. How many ounces in one gallon imperial measure?

5. How many grains in one gramme? How many cubic centimeters in a fluid ounce?

6. Does a drop and a minim of laudanum represent the same quantity? If not, state the difference.

7. How are fluid extracts prepared; what per cent. of the drug do they represent?

8. How many grains of cocaine in one ounce of 4 per cent. solution?

9. How is tartaric acid made, and from what?

10. What is an acid?

11. Give strength of tinct. opium and its dose.

12. Give Latin names for foxglove, deadly nightshade, thoroughwort and Culver's root.

13. What is Monsell's solution?

14. What is the source of magnesium salts; how is epsom salts made; how much would you sell for adult dose?

15. Define materia medica. Define botany.

16. Describe petrolatum, state its source and uses; what impurities is it liable to contain?

17. What antidotes would you recommend for each of the following poisons: Digitalis, opium, acetic acid, strychnine and aconite.

18. Name an officinal drug under each of the following descriptive heads: Antispasmodic, caustic, narcotic, tonic, vermifuge, cathartic.

19. Name four officinal preparations of mercury and give doses of same.

20. Name three important alkaloids of cinchona.

21. Name two important alkaloids of opium.

22. State how you would prepare an eight-ounce emulsion of cod liver oil so as to represent 50 per cent. of oil.

23. Give dose of powdered opium.

24. Name ingredients of Dover's powder and give dose.

25. Give common name for each of the following drugs: Sanguinaria, tartrate of soda and potash, lini farina.

26. What is a dispensatory?

Candidates using solvents, excipients and emulsifiers not called for in the prescrip-

   Sig. One every three hours as directed.

The board also gives an oral examination and one in pharmacognosy.

Success is simply the ability to do what you can do well.

Copper in Tinct. Nux Vomica.

Recently one of our members consulted me as to the following mixture:

℞ Tinct. Nucis Vom ..... ℥ii
Sp Ammon. Aromat..... ℥iv
Sy. Chloroformi ..... ℥ii
Aq. Menth. Pip.....ad ℥vi

This is an incompatible mixture. When dispensed the mixture has a slightly yellowish, white, milky appearance, which on standing, slowly changes to a greenish blue color. This change of color in the hands of the patient raised suspicion amounting to a complaint that the medicine was wrong, and, although dispensed again with a similar result, the patient refused to be satisfied, and demanded the return of her money. The question was, Why did the mixture change color?

A few experiments showed that the change of color was due to a reaction between the tincture of nux vomica and the aromatic spirits of ammonia. The mixture was dispensed with eight samples of tincture of nux vomica from different makers, and in every instance the same change of color took place, though in varying degree. Some of the tincture was evaporated to dryness and ignited, and the residue tested for copper, of which a minute, almost doubtful, trace was found to be present. One fluid ounce of liquid extract of nux vomica was evaporated to dryness, ignited and tested for copper, which was easily proved to be present, and obtained on a polished steel wire in the metallic state. It was quite evident, therefore, that this copper in the nux vomica was the cause of the color.—*J. Rutherford Hill, British Pharmaceutical Society.*

The United states and Canada consume 21,000 tons of rubber annually.

YOUR WINDOW

Will attract or repel trade. It all depends how you dress it. We can help you make it attractive. Our "**Palmo Tablet**" displays are novel, unique and original. We furnish them to only one dealer in a locality.

BLINDNESS AND DEATH FROM DRINKING OF ESSENCES OF GINGER, PEPPERMINT, Etc., DUE TO METHYL ALCOHOL.*

BY HERBERT HARLAN.

In 1897 Dr. A. G. Thompson reported a case of complete blindness due to the drinking of essence of ginger. About that time we began to see these cases in Baltimore, Hiram Woods reporting six such cases in the *Ophthalmic Record* for February, 1899. Their novelty excited a good deal of interest. It has been the habit in local option neighborhoods for a long time for people craving alcohol to substitute the various alcoholic essences when the ordinary forms could not be obtained. And that cases so striking as complete blindness should have escaped notice and publication was unaccountable. Such cases must have only been occurring recently.

In 1898-9, cases of blindness and death from drinking methyl alcohol were reported by Kuhnt, McCoy & Michael, Moulton, Holden, Gifford, Patillo, Callan and others. The very first on record, however, being that of Viger, which was generally overlooked, being published in *l'Annee Medicale*, June 1877. There is a striking similarity in the symptoms of all these cases and, as will be seen later, they are the same when the essences of ginger and peppermint were the beverages used. In Viger's case, an hour after drinking, there came on intense headache, vomiting, profuse sweating, dilation of pupils and delirium. Next day the delirium was gone, but there was complete blindness. After a week sight began to return, and at the end of six weeks the patient could see to get about. Subsequently he became entirely blind. This may be taken as a typical case where a full dose either of more or less impure wood alcohol, or one of the essences were taken.

In some cases when the dose was large or taken on an empty stomach, death ensued in a few hours. Some others, where the dose was small, entirely recovered. In most cases there was violent sickness, then blindness, then some return of sight, then complete blindness with optic nerve atrophy.

The consumption of wood alcohol by manufacturing druggists has increased enormously in the last decade. It can be bought wholesale for 75 cents a gallon of 95 p. c., 80 cents a gallon of 97 p. c., while the ordinary 95 p. c. ethyl alcohol costs $2.45. When it is remembered that these essences contain about 95 p. c. of some sort of alcohol, it is easy to understand the temptation for an unscrupulous manufacturing druggist to use the cheap and poisonous variety.

I was satisfied in my own mind that such was being done. To prove it was another matter.

On March 6th, O. O. aet. 28, from Crisfield, Maryland, was admitted to the Presbyterian Eye, Ear and Throat Hospital. The history was, that on election day the previous November, he had drunk seven bottles of Jamaica ginger and was made drunk by it. He was, however, able to walk home in the evening, a distance of two miles. The family state that he drank seven more bottles and then went to bed. He was very sick and knew nothing till three days later when he woke to find that he was almost blind, but could see to get about. His vision slowly decreased till about February 1st. Since which time it has been stationary.

On admission he could see light and large objects in an uncertain way. The ophthalmoscope showed optic nerve atrophy. The treatment was strychnia and pilocarpin sweats each night. March 19th, he counted fingers at three feet. But as is usual in these cases there was a good deal of variation in his vision from day to day. He left the hospital March 27th, and the note, on that day is little if any impovement in vision. I wrote to Dr. G. T. Simonson, of Crisfield, and he very kindly obtained for me a sample of the same package of Jamaica ginger from which O.'s supply had come. Dr. S. writes me further that O. later became entirely blind. The ginger was made by a well known wholesale drug house of Baltimore.

N. B. D. aet. 30, American, single, of Circleville, W. Va., came to the same hospital April 19th, 1900. He gave a history of going on about six sprees a year. When he could not get whiskey or brandy he drank drugs—as essence of cinnamon, of peppermint, of lemon, or "hot drops."

Sometimes he would go for a month without drinking. Then he would drink for a week at a time. He had used tobacco continuously for the last seven years by chewing, snuffing and smoking. His present trouble began in May, 1899. On a Saturday he drank three bottles of ess. of peppermint, and a part of a bottle of ess. of lemon. The next day he felt "unnerved," sick and stupid, and his eyesight

Duffy's Pure Malt Whiskey.

The standard medicinal Whiskey of the age; a great tonic and stimulant; an invaluable remedy for Consumption and all affections of the lungs and bronchia; a specific for grip, coughs, colds, malaria, and all forms of indigestion and dyspepsia; the only Whiskey taxed by the Government as a medicine. "It makes the weak strong, and the strong stronger."

Sold and recommended by all Druggists.

The Duffy Malt Whiskey Co.,

Rochester, New York.

began to grow dim. The dimness increased and by Wednesday he could only distinguish light from darkness. Under the treatment of a local physician his sight grew better.

Examination showed both nerves to be atropic. The fields were small and irregular. The central vision was 5 cc. in each eye. His treatment was pilocarpin, strychnia and later Kal. Iod. His fields improved materially and the central vision a little, being when he left the hospital on June 6th 6 cc. in the right and 7 cc. in the left eye.

He brought with him to the hospital about half of one of the bottles of peppermint. It was put up by the same firm as the ginger bought in Crisfield. In a daily paper of September 6th I saw an account of the death of two men at Fawn Grove, York Co., Pa. I wrote to Dr. V. Hawkins of that place in hopes that he could give me some details. He wrote me a most interesting letter, giving an account of the drinking, of the symptoms manifested, including blindness in one case, and of the death of the two men. He volunteered further the name of the manufacturer of the ess. of ginger drunk. It was the same Baltimore firm as in the other cases. Later he obtained quite a large supply from the Fawn Grove store.

Samples in similar bottles and with like labels were obtained from Harford County and other places.

Proper Colors for Medicine Bottles.

The use of colored glass for bottles has recently been investigated by H. J. Moller, Copenhagen, and in an article lately published by the German pharmaceutical society he describes the proper colors for bottles which are to contain medicines, liquors, or other substances. In order to procure protection for the contents from the chemical action of the light, a glass of dark color is used, and the best for this purpose are black (opaque), red, orange and dark yellowish brown. Next to these in the matter of protection stand light brownish yellow, dark green—that is without a bluish tint, and dark brownish green; while bluish green, violet, milky, bluish and colorless glass offer but little protection from the actinic rays of the sunlight. For preserving wine, beer and liquors a glass of dark yellowish brown or dark brownish yellow is the best.

LOADED SPONGES.

It has been called to the attention of the *Reporter* that the practice of loading Florida sponges is again in vogue. This is a practice which comes into prominence every few years, and it is the most regretted deception to which sponge buyers are subjected. It is now about two years since the present loading movement set in, and the loading has been indulged in to such an extent that it, in some instances, now amounts to fully fifty per cent of the weight of a bale of goods. Most of the large sponge houses are honestly desirous of giving up the practice, but are, to a certain extent, compelled to load at least part of their goods, not only to compete with concerns who have no scruples in the matter, but also because there is a demand for the goods from jobbing druggists and other distributors, who claim that the consumers will not pay the prices which pure goods must bring. If the jobbers will look into the matter, they can not help but see that they are not only deceiving their customers but also themselves, because it is only the practice of loading sponges that makes pure goods cost as much as they do to-day. It is true that prices have substantially advanced at the fishing grounds in Florida, but the advance has not been legitimate and is due solely to the fact that dealers who load their goods the most can afford to pay more for the raw material in primary markets. Right here we wish to call attention to the fact that, notwithstanding the excessive loading which is going on, the dealers are not adding to their profits, but are, in fact, cutting them down, as there is a certain expense attached to the labor of loading, estimated at from five to seven per cent, and the owners of the fishing vessels only are benefited. This can be seen from the fact that prices ex the wharf in Florida have advanced from two dollars and fifty cents to four dollars and fifty cents and even five dollars a pound within the past two or three years. It is true that part of that advance is legitimate owing to the fact the consumption of sponges is growing rapidly year by year, while the available supply is necessarily diminishing, owing to the exhaustion of various fishing grounds. An advance of from eighty to a hundred per cent in the course of two years, however, is unreasonable and decidedly unwarranted.

A few years ago the Florida sponges were loaded with lime and the proportion of loading increased to such an extent that the result proved its own cure. For a time it was a current facetious expression throughout the trade that no one looked for lime in a sponge, but looked for a trace of a sponge in a lump of lime. Sand has always been present to a greater or less extent, and it is said to be practically impossible to remove all traces of sand from a sponge, owing to the fact that when they are first landed from the fishing vessels they are laid on the sand at the edge of the water, where the successive tides wash over them. At present the materials used in loading consist of molasses, rock salt, sand and various other materials which will give weight. The lime formerly used in loading was injurious to the sponge, and if a sponge so loaded was allowed to lie awhile the lime would practically destroy it. The present mode of loading may not be actually injurious to the fiber of the sponge, but it certainly is of no benefit and is absolutely of no use. Does it not seem ridiculous to load a sponge with substances which are of no earthly use to either the sponge itself or to any object for which the sponge will be used, merely for the sake of making its cost to the consumer apparently smaller. Here again we repeat that the cost to the consumer is not less, but actually greater. In the first place a loaded sponge is less serviceable; in the second, a consumer buys a sponge said to weigh six ounces, which, in reality, is a three ounce sponge, with three ounces of loading. If loading were abolished he could buy a pure three-ounce sponge, which is fully as large as a loaded six-ounce sponge, and more serviceable, at a lower figure.

As we stated above, there seems to be an earnest desire on the part of most of the large importing and wholesale sponge houses to do away with the practice of loading. It is possible that loading will increase to such an extent that it will effect its own cure, as in the case of loading with lime; and it may be that it may be abolished by the concerted action of the wholesale dealers. It is certain, however, that it will again be resorted to unless the mode of selling is changed. It will be remembered that some twenty-five years ago a similar practice prevailed in regard to Mediterrean goods, the same question arose, and by the efforts of the *Reporter* and the concerted action of importers the practice was done away with, and the custom has since prevailed of selling all Mediterranean goods by the piece and no object is to be gained by loading them. Every one at all interested is now

Digitized by Google

willing to admit that the trade in those goods is on a very satisfactory basis. It is now the general opinion of the wholesale trade that a similar custom in regard to the Florida sheepswool sponges and, in fact, all other sponges, would be very advantageous to every one concerned, except, possibly the owners of the fishing vessels. With concerted action on the part of the wholesale trade, such a result could possibly be attained, and it is due themselves that such action be taken.

A REMARKABLE INVENTION.

Professor Reulaux, the world's authority on applied mechanics, and founder of the science of kinematics, said ten years ago in his lectures: "A mechanical device which would enable working machines to adapt themselves automatically to the different conditions of work would be the ideal solution of economical use of force, and I hope some day a mechanical genius may arise to solve this far-reaching question for the benefit of mankind."

Such an invention has been perfected and the device is now in use in Hartford, where so many inventors prosper. As any layman in mechanics knows, there is hardly existing to-day a machine which has a constant amount of work to do. As different work always requires different power, the designer tries to get the best efficiency out of his machine, namely, the highest capacity for turning out work, by speed-changing devices such as can be seen on every lathe.

There are now existing two kinds of speed-changing devices: one kind which can be set to any speed, but only work by friction, and therefore can only transmit a limited amount of power. The other sort transmits power positively, but only for a very limited number of steps. The device which has been shown us transmits the power and speed at any desired ratio, and, gradually changing, can be set or allowed to adapt itself automatically to the conditions of work to be done, always transmitting the power positively.

This is an absolutely new principle which has never been achieved by mechanical engineers before, although scores worked on it for years, and the best experts of Hartford declare it a wonderful mechanism, enabling machines to turn out more work than now, the increased efficiency often rating as high as fifty per cent. The principle in itself is astonishingly simple, consisting of an eccentric disk and two sets of toggle levers in peculiar combination. As far as plans for its adaptation have developed till now, it can be applied with admirable results to bicycles, automobiles, street cars, all kinds of machine tools, windmills, hoisting machinery, etc. In automobiles it will completely displace all the present troublesome speed-changing gears.

The bicycle shows its value most clearly, as such a wheel will adapt itself to any grade or wind resistance, always giving you the right gear, say, between forty and one hundred and twenty, without your changing your foot pressure or the speed of the crank revolutions. The invention, which is practically of unlimited prospects, is named after its inventor, and we shall doubtless hear more of it soon.—*Hartford Times.*

Remedy your deficiencies, and your merits will take care of themselves. Every man has in him good or evil. His good is in his valiant army, his evil in his corrupt commissariat; reform the commissariat, and the army will do its duty.

STARTING RIGHT.

If more fathers would take a course with their sons similar to the one my father took with me, observed one of the leading business men of Boston, the boys might think it hard at the time, but they'd thank him in after life.

What sort of a course, we asked.

Well, I was a young fellow of 22, just out of college, and I felt myself of considerable importance. I knew that my father was well off, and my head was full of foolish notions of having a good time and spending lots of money. Later on I expected father to start me in business after I'd swelled a while at clubs and with fine horse flesh.

Like a wise man, father saw through my folly, and resolved to prevent my self-destruction if it were possible.

"If the boy's got the right stuff in him let him prove it," I heard my father say to mother one day. "I worked hard for my money, and I don't intend to let Ned squander it and ruin himself besides."

That very day father came along and handed me $50, remarking, "Ned, take that money, spend it as you choose, but understand this much, it's the last dollar of my money you can have until you prove yourself capable of earning money and taking care of it on your on account."

I took the money in a sort of a dazed manner, stammered out, "I—why—I—I want to go into business."

"Business!" exclaimed my father, contemptuously, "what do you know of the mercantile business? Get a clerkship and learn the alphabet before you talk to me of business." And father left me then to ponder on his words. And that $50 was the last money my father ever gave me till at his death I received my part of the property by inheritance.

I felt hard and bitter then, felt that my father was a stingy old fogy, and mentally resolved to prove to him that I could live without his money. He had roused my pride—just what he intended, I suppose.

For three days I looked about for a place to make lots of money. I found no such chances, and at length I accepted a clerkship in a large retail store at $400 a year.

Another bit of father's "stinginess" at this time was demanding $2 a week for my board through that first year.

At the end of my first year I had laid aside $200, and the next year, my salary being raised $100, I had $500 laid by.

One hundred cents meant more to me in those days than $100 had previously. At the end of four years' clerking I went to my father with $1,500 of my own, and asked him if he was willing to help me enter business. Even then he would only let me hire the money, $2,000, at 6 per cent.

To-day I am called a successful business man. And I have my father to thank for it. Those lessons in self-denial, self-respect and independence which he gave me—though hard at the time—put the manhood into me.

Years afterward father told me it cost him the hardest struggle of his life to be so hard with his boy. But he felt it was the only course to make a man of me. Many a time we laughed heartily over that $2 board bill.—*Exchange.*

Different After Marriage.

"James, dear, will you bring me up a scuttle of coals from the cellar?" said a busy wife.

"That's just the way with you?" said James, with a frown, as he put down his book and rose from his armchair.

"Just the way with me?"

"Yes!" he snapped. "As soon as you see me enjoying myself you have something or other for me to do. Didn't you see i was absorbed in my reading?"

"Well, dear, I will do it myself."

"Yes, and tell everybody—your mother especially—that you have to carry your own coal up from the cellar. No, I'll do it. Let me mark my place."

So he marked the place in the book at which he had ceased reading, and when he went down to the cellar, grumbling all the way, she picked up the volume, and found it was a love story, and that the passage that he had been absorbed in was as follows:

"My darling, when you are my wife I will shield and protect you from every care. The winds of heaven shall not visit your face too roughly; those pretty hands shall never be soiled by menial tasks; your wish shall be my law; your happiness—"

Just then he reappeared, and, dropping the scuttle upon the floor, said:

"There's your coal! Give me my book."

Formulae.

APPLICATION FOR BURNS, ETC.

Adeps lanæ hydrosus	1 part.
Hydrogenii peroxidi	2 parts.
Ol. rosæ	1 gtt.

M. et. ft. ungt.

This is also a good toilet cream.

NERVE TONIC.

As a tonic in functional nervous diseases Dr. Julius Flesch gives the following combination and states that he has obtained excellent results from its use:

Quininæ ferrocitratis	gr. xlv	3 |
Strychninæ nitratis aa	gr. i	| 06
Extracti kola fluidi		|
Sodii glycerophosphati	ʒvi	24 |

Dissolve slowly by heat and add:

Syrup aurantii	℥vi	192 |

Sig. One teaspoonful after each meal.

SEA FOAM SHAMPOO.

Borax	2 parts.
Ammonium carbonate	1 part.
Glycerin	4 parts.
Jamaica rum	192 parts.
Bay rum	64 parts.
Water	64 parts.

Dissolve the borax and ammonium carbonate in the water and add the remaining ingredients in the order stated.

A PASTE SHAMPOO.

Ammonia water	3 drachms.
Cologne water	3 drachms.
Alcohol	5 ounces.
Water	5 ounces.
Whites of eggs, as many as desired.	

The whites of eggs (about two) are thoroughly beaten up previously to being mixed with the water of ammonia; the remaining ingredients are added in their order and stirred briskly.

PALATABLE CASTOR OIL.

Castor oil	5½ ounces av.
Acacia, fine powder	585 grains.
Tincture of vanilla	3 drachms.
Simple syrup	3 ounces.
Water	q s.

Carefully weigh the castor oil and the acacia into a mortar, triturate until well mixed; then add two fluid ounces of water all at once to the mixture of oil and acacia, triturating briskly until a thick, creamy emulsion is produced. To this add gradually with stirring, a mixture of the syrup and tincture with a portion of the remaining water, and finally enough water to make 16 fluid ounces.

MENTHOL OINTMENT.

Paraffin oil 5 parts, lanolin 85 parts. To be melted together and menthol 10 parts added. To be rubbed on the forehead for headache, hemicrania, etc.

GLYCONIN EMULSION.

A splendid emulsion can be prepared from yolk of egg, the formula of the National Formulary making an emulsion both beautiful and palatable. Glyconin, U. S. P., gives better results than the yolk, which is recommended in many works, and it is a splendid demonstration of the preservative value of glycerin. A sample prepared by the writer in November last is to-day perfectly sweet.

In answer to a demand for an "egg nog" emulsion, the following modification of the N. F. preparation was devised:

EGG EMULSION OF COD LIVER OIL.

Glyconin	fl. dr. 2½
Cod liver oil	fl. oz. 1
Syrup	fl. dr. 1½
Brandy	fl. dr. 2½
Water, enough to make	fl. oz. 2

Emulsionize the oil by gradual addition of glyconin, with constant trituration; then add the other ingredients in the order given. Flavor with vanilla.

The product is delicious and beautiful, and it should keep as well as, if not better, than the glyconin from which it was prepared.

EXTRACT OF MALT AS AN EMUSIFIER.

Extract of malt is more successful in covering the taste of cod liver oil than any other substance yet tried. The following formula was devised by the writer in 1891 and has been used by him almost every winter since. The product is a permanent emulsion, save an aqueous layer of about a thirty-second of the entire bulk, and its stability was proven by subjecting a sample to the action of New Orleans sunshine from October of one year to April of the next. A sample prepared last November is as sweet and palatable to-day as when made. The preparation consists of:

COD LIVER OIL, MALT AND WINE.

Cod liver oil	parts 4
Syrup of wild cherry	parts 2
Extract of malt	part 1
Sherry wine	part 1

Emulsify the oil by gradual addition to the extract, alternating with the syrup. Lastly add the wine.

If any trouble is experienced in emulsification, test the malt with litmus paper, for

Digitized by Google

it is likely to become a trifle acid on standing; as is well known, acids interfere with emulsification. If the malt be found acid, add a trace of sodium bicarbonate and the trouble will be removed.—*Prof. Arny.*

PERFUMED CLEANSING FLUID.

(1) Solution of ammonia, 165; soft soap, thirty; borax, eight; eau de cologne, fifteen; distilled water, to 360. (2) Solution of ammonia, forty-eight; sodium carbonate, twenty; distilled water, 320.

—*Pharm. Post*, 32, 39.

CLEVELAND DRUGGIST SUED.

Solomon Wax has brought suit against Mr. Albert Petersilge, a Woodland Avenue druggist, for damages to the extent of $2,500. He claims to have gone to the drug store of the defendant and asked the clerk for something for a sore finger and that he gave him carbolic acid in which he bathed the injured member and bound a cloth about it saturated in the acid. Result, an amputated finger.

The facts appear to be that Solomon went to the store and asked for five cents worth of carbolic acid which was given him properly labeled in compliance with law and all the rules of well regulated pharmacies and the foolish man went home and applied it freely with the above results.

The only censure to which the clerk was liable is that he did not refuse to sell carbolic acid in quantities of five cents. It is buying a law suit too cheap.

Men resemble plants, some flower and bloom all the time and pass for good plants. The ultimate end of plants, however is the fruit, and the men who produce results like the tree that yields much fruit are not given to flowers and beauty.

One Dose Cures.

DR. DRAKE'S

Making a Man.

Hurry the baby as fast as you can,
Hurry him, worry him, make him a man.
Off with his baby clothes, get him in pants,
Feed him on brain foods and make him advance.
Hustle him, soon as he's able to walk,
Into grammar school; cram him with talk.
Fill his poor head full of figures and facts.
Keep on ja-amming them in till it cracks.
Once boys grew up at a rational rate,
Now we develop a man while you wait.
Rush him through college, compel him to grab
Of every known subject a dip and a dab.
Get him in business and after the cash.
All by the time he can raise a mustache.
Let him forget he was ever a boy,
Make gold his god and its jingle his joy.
Keep him a-hustling and clear out of breath,
Until he wins—*nervous prostration and death.*

THE ADVERTISING HABIT.

There are a few businesses in the world that seem to have grown gradually to a point where they pay, without much appeal to the public, either on the printed page or the poster. They have started on a small scale by men who undertook to supply wares, or a single article, of universal demand. When rumor (which a Latin poet describes as a loud-voiced proclaimer) has made these wares known, the business connected with them has been enlarged until success of a worthy kind seems to have obtained without much spectacular publicity.

But this is not a quick road to success, nor is it a certain one.

The businesses that have been boomed by their "loving customers" are those that were begun at least a generation ago, when advertising was not as great an art as it is now; and when the letters and encomiums of patrons were the medium that made them known.

I think that Matthew Vassar's ale, out of which he made his fortune; and from the profits of which Vassar College was founded, began its career in this simple, unannounced way. At first he brewed it in his house, in very small quantities, and took it, himself, around town, and in the vicinage adjacent, in as primitive a way as rolling a keg of it along on a wheelbarrow. As profit came in, he enlarged his plant somewhat, and soon had a place for selling it in the basement of the Poughkeepsie court house. If there had been many advertising instrumentalities in the early part of the century when he began his business, no doubt he would have used them to advantage. As there were very few mediums through which to speak, he could not easily form the advertising habit.

But there was another Englishman, who did not emigrate to this country, as Vassar did, and who, I think, began to advertise at a somewhat later date than the time Vassar set up his home brewery, who did advertise at once, and who acquired the advertising habit. He is not much spoken of now; but those who can remember what was going on fifty years ago will remember Dr. Holloway, of London, and his famous pills. I am not certain but that he had an ointment also, but his pills were everywhere proclaimed.

He used no intermediary agent, but sent out from his business office to papers of all kinds in all countries his advertisements with which he would enclose, usually, a Bank of England note, asking the publisher whom he addressed to insert it as many times as the money enclosed would warrant. At first he used a few important papers near home; then those of small provincial circulation. After a while he patronized papers and periodicals in foreign countries—particularly in North and South America; and, at last, he applied to all papers everywhere without respect to their circulation or importance.

I think it was said his advertising habit at last became so pronounced that he wished to employ every paper published in the world. Whenever he discovered one that was new to him he sent to that paper his advertisement—even if the paper had only one hundred or two hundred subscribers.

But he had become a millionaire when he did this, and knew that advertising had been the source of his profit. Out of his millions he founded great charities which keep his name still known in England—and which indicate, as all his business transac-

You Make Money
SELLING
BAR-BEN
By accepting our Special Offer.

With an order for three dozen "Bar-Ben" at $4.00, we will give you one dozen free, and mail you signs and window display. This enables you to double your money, without carrying a large stock, and every box you sell makes a customer for more. Order from your jobber at once or direct, but be sure and specify the wholesale druggist through which you want goods shipped. "Bar-Ben" is the best nerve, brain and blood builder on the market today.
Sell your customers a box and see if they do not tell you so.

Digitized by Google

tions did, that he was a man of remarkable type, and well entitled to all his wealth and subsequent fame.

I will venture to say that no business to-day, or that ever existed, has employed so many newspapers in an advertising way as Dr. Holloway did.

But he began slowly. He knew just what portion of his profits to put into printers' ink, and how to enlarge his space as new profits flowed in. He saw, as Robert Bonner did, that he had a good thing; and was certain that when it was better known it would be more profitable. So he courted publicity by feeling his way along, and found his success in it.—*Fame.*

Effervescing Citrate of Magnesia.

Wilbur L. Scoville claims that nearly all of the so-called granular effervescent citrate of magnesium consists of an effervescent sulphate of magnesium or of sodium. He states that the objections to the official preparation are threefold: 1, it is not as nice appearing a preparation as its substitutes; 2, it costs several times as much, and, 3, it is a difficult and tedious preparation to make. He discusses the method of preparation in full. The British Pharmacopœia now recognizes an effervescent magnesium sulphate and it is to be hoped that the forthcoming U. S. P. will do likewise.

The Association of French Pharmacy Students is endeavoring to improve the conditions under which pharmacists do military service in France. As things are now, the young pharmacist has frequently to pass his obligatory year of military service in the ranks. Men in other avocations, it appears, are granted privileges, such as being made non-commissioned officers, while pharmacists obtain no rank on account of their profession. It is also said that the French army is sorely lacking in the number of army pharmacists, there being only 115 for an army of 500,000 men.

A certain physician has a patient who thinks she knows a great deal. The doctor gave her a prescription, of which one of the ingredients was Tr. Gent. Co. Some time after the patient wished to have the prescription rewritten, and by way of reminder to the physician said, "Why, Dr. R——, don't you remember it was the prescription that had Tincture of Gentlemen's Company in it?"—*Spatula.*

Petroleum in Diphtheria.

An account of a new method of treatment for diphtheria was recently published in the *Normandic Medicale* of Rouen. An epidemic of this disease broke out last year in the village of Neuville-Champ d'Oisel, about nine miles from Rouen, and the usual treatment was given by the country doctor. Happening to recollect the English use of petroleum as an anti-spasmodic and an antiseptic, he determined to make an experiment and selected for his first trial a little girl, seven years old, whom he had already given up. He swabbed the throat with common petroleum, and so marked was the improvement after the first application that the treatment was continued and the child recovered. He then tried the experiment with success on his other patients.

"I have been considering your application for an editorial position," said the managing editor, "and I sent for you to-day that I might get some idea of your style."

"Just so," replied the bright young man. "Well, you will observe I am wearing a blue suit, plain, but well cut, and a brown soft hat; quite the proper thing for this time of year. Will I do?"

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

DELAWARE—J. S. Prettyman, Milford, president; J. H. Spruance, Wilmington; W. F. Haines, Seaford; E. Outten, Dover; E. Hoffmann, Wilmington, secretary.

DISTRICT OF COLUMBIA—J. T. Winter, president; G. G. C. Simms, W. P. Carr, H. A. Johnston; R. N. Harper, secretary.

FLORIDA—H. C. Cushman, Pensacola, president; H. C. Groves, Ocala; J. D. Palmer, Monticello; A. A. Berger, Tampa; T. Clarke, Jacksonville, secretary.

GEORGIA—S.C. Durban, Augusta, president; J. G. Dodson, Americus; H. Sharp, Atlanta; Max Morris, Macon; Geo. F. Payne, Atlanta, secretary.

IDAHO—Has a pharmacy law empowering each county to organize its own board.

ILLINOIS—W. A. Dyche, Evanston, president; W. Bodemann, Chicago; B. Schwartz, Jr., Salem; T. A. Jewett, Oregon; W. C. Simpson, Vienna; L. T. Hoy (not a member), Springfield, secretary.

INDIAN TERRITORY—Has no pharmacy law.

INDIANA—C. B. Woodworth, Ft. Wayne, president; G. W. Sloan, Indianapolis; H. E. Glick, Lafayette; T. E. Otto, Columbus; C. E. Crecelius, New Albany, secretary.

IOWA—N. T. Hendrix, Columbus Jct., president; W. L. Leland, Hawarden; F. Howard, Des Moines; C. W. Phillips (not a member), Des Moines, secretary.

KANSAS—W. C. Johnson, Manhattan, president; W. W. Naylor, Holton; J. T. Moore, Lawrence; L. Ardery, Hutchinson; W. E. Sheriff, Ellsworth, secretary.

KENTUCKY—C. S. Porter, Somerset, president; A. Dimmitt, Louisville; C. L. Diehl, Louisville; J. E. Storms, Lancaster; J. W. Gayle, Frankfort, secretary.

LOUISIANA—P. L. Viallon, Bayou Goula, president; C. M. Brooks, Baton Rouge; T. J. Labbe, St. Martinsville; W. T. Taylor, New Orleans; G. S. Brown, New Orleans; L. F. Chalin, New Orleans; E. L. McClurg, Natichitoches; W. M. Levy, New Orleans; F. C. Godbold, New Orleans, secretary.

MAINE—P. L. Lord, Calais, president; J. F. Young, Augusta; D. W. Heseltine, Portland, secretary.

MARYLAND—J. W. Foster, president; E. E. Quandt; D. R. Millard, secretary. (Law applies to Baltimore alone.)

MASSACHUSETTS—C. F. Nixon, Leominster, president; Geo. M. Hoyt, East Weymouth; J. A. Rice, North Adams; F. H. Butler, Lowell; A. K. Tilden, Boston, secretary.

MICHIGAN—A. C. Schumacher, Ann Arbor, president; W. P. Doty, Detroit; L. E. Reynolds, St. Joseph; G. Gundrum, Ionia; H. Heim, Saginaw, secretary.

MINNESOTA—R. Humiston, Worthington; G. H. Goodrich, Anoka; T. Griffin, Minneapolis; C. T. Heller, St. Paul; J. B. Atkinson, Litchfield; H. G. Webster, Minneapolis, secretary.

MISSISSIPPI—C. W. Whitney, Jr., Fayette; M. M. Watkins, Scranton; R. C. Gibson, West Point, S. M. Covington, Summit; S. L. Caine, Columbus, secretary.

MISSOURI—A. Brandenberger, Jefferson City, president; W. B. Kerns, Bunceton; A. T. Fleischmann, Sedalia, secretary.

MONTANA—S. J. Coffee, Missoula, president; L. Warren, Bozeman; J. B. Lockwood, Helena, secretary.

NEBRASKA—H. R. Gering, Plattsmouth, president, J. H. Schmidt, Omaha; C. L. Stillman, Columbus; N. P. Hansen, Kearney; H. H. Barth, Lincoln, secretary.

NEVADA—Has no pharmacy law.

NEW HAMPSHIRE—E. H. Currier, Manchester, president; B. O. Aldrich, Keene; G. F. Underhill, Concord, secretary.

NEW JERSEY—G. H. White, Jersey City, president; W. T. Brown, Madison; H. O. Ryerson, Newton; G. W. Parisen, Perth Amboy; H. A. Jorden, Bridgeton, secretary.

NEW MEXICO—B. Ruppe, Albuquerque, president, A. Fisher, Santa Fe; P. Moreno, Las Cruces; E. G. Murphey, Las Vegas; W. C. Porterfield, Silver City, secretary.

NEW YORK—A. B. Huested, Albany, president; C. H. Haskin, Rochester; F. L. Norton, Delhi; J. C. Smith, Plattsburg; E. S. Dawson, Jr., Syracuse, secretary.

NORTH CAROLINA—E. V. Zoeller, Tarboro, president; W. H. Wearn, Charlotte; F. W. Hancock, Oxford; J. H. Bobbitt, Raleigh; W. Simpson, Raleigh, secretary.

NORTH DAKOTA—H. L. Haussamen, Grafton, president; H. E. White, Jamestown; W. S. Parker, Lisbon, secretary.

OHIO—C. Krone, Hamilton, president; G. W. Voss, Cleveland; F. H. King, Delphos; Julius Greyer, Cincinnati; W. R. Ogier, Columbus, secretary.

OKLAHOMA—C. A. Dow, Pond Creek, president; E. E. Howendobler, Perry; F. B. Lillie, Guthrie, secretary.

OREGON—A. Yerrington, Eugene, president; J. M. A. Lane, Portland; L. W. Moody, Portland; L. Steiner, Salem; G. C. Blakely, The Dalles; R. E. L. Steiner, Dallas, secretary.

PENNSYLVANIA—L. Emanuel, Pittsburg, president; G. W. Kennedy, Pottsville; F. A. Boericke, Philadelphia; H. C. Porter, Towanda; C. T. George, Harrisburg, secretary.

RHODE ISLAND—N. N. Mason, Providence, president; W. J. McCaw, Providence; J. T. Wright, Newport; A. B. Collins, Westerly; F. A. Jackson, Woonsocket; H. W. R. Potter, Providence; H. A. Pearce, Providence, secretary.

SOUTH CAROLINA—E. S. Burnham, Charleston, president, J. G. DeLorme, Sumpter; O. Y. Owings, Columbia; J. A. Barbot, Charleston; O. E. Thomas, Columbia; M. H. Sandifer, Rock Hill, secretary.

SOUTH DAKOTA—J. Lewis, Canton, president; N. J. Bleser, Milbank; I. A. Keith, Lake Preston; W. T. Hull, Alexandria; E. C. Bent, Dell Rapids, secretary.

TENNESSEE—J. F. Voigt, Chattanooga, president; J. S. Robinson, Memphis; A. A. Yeager, Knoxville; B. H. Owen, Clarksville; A. B. Rains, Columbia; R. L. Eves (not a member), Nashville, secretary.

TEXAS—Has a separate board for each judical district.

UTAH—J. B. Farlow, Salt Lake, president; B. F. Riter, Logan; J. H. Fennimore, Beaver; C. H. McCoy, Salt Lake City, secretary.

VERMONT—C. C. Bingham, St. Johnsbury president; C. Blakely, Montpelier; A. L. Dutcher, St. Albans; A. W. Higgins, Rutland; J. G. Bellrose, Burlington, secretary.

VIRGINIA—J. L. Avis, Harrisonburg, president; C. R. Linke, Charlotteville; E. Warfield, Alexandria; T. A. Miller, Richmond; E. R. Beckwith, Petersburg, secretary.

WASHINGTON—J. H. Day, Dayton, president; L. D. P. Collins, New Whatcom; Isaac Korn, Seattle; P. Jensen, Stielacoom; J. W. McArthur, Spokane, secretary.

WEST VIRGINIA—H. L. Boggs, Charleston, president; G. H. Ebeling, Wheeling; E. B. Hall, Parkersburg; W. S. Hamilton, Fairmont, secretary.

WISCONSIN—D. A. Taylor, Stevens Point, president; A. F. Menges, Madison; H. G. Thompson, Marinette; H. C. Schranck, Milwaukee; E. B. Heimstreet, Janesville, secretary.

WYOMING—W. H. Edelman, Sherdan, president; C. Wilseck, ————; J. J. Steffein, Douglas, secretary.

SYNOPSIS OF OHIO LAWS RELATING TO PHARMACY.

PHARMACY LAW.

There are two grades of licentiates, pharmacists and assistant pharmacists. Every pharmacy or store where drugs are sold at retail or where medicines are compounded or dispensed must be under the immediate supervision of a registered pharmacist. An assistant pharmacist can only perform the duties of a pharmacist in a store which is under the supervision of a registered pharmacist. A pharmacist can not have supervision of more than one drug store or pharmacy, nor can he be regarded as being in charge of such when he spends a portion of his time in another occupation.

Physicians may compound or dispense their own prescriptions and keep a stock of drugs for that purpose, but they can not legally sell drugs in the same way as a druggist, nor compound the prescriptions of other physicians.

The following articles may be sold by persons not registered: Copperas, borax, blue vitriol, saltpetre, sulphur, brimstone, licorice, sage, juniper berries, senna leaves, castor oil, sweet oil, spirits of turpentine, glycerine, glauber's salt, cream of tartar, bicarbonate of sodium, quinine, rochelle salts, epsom salts, alum, gum camphor, oil of cinnamon and oil of lemon.

The following articles may be lawfully sold by persons not registered, if put up in boxes, vials or packages by a registered pharmacist or wholesale druggist, and bearing the name of the article, the directions for its use and the name of the firm or person who prepares them: Paregoric, essence of peppermint, essence of cinnamon, essence of ginger, hive syrup, syrup of ipecac, tincture of arnica, syrup of tolu, syrup of squills, spirits of camphor, number six, sweet spirits of nitre, compound cathartic pills, quinine pills and paris green when put up in bottles or boxes, bearing the name of a legally registered pharmacist or wholesale dealer, and labeled as required by Section 4364 54 of the Revised Statutes.

Registration is secured by examination only. Examinations are held in Columbus on the second Tuesdays and Wednesdays of January, May and October. The fee is $5.00 for pharmacist and $3.00 for an assistant pharmacist. Applications must be filed at least five days in advance of any examination.

Applicants for first grade certificates must be at least 21 years old and have at least four years experience in the study and practice of pharmacy.

Assistant pharmacists must be at least eighteen years old and have at least two years experience.

Certificates are issued for three years and are then renewable if the holder is engaged in the practice of of pharmacy in Ohio.

Certificates obtained through fraud or misrepresentation are subject to being revoked.

The board of pharmacy may grant certificates to those registered as pharmacists in other states by examination, if their grades are high enough in the state where the examination was taken, but only when such state recognizes on like terms the holders of Ohio certificates. But few states however interchange with Ohio.

Penalties for violation of the law are from $20 to $100 fine and from twenty to one hundred days imprisonment or both. Each day constitutes a separate offense.

POISON LAW.

Whoever sells or gives away, any quantity of arsenic less than one pound, without first mixing therewith soot or indigo in the proportion of one ounce of soot, or half an ounce of indigo to the pound of arsenic, or except upon the prescription of a physician, sells or gives away any quantity of any article belonging to the class usually denominated poisons, to any minor, or sells or gives away any such article to any person, without having first marked the word "poison" upon the label or wrapper containing the same, and registered in a book to be by him kept for that purpose, the day and date upon which it is sold or given away, the quantity thereof, the name, age, sex and color of person obtaining the same, the purpose for which it is required, and the name and place of abode of the person for whom the same is intended, shall be fined not more than two hundred nor less than twenty dollars.

LABEL LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That whenever any pharmacist, druggist or other dealer in poisons, chemicals, medicines and drugs, whether wholesale or retail, shall sell any drug or chemical, an indiscriminate or careless use of which would be destructive of human life, such dealer shall affix to each bottle or package of such drug, chemical or poison, a label printed in red ink, having on it the name of the article by which it is commonly known, the cautionary emblem of the skull and cross-bones, the words "caution and poison," and in addition thereto at least two of the most readily obtainable effective antidotes to such poisonous article.

SEC. 2. Whoever violates the provisions of section one (1) of this act shall upon conviction thereof, before any court having competent jurisdiction, be fined in any sum not exceeding one hundred (100) dollars, nor less than ten (10) dollars.

MORPHINE LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That it shall not be lawful for any person, other than a wholesale druggist or other dealer in drugs and medicines, to sell or offer for sale at wholesale, or for any person other than a registered pharmacist or a registered assistant pharmacist, to sell or offer for sale at retail, morphine or any of its salts, in this state, and it shall not be lawful for such person to sell or offer for sale, morphine or any of its salts, in any bottle, vial, envelope or other package, unless the same shall be wrapped in a scarlet paper or envelope, and all bottles or vials used for the above purpose shall contain not more than one drachm each, and shall have in addition to said scarlet wrapper a scarlet label lettered in white letters, and the same must be upon both vial and wrapper, when vials are used, plainly naming the contents of said bottle; and further, that no person shall have the right to change any preparation of morphine from its original package to any other receptacle whatever for the purpose of retailing or dispensing therefrom, but it must be retailed or dispensed only from the original package with scarlet wrapper and scarlet label as aforesaid.

SEC. 2. That any one violating the provisions of the above section shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than ten or more than fifty dollars, at the discretion of the court, for each and every violation of the preceding section.

SEC. 3. That all laws and parts of laws in conflict with this act be and the same is hereby repealed.

JUST AS GOOD WEST OF THE MISSISSIPPI AS IN NEW YORK.

People everywhere are interested in the New York Rapid Transit Tunnel.

Give your customers a chance to get better acquainted with the greatest undertaking of the age. The progress of New York in the matter of Rapid Transit, is being watched by the entire world. This window display will give any one a clear idea of the most important station of the system.

Our facsimile of the 23d Street Station of New York Rapid Transit Tunnel is the most remarkable window display ever offered the retail drug trade. If you care to increase your trade this window display will do it for you.

In actual size this window display cut out is five feet long by three feet high. It is an exact reproduction in fourteen colors of the 23d Street and 4th Avenue Station of the New York Transit Tunnel.

Send us an order through your wholesaler for one gross of small size Abbey's Salt, or its equivalent in the larger sizes, and we will include in the order one of the cut outs.

ABBEY'S SALT is sold in three sizes, retailing at 25c., 50c., and $1.00 per bottle.
Trade List on application.

THE ABBEY EFFERVESCENT SALT CO., 9-15 Murray Street, New York.

"Do you have matins in this church?" asked the High Church visitor of the verger of the village church.

"No, indeed," replied that dignitary, with scorn: "we have oilcloth, and right up the chancel, too!"

"It ain't only English people drops their aitches," said a little boy to the new teacher. "I never heard no American pronounce the aitch in my name."

"What is your name?" asked the teacher.

"Johnny," said the little boy."

One Dose Cures.

Sold by all Druggists.

If you have never sold it, write to us for introductory offer, giving 200 per cent. profit.

The Glessner Medicine Co.,

Sole Proprietors.

FINDLAY, - - OHIO.

Laxative Bromo Quinine

Is a Valid Trade Mark,
And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

Presents the most attractive proposition to a retail druggist. The discounts are exceedingly liberal, and the best advertising makes sales easy. Every home needs Wine of Cardui, and a distribution of our advertising with your name on it will make a large proportion of the homes in your neighborhood your customers.

For a fine assortment of Ladies' Birthday Almanacs, Cardui Books, Weather Prophet Books and Show Cards, address THE CHATTANOOGA MEDICINE CO., Chattanooga, Tenn.

Cremeline.

was the name adopted by us some years ago so as to distinguish our brand of Pure Petrolatum. "Cremeline" is well and favorably known to the drug trade of the United States. We are the originators of the idea of using screw-top bottles and we flatter ourselves that we have always put up our goods with a little bit more "style" and "neatness" than the many imitators who bob up serenely.

Prices for the various sizes of Cremeline, will be found under the list of "druggists sundries." Goods supplied by Wholesale Druggists.

COMMUNICATIONS.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

THAT TIRED FEELING.

IN conversation recently with two prominent city pharmacists at different times a vigorous protest was entered by both in regard to the failure of members of local organizations to abide by the terms of the agreements to which they had assented in so far as such agreements related to the maintaining prices and other matters of vital interest to all retail druggists. Said one of these gentlemen: "It is absolutely useless to place any reliance whatever in the promises of many men in the retail drug trade, and this is especially true of the proprietors of the smaller stores in the outlying districts. A few months ago one of these proposed in the meeting of the local association, of which I am a member, that we fix the price of alcohol at 45 cents per pint in order that we might at least not lose any money, and this was agreed to; but it was only a short time afterward that a customer came for a pint of alcohol and objected to paying 45 cents for it, stating that the druggist near his residence—naming the one who had proposed this price—was only asking 40 cents for alcohol. In order to satisfy myself I had my clerk telephone the proprietor of the store mentioned without giving any name, but simply asking the price at which he sold alcohol, and the reply came back, 'forty cents per pint.'

"No," he continued, "I am getting very

Digitized by Google

tired of this sort of business and I have lost all faith in local organizations; the truth is, that we of the larger stores in the city centers are simply helping those of the small ones in the suburbs to cut our throats and I do not propose much longer to be a party to my own destruction. If it comes to the point the down-town stores will combine and establish prices of their own that will simply result in the small dealers in the remote sections being forced to the wall. This is the policy of the larger stores like department and dry goods stores toward the drug trade in general, and instead of making prices on the goods we used to carry and sell, that would prevent such stores from placing them among their stocks we have gone into a combination to save the bacon of the small retail druggist and thereby have sacrificed our own business interests."

A similar complaint was made by the other pharmacist, but giving a different illustration of the same point. Said No. 2: "I was present at a meeting of our association when one of my suburban brethren offered a resolution not to carry the 25-cent size of a cough syrup, the profit on which to the retailer is five cents. The resolution was adopted, but inside of four weeks this same member offering it had on his shelves the preparation, the sale of which had been proscribed. I am sick of the whole business of attempting to accomplish any thing through organizations of retail druggists, and one of these fine days I propose to cut loose from all obligations to them, fix my own prices, do business in my own way and take care of my own interests."

Both of these gentlemen have made a success of the retail drug business, as that word is generally understood, they have been strong advocates of the policy of getting a reasonable profit and they are men whose business standing is first-class. Now if this is a fair representation of the lack of stability exhibited among retail druggists there is absolutely no hope of accomplishing any good by organization or otherwise for the trade in general. Men will not and ought not to obligate themselves to a certain line of action without assurance that all the other parties to the agreement shall stand upon the terms demanded and live up to them at all cost. We fear that in many instances this is not done, aud wherein agreements are violated combinations are a delusion and a fraud.

The man who enters any organization without the fixed determination to sustain in the minutest detail the regulations and observe the contracts which are for the welfare of all the members of that organization is a man wholly unfit to be associated in fellowship with honest men. If there are persons in the retail drug trade so wholly lost to their own interests in a broad sense, and have so little regard for the interests of their fellow-brethren in the same vocation then the honorable ones are fully justified in a combination that will force such out of business and into something where honor is not a pre-requisite accomplishment.

PURE FOOD IN THE NUTMEG STATE.

THE Agricultural Experiment Station of Connecticut has recently issued its fifth annual report, which gives the results of some of its tests. These indicate that there has not been the general improvement in the quality of the foods sold in that state which was announced a year or more ago.

Of 246 samples of milk collected in seventeen cities twenty were found adulterated with water, or chemical preservatives had been added. This is rather a favorable showing as far as milk is concerned, although we suspect that if the tests had been made during the heat of summer weather many more would have been found to contain preservatives. Four out of eight samples of cream tested were found to contain chemicals. But ten of 150 samples of lard were found impure and the admixture in these was cottonseed oil and stearine, while forty per cent. of samples of olive oil examined were adulterated. Ten per cent. of the baking powder samples showed adulteration, mostly with plaster—one contained one-fourth of its weight of talc and tremolite, an article used as a filler in making wall-papers.

Thirty-two per cent. of the cream of tartar was found impure.

Mineral waters were a bad lot. Of twenty-four samples of spring waters sold in the state but eleven were found to be normal, and fourteen showed evidence of past contamination, although containing no specific disease germs.

One sample of artesian well water was found to be almost wholly sewage, fairly well purified at the time the sample was taken but liable at any time to be as dangerous to health as unpurified sewage.

WHAT SEEST THOU?

RUSKIN taught that the seer is greater than the thinker. There is a large sense in which this is true. In ancient times some men were called prophets, or seers, not because they were made of different fibre from other men but because they possessed the faculty of seeing things which were invisible to the eyes of others.

Newton was noted for his absent-mindedness, for he was living in a realm closely allied with, but somewhat above, that in which the multitude of men exists, but a realm whose door is open to any seeking entrance.

Great inventors and discoverers have, as a rule, been far-seers. The American continent was not discovered by chance. Columbus saw it in his fancy long before his physical eyes discerned its faint outlines on the far western horizon. It was not an accident by which Kepler was able to announce that the planets had orbits, or Galileo to invent the telescope, or Morse the telegraph. Our own Edison is called a wizard, which is but another name for seer, but he and all the others are, and were different from their fellows only in that they saw further into things than the men about them, searching for that which they believed to exist they found that for which they sought. An architect sees in perfected outline the magnificent structure which he afterwards produces, first on paper, then in the completed building formed of stone, iron and wood, wrought out into solidity and beauty of form and substance. The Quaker has a religious tenet which he calls the "inner light," and this illuminates his path in the search after truth. The great teachers of history have not been supernatural men, but men of like mold as their fellows and differing chiefly in their insight into that supernatural domain from which all intelligent beings are separated by an invisible partition.

John Burroughs will see more of nature's beauty and hear more of her riotous melody in a walk of ten minutes on a spring morning than most men will see or hear in a lifetime of direct contact with nature's radiant charms.

Some one has said, "Milton in his blindness saw more beautiful visions, and Beethoven in his deafness heard more heavenly music than most of us can ever live to enjoy here or hereafter." Why? Is it necessary to lose the sight of the eye or the hearing of the ear in order to see and understand that which exists for our enjoyment or profit, or welfare? It is not so. What seest thou, O man? Every one of us with sufficient intelligence to propel him along the highway of human activity is pursuing some ideal. Every normal man has photographed upon his mental retina the picture of an object which he is seeking to reproduce in the external world, of which his body is a part. It does not require one of profound philosophic attainment to learn that the ideals of men, those structures which are forming in their fancies and which they firmly believe may be built just as the architect knows that the building which exists in his brain may be firmly set upon the earth, are growing more symmetrical, more elaborate and more beautiful with each succeeding generation. Never since the morning stars sang together were there so many men in the earth possessed with such large ideas of the useful and beneficent objects which are to be established, not only for their own enjoyment but also for the well-being of their fellow-men, as are now being hopefully and enthusiastically projected by the seers in the dawn of this new century. For a moment our people are staggered and incensed by the announcement that one of her citizens is possessed with an interest of more than a hundred million of dollars in one of the most stupendous manufacturing combinations which the world has ever known, but ere the murmur of dissatisfaction over this announcement has fallen away there is told another story of this individual setting aside many millions of his accumulated wealth for the benefit of his former employees and still other millions for the uplifting of mankind in the large centers of population. What is Andrew Carnegie seeing? His faith in the possibilities of human achievement in other directions than the mere making of money must be as sublime as any that are recorded of any of the great prophets of history. Every sincere man whose eye may fall upon these lines is constructing as an enduring monument of his life work a structure whose outlines are in his own brain and no matter whether it be one of magnificent proportions or of humble dimensions in so far as it is nobly conceived and honestly erected he is doing in his sphere as sublime a work as a Carnegie, an Edison, a Kepler or a Columbus.

It is therefore more than worth while to keep an alert ear to hear what the voices at the other end of the telephone line are

Digitized by Google

saying to your inner consciousness in order that the inspiration to build yet more nobly may not be missed.

The meaning of the great events of the present day is apprehended by but few. The great men in the political and commercial worlds are often so submerged with present duties, so engrossed with watching the daily ebb and flow of the tides in the sea of life as to be unable to study the deep currents in that sea, the influence and power of which are to be manifested after all the surface storms shall have been hushed into peace. "We are for the most part creatures moving about in a world not realized." Here and there arises a seer out of the living mass of men, like the lonely peaks of the mountain range above the dead level of the plains, who discerns the deep significance, who perceives the opportunities and who points to the great events that are to usher in the most wonderful epoch in human history.

To those of our readers who do not care to peruse such train of shought as this we have no apology for its appearance. Pharmacists are busy men, they are cumbered about with many cares, their opportunities for contemplation are not many, but there is an ever increasing number who are interested in the current events which have a bearing upon the large affairs of men, and among these we hope to find an attentive ear.

"But what you find in the busy days
Depends on how you go about it;
A strong mind helps poor eyes to see
What keenest eyes can't see without it.
One man sees the deep blue skies,
And bursting leaf buds round and ruddy.
Another looks at his own feet,
And only knows that they are muddy."

—O.

WHAT CONSTITUTES A TRUST IN OHIO.

AN inquiry has reached this office as to whether or not local associations of retail druggists in Ohio have the power to enter into an agreement to control the prices of articles sold by them. The inquirer cites the anti-trust law of 1898 in the state of Ohio and wants to know if all such attempts to establish the prices at which certain articles shall be sold in that state are not violations of law.

We do not assume to interpret the statutes of any state. The courts can do that. Attorneys are frequently asked just such questions, but they can only give an opinion of their own, although it is of course evident that an attorney is much more competent to render an accurate opinion as to the provisions of any law than one who has not been trained in legal phraseology.

Our answer to this inquiry is a quotation from the Ohio anti-trust law and in Section 1 of that law we find among the definitions of a trust the following:

"1. To carry out or create restrictions in trade and commerce.

"2. To limit or reduce the production, *or increase, or reduce the price of merchandise, or any commodity.*

"3. To prevent competition in manufacturing, making, transportation, *sale, or purchase of merchandise*, produce or any commodity.

"4. *To fix at any standard or figure, whereby its price to the public or consumer shall be in any manner controlled or established, any article or commodity of merchandise*, produce or commerce intended for sale, barter, use or consumption in this state.

"5. To make or enter into or execute or carry out any contracts * * by which they shall bind themselves not to sell, or dispose of any article of trade, merchandise or commerce below a common fixed value or standard figure, or by which they shall agree in any manner to keep the price of such article at a fixed or graduated figure, or by which they shall in any manner establish or settle the price of any article between them, or themselves and others, so as to directly or indirectly preclude a free and unrestricted competition among themselves or any purchasers or consumers in the sale of any such article or commodity."

We have omitted from No. 5 some phrases which are not germane to the purpose and give only the points relating to the sale of articles.

This entire legislative act is very interesting reading to retail druggists, especially in the light of the contests now being waged in some of the large Ohio cities between local associations and "agressive cutters." It was enacted on April 19th, 1898, and took effect on July 1st following. We suggest that the retail druggists of the state go to any lawyer's office and look up this law, read it carefully, then ask themselves as to the status of these organizations in the light of this act. The MIDLAND is in most hearty sympathy with retail druggists of this or any other state in their effort to exist. It is not a question of

Digitized by Google

"getting rich," it is one of existence, and every man has a right to use all reasonable effort to preserve for himself and those dependent upon him a decent livlihood. Nevertheless we believe that every law must be observed at any cost, and we are furthermore convinced that the large majority of retail druggists take this view. If, therefore, the associations in their attempt to regulate or control the price of any article are attempting to do so in violation of any law it is a matter for serious reflection on the part of those in control of these organizations as to their methods of procedure in order to avoid any such conflict. As we understand the matter, the associations of retail druggists in Ohio do not in any of their methods run contrary to any provision of the Valentine anti-trust act.

A "MAGNANIMOUS GIFT."

THE magnanimous gift of $4,342.00 recently made by the Sterling Remedy Co., in accordance with the easy terms of the offer presented by this firm to the N. A. R. D. at its Detroit convention, is enabling the organization to carry out some plans which the executive committee has long realized were of paramount importance, particularly the work of sending trained organizers into localities where at present no organization of druggists exists. This work is proceeding slowly because the committee considers it necessary that only the very best men attainable should be selected for this work, but it will be pushed with vigor, and from present indications the results will be a source of agreeable surprise to the well-wishers of the movement."

The above item appears in the notes sent out from the office of the executive committee of the N. A. R. D., in Chicago, on March 4th. It is our opinion that the manner in which this important announcement is heralded does not savor of either wisdom or good taste. The officers of the N. A. R. D. are quite cognizant of the fact that a good many of the most loyal supporters and friends of the association are not a little mortified, not to say disgusted, with the humiliating spectacle of this body bowing in humble adoration at the shrine of that combination of interests which it was found necessary to sandbag into a decent recognition of the just claims of the retail druggist, and the image set up on this shrine a golden calf.

To call a sum of money which is squeezed out of the pockets of the retail druggists through the advertising so beneficently donated by the N. A. R. D. a "magnanimous gift" is enough to make a little dog turn his back to the audience to conceal his merriment. "Gift?" No, it was a bargain counter sale at a "cut rate" worse than "thirty cents." The price was so small that the most greedy delegate who voted in the Detroit convention in favor of the contract turns his face to the angle of two walls whenever he thinks of his share in the barter. The executive officers are not to blame for the acceptance of the offer; the responsibility for that unfortunate transaction rests with the convention, which adopted the resolution, but we think that discretion would have dictated that it was unnecessary to proclaim through the pharmaceutical press of the country in so objectionable a form the account of the work that is being projected by means of a fund secured in this manner.

OHIO PHARMACEUTICAL ASSOCIATION.

THE twenty-third annual meeting of the State Pharmaceutical Association of Ohio will be held in Dayton on Tuesday, Wednesday and Thursday, July 16th, 17th and 18th, 1901. The druggists of that beautiful and enterprising city are making all possible arrangements to render the meeting enjoyable and if the members of the association do not make a special effort to attend it will not be according the brethren of Dayton that degree of courtesy which their activity deserves. A correspondent in Cincinnati writes a rather discouraging letter, which appeared in the MIDLAND for March, regarding the future of this time-honored organization and predicts its speedy dissolution if some additional vitality is not soon injected into its veins. There is no use in denying the fact which has been for several years apparent to those who regularly attend the annual meetings of the Ohio association that the interest in the proceedings has been steadily diminishing and the attendance falling off. It has not seemed to possess any of the characteristics of a live organization with an object in view and a determination to fulfill its mission. Practically few papers are prepared, the reports of standing committees have either not been given at all or in many cases given in a verbal manner,

Digitized by Google

which practically amounted to no report at all. There has been an attendance of about 100 members with rarely more than one-half of this number present at any one session. A few of the faithful have gathered together, exchanged greetings, sat around in a solemn sort of way, heard a few telegrams of congratulation (for what no one knew), had a good time socially, appointed a committee to name officers for the ensuing year and adjourned with about a dozen members present at the final session. Now, in these days of enterprise and activity, there is no use whatever of going through a perfunctory form simply for the sake of keeping a little breath in a body which has already lost its power. If the retail druggists of Ohio do not care enough for their own interests to maintain within the borders of the state a strong, central organization, to which they are willing to contribute of their means, and use a few days of their time to attend the meetings and endeavor to accomplish something for the general welfare of the retail drug trade in the state of Ohio that fact might as well be known soon as later and the association be permitted to peacefully expire. We are not ready yet to believe this to be the case. On the contrary, we are anticipating a larger attendance at Dayton in July than has been seen in five years. Once there, we believe that some efforts will be made to arouse some of the enthusiasm of former days and that the meeting will close with new vitality and an inspiration for future work. There are still about five hundred members in active relations to the association and we should have at least 250 of these present. If 250 retail drug men can be gathered within the limits of one city we are well assured that the music will be sufficiently inspiring and entertaining to warrant the majority of them in saying that they have had a profitable time and that they expect to return each year.

The privilege of old age is that it can look carefully for the second time into things that it was absolutely sure of in the time of youth.

EDITORIAL NOTES.

WE will cheerfully set aside all the space needed in which to publish the names of proprietors of patent medicines who propose to reduce the prices of their preparations after July 1st, 1901, in proportion to the amount of the stamp tax, which is done away with after that date. The retail druggists contributed not a little to the effort to repeal the stamp tax, and it is reasonable to assume that in the desperate state of the bill providing for such repeal that if the retailers had been indifferent the tax would have remained, in part at least. Now they are anxious to know if they were laboring wholly in the interests of the proprietors, or if they are to reap some of the reward for their activity themselves. This is a very important question to the retail druggist. If he is to pay $7,000,000 to the proprietors instead of to the U. S. treasury his latter state is worse than the first. We hope to have a page of names of those proprietors who will reduce their prices after July 1st, and we will keep the list standing for at least three months, so that all who scan the pages of the MIDLAND will know who have stood up to be counted.

* * *

A RATHER serious mistake, with some ludicrous features, is reported recently from Springfield, Ohio. A young woman, suffering from the effects of a cold, drank from a bottle of "Bugine," supposing it to be "Rock, Rye and Glycerine." We have never sampled "Bugine" and have no inclination to do so; we do know what R. R. & G. tastes like and the "bug juice" must be fixed up in an exceedingly palatable manner if it can deceive an ordinary palate into the notion that it is being tickled with that most popular remedy for a "common cold." But then, the woman was not an expert in tastes or smells and that makes a difference, "Don't you know?" The girl will live to know the difference the next time she has a cold.

* * *

WE have a limited supply of re-prints of form of organization for local associations of retail druggists, a copy of which appeared in the February MIDLAND. A copy will be sent to any person desiring to assist in the work of organizing local associations upon receipt of a stamped envelope.

THE Northern Ohio Drug Association does not seem to be disturbed over the departure of one member to become a wild-eyed cutter. On the contrary, the meetings are more largely attended than ever and the enthusiasm is rising. It is a fight to the conclusion and the members of that enterprising organization are not concerned about the result. The "Cutter" seems to have the ear of a reporter on one of the sensational papers in Cleveland and all sorts of reports are published in the one-cent news(?) paper. We are glad to see the northern Ohio people standing as a unit in this contest. As the MIDLAND has strenuously advocated since it came into existence this is the only method by which the retail druggist is to secure his salvation, and if he does not follow out some such plan of organization it will not be a great while until his remains may be sprayed with formalin and laid away.

* * *

PROF. JOHN URI LLOYD has favored this office with a combination sample of morphine and hydrastine in order that we might make the experiment in line with that given in the trial of Red Head, in "Stringtown on the Pike." Prof. Lloyd has prepared a number of samples of this combination, has put them up in envelopes with printed directions, so that almost any one can make the experiment, and has authorized us to announce that he will forward samples of the mixture to readers of "Stringtown" as long as the present supply lasts. The interest excited by the trial of "Red Head" has brought the author of "Stringtown" many inquiries for this mixture and Prof. Lloyd has very generously offered to gratify this curiosity for amateur scientific experiment in the manner indicated.

* * *

THE Phenyo-Caffein case has reached the Supreme Court of Ohio. All readers of pharmaceutical journals are familiar with the facts in this case, which is identical with those brought in other states to determine the right by agreement of the proprietor to fix the price at which his goods shall be sold at retail. The style of this case is F. P. Schroeder, Plaintiff, vs. Julius Garst, error to the Circuit Court of Cuyahoga county, Ohio. Mr. Schroeder sold Phenyo-Caffein at 19 cents and Mr. Garst sued for damages for breach of contract, and won his case in both the Common Pleas and the Circuit Courts of Cuyahoga

Digitized by Google

county. Schroeder now brings the case to Supreme Court for a final decision. A statement of facts has been agreed upon, a motion to advance the case on the docket has been granted and it will not be long until it is known if the Ohio court will follow those of other states in deciding in Mr. Garst's favor.

* * *

WILL our correspondents please observe that all communications relating to advertising or subscriptions should be addressed to the business manager, while those pertaining to matter for publication in the MIDLAND should be addressed to the editor. The observance of this request will greatly facilitate responses from both departments.

OHIO BOARD OF PHARMACY.

The examination of May 14th and 15th, 1901, heretofore announced to be held at the Chittenden Hotel in Columbus, will be held at Schenck's Hall, 335½ South High street. The assembly hall at the Hotel cannot be secured for the above dates.

Applications for this examination must be filed in the office of the board by Thursday evening, May 9th, else they will not be accepted.

W. R. OGIER, *Secretary.*

MEETING OF COLUMBUS DRUGGISTS.

The Columbus Druggists' Association met on March 26th, for the purpose of acting upon a new constitution, the main features of which were to change the annual dues from one to six dollars and employ a salaried secretary to collect these dues monthly and keep a general oversight of the retail drug trade of that city. The following officers were elected for one year from April 1st, 1901:

President, John Byrne; Vice-Presidents, T. C. Haney, A. W. Kiler; Secretary, W. C. Wendt; Treasurer, Geo. B. Topping; Executive Committee, C. F. Lentz, F. W. Herbst, George H. Matson, A. W. Kiler and E. Stroetder.

COMMENCEMENT.

Ohio Medical University, Columbus.

The Commencement exercises of the Ohio Medical University will be held in the Great Southern Theatre, Columbus, on Tuesday afternoon, April 16th, at 2:30 o'clock. In the evening of the same day a banquet will be given the graduating class by the trustees of the university at the Chittenden Hotel. The candidates for degree of Doctor of Medicine number forty-three. The graduates from the Dental department number fifty-six and there are five graduates from the department of Pharmacy, as follows: Samuel B. Bacharach, Harry J. Haudenschield, Adoniram J. Quimby, Wm. B. Seward and Charles G. Vandever. The following programme for the Commencement service in the afternoon has been prepared:

Invocation.....REV. EDWARD S. LEWIS, D. D.
Introductory Remarks.....
.....DAVID M. KINSMAN, A.M., M. D., Chancellor.
Song.....University Quartette
Address, REV. LOUIS EDWARD HOLDEN, A. M. D., President University of Wooster.
Music..... University Quartette.
Address on behalf of the Paculty.....
.....PROF. JOSIAH MEDBERY, A. M., M. D.
Music.....University Quartette.
Conferring of Degrees.....
.....HON. FRED J. HEER, Pres. Board of Trustees.
Music.....University Quartette.
Benediction.

ANOTHER CRIMINAL CONVICTION.

Charles H. Fletcher Still After Imitators.

That the way of the transgressor is a hard one is being most forcibly demonstrated by the Centaur Company, proprietors of Castoria. President Chas. H. Fletcher, of that concern, still employs a corps of agents which he keeps circulating through the country in search of imitators of Castoria, and has just been notified of two more successful suits brought by them.

One was the case against Benj. Thierhauff, of St. Louis, Mo., who on March 9th was convicted in the Criminal Courts of that city for manufacturing a preparation in imitation of the Fletcher Castoria. This marks the third criminal conviction this company has recently secured against imitators of its goods. The other was a suit brought in the United States Court in the Southern District of Florida against The Williams Drug and Chemical Company, of Tallahassee, Fla. An injunction was granted against the imitators by Judge Locke, at Jacksonville, Fla., on March 8th.

AN ANCIENT APOTHECARY SHOP.

One of the long established pharmacies in Cleveland is about to be removed from the building in which it has been located for more than forty years, and the present building is to give place to modern steel office building towering starward. The store is that of The Mayell-Hopp Drug Co., and was started about the year 1858. Who the first owner or owners were is not definitely known, but the fixtures were those from two or three other stores. A Mr. Hopkins was the owner of the store when the Civil War began and is said to have closed the shop one night and marched away to the war never to be heard of again. A thrilling romance might be written, if these facts could be substantiated, upon which the story might be appropriately hung.

Mr. Hopp says that when he entered the store (which must have been a long, long time ago) it had a cellar five feet wide and forty feet long. and the sweepings from the store were swept down the cellar and under the stairs. J. D. Keegan owned the store about 1868 and in 1869 sold to A. Mayell & Bro. After a few years Mr. A. Mayell bought his brother's interest and continued to conduct it under his own name until the year 1880. Mr. Mayell had some very fine ideas as to the proper conduct of a pharmacy. No liquor was sold by the drink to any one, nor was it permitted to be sold in any form with soda water, or any of the drinks at the fountain. He lost some trade by this rule, many customers going away, declaring they would never enter the store again. But the most of them repented of this in time and afterward became the best patrons of the establishment. Mr. Mayell also closed his soda fountain on Sundays at the outset and strictly adhered to his own notions as to the method of conducting his business, no matter whether he apparently lost or gained in patronage.

Mr. Hopp entered the store as an apprentice in 1870, and having served his apprenticeship there entered the Philadelphia College of Pharmacy, whence he graduated in 1875. He stood at the head of his class and was awarded first prize, which was in the form of an engraved certificate about the size of a regular diploma, and of course this was hung in the store and attracted not a little attention from its customers. Soon after this the soda fountain was eliminated, thrown out, cast aside, and the establishment became a pharmacy in the strictest sense.

Mr. Mayell died in 1891. Mr. Hopp entered the firm of A. Mayell & Co. in 1880 and in 1890 the style was changed to its present form, The Mayell-Hopp Drug Co., and was incorporated under the laws of Ohio. The store will be moved about May 1st to 256 Euclid avenue, where it will be temporarily installed until the new 14-story building is completed, when it will go back to its old location in its new and elegant home.

THE CHILLICOTHE POISON CASE.

Suit has been brought against a prominent druggist of Chillicothe, Ohio, by Miss Tina Brown for $5,000 damages because a clerk sold Miss Brown strychnine for cocaine, which caused her some sickness and a large doctor bill. The facts of the case, after careful investigation, are as follows:

Tina Brown, who is an inmate of a resort, went to the Davis drug store and asked for a small bottle of cocaine, claiming it was for one of her companions, which was true. For some reason the clerk gave her a ⅛-ounce vial of strychnine sulphate, so labeled, and an original package. At the same time he registered it in his poison register as mur. cocaine. How he happened to do this he can't explain, as it is just one of those mistakes which seem bound to occur once in a while. The girl took the bottle home and delivered it, when the mistake was discovered. Instead of returning the bottle to the drug store the owner, Marie Thornburg, insisted on trying the stuff to satisfy herself it was not "coke." The other girls warned her it would kill her, but she bantered them to try it, which they finally did. Tina Brown snuffed some and then declared they could not fool her, she knew it was "coke," after which she laid down and went to sleep. Meanwhile Marie Thornburg kept on snuffing the strychnine and it is presumed used up about one-quarter of a teaspoonful, which shortly threw her into violent spasms and in a couple of hours caused her death. The doctor was called as soon as possible, but of course could do nothing for her. She had taken so much that the doctor wiped some out of her nostrils after he came. Miss Brown was awakened and

Digitized by Google

found herself feeling rather queer, but reporters who inquired how she felt the next morning were assured she was all right. Now she brings suit for damages for her own illness, etc. Can she get it? The case will be watched with some interest and the MIDLAND will endeavor to keep its readers posted.

The Thermometer.

The first use of the name, thermometer, and the first accurate description, comes from Leurechon in 1624, but the real inventor of the instrument was Galileo, and the date between 1592 and 1597. This is proved, not from statements of the inventor but from letters written to him, and the proof is complete. This first thermometer consisted of a bulbed tube, inverted in colored water, in which the liquid rose and fell with the temperature of the bulb. With such an instrument Sanctorius discovered that there was a normal body temperature. In 1632 Jean Rey made a water thermometer, in which the expansion of a fluid replaced that of air, and not long after this Ferdinand II, of Tuscany, by sealing the top of the tube, gave approximately the modern form to the instrument. Mercury had been previously used to show expansion by heat, but in 1714 Fahrenheit constructed the first mercury thermometer with a reliable scale.

Many different scales have at various times been applied to the thermometer, and in most of them the graduation has been almost purely arbitrary. The origin of the Fahrenheit scale is involved in much obscurity. Reaumur was the first to use the melting point of ice for zero, while his boiling point of water, 80°, was obtained by the expansion of one thousand parts of 80 per cent. alcohol between the freezing and boiling points of water. As this was eighty parts, he used this number for his higher fixed temperature. The first to adopt 0° and 100° for the two points was Celsius, but in his instrument 0° represented the boiling point of water. Finally the change to the modern centigrade scale was made independently by Christian of Lyons and Stromer of Upsala, in 1743.

Communications.

We have received the following communication from Dr. George F. Payne, chairman of the special committee of the American Pharmaceutical Association, on the status of pharmacists in the U. S. army and the marine hospital service. Since there is no session of the Ohio legislature this year nothing can be done in the matter in this state until next year. We publish his letter, however, and suggest that the subject would be an interesting and profitable one for discussion and action at the annual meeting of the Ohio Pharmaceutical Association, in July:

ATLANTA, GA., March 22, 1901.

Editor Midland Druggist.

DEAR SIR:—Will you not kindly see that a bill is drawn up and introduced in your legislature to give the Hospital Stewards of your state troops commissions as first or second lieutenants? It would be best to take your medical staff bill and introduce the words, "One pharmacist with the rank of first lieutenant shall be appointed to each regiment and assigned battalion or company. Said pharmacist shall be a graduate in pharmacy and skilled in pharmaceutical work and familiar with the examination of water supplies, foods and sanitary work." Then make such changes in the general bill as to include the pharmacists. There may be other changes necessary. Some might oppose the words, "graduates in pharmacy," others might wish "second lieutenant" instead of "first lieutenant" on account of the rank of first lieutenant interfering with that of the assistent surgeons, if such should be the case, etc. I give you this as a suggestion. I have drawn up a bill for our own legislature and will introduce it immediately upon its assembly. If we could get these bills passed in our various states it would mean a great deal for the professional recognition of the pharmacists not only by the people of our own states, but by our government. The positions in the army of the U. S. would soon be made equal to those among the state troops and would be such that self-respecting pharmacists of ability would in many cases be glad to secure them to the interest of our men in the service and to the elevation of our profession in the esteem and respect of the public in general. Your interest and action in this matter will do much for the promotion of pharmacy not only in your state but in the whole United States. I appeal to you personally as one of the prominent pharmacists of your state who are making its history, to take up this matter actively and to push it to an early conclusion.

Yours fraternally,
GEORGE F. PAYNE.

* * *

GRAND RAPIDS, O., March 21, 1901.

Midland Druggist:

From my standpoint in the "Cleveland Aconite Case" it shows reckless prescribing by the physician. The directions—"ten drops in a *glass* of water and then a teaspoonful every hour." What capacity of glass? Some glasses hold eight ounces, down to one ounce. From a druggist's standpoint I would not fill such a prescription. As a physician I would designate the size. The "teaspoonful every hour" placed on the bottle of tincture of aconite would lead to just such an error as occurred in nine cases out of ten. In this case the physician was first to blame, and the druggist in filling it. It's a wonder more deaths do not occur from the careless and indifferent manner in writing of prescriptions than there is. Physicians think druggists can read any sort of a scrawl. The very best and plainest writing should be used in this work and it would relieve druggists of a great care. Yours,

A. J. GARDNER.

A Fatal Error.

Our Montreal correspondent announces the payment, by a druggist, of $600 to the family of a customer, who lost her life through receiving from the druggist's clerk carbolic acid when tincture of iodine was called for. Inasmuch as the druggist pleaded guilty, he may consider himself very lucky that he escaped with such a comparatively light punishment. But what should be said of the stupidity of a clerk who would mistake the two articles named? His place is evidently elsewhere than in a drug store. He should have some occupation where there would be no chance of imperilling human life.—*Phar. Era.*

It is generally safe to converse freely with an unreserved talker, but when a man lets you carry on all the conversation it is well to be on your guard, for the probability is he is taking your measure.

COLUMBUS ITEMS.

Frank Kienzle can now be found at Rouskolb's pharmacy, South Fourth street.

Stewart Clark has accepted a position as manager of T. B. Ellis' Main street store.

Charles Hatton, of Hatton Brothers' pharmacy, was in New York, on business, a few days last month.

E. H. Rouse has repainted and papered his store on East Long street and it looks very neat in its new "dress."

Clarence Hyle, who formerly clerked at Miller's pharmacy at Main and High streets, has accepted a position with Haney & Brown, at South Columbus.

T. C. Haney, the druggist at Schiller and Third streets, has purchased an interest in the South Columbus Pharmacy, formerly owned by the Schueller Brothers.

G. Lindeman, the South High street druggist, whose store was damaged by fire in February, has again opened up for business, after being closed several weeks to make repairs.

David Jones, who formerly conducted a drug store at Gay and High streets, has moved the stock and fixtures to Long street and Hamilton avenue. The store is now open for business at that location.

E. P. Vance, at Oak street and Wilson avenue, has taken in the room west of his store-room and enlarged his drug store by nearly one-half its original size. When improvements are finished Mr. Vance will have a store equal to any in the city.

The Columbus druggists are all very busy getting ready for the soda season. Quite a number have made extensive improvements in the way of enlarging their facilities for dispensing and not a few have put in handsome new fountains of the latest designs.

Herman Hoppe, the popular German druggist of Livingstone avenue and Fourth street, had his first experience as a political candidate this spring. On account of his friends he was persuaded to make the race for Ward Committeeman. The vote stood —but why go into details?

Joseph Berger, the well-known druggist at High street and Third avenue, has bought and put in place one of the largest and finest canopy-top onyx fountains in the city.

Theo. B. Ellis, the druggist at Main street and Ohio avenue, has opened one of the most complete pharmacies in the city at the corner of Oak street and Ohio avenue. It is an up-to-date model store in every respect. Mr. Ellis surely deserves the patronage of the people in that section of the city, as he has put in a full and complete line of first-class goods and has a handsome place in which to do business.

—

George Fowler, Kentland, Ind., has sold out.

G. S. Reed, South Bend, Indiana, has sold out.

R. S. Knowlton has a new store at Ashtabula, Ohio.

The firm of Foncannon & Co., Toledo, Ohio, has been dissolved.

W. N. Monday, Forest, Ohio, has been succeeded by H. F. Shields.

James R. West, of New Vienna, is sick, from an attack of the grippe.

Carl Lorey, Washington C. H., Ohio, has been succeeded by P. M. Hughey.

W. W. McMillan, Dillonville, Ohio, has been succeeded by the Union Drug Co.

New fixtures adorn the store of A. O. Stearn, 197 St. Clair street, Cleveland.

H. C. Knopf has purchased the Central avenue pharmacy, Cleveland, from J. D. Fall.

The firm of McCann & Ary has been dissolved, W. L. Ary succeeding to the business.

H. H. Flandermeyer, Superior and Delaware, Cleveland, has refitted his store with new fixtures.

Mr. Hoffman, of East Eaton, Ohio, has accepted a position with Hameil & Johnson, Arcanum, Ohio.

R. H. Schrader, of the Schrader pharmacy, Nelsonville, Ohio, has sold his store to J. M. Hyde.

W. L. Cary, for a time with F. M. Gallagher & Co., Racine, Ohio, has returned to Upper Sandusky.

Digitized by Google

Grant McGhee, of Harrison & McGhee, Wellston, Ohio, is visiting at his old home, near Williamsport, Ohio.

Charles Barman, of Chillicothe, Ohio, has accepted a position with Garrett & Ayers, Hillsboro, Ohio.

P. H. Reed, of London, Ohio, went to Ashland Wednesday, March 21st, on business and was gone two weeks.

Charles W. Anthony, of Canton, Ohio, has accepted a position with Charles Henderson, Athens, Ohio.

Frank Price, of Pomeroy, Ohio, who held a position for a time at Indianapolis, has returned to the Ohio valley.

Dave Williams, of Segrist & Williams, Coshocton, Ohio, is able to be in the store, after a severe attack of mumps.

George Giffen, of Giffen & Mackall, Barnesville, Ohio, has been quite seriously ill with the grip.

J. H. Johnson, of Arcanum, Ohio, is in El Paso, Texas, on a trip, combining business with pleasure.

P. L. Feur has a new store at 2813 Superior, Cleveland, and continues his old stand, at Payne and Case avenues.

John Asplin has a fine outfit with an Erie street front in the new Rose building, Cleveland, one of the finest in town.

A. Hoffman, Collinwood, has sold his store to C. R. Bosworth. Hereafter this store will be known as "The Bosworth Pharmacy."

J. P. Harley, formerly of Lima, Ohio, has recently purchased the Rigby & Clark drug store at Warren. Success to you, friend Harley.

A. C. Swimley, formerly of Forest, Ohio, is running the store of Mr. Dabney, Proctorsville, Ohio. Mr. Dabney recently died of tuberculosis.

E. C. Lingan, formerly 1061 Lorain street, has purchased the drug store of Dr. F. D. Page, corner Bolton and East Prospect streets, Cleveland.

Ort & Klostermeyer, of Charleston, West Virginia, have recently purchased one of the latest improved cash registers, which is a thing of beauty.

A. O. Stern has purchased the drug store owned by H. M. Schlitt at Central avenue and Greenwood street, Cleveland. Mr. Schlitt retires from the drug business to take an interest in the Savarin restaurant, Ontario street, with his brother, under the firm name of Schlitt Brothers.

S. H. Lederer has sold his store, corner Prospect and Brownell street, Cleveland, to E. H. Bohm. The name, "Lederer's Pharmacy," will continue.

R. H. Birnie, Macksburg, Ohio, has fitted up the old Snyder pharmacy. The change is so great that its most familiar lounger would fail to recognize it.

Edward W. Meyer has purchased an interest in the business of Joseph Albrecht, 1330 Central avenue, Cleveland. Thd firm name will be Albrecht & Meyer.

Herman McCleary, with W. F. Warning & Co., Blanchester, Ohio, has just returned from a visit to his old home, at Cambridge, Ohio. He reports a very pleasant visit.

Orland Miller, senior member of the firm of Miller & Son, druggists, Newark, Ohio, has been confined to the house for several days with an attack of stomach trouble.

Samuel Aubley is devoting his time to the Bar-Ben Company since selection as secretary. Bo-Lo, his summer drink, will give variety and spice to his meditations.

Simon Snyder, an old citizen of Tiffin, died Friday, March 22d, aged seventy-eight years. He was the father of H. H. Snyder, the well-known druggist of London, Ohio.

W. H. Hickman, the well-known druggist of Nelsonville, and treasurer of Athens county, has been confined to his house for some time with a severe attack of pneumonia.

J. B. Hurst has purchased the W. J. Kauffman store, 295 West Madison avenue, Cleveland. Mr. Kauffman goes to Akron to take charge of his interest in Kauffman Brothers.

Alois Jilek has purchased the J. M. Gehrung store, 158 Quincy, Cleveland. Mr. Gehrung will devote all his time to his interest in the Euclid avenue store of Gehrung & Albrecht.

Joe Steele, of Chillicothe, Ohio, has been laid up for the past week, with what looked to be an abcess, but after careful nursing, he thinks it is a "goner" now and he is up and about as usual.

"The Corner Pharmacy," is the style in which the new store just opened at Painesville, Ohio, is indicated. Mr. H. C. Garrett is the manager and from reports received he has a pharmacy of the very latest pattern, the equipment being elegant and complete. We congratulate the citizens of Painesville on the advantages thus afforded them.

Digitized by Google

Tom Lewis, of Jackson, Ohio, has again taken charge of his old store and once more will wield the pestle and spatula to the satisfaction of his many friends. We wish him his old-time success.

John Wood, of Mt. Sterling, Ohio, has just returned from Ada, Ohio, where he has just completed a course in pharmacy. John thinks he will pass the coming examination without any trouble.

Kreig & Price, of Charleston, West Virginia, have completely remodeled their room, removed all the old paper and paint and beautifully decorated the ceiling and walls, which has added a great deal to their already attractive pharmacy.

M. L. Cockerill, successor to the business of the late John E. Wenz, East Fifth street, Dayton, Ohio, has purchased a fine new fifteen-syrup soda fountain and promises to give his competitors in that section a lively hustle for the soda business this summer.

John Friedland, of Coalton, Ohio, recently heard from his son Frank, who has been in Chicago, undergoing a severe operation on his eyes. He reports a very great improvement and hopes to return soon to the O. S. U., where he was a student for the past year.

W. J. Stuart, of Nelsonville, Ohio, suffered a severe attack of la grippe just as he was about to start on a trip to New York and other eastern cities and was obliged to postpone his visit. His friends will be glad to learn that he has fully recovered, after being confined to his home for a week.

Mr. O. B. Hannon, chief chemist with Strong, Cobb & Co., Cleveland, for sixteen years past, has resigned his position to engage in business for himself. He leaves with the best wishes of the firm he has served so long and faithfully. If he is as versatile in the management of any business as he is in telling good stories he will not be a failure by any means. Success, O. B.

We regret to chronicle the death of Ira Van Houten, of Hillsboro, Ohio. Ira has been with Garrett & Ayers for the past ten years and has been a clerk of exceptional ability, liked and admired by all who came in contact with him. We feel sure his loss will be felt by his many friends. His death was caused by an attack of grippe and erysipelas March 23d. He leaves a wife and a ten-months-old boy, to whom our sincere sympathy is extended.

Giffen & Mackell have succeeded to the drug business of Hornbrook & Son, Painesville, Ohio. Both members of the new firm are experienced druggists and undoubtedly will prove successful in the conduct of their new business.

There is no question that John W. Miller, the genial Dayton druggist, is doing a nice business and his reputation for veracity has always been of the best, but if it is true that he made the following statement, which has recently come to the ears of the MIDLAND, we think he will bear watching. "Speaking of business," he says, "my store has been so full of customers of late that passersby have rushed in and asked in eager undertones what the excitement was all about."

Every druggist has been "held up" at different times by his church, or rather his wife's church, for an ad. in some entertainment programme. No doubt Mr. Richard Collins, the Newark druggist, was looking for vengeance when he put the following advertisement in a receipt book, published by the ladies of the church of which his wife is a member: "If anybody gets sick from eating food cooked from these receipts he can get relief at Collins' drug store. They carry a full line of proper antidotes."

WAS HE A RUBBER MAN?—The newspapers are telling a story of how one Harry Filbey, an employee at the works of the Goodrich Rubber Company, fell five stories through an elevator shaft without being in the least injured. We would like to have it further demonstrated as to the effect of labor in a rubber works and hope some other of the employees may be induced to take a like tumble. We did not see any statement as to how far Mr. Filbey bounced back and are awaiting further information with interest.

Our readers will learn with regret of the death of William R. Warner, Sr., which occurred on Wednesday, April 3d. Mr. Warner's name has been a familiar one in drug circles for more than forty years, the extensive business which he built up at Philadelphia making his name a familiar one. His business career was active and honorable and was justly crowned with success. He was active in the affairs of his business up to the last and although it is left in the hands of his sons, who are thoroughly competent, we have no doubt that his advice will be seriously missed by his business associates, as will his genial personality by his friends.

On the night of April 8th the wholesale drug store of Gilpin, Langdon & Co., Baltimore, was entirely destroyed by fire. The loss, which was largely insured, is reported to be about $200,000.

The building at the corner of Euclid avenue and Erie street, in which the Mayell-Hopp Drug Co. have had their retail store and laboratory for so many years, is to be torn down to give place to a mammoth office and business building fifteen stories in height. The Mayell-Hopp Co. have secured a room on Euclid avenue, a short distance from the corner of Erie street, to which they are about to remove.

The Mallinckrodt Chemical Works call special attention of the trade to their two leading grades of carbolic acid, namely, "Gilt Label" and "Black Label." The latter quality is a very excellent acid, suitable for all general purposes, and fully equal to any foreign or domestic brand sold at a similar price. The "M. C. W.," "Gilt Label" acid, however, is an article of exceptional purity, and especially desirable for medicinal and surgical purposes. This grade should be given preference by pharmacists and physicians when an absolutely pure carbolic acid is required.

On April 6th Rourke Brothers, of Binghampton, N. Y., brought suit for fifty thousand dollars' damages against thirty local druggists, the National Proprietary Association, the National Wholesale Druggists' Association and the National Association of Retail Druggists. It is the old cry of conspiracy and comes because Rourke Brothers find difficulty in obtaining goods to sell at cut rate prices. The usual claim of support from outside sources and the employment of weighty legal ability is made. We look for this suit to go the way of others of like nature which have preceded it, but also look upon it as an evidence that the power of the National association is being felt.

From a Modern Mother's Diary.

Clifford was extremely naughty to-day.

I have offered him fifty cents to submit to being whipped, and he has taken the matter under advisement.

I am determined to whip him, if I have to pay him $1.25.

I feel I am quite right in paying my boy for being whipped.

It teaches him the value of money.

—*Detroit Journal.*

The Springfield Case.

The case brought by Detective Norris against Dr. T. J. Casper for violations of the provisions of the Dow Law has been decided by Judge Goodwin of the Circuit Court. Under this decision the law on which Norris' prosecution was based has been held unconstitutional and if Norris wishes to continue prosecution he will have to take the case to a higher court. The point on which Judge Goodwin based his opinion was that the Middleton Law confused the judiciary with the executive department of government in directing that the Probate Court collect this tax.

This decision is certainly of great interest to the drug trade, as it disposes of this troublesome question and relieves the mind of the pharmacists from the contemplation of possible trouble. It is much hoped that this case will be pushed through the highest court, so that there may be no possible question regarding it. The MIDLAND congratulates Dr. Casper on the firm stand which he has taken and on the success which is his. We acknowledge in the name of the trade of the state the obligation which we owe him.

Behavior of Carbolic Acid and Creosote With Albumin.*

By Jos. L. Mayer, Phr. D., Brooklyn, N. Y.

Among the tests for carbolic acid given in the United States Pharmacopoeia of 1890 we read that on adding this "acid" "either to albumin or collodion, coagulation takes place; (difference from creosote.)" In the Digest of Criticisms prepared by the revision committee of 1890 we find the following in reference to the pharmacopeial statement as to distinction from creosote: "This is certainly an error; it is creosote which coagulates albumin Pharm. Journal and Transactions, '93, Sept., 241)."

In an endeavor to dissipate the uncertainty thus created in his mind, the writer thoroughly read the literature pertaining to the subject and supplemented this by practical work with results which follow. The only part of the pharmacopeial paragraph in doubt is that which had to do with the action of the albumin on creosote, as the wording of the inference implies that carbolic acid and not creosote coagulates albumin. It was natural to expect then that under the article on creosote we should find a statement something like "does not coagulate albumin (difference from carbolic acid)," but such a statement is absent from the pharmacopoeia.

Then came the thought that perhaps an earlier pharmacopoeia would reiterate its assertion made under carbolic acid, and say under creosote that it differed by not coagulating albumin. The 1880 edition rewarded the search; in addition to the notes on carbolic acid which do not differ from those in the 1890 one, there appeared under creosote: "Creosote does not coagulate albumin." Why the present book should go only half way is not apparent.

The new United States Dispensatory (eighteenth edition, August, 1899), under methods of distinguishing carbolic acid from creosote, says: "Creosote is distinguished by not coagulating collodion or albumin." To practically test the worth of these variously couched statements that creosote does not coagulate albumin, the following tests were made:

The white of an egg was taken, and after being thoroughly cut into small pieces with a pair of scissors (to aid solution) was then thoroughly shaken with about 20 per cent. of water to dissolve the albumin, and filtered; this solution was used throughout.

The creosote used was Merck's beechwood variety of the highest purity, which withstood all the tests and did not in any way respond to any reactions for carbolic acid except the albumin one to be described. Two kinds of carbolic acid were employed. One a very pure natural product, and the other a pure synthetic article. The tests were carried out in three-dram cork-stopped homoeopathic vials, as they were more convenient to shake and handle than test tubes. The carbolic acid had added to it just sufficient water to keep it in a liquid state; the conditions as to quantities, etc., were alike throughout, and the number of tests aggregated about sixteen.

In every case where creosote and albumin were mixed, the mixture almost immediately coagulated, that is, formed a mass so gelatinous that it could be cut with a knife. The natural carbolic acid and albumin formed a liquid with white flocculi, and the mixture remained mobile for at least four days before gelatinizing.

The synthetic carbolic acid and albumin formed a very fluid mixture, which showed but a few flakes, and did not at first give any evidence that it would ever gelatinize, but after six days it did so, becoming thick and solidified, but at no time did any of the carbolic acids act like the creosote, and thicken or solidify at once. As a result of this work the writer would call the attention of the new committee of revision to the carbolic acid test as it now rests, suggesting that it be changed to "coagulates collodion (difference from creosote)," and then on a distinct line say "coagulates albumin." It should go farther and under creosote say the same, viz: "Coagulates albumin." It would thus discredit the fallacy that the coagulation of carbolic acid by albumin is a means of differentiating between carbolic acid and creosote, for as both behave in exactly the same manner towards albumin, the test becomes one of identity (when associated with others) rather than one of differentiation.

* Merck's Report.

Last year's production of saccharine in Germany is given as equivalent to 50,000 metric tons of sugar. The sugar producers demand that it be sold only as a drug and its use in foodstuffs is prohibited in France, Belgium and Greece.

SOME NOTED PHARMACISTS

WHO HAVE SERVED ON THE OHIO BOARD OF PHARMACY.

MANY Ohio druggists are not familiar with the history of legislation relating to pharmacy in that state. This is especially true of the younger men who have entered the business within the past fifteen years.

JOHN A. NIPGEN,
First President, Ohio Board of Pharmacy.

The first law applying to the state in general was enacted on March 18th, 1884. For several years previous to that time a law had existed which applied only to the city of Cincinnati. Unfortunately there is not, so far as we have been able to learn, even a fragment of the records of the Board existing under the Cincinnati law. A chapter or two from its records we think would be interesting reading at this time. The members appointed by the Governor under the first state law were John A. Nipgen, of Chillicothe; Edgar M. Hatton, of Zanesville; F. T. Bower, of Toledo; Philip H. Bruck, of Columbus, and Edward S. Wayne, of Cincinnati. These are all living, except E. S. Wayne, in fact, he is the only person who has at any time held membership on the Ohio Board who is deceased.

The first meeting of the Board was held in Columbus, on April 8th, 1884. At this meeting John A. Nipgen was elected president, and P. H. Bruck secretary. These gentlemen continued to fill these offices until May, 1887, when Mr. Bruck retired from the Board, declining a re-appointment, and Mr. Nipgen was chosen secretary, which office he held for one year. Mr. Bruck entered the political field, at once being elected mayor of the city of Columbus, which office he held for two terms, and subsequently was elected to the House of Representatives of the Ohio legislature. He has been a prominent factor in political affairs in his home city since his retirement from the field of active public life and is

PHILIP H. BRUCK,
First Secretary, Ohio Board of Pharmacy.

now engaged in private business. Mr. Nipgen retired from the Board in 1888 after four years of faithful service and has since devoted himself to his pharmacy in Chillicothe, where he has a splendid record as a

Digitized by Google

careful and competent pharmacist. Modern methods of pharmaceutical training have not developed better specimens of the real pharmacist than Messrs. Nipgen and Bruck.

Prof. E. S. Wayne attended but three meetings of the Board and never became identified with its work. He was in feeble

JOHN WEYER, Cincinnati, O.

health during the time of his membership and died in Philadelphia in December, 1885. His place was filled by the appointment of John Weyer, of Cincinnati, who continued in the service until April 1st, 1894. Edgar M. Hatton retired from the Board in March, 1889, and was succeeded by James M. Colwell, who served the balance of the unexpired term of two years. Dr. Hatton resigned from the Board to enter the practice of medicine and he is now one of the leading physicians of Columbus. In 1888 Mr. G. L. Hechler was appointed to the place vacated by Dr. Nipgen and served four years, resigning his position to permit another member to be retained on the Board. Such action is characteristic of Mr. Hechler. Large of heart as he is of body, sound in judgment and fearless in the performance of duty he needs no introduction here and the eulogies pronounced over him when he is gone will not be any more eloquent than his straightforward life and devotion to what he conceives to be right actions.

F. T. Bower, of Toledo, served on the Board until 1895, when he was succeeded by George W. Voss, of Cleveland, who is at present a member.

The law of 1884 was repealed in 1898 and a new one enacted in its place.

It was a queer combination of terms, ambiguous, indefinite, saying too little on important points and too much on those of small significance. Those who had the responsibility of interpreting and enforcing its provisions and establishing in the state the fact of its existence and what it required of those whom it specifically interested was not an easy task. It required a great deal of wisdom and discretion. There were no precedents to guide, there was no well defined idea among pharmacists as to what a law of this character was intended to accomplish, and there was an entire absence of interest on the part of the people as to the necessity for such restriction as a pharmacy law ought to impose. The law

EDGAR M. HATTON, Ph. G., M. D., Columbus, O.

was difficult to enforce, because in its most important point it provided no penalty for its transgression. Moral suasion and frequent reminders as to what it required with an occasional prosecution was the most that the Board could do under the conditions.

Digitized by Google

which existed at the time. These men discharged these difficult and delicate duties with fidelity and ability which is not surpassed by many men in public positions and in the selection of members of the first Board of Pharmacy choice fell upon a true and faithful set of individuals, who did honor to the state as well as to the profession to which they belonged. Mr. F. T. Bower, of the first Board, has retired from the practice of pharmacy to engage in other

G. L. HECHLER, Cleveland, O.

business, and Mr. John Weyer has for several years been the secretary of the Retail Druggists' Fire Insurance Co., of Cincinnati, which was organized through his efforts in 1890, and has always been a prosperous enterprise of great benefit to Ohio druggists. In a future number of the MIDLAND we will give a brief sketch of some of the later members of the Ohio Board.

There is no substitute for rest. Medicine is a makeshift. Bracers and tonics are temporary. Get plenty of sleep, spend more evenings at home surrounded by quiet influences. The man who works hard all day and seeks excitement in the evening soon finds "there's something wrong" and he is lagging behind in the procession. He gets a cheaper job and he is a has-been. The young man who passes him at the half-mile post is the man who takes rest and takes care of his health.

BUSINESS COURSES IN COLLEGE OF PHARMACY.

I do not believe that a course in commercial training has any place in the curriculum of a college of pharmacy, not because a knowledge of business methods is unnecessary to the pharmacist, but for the reason that this branch of training belongs to the legitimate business colleges, and also for the reason that the training in commercial lines, such as would be practically useful to the pharmacist, cannot be acquired at college. Enterprise and thrift are inherent qualities which, while they may be developed to some extent, cannot be inculcated by any sort of school training.

I am not prepared to admit that the average pharmacist possesses lower business qualification than those engaged in other lines of merchandising. In fact, I am inclined to the opinion that he is rather above the average in this quality. It is generally considered among credit men that drug store risks are among the best, and certainly the proportionate number of failures goes to support this opinion. Few pharmacists get rich, when riches are measured on the millionaire standard of the present day, but that is because the entire volume of business done in an average drug store would not build up what would now be called a fortune.

An attempt to introduce commercial training as a part of a course in pharmacy would necessarily take time from the study of other subjects. The terms of instruction are altogether too short to permit the proper mastery of the branches already essential to such a course and would result in a general lowering of the qualification of the graduates. It is well, and I think it is a general custom in colleges of pharmacy, to devote a few lectures to the conduct of the store, in which the uses of the various commercial papers are explained. Further than this I do not think it advisable to go. Very few pharmacists have any occasion for the use of an elaborate system of accounts, and these few who have a business large enough to require such, find it economy to employ trained accountants. The simple method in vogue in most drug stores may be readily understood and all the various points relating to the care of stock, conduct toward customers, and other strictly store methods are best learned in the stores themselves.

Yours very truly,
GEO. B. KAUFFMAN,
in Phar. Era.

NEW MEMBER OF THE OHIO BOARD OF PHARMACY.

On April 6th Gov. Nash appointed Chas. W. Tobey, of Troy, Ohio, to membership on the Ohio Board of Pharmacy for the term of five years from March 31st, 1901. Mr. Tobey may feel complimented in receiving this appointment from the fact that the State Pharmaceutical Association submitted at its last meeting an unusually strong list from which to make the selection, and any one of the gentlemen named therein would have graced the position and made a useful member of the board.

C. W. TOBY, Troy, Ohio,
New Member, Ohio Board of Pharmacy.

Charles W. Tobey was born in Dayton, Ohio, in 1855. In 1865 his family moved to Troy, where they have resided up to the present time. Mr. Tobey served an apprenticeship of four years in the retail drug business and graduated from the Philadelphia College of Pharmacy in 1876. He has been continuausly engaged in the retail drug business under the firm name of N. Tobey & Son. He was elected president of the Ohio State Pharmaceutical Association in 1896. Mr. Tobey is a genial, courtly and portly gentleman, well qualified by education and experience for the delicate and difficult duties which await him, and we feel confident will become a valuable member of the board as soon as his official harness has been fairly adjusted. He will not find the field all daisies and spring violets, there will be thistles, and rag-weed, and goose-grass, and burdock, and jimson. Here and there an American Beauty, or a carnation may be plucked, but there are not enough of these to more than furnish an occasional *boutonniere.*

At the Other End.

Nathan Strauss, the great New York merchant, when asked what had contributed most to his remarkable career, said: "I always looked out for the man at the other end of the bargain."

Mr. Strauss says that, if he got a bad bargain himself, he could stand it, even if his losses were heavy, but that he could never afford to have the man who dealt with him get a bad bargain. He felt that his own loss, however great, might possibly be repaired; but that, if a man who had dealings with him should lose, or be deceived thereby, nothing could ever compensate him (Mr. Strauss) for this, as his character would be permanently injured. The history of the leading business establishments in this country shows that the men who built them up always looked out for "the man at the other end of the bargain."—*Success.*

A man should act like a guest at a banquet. When the waiter passes by with something he wants he should decide and act immediately, and not wait until the waiter has passed look at the waiter longingly, wishing he had taken something. While he is looking at the vanishing waiter, other waiters are passing by, offering opportunities. An opportunity once passed can never be taken advantage of again. On the other hand, the guest at the banquet should not pass his time looking at the waiter just entering the hall, for he is missing opportunities if he spends his time looking for some good time to come in the future. Instead of grasping present opportunities, the guest who divides his time between watching the waiters who have passed, and the waiters who are coming, misses many waiters who pass before him offering him a chance to grasp present opportunities.

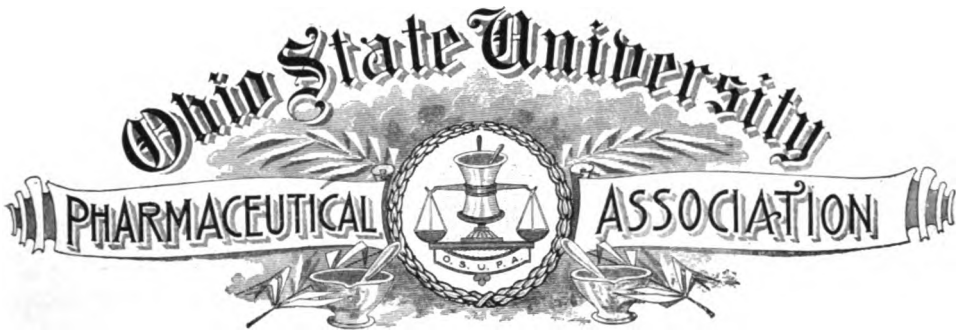
O. S. U. PHARMACEUTICAL ASSOCIATION.

Digitized by Google



O. S. U. Notes.

The Association, for two reasons, wishes to call attention to the cut used at the head of our notes this month. In the first place, we want our readers to know that the cut is a reduced fac-simile of the head of the diploma which is given to students who have been members of the Association for two years and who have fulfilled their duties as such. Also we wish to call attention to the emblem in the centre of the cut, which is the emblem adopted by the society. This cut will be used permanently as an introduction to our notes.

—

On another page will be seen a cut of our Association, which will appear in the college annual, the "Makio."

—

The new catalogue of the pharmacy department will be out in a week or more; any person desiring one will please notify the department.

—

The department wishes to complete its file of the *Druggists' Circular* and would be pleased to communicate with any one having the following numbers for sale: August, '93, and February and March, '94. We would also like to purchase the November, '99, and May, 1900, of the *Western Druggist.*

—

We are one month nearer our trip to Detroit, which the students are looking forward to with much pleasure. Miss Lucy M. Harvey, of Pomeroy, Ohio, has written us expressing a desire to be one of our number. Let us hear from others. Professor Beal expects to send from forty to fifty students from Scio college to join our excursion. Remember the time, latter part of May, after state board examination.

—

Monday evening, April 8th, being the first meeting of the O. S. U. P. A. this term, the regular election of officers was held. A very interesting address by Mr. Somermeir, on the importance of the study of mineralogy to the pharmacist, was listened to with pleasure. Mr. Somermier is assistant instructor in the department of mineralogy and metallurgy and being an enthusiastic student of minerals his talk was given with the idea of instilling a love of the study into the members of the Association. An extract of his paper appears on another page. The election of officers was of special interest, owing to the contest for President of the Association, the successful candidate having the honor of wearing the beautiful jeweled pin, presented to the Association by Professor Kauffman. The officers elected were as follows: President, Mr. Royer; Vice-President, Mr. Pope; Secretary and Treasurer, Mr. McBride; Master of Programmes, Mr. Funk.

—

A very complete set of mineralogical specimens has been received by the department of pharmacy. The collection consists of one hundred and seventy-five of the more important minerals, from which the manufacturing chemist obtains his supply of crude material. These minerals will be used in class-room work to illustrate the sources of chemicals used by the pharmacist in his daily work. The collection will be placed in glass jars, properly labeled with chemical composition and locality where obtained, and placed in a convenient case in the lecture-room along with the other collections. Some of the specimens present a very beautiful appearance, the copper and iron ores in particular. One specimen which does not fail to attract attention is a hard rock, containing small pockets filled with metallic mercury. Other specimens of mercury are cinnabar and calomel crystallized. Crystals of sulphur, gypsum, arsenic salts, orpement and realgar and many other beautiful minerals. We would be pleased to have our readers call and spend some time examining the collection. It will be both interesting and profitable.

Digitized by Google

The O. S. U. P. A. held its last meeting for the winter term March 25th in the pharmacy lecture-room. A large crowd was in attendance and a special programme was given. In the absence of President Hoover Vice-President Royer assumed the duties of President.

The first paper of the evening was presented by Mr. A. W. Kiler, on "Some Pointers in Conducting a Retail Pharmacy." Mr. Kiler is a graduate of the O. S. U. College of Pharmacy and as he is now and has been for the past few years actively engaged in the drug business, he is abundantly able to offer valuable suggestions.

Mr. Kiler's paper was followed by a talk by Prof. G. B. Kauffman. In it he manifested his interest taken in the society and especially urged us to take part in the discussions whenever such opportunities present themselves, for the benefits derived from such training will be of inestimable value to us later on in life. Lack of just this kind of training, he said, is very evident in large meetings and associations, where it is necessary for the members to take part in discussions in order to have some representation in the meetings. Prof. Kauffman then treated us to a surprise which he had prepared for us. The society was presented with a handsome jewel pin, wrought in the form of the emblem of the society, and set with diamonds, rubies and opals. This pin is to be the property of the Association and is to be worn by the President during his term of office, and is to be handed down from the retiring President to the President-elect. Mr. Hoover has the honor of being the first President to wear the emblem.

Every member is anxious to become the next President and we are looking forward to the election with interest.

During the evening excellent music was furnished by Messrs. Baltzley and Heaton. Upon the whole this was one of the most interesting and instructive meetings of the term. We are looking forward to a series of good meetings next year.

Some Simple Chemical Experiments for the Drug Clerk.

What a splendid opportunity the drug clerk has for acquiring a knowledge of experimental chemistry, yet how seldom does he avail himself of the ready means at hand. The drug clerk, especially in country towns, usually has several hours a day which may be devoted to any subject he may prefer and the object of this article is to induce him to spend some of that time on a few of the simple tests which are so easily made and which are of such permanent value.

I fear that too often the words chemistry, analysis, test, experiment and many similar words convey too serious a meaning to the student. One thinks of costly and elaborate apparatus, rare chemicals, expensive books and years of college training as a prerequisite to such work; true, they represent all that and much more to the earnest student who devotes his life to such work, but they have a beginning and it is of this beginning that I wish to write. For instance, how easy it would be to heat some red oxide of mercury, or chlorate of potassium in a small glass tube, sealed at one end and then introduce a splinter with a live coal, the coal will burst into a flame. If chlorate of potassium is used it is better to add a little manganese dioxide, which aids in liberating the oxygen.

If you have a heavy colorless crystalline substance, having a sweetish taste, treat it with a little sulphuric acid and if it give an odor of acetic acid, you probably have acetate of lead, or sugar of lead, as it is commonly called. Heat on a small piece of charcoal, see if you get a soft metallic bead of lead. Lead carbonate, oxide, nitrate, etc., give the same charcoal reaction.

Rub a little mercury and chalk on a copper penny and you will have what the "faker" calls a silver plate.

The carbonates and bicarbonate liberate carbonic acid, which is a heavy gas, and will extinguish a lighted taper when introduced into a tube containing it. Heat a small crystal of nitrate of silver on charcoal and you will get "free silver."

A very interesting experiment, and one that gives you a glimpse into the realm of organic chemistry, and the manufacture of synthetic products, is the artificial production of oil of wintergreen. Heat a small quantity of sulphuric acid, salicylic acid and wood alcohol together and you will get the odor of oil of wintergreen. Oil of wintergreen is composed principally of methyl salicylate and salicylic acid when heated with methyl alcohol in presence of sulphuric acid forms this compound. This experiment may be used as a test for either wood alcohol or salicylic acid.

Treat some ammon. chloride with potash or lye and you will liberate ammonia gas.

To determine whether your alum is ammonia alum or not apply the same test.

Digitized by Google

Heat some common salt (sodium chloride) and sulphuric acid and you will generate hydrochloric acid, but if a little manganese is added you will liberate the very poisonous yellow gas chlorine. Be careful not to inhale this gas, as it is very irritating to the throat and nasal passages.

Perhaps you did not know that iron would burn; then you have never watched the blacksmith as he drew a heated iron from the forge and by striking it made the small particles of iron fly away, burning brilliantly. You can perform the same experiment on a small scale by dropping some reduced iron into a gas or alcohol flame, or very fine steel wire, such as is used by the jeweler, will burn brilliantly. It is the iron uniting with the oxygen of the air, just as the splinter did when burned.

Dissolve a little boracic acid in some alcohol and ignite it and observe the beautiful color imparted to the flame. If no boracic acid is at hand use borax and add sulphuric acid, which will make sulphate of soda, and liberate boracic acid, which gives the color test. It is a very easy matter to distinguish between calomel and corrosive sublimate, one is soluble and the other not, one gives a black mixture, the other a yellow one when mixed with lime water. When sulphur is burned you get sulphur dioxide, the familiar odor of burning matches. It is from this gas that sulphuric acid is made.

There are a number of tests to distinguish iron, copper and many other substances found in all drug stores, and the only wonder is that drug clerks do not make use of their spare moments and lay the foundation for the study of chemistry, which will bring many pleasant and profitable hours. These tests and experiments are so simple that I am sure that no one need hesitate to try them, and then, perhaps, they will want to know the why.

—W. A. L.

Some Common Minerals and Their Identification.

By far the larger part of the earth's crust is made up of inorganic material and if quantity be considered of importance, a knowledge of rocks and minerals certainly merits an important place and it is difficult to understand why a study of the commoner minerals is not fully as interesting and valuable as the study of plants and animal life. Yet how many of us know even the very commonest rocks and minerals, though a knowledge of them is easily obtained, and rocks and mineral specimens are not only interesting to collect, but also have the advantage of being easy of preservation. To the pharmacist especially, a study of the commoner minerals, their occurrence, composition and identification ought to be easy, interesting and valuable, as the chemical knowledge acquired in pharmaceutical work is easily applied to the simpler chemical tests for minerals, while the physical characteristics and tests are easily understood, even by those lacking the chemical information. And the pharmacist, daily dispensing compounds of lead, antimony, silver, arsenic, gold, platinum, iron, copper, zinc, etc., ought certainly to feel an interest in the minerals from which they are derived, and a collection of a few of the more representative minerals, labeled as to occurrence, composition and pharmaceutical products obtained therefrom, while comparatively inexpensive would make both a novel and interesting showcase exhibit.

The pharmacist who is able to explain to a customer that the piece of yellow mineral which he found on the hillside can't be gold because of its hardness, brittleness, lightness in weight and its failure to stand certain tests, gets a local reputation for knowing his business and probably gets a few more prescriptions to fill, or makes a few sales which his competitor might otherwise have made.

A few words as to some of the commoner minerals. Calcium carbonate in crystalized form makes a very pretty specimen and its effervescence in cold dilute acids, its being easily scratched with a knife and its common crystalline form, something like a distorted cube, makes its identification usually not difficult.

Iron pyrites, or sulphide of iron, on account of its golden color, is an interesting specimen to the ordinary individual. It is characterized by its hardness, crystalline form usually in cubes or octahedrons or combinations of the two, and when fused it gives off the characteristic odor of sulphur matches and the residue becomes magnetic. It is at present the chief source of sulphuric acid.

The commoner arsenic mineral, from which the white oxide of commerce is obtained, is a sulphide of iron and arsenic, which, when roasted, yields up its arsenic in the form of the white oxide. This mineral not only gives reaction for iron and sulphur but also, if carefully heated, gives off the strong pungent odor of garlic.

The lead and silver minerals give metallic

Digitized by Google

globules if heated on charcoal before a blow-pipe flame, and these globules can be tested further for lead and silver.

The copper minerals form an interesting series, some of them being quite beautiful in appearance, the carbonate being a bright green, another near related form being a azure blue; the oxides are red and black, while some of the complex sulphides present quite an array of colors, yellow, blue and purple. All the copper minerals if roasted on charcoal, then moistened with hydrochloric acid and again heated, give a characteristic blue color, due to the presence of copper chloride.

Many other common or important minerals might be mentioned, but those given above serve to show how the unknown specimen can be identified by its appearance, hardness, its action with acid and its conduct when heated. Effervescence in acids characterizes the carbonates, the odor of burning sulphur when heated characterizes the sulphides and the garlic odor distinguishes the arsenides. Also certain minerals when heated on charcoal give coatings of zinc oxide, pale yellow when hot but white when cold.

With only a comparatively few pieces of apparatus and the use of a few chemicals and the aid of a tabulated list of minerals arranged similarily to a botanical key the unknown mineral can usually be identified without great trouble. We can easily learn to recognize the commoner ones by sight, just as we come to recognize the commoner varieties of flowers.

The crystallized mineral and the fragrant flower each have their own peculiar beauties and properties, both being products of nature's handiwork and both being worthy of our time and study, and a few hours now and then applied to the study of minerals while not only pleasant and interesting at the time, may perhaps in the future prove of commercial value as well.

PROF. E. E. SOMERMEIER.

Have you ever noticed that not one time in ten is your suspicion correct? How much better, therefore, is it to spend your time looking for good in a person.

Let it be said of me by those who know me best, that I have always plucked a thistle and planted a flower in its place wherever a flower would grow.

THE PROFESSIONAL VIEW OF PHARMACY.

Every druggist who aims at approximating to the standard of a true professional pharmacist looks forward with great hope toward that future when only well-educated men will be classed as pharmacists, and when, by differentiation, something akin to the drug-dealer of Europe will supply the ordinary drugs the public demand. Evolution is at work now molding conditions for that future in a way that is making the timid fear and the pessimistic scowl. The same unbending law that incessantly keeps projecting into being multitudinous variations among plants and animals, only to let the fit survive, is at work among pharmacists leading them on to the newer and higher conditions of the future.

Already, within a comparatively brief time, we have seen one set of pharmacists turning their exclusive attention to the production of chemicals, another to the preparation of galenicals, a third to the providing of plasters and surgical dressings, while still others give their sole attention to the making of tablets, pills, or even seidlitz powders. Here and there we see an effort being made toward the realizing in practice of an ideal pharmacy where the chief work done is the compounding of prescriptions, and where the only semblance of a commercial business is the sale of such articles as are of use in the sick-room or in demand by the surgeon.

Many uninformed persons imagine that progress is a movement along an imaginary straight line, and hence, when they come to look over the present developments of pharmacy, they fail to discover any indications of what they would call progress. As there is nothing to show that the world ever, in its whole history, gave evidence of any such type of progress as the kind they are looking for, it is no wonder that they can find no indications of any such progress now. Development only comes through division of labor and higher training of the individual along the lines of such division. The great pharmacist of the future will be the one who has mastered completely only a little, narrow field of pharmacy, but who at the same time knows, in a masterly but general way, the various relations of all the rest of pharmacy to his field.

No amount of direct effort on the part of pharmacists themselves to hurry up the hoped-for pharmaceutical millennium can aid it to any appreciable extent. Indirect effort alone can accomplish much. Its chief dependence is on the public. Society must feel the need of the ideal pharmacy before it can be properly realized. To bring society to feel such need is the task that has to be performed. The masses must learn to select their pharmacists as they select their lawyer. They must seek for the man who, in their judgment, possesses the greatest skill as a compounder of remedies, and whose word of honor can be depended upon regarding the goods he supplies. They must be taught that it is fatal for them to attempt to rely upon their own judgment in matters so serious as the quality or kind of drugs they take.

When once this lesson has been taught, there will be very little trouble in the securing of adequate compensation by the skilled pharmacist for his services. Only extremely poor people will hesitate to pay him the prices he demands, and then only because of their poverty, and not because they think he is overcharging them. The great lawyer and the great doctor can command enormous fees for their work simply because their clients and patients believe that their services are worth such fees to them. The great pharmacist of to-day can command no such fees, and cannot even double upon the rate of his inferior competitor, simply because the world has not been taught to believe in him. The false notions that exist in the minds of the masses regarding the importance of education in pharmacy is responsible for this state of affairs. The purely commercial druggist thrives on the skepticism of the people and holds down the whole profession to his own level. His struggle for higher prices, instead of being made on the ground of his skill, he seeks to enforce by methods which his customers cannot help but look upon as wholly unprofessional.

Pharmacists must teach the public to know that it is wholly and wofully ignorant of pharmacy, and that it is the part of wisdom to seek out and trust the honest, educated pharmacist. Colleges and boards of pharmacy must learn how best to adapt themselves to the demands of an evolving pharmacy, and to make the education they impart fit the future needs of their students or licentiates. Our great universities are dividing up their classes into special departments where young men can have selec-

Digitized by Google

tive studies suited to their future needs. Our colleges of pharmacy may in time have to adopt a somewhat similar method in dealing with their students. Manufacturing pharmacists of every grade, mere salesmen in pharmacies, and skilled prescription pharmacists, all have at present the same studies to pursue whether adapted to their wants or not. Future divisions in the practice of pharmacy will be very likely to change this and bring about a differentiation in education parallel with the differentiation in the expected future functions of the student of pharmacy.

The "Allcock" Plasters
ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

ALLCOCK MFG. COMPANY, (Successors.) Salesrooms—274 Canal St., New York.

INCOMPATIBILITIES OF HEROIN AND HEROIN HYDROCHLORIDE.

Heroin and heroin hydrochloride form an essential part of so many formulæ for the relief of cough, dyspnea and pains in the treatment of respiratory affections, that it is important to determine in what combination they will prove most effective and what are their incompatibilities. Owing to the insolubility of heroin in watery solutions it is necessary to add a few drops of some acid, acetic or hydrochloric, in order to effect its solution. This can be entirely obviated by using the hydrochloride, which is freely soluble. The only incompatibilities of heroin and the hydrochloride worthy of special mention are the alkalies, such as bicarbonate of sodium and carbonate of ammonium. On the other hand, salts of neutral reaction, such as iodide of potassium or chloride of ammonium, may be used in the same mixture, and this also applies to acid salts, such as the hypophosphites or acid phosphates. The vegetable expectorants, as ipecac, senega, squill and sanguinaria, are entirely compatible with heroin and its hydrochloride. Although many physicians employ heroin without admixture, very desirable results have been reported from combinations with iodide of potassium, chloride of ammonium, and the vegetable expectorants, according to the indications present in particular cases. A word as to the dosage of heroin and heroin hydrochloride may be of interest here. The large doses at first recommended at the time of the introduction of heroin are no longer preferred by the majority of authors, the average dose ranging from one twenty-fourth to one-twelfth grain in adults, and one one-hundred-and-twentieth to one-sixtieth grain in children. It is advisable not to employ larger doses until the smaller ones have been given a trial. Furthermore many physicians now resort to the hypodermatic use of heroin hydrochloride in cases in which it is desirable to obtain an immediate effect, and especially in the treatment of spasmodic conditions, such as asthma, care being taken in the preparation of solutions not to add the drug until the water has partially cooled.

CODE OF ETHICS.

Philadelphia School of Pharmacy.

The pharmaceutical profession being one which demands knowledge, skill and integrity on the part of those engaged in it, and being associated with the medical profession in the responsible duties of preserving the public health and dispensing the useful though often dangerous agents adapted to the cure of disease, its members should be united on the ethical principles to be observed in their relations to each other, to the medical profession and the public.

The Philadelphia College of Pharmacy being an incorporated institution, embracing among its members a large number of eminent pharmacists, manufacturers, chemists, and scientists, has erected and consistently maintained a high standard of scientific attainment, which there is a growing disposition on the part of candidates for the profession to reach; and being desirous that, in relation to professional conduct and probity, there shall be a corresponding disposition to advance, its members have subscribed to the following fundamental principles for the government of their professional conduct:

1st. We accept the United States Pharmacopoeia as our standard and guide for all official preparations.

in compounding a prescription written in a foreign country the Pharmacopoeia recognixed as authority in that country is to be followed. For unofficial preparations we advocate the adoption of uniform formulas in accordance with the National Formulary or other standard works, published by national or international agreement.

2d. The practice of pharmacy can become uniform only by an open and candid intercourse between apothecaries, which will lead them to discountenance the use of secret formulas in dispensing, and promote the general use and knowledge of improved methods. This college considers that any discovery which is useful in alleviating human suffering or in restoring the diseased to health, should be made public for the good of humanity and the general advancement of the healing art. We particularly deprecate the use of secret formulas between physicians and pharmacists.

While, at present, the college does not feel authorized in requiring its members to abandon the sale of proprietary medicines, it earnestly recommends the propriety of discouraging their employment.

3d. The apothecary should be remunerated by the public for knowledge and skill, and the charges should be regulated by the time consumed in preparation as well as by the cost of the article sold. Although location and other circumstances necessarily affect the rate of charges at different establishments, no apothecary should intentionally undersell his neighbors with a view to their injury.

4th. No apothecary should be engaged in furthering the interests of any particular physician to the prejudice of other reputable members of the medical profession. We emphatically condemn the practice of allowing physicians a percentage on prescriptions as unjust to the public and detrimental to both professions.

5th. As the diagnosis and treatment of disease belongs to the province of medicine and as a pharmaceutical education does not qualify the pharmacist for the discharge of these responsible duties, we should, where it is practicable, refer applicants for medical aid to a regular physician. And we likewise hold that medical practitioners should recognize the value of pharmaceutical education and relegate the compounding of prescriptions and the dispensing of all medicines to pharmacists.

6th. As medical practitioners occasionally commit errors in their prescriptions, which may or may not involve ill-consequences to the patient if dispensed, and be injurious to the character of the prescriber, it is held to be the duty of the apothecary in all such cases to protect the physician and to have the corrections made, if possible, without the knowledge of the patient, so that the physician may be screened from censure. When the errors are of such a character as not to be apparent, without the knowledge of circumstances beyond the reach of the apothecary, we hold him to be blameless in case of ill-consequences. As the original prescription is his guarantee, we recommend that it should always be retained by the apothecary.

Apothecaries, likewise, are liable to commit errors in compounding prescriptions, and we hold that in all such cases it is the duty of the physician to protect the interests of the dispenser, and stand between him and the patient as far as possible.

7th. The apothecary should be able to distinguish between good and bad drugs, and as the substitution of a weak or inert drug for an active remedy may be produc-

Digitized by Google

tive of serious consequences, duty demands that he should exercise his expert knowledge and good judgment in the selection and preparation of all remedies. We hold that substitution or the sale of impure drugs or medicines, when pure articles can be obtained, is highly culpable, and that it is the duty of every honest apothecary or druggist to expose all such fraudulent acts as may come to his knowledge.

8th. As there are many powerful substances that rank as poisons, which are constantly kept by apothecaries and prescribed by physicians, and which are only safe in their hands, we hold that the apothecary is not justified in vending these powerful agents indiscriminately to persons unqualified to administer them, and that a prescription should always be required when intended for medicinal use. When the poisons are intended for technical purposes, or for the destruction of animals or vermin, the sales should only be made to responsible persons and strictly in accordance with the state law governing the sale of such poisons.

9th. While we recognize the value of spirituous liquors as therapeutic agents and the necessity for pharmacists dispensing these legitimately in accordance with the physicians' prescriptions, we condemn as degrading and unprofessional any attempt to make such sales a prominent feature of the business.

We discountenance any attempt to foster or increase the use of opiates or injurious drugs possessing the power of enslaving the consumer to habitual use.

We hold that where there is good reason to believe that the purchaser is habitually using stimulants, opiates or other injurious drugs, that we should discourage such practice by every means possible, and we urge upon pharmacists the duty of exercising at all times a conscientious care in dispensing drugs liable to such dangerous abuse.

10th. As pharmacy is a progressive profession, its followers should, by continuous study and application, keep abreast of the advances made in medicine and the sciences. It becomes our duty to encourage the elevation of our chosen profession by stimulating research, investigation and study.

Special care should be exercised in the selection of our assistants. No apprentice to the business of apothecary should be taken for a less term than four years, unless he has already served a portion of that time in an establishment of good character. Assistants should invariably be entered as students in a college of pharmacy and encouraged to secure a thorough education. As the progress of our profession, in the scale of scientific attainment, must depend mainly upon those who are yet to enter it, it is recommended that those applicants who have had the advantage of a good preliminary education, including the Latin language, should be preferred.

—*Pharmaceutical Era.*

The *Indian Planters' Gazette* gives its readers the information, "as of special value to planters generally," that fruit acids are germicidal. The juice of lime and lemon, it says, is as deadly to cholera germs as corrosive sublimate or sulphur fumes or any other disinfectant. It is so powerful a germicide that if the juice of one lime or lemon be squeezed into a glass of water, that if then left standing 10 or 15 minutes, the water will be disinfected. It makes little difference where the water has been obtained, or whether it has been boiled or filtered. This is a fact worth knowing, for any one may at any time find himself under circumstances which it is impossible to get either boiled or filtered water. In such a case the juice of a lime or lemon will purify the water perfectly.

THE PHARMACEUTICAL PRESS.

Puffing and advertising do not avail much. If the contents of the journal fails to give the subscriber a conviction of ability, force, courage, and a real usefulness in the every-day work of the druggist, that journal is infallibly doomed; it cannot be bolstered up for long; it cannot long escape the fitting penalty of mediocrity, laziness, cowardice, or stupidity.

The result of the keen and merciless competition prevailing in pharmaceutical journalism shows itself in the very high character of the pharmaceutical press. Compare that press with the medical press or with the organs of any other calling, whether professional or commercial, and you will realize with what zeal and energy, with what knowledge and intelligence, it seeks to advance your interests, to point out every promising avenue of progress, to attack your evils, to advocate your reforms, to gird up the loins of your organizations, and send forth regularly a fund of material comprising everything profitable that you can buy, borrow, and originate. Then look about among your *other* pharmaceutical institutions—your boards, your colleges, your associations—and see how faulty and feeble some of them are.

Granting a great proponderance of good in the work they accomplish, it cannot be denied that some of them have gaping holes in their armor. And yet barring a few wretched travesties of pharmaceutical journalism, barring a few periodicals which succeed in clinging to the skirts of a profession which repudiates and casts them off, I challenge the severest critic to find the stones with which he may justly pelt the pharmaceutical press. No, if you will stop to consider that probably not much more than half the druggists of the country take any journal at all, that the total revenue of the drug press is derived only in small measure from its subscribers, and that it is in reality the advertiser and not the druggist who supports the pharmaceutical periodical, you will hold with me that the drug press gives you a service and a support far beyond what you pay for.

I believe that the application of newspaper methods to the pharmaceutical press has been a blessing, and I hasten to pay my tribute of admiration to those energetic men who had the courage to cast tradition to the winds and to shatter the old-time conventions of the pharmaceutical press, building up popular and successful periodicals by methods calculated to rattle, fracture, and powder the dry bones of the ancient and stereotyped journal. Although the change is not by any means an unmixed good, it has on the whole conferred a lasting benefit on the drug press, by enforcing the need of enterprise and progress by emphasizing the ever-present danger of falling into a rut and the deadly sin of routine.

Men do not care to read papers before a few hundred when they can reach thousands through the drug press with vastly less trouble, effort and expense. If they have an important message for their colleagues they don't want to wait a month or a year; they can choose their own time, and the entire community of druggists becomes their audience. Moreover, the reading of papers involves the expense of travel, whereas the writing of an able article is a source of income. Brains, gentlemen, are the only commodity on which you can put your own price, and I can refer you to any one of a half-dozen pharmaceutical editors who will pay you anything you ask for a strong or brilliant contribution. For these

Digitized by Google

reasons, though the press has most generously and loyally supported the associations, local, state and national, giving them space without stint, and incessantly urging their benefits, the educational organizations have not been able to escape their fate nor the periodicals their success.

The pharmaceutical press may at all times be depended upon to espouse every cause and to urge every reform conducive to the welfare of the druggists of this country.—*Jos. Helfman, in The Spatula.*

HOW STAMPS WILL BE REDEEMED.

The Commissioner of Internal Revenue has issued a circular relative to the redemption of documentary and proprietary stamps. It says that "unused documentary and proprietary stamps, issued under the provisions of the war revenue act, for which the owners have no use, may be redeemed, but in all cases there will be deducted the percentage, if any, allowed to the purchaser. Applications for redemption of such stamps should be made to the collector of internal revenue from whom the same were purchased, who will supply the applicant with form 38 and necessary instructions relative to the preparation of his claim.

"Claims for the redemption of adhesive documentary and proprietary stamps, if purchased from a collector, must show date and amount of purchase. If purchased from a dealer in stamps, such dealer's certificate as to the date of sale to claimant, and the certificate as to the date of sale to the dealer, must be furnished. Stamps that are not in the same condition as when issued will not be redeemed unless their condition is satisfactorily accounted for.

"Documentary and proprietary stamps can be redeemed only when presented in quantities of $2 or more face value, and no claim for the redemption of or allowance for such stamps can be allowed unless presented within two years after the purchase of said stamps from this government.

"All claims for the redemption of stamps imprinted on checks, drafts and other instruments must be entered of record and forwarded by the collector of the district in which the order for the imprinting of the stamps was purchased. If the claimant resides in a district other than that in which the said order was purchased, his claim should be prepared and deposited with the collector of the district in which he resides."

Directions are then given with reference to the forwarding of stamps for redemption and other details.

Mrs. Floodyer—"Oh, Mr. Batts, how I enjoyed your lovely volume of poems!"

Batts—"You're very kind, indeed. Do you like the Alcaic meter?"

Mrs. Floodyer—"Alcaic meter? Oh, I see, you want to change the subject. Modesty's the crown of genius. But really I can't say. Does it save much gas?"

EXCIPIENTS FOR PILL MASSES.

J. Cohn has contributed to the *Bollettino chimico-farmaceutico* the following, which may prove useful in a pinch, to the busy compounder who, whatever his experience and knowledge of his business, sometimes is "stumped" by an awkward prescription or a cantankerous ingredient:

Carbolic Acid—1. Soap and powdered licorice or marshmallow. 2. Soap, powdered marshmallow and honey. 3. Powdered licorice and licorice extract. 4. Farina, soap and glycerin. 5. Farina, honey and glucose. 6. Powdered marshmallow, starch and glycerin.

Ammonium Carbonate—Tragacanth and glucose. Shun glycerin.

Ammonium Valerianate—1. A little starch or kaolin with gum tragacanth and honey or glucose. 2. Extract of gentian. 3. Extract of licorice and honey.

Balsam Copaiba—1. About one-sixteenth of calcined magnesia, and a small amount of water. 2. Kaolin, gum tragacanth, and a little water. 3. Magnesia and about one-twelfth part of lanolin, it is stated, is excellent, and beside prevents the pills from becoming hard and friable.

Alkaline Bromides and Iodides—1. Kaolin and vaselin or adeps lanæ. 2. Powdered marshmallow and honey. 3. Starch, gum tragacanth and honey.

Calomel—1. Starch, gum tragacanth and water. 2. Gum tragacanth and glycerin. 3. Kaolin and vaselin.

N. B.—Avoid gum arabic. Pills made with it become too hard and finally completely insoluble in the system.

N. B.—Glucose reduces calomel, and honey does the same. Avoid both.

Camphor—1. Soap and starch (or marshmallow), with honey or glucose. 2. Soap and a little alcohol. 3. Extract of gentian.

Quinine—1. Tragacanth, 6 parts; glycerin, 50 parts; water, 70 parts. 2. Tragacanth and honey or glucose. 3. Tartaric acid with a little glycerin and water. Pills thus prepared are very small, but they eventually become quite hard.

N. B.—Avoid simple syrup and gum arabic, as pills made with either will crack and break up.

Chloral Hydrate—1. Starch, tragacanth and honey or glucose. 2. Marshmallow and licorice with tragacanth and glycerin. 3. Licorice powder, extract of licorice and water.

Creolin—Kaolin alone makes an excellent mass.

Creosote—1. Soap, 1 part; licorice powder, 5 parts. 3. Licorice powder, fresh egg albumen, flour and a small amount of syrup. 3. Kaolin, powdered licorice juice, and honey. 4. Soap, powdered licorice juice, balsam of tolu, a little alcohol and magnesia.

N. B.—Prepare in the same manner pills of

Eucalyptol,
Guaiacol,
Terpinol, and
The various *Essential oils*.

Ergatin—Use kaolin alone. Powder of licorice and of marshmallow are to be avoided, since they give too much volume to the product. Beside this, the first (licorice powder) makes the pills too soft.

Male Fern, ethereal Extract of—Powder of the rhizome of the fern, tragacanth and water.

Phosphorus—Dissolve the substance in a little carbon disulphide or chloroform, add a little vaselin, agitate until the solvent evaporates, then add kaolin.

Oleoresins—1. Kaolin, farina, and a little water. 2. Kaolin, tragacanth, and honey.

Croton Oil—1. Flour (farina) and a little water or simple syrup. 2. Bread crumbs or crust. 3. Kaolin with vaselin or lanolin. 4. Powdered licorice, tragacanth and honey or glucose.

Potassium Permanganate—Kaolin and vaselin or water. Powder with talc.

Silver Nitrate—The same as potassium permanganate.

Salts, deliquescent—1. Canada balsam. 2. Kaolin and vaselin.

Iron Salts, in scales—Tragacanth and honey or glucose.

N. B.—Very little of either ingredient is necessary.

Terpine—1. Starch, tragacanth and honey or syrup. 2. Licorice, marshmallow and extract of gentian.

ART IN PHARMACY.

Twenty-five years ago I heard a well-informed physician say that a fluid extract was a fluid extract, regardless of the manufacturer. He was arguing against physicians specifying the name of a particular maker; his claim being that a physician should write the official name of the preparation in his prescription, and then let the pharmacist fill in any make he pleased. It is needless to say that I do not believe in that theory, and whether it be orthodox or not, I consider it my privilege to differ. I believe that it is the right of the afflicted to select their physician, and of the physician to prefer his pharmacist, and also to prefer a make of medicine which has enlisted his confidence. As well tell me that all the graduates of a college are on an equal footing, and that a man has no right to select a particular lawyer or doctor as that all preparations bearing a name of a drug are identical and that a physician has no right to specify this or that brand. In my opinion, this resistance to self-evident fact has done much to discourage industrious pharmacists who found the tendency of ethical instruction to be towards professional nihilism of the individual. In other words, no encouragement was offered the pharmacist who wished to excel. He was classed in the list with all other pharmacists as well as with men who claimed to be pharmacists who were not. One of the monstrous wrongs attempted by these ethical leaders, in my opinion, has been this attempt to repress the industrious, the talented, the persistent student, and to say it makes no difference how hard he studies or how expert he becomes, it is not ethical to recognize his qualifications.

"A fluid extract is a fluid extract" may be good argument so far as the label is concerned, but I know that beneath different labels of the same name, very different substances may be found, and I, for one, have never acquiesced in this aim of the leaders who seek to throw a premium on indolence and a weight on industry. I repeat, and wish it to go on record, that I believe there is not less difference in the qualifications of pharmacists than of physicians or attorneys, or teachers, and that it is no more just to deny a pharmacist his individuality than to deny a physician that right. I say, furthermore, that, in my opinion, some pharmacists are not only more careful, more conscientious, more expert than others, but that the physician who is aware of the qualifications of a pharmacist in whom he has all confidence, does a wrong to his patient if he permits preparations to be used of which he is ignorant or in which he has no confidence.

I know, and you know it, too, if you have experience, that the personal equation is a factor in qualifying the results of men's handiwork, and knowing this, we do a wrong when we attempt to make all men equal, for we more than uplift the unworthy and repress the worthy. And this is just what the ethical man in medicine does when he attempts to argue that pharmacists have no distinctive qualities, and that the shirk, the indifferent, or the dissipated person in our ranks is entitled to as great credit as the conscientious student. When the same rule applies and these same ethical medical purists argue that the public has no right to select its physician or its surgeon, but must call up the central telephone station and, in case of sickness, ask that a physician be sent, and take any one who is sent, then and not till then will I accept that a physician has no right to prefer a pharmacist or to specify a certain brand of fluid extract. Indeed, I question if I will then accept it, for the same short-sighted spirit which argues that the *name* "pharmacist" brings all men to one common level may make him so fanatical or indifferent to his own welfare as to lead him to say that the name "physician" levels all the graduates of all the colleges.

—*John Uri Lloyd, in Medical Gleaner.*

SPEECH.

Talk Happiness. The world is sad enough
Without your woes. No path is wholly rough;
Look for the places that are smooth and clear,
And speak of those to rest the weary ear
Of earth, so hurt by one continuous strain
Of human discontent and grief and pain.

Talk Faith. The world is better off without
Your uttered ignorance and morbid doubt.
If you have faith in God, or man, or self
Say so; if not, push back upon the shelf
Of silence your thoughts till faith shall come;
No one will grieve because your lips are dumb.

Talk Health. The dreary, never-changing tale
Of mortal maladies is wrong and stale;
You cannot charm or interest, or please
By harping on that minor chord, disease.
Say you are well, or all is well with you
And God shall hear your words and make them true.

—*Ella Wheeler Wilcox.*

Formulae.

SYRUP OF CUBEB.

Fld. extract cubeb	℥ij
Magnesium carbonate	℥ss
Sugar	℥xij
Oil of bitter almond	mj
Orange flower water	℥ij
Water	Oj

Rub the fluid extract with the magnesium carbonate; then add about a sixth part of the sugar, and when thoroughly mixed add gradually, first the orange flower water and then 7 fluid ounces of water, constantly triturating the mixture until the sugar is dissolved; filter and add sufficient water to measure 11 fluid ounces, in which dissolve the remainder of the sugar without heat; add the oil, dissolved in a little alcohol, and sufficient water to make 16 fluid ounces.

COMPOUND ELIXIR OF VIBURNUM.—A. G.

Fld. extract viburnum opulus	fl. ℥x
Fld. extract trillium	fl. ℥iiss
Fld. extract aletris	fl. ℥x
Compound elixir taraxacum	fl. ℥xij

Mix them. Allow the mixture to stand a few days and filter.—*Nat. Formulary.*

AN ELEGANT TOILET WATER.

Tincture of orris	600 parts
Tincture of tolu	280 parts
Oil of bergamot	20 parts
Ylang-Ylang oil	8 parts
Vanillin	1 part
Tincture of musk	8 parts
Alcohol, 90 per cent., sufficient to make	2000 parts

Mix. Let stand a few days, then filter. —*National Druggist.*

HOG CHOLERA REMEDY.

Wood charcoal	4 av. ozs.
Sodium sulphate	4 av. ozs.
Black antimony	4 av. ozs.
Sulphur	4 av. ozs.
Sodium hyposulphite	8 av. ozs.
Sodium bicarbonate	8 av. ozs.
Sodium chloride	8 av. ozs.

Reduce all to powder and mix well.

Directions: A large tablespoonful for each 200 lbs. of animal. Should be given once daily with food.

ARNICA TOOTH PASTE.

Precipitated chalk	12 av. ozs.
Castile soap, powder	4 av. ozs.
Cuttlefish, powder	2 av. ozs.
Tincture arnica	2 fl. ozs.
Solution carmine	1 fl. dr.
Oil of peppermint	1 fl. dr.
Oil of sassafras	4 fl. drs.
Glycerin	4 fl. ozs.
Water sufficient to make paste.	

WALNUT CHOCOLATE.

Blanch four ounces of walnut kernals and rub to a powder in a mortar with a few drops of lemon juice. Rub well, gradually adding water to make an emulsion. Transfer to cloth and express. If any residue is left return to mortar and proceed as before; express again, and continue until all the walnut has passed through or emulsified, which should amount to about eight or nine ounces. Add this product to eighteen ounces of chocolate syrup; serve two ounces to a twelve-ounce glass with one ounce of sweet cream.—L. W. Marshall, Lexington, Mo.

CLARETTE.

Claret wine	Oij
Juice lemons	No. ij
Juice oranges	No. iij
Fruit acid	℥ss
Color a wine red, using pure confectioners' colors.	
Sugar	lbjss
Simple syrup	q. s. cong. j

Dissolve the sugar in the wine and then add the syrup and other ingredients and mix thoroughly. Serve still in eight-ounce glasses with or without phosphate. This may also be served from a punch-bowl with good effect. Use a 12-ounce glass one-third full of fine ice, then fill nearly full of soda, pour on syrup and mix. When used from a punch-bowl add one more pint of claret to the above and use a little more to the glass.—H. A. Williams, New York.

What is the Formula for "Creme Marquise?"

White wax	½ av. oz.
Spermaceti	5 av. ozs.
Oil of sweet almond	5 av. ozs.
Rosewater	3 fl. ozs.

Melt the wax and spermaceti, add the oil, remove from the fire and add rosewater and beat till fluffy and white; add a few drops more of perfume if desirable.

This formula, with many more like it, are published under the heading of "The Woman Beautiful," by a writer signed, "Mme. Qui Vive," in newspapers. Another one of the formulas is:

CREME DUCHESSE.

Benzoinated mutton tallow	3 av. ozs.
Oil of sweet almond	1 av. oz.
Glycerin	2 fl. dr.
Rosewater	2 fl. dr.
Oil rose geranium	20 drops.

Heat the tallow and oil of almonds in one vessel, and the other three ingredients in another; mix the two and stir until cool. The cream which it produces is as light and fluffy as the white of an egg. This recipe has never been printed before and is a most valuable one. This writer then further

Digitized by Google

says: "On account of the mutton tallow, which might possibly cause a growth of superfluous hair, this cream is not desirable as a face cosmetic." (?)

GLYCERIN BALSAM.

White wax	½ av. oz.
Spermaceti	1 av. oz.
Oil of sweet almond	4½ av. ozs.
Glycerin	1½ av. ozs.
Oil of rose geranium	8 drops.

Melt the wax and oils together, remove from fire and beat in the glycerin, and stir briskly until cold and white.

—*Meyer Druggist.*

MARSHMALLOW SYRUP (ARTIFICIAL.)

Mucilage of gum acacia (strictly fresh)	℥xij
Orange flower water	℥iv
Sol. citric acid, 50 per cent	℥ss
Simple syrup	q. s. cong. j

Mix thoroughly and strain.

Note—If you have no fresh mucilage of acacia on hand, the syrup may be made by triturating 600 grains of powdered acacia with a small portion of syrup until a smooth paste is obtained, then add balance of syrup, etc.

MARSHMALLOW SYRUP.

Sugar (granulated)	℔ij
Water	Oiv
Gum acacia	℥xij
Whites of eggs	No. v

Dissolve the gum in one-half the water and the sugar in the other half using a low heat. Let syrup cool and add the whites of the eggs, which have been thoroughly beaten to a froth, then incorporate the gum solution, beating all the time to make smooth syrup. Keep covered and in a cool place.

KOCELMA.

Ext. malt	Oj
Kocel syrup	Oj

(formula published in this issue.)

Mix, and serve one ounce in an eight-ounce mineral glass. (Cyclists who drink Kocelma never tire.—Voelcker & Co., Louisville, Ky.

CHERRY MALT TONIC.

Malt ext. kola	℥viij
Tinct. celery seed	℥ij
Orange syrup	℥iv
Tinct. gentian co	℥j
Lemon syrup	q. s. Oij

Mix, and serve one ounce in an eight-ounce mineral glass with or without phosphate.—Henry Smith, New York.

Best Syrup Formula of Any Kind.

KOCEL.

Fl. ext. kola	
Fl. ext. celery	aa ℥j
Wine of coca	℥ijss
Tinct. cardamon comp	
Tinct. orange peel	aa ℥ij
Pineapple syrup	℥viij
Simple syrup	q. s. Cong. ijss

Mix thoroughly and filter. Drink Kocel for the nerves.

NECTAR SWEETS.

Pineapple syrup	Oj
Strawberry syrup	Oj
Lemon syrup	Oss
Grape syrup	Oj

Mix, and serve same as other nectar syrups.—Voelcker & Co., Louisville, Ky.

CALICO.

Elixir calisaya	℥vj
Wine coca	℥vj
Wild cherry syrup	q. s. Oiv

Mix thoroughly. Serve one and a half ounces to a glass with a dash of phosphate. —L. W. Marshall, Lexington, Mo.

HOP GUARANA.

Elixir guarana	℥iv
Elixir celery co	℥iij
Elixir hops	℥iij
Orange syrup	Oij
Pineapple syrup	Oj

Mix and serve one ounce in an eight-ounce mineral glass.—L. W. Marshall, Lexington, Mo.

EXAGGERATION.

We love the enthusiastic man; he who has the "push" and energy to make things "hum." When we become seriously ill, we want an enthusiastic doctor to attend us. All the advances in art, civilization, mechanical triumphs, war, peace, and blessed medicine, have been made by enthusiastic men. Yet enthusiasm is seldom found absent from a tendency toward exaggeration; and such trend is deplorable and unfortunate.

Exaggeration in children is designated as lying; in the grown up professional man it is none the less so. The child exaggerates through a desire for self-exaltation, and the motive in the grown up person is the very same. If a layman, it is bad enough; but in a physician it is almost or altogether criminal. We all know physicians who are continually having "terrible" cases, and who are always "rushed to death." It generally takes them an hour of their valuable time to tell the garrulous old women, who love to listen with gaping mouth, of some new and "terrible" case, even though they "cannot get time to eat." It is such men who label every case of simple fracture as a "very complicated case," and who term all cases of tonsilitis "severe diphtheria." The fact that they worry both patients and friends does not influence them in the least. The fact that their words are deliberate untruths does not disturb their equanimity. The child who exaggerates, lies, and is reproved. The doctor who lies along such lines, is revered by the laity as a great and wonderfully skillful man. Yet what must be the mirror of that man's inner soul? They cannot help knowing that they are the objects of ridicule by sensible practitioners and by the more intelligent laity.—*Medical World.*

HER DEBT OF GRATITUDE.

When she entered the pharmacy the proprietor was too busy stacking almanacs to hear her footsteps. She tapped on the brass scales and he came out smiling.

"What can I do for you?" he asked, with a courteous bow.

"Ah, monsieur," she replied, "you can do nozing now; you have done much in ze pazt. I come to say zanks."

"I am afraid I don't recall the circumstances," he said, shaking his head.

"Ah, monsieur's memory is weak. Two years. I come one night. Ze wind. How ze wind blew zat one night two years ago! Ah, monsieur, and ze sleet. Horrible ze thought! I come and ask for ze poison. I was ze one miserable singer. My voice fail. No longer ze audience call for Marie. Ze audience hiss ze song. I no longer want life. I come for ze poison. Monsieur sell ze belladonna without ze prescription or ze question."

"Did you take it?" gasped the pharmacist.

"Monsieur will listen. I stand in ze dressing-room. I would take ze poison in ze moment. While I wait I have one idea. I put ze belladonna in my eyes. Zey shine like stars of ze North. Glorious! I run out on ze stage. In ze box sit ze rich old man. He fall madly in love with my bright eyes. He beg me to marry him. He worth many millions. I am his wife to-day. Suppose monsieur had refused ze poison on zat wild night two years ago?"

"It would have been bad for you."

"Horrible! And now I will buy somezing of monsieur. Give me two stamps and one postal, please."

The pharmacist sighed and opened the stamp drawer. When his visitor was at the door smiling a farewell he beckoned her to return.

"Was ze change right?" she queried.

"Yes, but you forgot to take an almanac."

He forced a collection of variegated pamphlets in her hand.

"Here is a good selection. Calendars, recipes, jokes and pictures of great men who take preparations."—*Chicago News.*

The Use of Garlic in Tuberculosis.

Dr. Giulio Cavazzani reports a series of experiments conducted in the city hospital of Venice with reference to the action of garlic in consumption. Garlic is cut into small pieces and dried for a short time. It is given in this form to the patients in quantities of from four to six grammes in twenty-four hours. An improvement is said to have taken place in all stages of tuberculosis, especially in the early cases. The number of bacilli diminishes, until it completely disappears and cough is lessened, the physical signs disappear, and there is a marked improvement in the appetite and general condition. Of course, the usual hygienic and symptomatic treatment is continued during the administration of the garlic.—*Journal A. M. A.*

SENSE AND NONSENSE.

"Of plain sound sense life's current coin is made."
—*Young.*

"A little nonsense now and then
Is relished by the wisest men."—*Anon.*

(*When origin is known credit is given.*)

The XXth Century Girl.

Mother—Did he propose, darling?

Daughter—No, mother, not quite.

Mother—You are hardly bashful enough yet. But don't be discouraged, dear; with time and practice bashfulness will come.
—*Life.*

▲ ▲ ▲

A son of Erin appeared at the money order window of a postoffice and said that he wanted to "sind some money to ould Oireland."

"Fill out this blank," said the clerk, handing the applicant one of the blanks used on such occasions.

"An' phwat is that?" asked Jerry.

"It's a blank that every applicant for a money order must fill out—a kind of letter of advice regarding the money order."

"An' phwat has a letther of advice got to do wid me sindin' tin dollars to me ould mother?"

"A letter of advice to the postmaster where the money is to be paid must always go with a money order."

Jerry went away from the window grumbling and mystified. After half an hour of painful effort at a high desk provided for the public at one end of the room Jerry returned to the window and handed in this "letter of advice" to the postmaster at Ballycarney:

"Dear Moike: Oi'm tould Oi must give yez a bit av advice before you'll be able to pay me ould mother the two pounds Oi'm sindin' along with this. So, Moike, Oi would advise yez to come to Ameriky an' get a job at kaping postoffice, for it's illigant postoffices they has here, an' Oi've no doubt the pay is tin toimes what it is wid you. So now be sure an' pay me ould mother the two pounds, for Oi've done as the law says, an' sint yez a letther of advice."—*Youth's Companion.*

The Crusade Spreading.

"The Kansas crusade is spreading."

"No!"

"Yes; we have an old hen sitting on one egg and trying to hatchet."

Not Counted On.

Briggs—Well, we had an addition to our family yesterday.

Braggs—You don't say so? Boy or girl?

Briggs—Neither. It was my wife's mother.—*Tit-Bits.*

▲ ▲ ▲

Hicks—Wonder how Mortar is getting on nowadays? Wicks—Getting along finely. It was only two years ago he started out as an apothecary. He is already a druggist, and if his luck holds out he will be a pharmacist before the end of another twelvemonth. Hicks—But what difference will that make? Wicks—A big difference. An apothecary oftentimes has to sell things at only 50 per cent. above cost, and a druggist never takes less than 100 per cent., but to a pharmacist there is no limit.
—*Boston Transcript.*

▲ ▲ ▲

"Tell me by what hidden magic
Our impressions first are led
Into liking or disliking
Oft before a word is said?
Why should *smiles* sometimes repel us?
Bright eyes turn our feelings cold?
What *is* that which comes to tell us
All that glitters is not gold?"

▲ ▲ ▲

"My stars," ejaculated the leader of the choir, happening in when the quarrel was at its height.

"There seems to be trouble in the air."

"Not at all, sir," said the soprano, her eyes snapping. "The trouble is in the bass!"—*Chicago Tribune.*

▲ ▲ ▲

At the Boarding House.

Mr. Knife—The hash don't look well tonight.

Mr. Fork—No; he feels all cut up.

▲ ▲ ▲

A Boston man found himself in jail on the day he was to have been married. He took his situation very calmly and philosophically. He said he would have lost his liberty anyhow.

▲ ▲ ▲

"The evidence," said the judge, "shows that you threw a stone at this man."

"Sure," replied Mrs. O'Hoolihan, "an' the looks av the man shows more than thot, yer honor. It shows thot Oi hit him."
—*Chicago News.*

▲ ▲ ▲

After a man has owed you money as long as two years he begins to believe the account is not right. At the end of three years he thinks you are a thief.
—*Atchison Globe.*

Digitized by Google

A glasgow paper thus analyzes the music of the bagpipe: "Big flies on window, 72 per cent.; cats on midnight tiles, 11½ per cent.; voices of infant puppies, 6 per cent.; grunting hungry pigs in the morning, 5½ per cent.; steam whistles, 3 per cent.; chant of cricket, 2 per cent.

—*Northwestern Christian Advocate.*

▲ ▲ ▲

First Pioneer—Ain't it awful the way them Cubans has been treated?

Second Pioneer—Awful is no name for it. W'y I wouldn't treat a lot of Injuns any worse than that.—*Cin. Enquirer.*

▲ ▲ ▲

Agatha used to talk
Of aristocracy.
She'd marry no one, said she,
Who hadn't a family tree,
Of lengthy descent she'd rant.
She's changed her mind, you see,
To wed, just recently,
A man, most willingly,
Who hasn't a family tree,
But he has an electric plant.

—*Washington Post.*

▲ ▲ ▲

A man stopped his wagon in front of a Michigan City electric light plant and asked a bystander:

"What is that air buildin'; a factory?"

"No; a plant," came the answer.

"What do they raise there?"

"Currents," replied the quick-witted bystander.

"What are they worth a bushel?"

"We sell them by the shock."

The farmer pulled his beard, scratched his head, and drove down town to market his vegetables.

▲ ▲ ▲

"Johnny, dear, did you try to mind the golden rule in your dealings with your playmates at school to-day?"

"Yes'm, 'till we had recess. You can't use it in football, you know. It'd kill the game deader'n a door nail."

GOOD HUMOR.—Good humor in the clear, blue sky of the soul, on which every star of talent will shine more clearly, and the sun of genius encounter no vapors in his passage. It is the most exquisite beauty of a fine face, a redeeming grace in a homely one. It is like the green in the landscape, harmonizing with every color, mellowing the glories of the bright and softening the hue of the dark; like a flute in full chorus of instruments, a sound, not at first discovered by the ear, yet filling up the breaks in the concord with its deep melody.

—*Sanatarian.*

▲ ▲ ▲

Bobbs—Laughter is a cure for indigestion. Dobbs—But a man can't laugh when he has dyspepsia.

▲ ▲ ▲

'Twixt Scylla and Charybdis
The prudent man must walk,
Who knows how treach'rous spring is
In weather in New York;
For he his winter underwear
Is much afraid to doff,
Although the heat is hard to bear
While spring is on and off.

▲ ▲ ▲

Millicent—Aren't bicycle lamps annoying?

Miriam (vexatiously)—Yes; mine goes out every time I run into anybody.

▲ ▲ ▲

He—They can photograph the voice now.

She—Goodness! I hope I'll never live to see a picture of the things you say when your collar button drops down your back.

▲ ▲ ▲

Bramble—The play was wonderfully pathetic.

Thorne—Not a dry eye in the house, I suppose?

Bramble—Not one. Even the seats were in tiers.

In the

BARRY TWIN-BULB THERMOMETER

the mercury registers quickly and is easily read because it has a broad magnifying lens. The twin bulb is the cause, and if you are not chary of praise you will applaud it.

If you want to be "right in line" you can get any quantity of these from your jobber—we know he has got them.

BECTON, DICKINSON & CO., Makers,
45 Vesey Street, - - NEW YORK.

CHICAGO

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

Editorial.

DRUGS OR MEDICINES?

THE accomplished editor of the *National Druggist* in the April issue of that journal takes exception to that portion of the decision of Judge Feidler in the aconite poisoning case at Cleveland, Ohio, in which a distinction is made between a medicine and the term "drugs, chemicals and poisons." We quote from the editorial:

"This, it seems to us, is sophistry, mere juggling with words. Fowler's solution, for instance, or prussic acid, is none the less deadly because it is styled a 'medicine' and if there were no better or sounder reason than this to advance why compounded prescriptions should not be subjected to the poison label we fear the higher courts would refuse to coincide with Judge Feidler's opinion."

True enough as to the poison part of it, but as we see it the question as to whether the component parts of a compounded prescription are toxic or inert does not enter into consideration at all. It is rather one as to whether or not "drugs, chemicals and poisons" are identical with "medicines," and while the court may not have interpreted the law properly, we thought that the decision showed a careful study of the subject beyond what may usually be expected even from courts of higher authority.

Digitized by Google

It may be a "mere juggling with words," but we have to take issue with our journalistic friend in his criticism of the court's opinion on this important point.

We hold that there is a difference between "drugs, chemicals and poisons" and "medicines." What is a medicine? "A substance administered *in the treatment of disease, a remedial agent, a remedy for disease.*" The science of medicine is that "which relates to the cure, alleviation or prevention of disease."

A pharmacist may sell an ounce of tinct. of aconite and he is then simply selling a drug or a poison, but if a customer comes and says he has some fever and is not feeling well and after getting an account of his symptoms he then gives him an ounce of tinct. of aconite and tells him to take a certain number of drops at certain intervals he is giving his customer (patient) a medicine, and if he is not qualified to prescribe for him is probably giving him a poison, but it is intended to be a medicine.

Drugs, chemicals or poisons are not medicines until they are administered for the specific purpose of combating a diseased condition. A medicine is not infrequently given which cannot reasonably be classed in either of these divisions. The distinction may be a fine, but we do not think a far-fetched one, and in this view of the subject we expressed our gratification at the conclusions reached by the court before which this case was heard.

In this connection an illustration may be given from the writer's experience a few years since, in whose store a prescription calling for doses of about 1-70th of a grain of atropin in syrup tolu was prepared for a maid servant in the family of one of the patrons of the store. She speedily recovered from the bronchial difficulty for which the prescription was ordered. In a few days afterward the lady of the house was taken with a severe cold, accompanied by a very distressing cough. She thought of the cough medicine which had been ordered for "Mary" and finding the four-ounce bottle more than half full began taking a dose every hour instead of every three hours as the directions demanded. In the course of the day she was taken seriously ill and the physician was suddenly summoned to find a case of atropin poisoning. What was "medicine" for the maid was not "medicine" for the mistress, especially in the dose which it was being taken, nor indeed was it in any dose, for the conditions, physical, symptomatic and in all other relations were wholly different, and the attending physician announced that the madame had no business with atropin in any dose, no matter how minute. The maid got a "medicine," the mistress a poison, which came near ending her career.

This illustration may be cited as a strong one in favor of labeling prescriptions in a cautionary manner, but it must be remembered that the majority of prescriptions are poisonous when taken out of the sphere within which they were intended for the accomplishment of certain results.

There is no dispute as to the necessity for the complete revision of all Ohio laws relating to the sale of poisons. They are crude, unintelligible and practically useless. Feeble efforts have been made at long intervals for their amendment but a sufficient interest in the much needed changes has not been shown by pharmacists to result in any practical good. This is a subject which the next meeting of the State Pharmaceutical Association should take hold of in real earnest, in order that the session of the General Assembly of 1902 may be induced to place upon the statute books such regulations as to the sale of poisons as may be easily understood, both by pharmacists and judges of the courts.

PROFESSIONAL PHARMACY.

THE increasing number and variety of side lines which druggists are being urged to carry does not promise well for placing pharmacy in the category of the professions. The soda fountain has apparently come to stay in retail drug stores and the one which does not in these days have a fine apparatus, from which to dispense this popular beverage, is regarded as hopelessly behind the times. Twenty years ago it was thought that the soda fountain would soon be relegated to the restaurants, the confectioners and cafes, but it is not gone to either of these with anything like the increasing number which have found their way into drug stores. Then there are artists' goods, photographic material, newspapers and magazines, confectionery and other lines quite generally found in city pharmacies, while the stores in smaller towns still carry paints, wall paper, schoolbooks, lamps and many other lines, as circumstances in localities require.

Without doubt the prescription business is passing, in many places has already passed from the view of the pharmacist

Digitized by Google

and it is a question if it has not gone to return no more to the present generation. The days of polypharmacy have passed, and the present time is one characterized by simplicity in medication, even to the point of no medication at all. Reliance is placed more upon sanitation, upon hygeinic and other methods rather than upon the administration of drugs in the cure of disease. Pharmacists in middle-life recall very distinctly when physicians prescribed mixtures in quantities from eight to thirty-two ounces and pills, which were to be prepared, numbering from fifty to one hundred upon each prescription. It is not done after that fashion in these days.

The side lines have been thrust upon the retail druggist in order that he may continue to do business at all. He can no longer, in most instances, rely upon even paying his rent from the sale of medicines alone. He must either abandon his occupation and engage in some other or he must find additional articles of merchandise upon which he can realize some profit in order to secure the means for existence. This being the case, and it is a fair picture the country over outside of the large cities where a limited number of pharmacies may yet be found, how is that long-promised era of professional pharmacy to be brought in? The drug journals have a heap to say about the professional side of pharmacy. The schools and the teachers of pharmacy therein are always holding up to the view of their students and others the thought that pharmacy is a profession. A professional standard is being lifted up by men who are not in the business of retailing drugs to which all aspirants for such distinction are urged to turn their gaze. But the men actually in the ranks are not waxing fat on such impossible ideals. They are hustling for new methods of increasing their bank accounts, of paying their current business expenses, of putting bread in the mouths of the women and babies. Professionalism and starvation are incompatible to the minds of average men, and when the alternative is presented to them the former goes into the atmosphere rather than to suffer the pangs of the latter. It is growing difficult to find in many sections a retail druggist who is not extremely cynical when he hears any of this professional talk going about. A good deal of this spirit of cynicism reaches boards of pharmacy, the members of which are goaded on the one hand by those who are making their living out of the professional side of pharmacy into making examinations largely of a theoretical character, while the retail druggist takes special delight in saying to the members of these boards that the average man who passes their examinations is not worth a blank in the actual work and duties of a retail drug store.

It is always well to hold before the mind's eye large ideals, for in so far as they stimulate any to greater effort to that extent they are accomplishing a good work, but meantime the retail druggist must eat and drink and find the wherewith to be clothed, and in order to do this he will go on searching for methods of increasing his business and the revenue therefrom and let those whose soft hands are strangers to the pestle and the drug mill talk about the "professional side of pharmacy."

FREAK LEGISLATION.

ON another page will be found a reprint from the *Pharmaceutical Era* of an editorial on freak legislation, which gives some account of the number of bills of this kind which have been before the recent session of the legislature in New York.

New York is not the only state which has developed statesmen possessed with the idea that every condition of men in general and the peculiar conditions which surround the individual may be made better by legislation. It is not shooting very wide of the target to say that laws are destined to be the curse of this country unless men with ordinary horse sense in larger proportions are sent to state and national legislatures.

The pharmacy law of New York state was not put into effective operation before there were some dozen or more bills introduced into the legislature to amend the law. It is reasonably safe to say that the members who drafted and presented the majority of these bills had little or no knowledge as to what their enactment was expected to accomplish.

A few years ago a member of the Ohio legislature introduced a bill to so amend the pharmacy law of that state as to permit two persons to register as pharmacists who held only assistant pharmacists' certificates, and actually succeeded in getting the bill passed by one branch of the general assembly.

In the last session of the legislature of the same state a member who owned a general store introduced and secured the

Digitized by Google

enactment into a law of a bill adding five articles to the list of those in the pharmacy law which persons not registered could sell lawfully. The prime object was to get permission to sell these articles in his own store.

A bill was introduced in one of the state legislatures during the past winter to require all persons who contemplated marriage to first pass an examination before a board of medical examiners. This bill passed one branch of the legislature, but we are not informed as to whether or not it ultimately became a law.

And now comes Arkansas with a bill which has already passed one house of the legislature of that state requiring all persons to take out a license before they can lawfully drink intoxicating liquors of any kind. This is freak legislation in full blossom. Arkansas is a queer state. One would naturally expect all sorts of crazy things from that section, but there is not much difference after all between that and the bills which are brought out and aired in other states where better things might be expected.

The Arkansas bill taxes each individual $5.00 per annum, for which sum he receives a permit, or license, from the state entitling him to the privilege of drinking and getting drunk for the term of one year. Should this bill become a law it will be interesting to note how many persons will pay the $5.00 license fee. It is not probable that it will require a burglar proof vault to store the money so collected.

We suggest to some ambitious statesman in the legislature of some state to attempt to pass a bill providing that all candidates for membership in any law-making body be first required to pass an examination as to his mental balance and moral and intellectual equipment, showing his qualifications to perform the duties required of a member of such legislative body. Let us have civil service examinations for state legislators, so that candidates may exhibit to their constituents evidence of their fitness to hold such offices. Perhaps this would tend to check freak legislation.

* * * * * * *

Pharmacists themselves are not wholly free from the notion that the condition of pharmacy is to be improved by legislative fiat. There are not a few pharmacists who fancy that all that is necessary to secure them from present and future troubles of all sorts whatsoever is to secure the passage of some one or more laws "protecting" their interests. The fact is that any interest that needs protecting has no moral right to exist at all.

Pharmacists are to better their condition by their own efforts. A man who will not work should not eat, and he will not eat for very long unless he is fed at public expense in the almshouse. But among the classes of workers who are slow to use all the means at hand for their own benefit it occasionally appears that pharmacists are the slowest. They are slow in entering into and staunchly standing by those organizations created for their special benefit. It is uphill work to induce them in large numbers to prominently identify themselves with movements which give promise of undoubted benefit when enthusiastically approved.

An improvement has been noted within a year or two in this direction, but there are still large sections of the country with a great many pharmacists who have not yet waked up. The National Association of Retail Druggists has been of great benefit in arousing many of the dormant ones, but even this supreme organization has not yet received the help it needs from those whose interests are to be sustained by its influence and powers. What may be done by organization is being demonstrated in some sections to the complete satisfaction of the druggists in those localities who are taking care of themselves, and this is but a sample of what may be done everywhere if the will to do is once manifested.

IT IS THE KING'S WORK.

These were the potters, and those that dwelt among the plants and hedges; there they dwelt with the King for his work.—*Chron., 4, 23.*

HOW many men may be found who will openly say that they are perfectly happy or contented in their chosen occupations? A successful lawyer will tell you to place your son in any other profession or business but at all hazards keep him from the study of law. One of the most skillful and successful surgeons the writer has known said: "I would rather a boy of mine should be a ditch digger than that he should become a physician." Many such statements we believe lack the elements of sincerity, but that they are expressed at all denotes a condition of mind other than one of satisfaction with the duties to be performed.

Digitized by Google

Pharmacists are found among the worst of those who preach this sort of pessimism. Their long hours, their responsible relations, their meagre earnings or profits are in some measure accountable for this, but the *habit* of decrying pharmacy or the retail drug business is responsible for much more of it.

Some people become hopeless invalids who ought to be in good health simply because they begin to complain of not "feeling very well," and after repeating such a statement a number of times form the habit of analyzing their sensations in order to keep track of their condition and ultimately wind up in a state of chronic invalidism.

If a man has an occupation he should get all he can out of it in money, in comfort, in gratification over its progress, in contentment with its surroundings. It should become his ideal, his joy; it should be the means of lifting him out of the common place routine of life and giving him a point of view from which to scan the horizon of human duty and destiny. We like to find a man with a "horizon," one who keeps his face to the sunrise. No matter about his occupation so it is a useful and honorable one. There is nothing so small or mean as the habit which is all too prevalent of regarding one business or occupation as higher in grade than some other. It is disgusting to hear good people speaking contemptuously of housemaids who are employed in their kitchens and calling them by hard names. The cornerstone of our civil life is the home, and the most useful calling a young woman can follow is that of a domestic in a home. There she should be appreciated and honored in a manner which she is not. A prominent professional gentleman said recently to the author: "The 'servant girl' problem threatens the destruction of the American home, and the great trouble with the problem is the contempt with which home-makers speak and act toward domestics."

We watched a gang of a hundred common laborers helping to build a traction line in the city streets last summer when the weather was hot and the work hard, and realized as we had not done before the value of the so-called common workmen to the needs of the time. That line could not have been built but for the sweat and toil of these common men working for $1.25 per day. Among the most useful adjuncts were three small boys who carried water to these thirsty men while at their work. Where would our boasted civilization be but for these and other humble toilers? They make possible our wonderful progress, our unparallelled prosperity, they are bringing the kingdom of heaven, so to speak, on the earth; they are digging down the mountains, and leveling up the valleys and making a highway smooth and perfect in which the feet of a little child may walk without stumbling and "the wayfaring man though a fool need not err therein."

Do not belittle your occupation. A soda water boy in a drug store should feel that he is dwelling with the King and doing his work; that the King's business if it does not always require haste, at least requires diligence and that the King's servants are always well clothed and well fed. To be a good pharmacist is as divine a calling as to be a fine minister or a great ruler, and when the men in these ranks begin to invest the hard work of their daily lives with the dignity and the royalty which should characterize it there will be found small necessity for calling it hard names.

WHOOPING COUGH

The Great Guaranteed Remedy for Whooping Cough is . . . .

Dr. Drake's German Croup Remedy

ONE DOSE gives instant relief from the most violent coughing. It never vomits. Sold for over ten years under a positive guarantee to prove satisfactory. EDITORIAL NOTES.

MAY.

The year is now a sweetheart true,
Blushing at love and the joy it brings;
Beaming forth from her eyes so blue
And bubbling o'er in the song she sings.

* * *

TOLEDO is getting a large dose of the cutting mixture if we are to judge from the advertisements clipped from the newspapers of that city and sent us by a correspondent. Some of these advertised prices take the prize over anything in the line of cut rates we have yet seen; such as Peruna, 55 cents; Mennen's Powder, (25 cent size) 9 cents; Munyen's Remedies. 12 cents; Pinkham's Compound, 58 cents, and so on. What does Toledo need?

* * *

A CASE of interest to pharmacists is reported from Glasgow, Scotland. A firm of chemists delivered to a customer a liniment composed of aconite and belladonna in mistake for the medicine intended for him. Although the bottle was correctly labeled the customer took a dose of it and nearly lost his life from the effects. The trial officer dismissed the case brought against the firm, on the ground of the carelessness of the plaintiff in not examining the label on the vial, thereby inviting the disaster. This the high court overruled, and gave the plaintiff damages to the amount of £700 ($3,500).

* * *

THE legislature of Missouri has so amended Section 3037 of the pharmacy law of that state as to require that physicians must hereafter pass examinations as pharmacists if they desire to register as such. The former section permitted these medical men to register without examination, while the law required pharmacists to submit to that test. The folly of such a requirement was only equalled by its injustice, and the citizens of that state no less than the pharmacists are to be congratulated on the change in the law.

* * *

THERE appears to be no reasonable doubt that the three large drug organizations are doing their utmost to carry out the plans and agreements entered into about a year ago for controlling the prices of proprietary articles. While hints have been made that some of the proprietors and jobbers have not in all cases adhered to their agreements yet the plain intent of all of them to fully carry out the contracts into which they have entered is becoming more and more apparent. The cutters are beginning to feel the pressure as they have never done before. They are attempting to form an organization of their own to resist the "drug trust," as they delight to call it, and this fact alone is indicative that they are being distressed more than ever before. Suits are being brought against wholesale druggists and proprietors of patent medicines in many sections for damages in withholding supplies, and the whole atmosphere is being disturbed in the conflicting currents of self-interest. It is a welcome storm. Let the retail druggist feel the importance of doing his share, thereby aiding and reinforcing the efforts of the wholesale druggist and the manufacturer, and the results of such combined effort will be manifest in large maasure before the close of another year. The N. A. R. D. plan is destined to succeed. There is no shadow of doubt about it if the retailer will do his share.

* * *

AN elegant condition of affairs is the sequel to the action of the Pennsylvania board of pharmacy in employing detectives to secure proof of violation of the pharmacy law of that state. More than half a hundred cases of prosecution brought on the strength of the evidence secured after this fashion have failed because the spies employed refuse to appear and testify until they are paid in full for their services as per contract. The board's attorney is reported to have said that more than three hundred cases will be lost by the non-appearance of the detectives, but further says that new agents will be employed and another crusade begun. If the members of the Pennsylvania board are possessed with the wisdom which it is supposed the Almighty has bestowed upon geese they will do nothing of the sort: It is their business to enforce the law and in the performance of this duty it may be necessary to employ some one or more persons to ascertain the facts and to secure the evidence necessary to the successful prosecution of violators, but this part of the show should not be farmed out to detectives at so much per victim. Plenty of clean, conscientious, decent men may be obtained with the faculty of finding who are and who are not conducting business with due regard to law

and securing such evidence as may be necessary to sustain an action in courts of justice without invading the unsanctified territory of a detective agency to take what may be detailed of a set of men whose training and methods of work are not recommendations of character. Boards of pharmacy should have naught to do with detectives or detective agencies, if they wish to preserve their own reputations, and enforce the laws with some regard for decency and dignity.

* * *

THE Pennsylvania legislature has passed an amendment to the pharmacy law which does away with the payment of fees for the renewal of registrations and the exposing of renewal receipts; it also changes the amounts to be paid for examination and registration. A bill has also been made into a law defining the crime and prescribing a penalty for selling or administering "knock-out drops." Bills have also been introduced making it an offense to place free or trial samples of medicines, dyes, inks and other articles, or any poisonous preparation or compound where the same may be secured by children. A member recently introduced a bill of interest to pharmacists in that state which proposes an appropriation to the Philadelphia College of Pharmacy in the amount of $100,000. Pennsylvania pharmacists are getting a full share of legislation this year and most of it appears to be of a desirable character.

* * *

MR. ALFRED DELANG, former president of the Ohio Pharmaceutical Association, has favored us with some printed matter, showing the methods being used by that energetic body of druggists known as the Ohio Valley Druggists' Association for the practical benefit of its members. It is gratifying to know that the Ohio Valley and the Northern Ohio are both doing fine work within the state of Ohio and in some important territory immediately contiguous thereto. The Ohio Valley is associated with the National Association. In its membership are more than two-thirds of the druggists of Cincinnati and Hamilton county. The Association has designated Tuesday, June 4th, as "Druggists' Day." All druggists, clerks and friends are to have a holiday and pay a visit to the Country Club and enjoy an outing. Proper committees have been appointed and these report great success. The wholesale drug houses are to close for a half holiday and their employees are to be furnished with tickets of admission. Sports and games are to be indulged in and prizes of considerable value will be contested for. A fine souvenir programme is being prepared, and a great time is assured.

THE ST. LOUIS COLLEGE OF PHARMACY.

The annual meeting of the St. Louis College of Pharmacy was held Monday, April 29th, a large attendance of members marking the occasion. The following officers for the coming year were elected:

President—H. T. Rohlfing.
Vice-President—H. F. Hagenow.
Treasurer—Solomon Boehm.
Rec. Secretary—Wm. C. Bolm.
Cor. Secretary—Dr. J. C. Falk.
Trustees—Charles Gietner, Dr. O. F. Claus, L. A. Seitz.

The College has closed a very successful year and looks for a still more prosperous future.

During the past session there were 170 students enrolled in the classes; 54 graduating at the commencement exercises recently held; 41 receiving the degree, "Graduate in Pharmacy," "Ph. G.," and 13 acquired the degree, "Bachelor of Pharmacy," "Ph. B."

The treasurer reported that the finances had permitted taking up and cancelling of several of the College bonds since the last annual meeting.

Steps are being taken to have an exhibit by the school at the meeting in St .Louis of the American Pharmaceutical Association, September 16 to 21.

The initiation fee for membership in the College was raised from five to ten dollars. The annual dues remain at two dollars per year.

J. C. FAULK, *Cor. Secretary*,
2700 Stoddard St.,
St. Louis, Mo.

Morphine of the highest purity, and beautiful in appearance, is offered by the Mallinckrodt Chemical Works in both "flake" and "cube" form. The favorable reception accorded the "M. C. W." Morphine is indicative of the confidence pharmacists and physicians have in the products of the Mallinckrodt manufacture. They have stood the test of years, and have continued to grow in popularity with the most critical trade.

ANSWER TO INQUIRIES.

In answer to inquiry of "L. H. K.," Zanesville, Ohio:

COATING GLASS MIRRORS—Mirror plates are made by coating glass with an amalgam of mercury and tin, but the process is not an easy one. A sheet of pure tin-foil, slightly larger than the glass plate to be silvered, is spread evenly on a perfectly plane stone table, having a raised edge, and is well cleaned from all dust and impurity. The foil must be free from the slightest flaw or crack. The tin is next covered uniformly to the depth of one-eighth of an inch with mercury, preference being given by some to that containing a small proportion of tin from a previous operation. The glass plate, freed from all dust or grease, and repolished if necessary, is then carefully slid over the mercury. This part of the work requires skill and experience to exclude all air bubbles, and even the best workmen are not every time successful. If there is a single bubble or scratch the operation has to be repeated and the tin-foil is lost; not a small expense for large sizes. When this step has been satisfactorily accomplished the remainder is comparatively easy. The glass plate is loaded with heavy weights, to press out the excess of mercury, which is collected and used again. After twenty-four hours the mirror is lifted from the table and placed on edge against a wall, where it is left to drain well.

Annual Meeting of the Ohio Board of Pharmacy.

As this number of the MIDLAND is being issued the Ohio Board of Pharmacy is holding its annual meeting in Columbus. The election of officers for the ensuing year takes place and the largest class in the history of the board is being examined. There are 155 applicants for pharmacist's certificates of registration, and 75 for certificates as assistant pharmacists, making a total of 230. The board has never had more than 200 applicants at any previous examination. This, therefore, beats the record of seventeen years. A list of those who passed a satisfactory examination will be published in the June number of this journal.

The next examination of the board will be in Columbus on October 8th and 9th.

How few people are able to appreciate a good thing until after they lose it.

Ohio Valley Druggists' Association Outing.

The Ohio Valley Druggists' Associatian will give an outing on June 4th, at the Country Club, which is located near Carthage, a suburb of Cincinnati. There will be baseball games, bowling contests, races of various kinds, and many other forms of diversion for young and old. Extensive preparations are being made and, judging from the general enthusiasm manifested, the success of the project is already assured, and it promises to be the event of the season.

A Dangerous Article.

Our attention has just been called to a new product on the list of vermin exterminators which is being introduced to the trade under the name of "Rat Biskit." This product is very nicely gotten up and is in the form of a cake, or cracker, and has a very appetizing odor. The package which we saw contained six of these "Biskits," which were neatly wrapped in oil paper, the box bearing the label with directions. We look upon such a product as one extremely dangerous in the household. Its form, its attractive odor, would certainly lead the little ones to eat it should it fall into their hands, and we shudder to think of the bright young lives that are almost certain to be sacrificed to the enterprise of the "Rat Biskit" Co. We do not doubt but that the preparation is effective for the purpose for which it is intended but do wish to call attention to its exceptionally dangerous form. We would also call attention to the fact that the label on the package does not conform to the state law regarding the labeling of poisons.

WALT WHITMAN'S CREED.

(WALT WHITMAN, DIED MARCH 26, 1892.)

All goes onward and outward, nothing collapses,
And to die is different from what one supposed and luckier. . . .
I know I am deathless,
I know this orbit of mine can not be swept by a carpenter's compass,
I know I shall not pass like a child's carlacue cut with a burnt stick at night. . . .
One world is away and by far the largest to me, and that is myself,
And whether I come to my own to-day or in ten thousand or ten million years,
I can cheerfully take it now, or with equal cheerfulness I san wait.
My foothold is tenoned and mortised in granite,
I laugh at what you call dissolution,
And I know the amplitude of time.

PROF. LLOYD'S NEW STORY.

The Bookman for May contains the opening chapters of a new serial story by Prof. John Uri Lloyd, the title of which is

"WARWICK OF THE KNOBS."

A Story of Stringtown County.

To those who have read Mr. Lloyd's earlier book, any word of introduction to Stringtown and Stringtown county would be superfluous. The story deals with somewhat the same scenes and the same period. It contains, however (unlike "Stringtown"), practically no dialect, and little is said of the Kentucky superstitions, to which, in "Stringtown" Mr. Lloyd gave so much attention.

"Warwick of the Knobs" is a study of a life such as men like Warwick met with Warwick's stoicism. These men were iron in the manner in which they clung to tradition, to home, to family pride, and above all to their religion and their God, whom they believed to be relentless but just. This description of Boone (Stringtown) county is such as history might record, but does not. The scenery, the people, the methods of worship, the prejudice, the sacrifice, have all been drawn from actual life.

There was no Warwick. At least there was no one of that name who presented the characteristics of the man whose name has given the title to this story. But with that, we might say, pure fiction ends. Beyond it everything lies somewhere or other in that borderland where the memory and the imagination meet and blend. Morgan scampered over these hills of Boone county at the head of his cavalry. He passed through here again after his escape from Columbus, and for a time was secreted on one of the knobs of Gunpowder. The ruins of the old church are still to be seen.

The story as a whole marks an advance upon Mr. Lloyd's first story, "Stringtown." To those who liked "Stringtown" it will be a matter of interest to know that it is now in its fiftieth thousand.

The One Thought.

We have most of us heard of that sweet wedded bliss—
Of two hearts that are beating as one,
And two souls with a single thought sealed with a kiss—
And have wondered, perhaps, how 'twas done.

But to those who have been by experience taught
This effect is not hard to explain;
For in most of the cases that one "single" thought
Is—I wish I was single again.

—*Smart Set.*

A Money Maker for Druggists.

Our attention has been recently called to the large number of Vapor Bath Cabinets that are being sold through druggists, both in this country and abroad. From the information we have at hand, we should estimate there are at least 50,000 to 60,000 Bath Cabinets being sold every year through druggists alone. These Bath Cabinets are very beneficial in cases of Rheumatism, Neuralgia, Colds, Liver, Kidney, Blood and Skin Diseases. Druggists, after the sale of the Cabinets, derive a great deal of revenue in furnishing the users of the Bath Cabinets with alcohol and different medications that are used in the vapor cup. There are a great many different makes of Bath Cabinets on the market at the present time, but through the information we are able to get, and the comparisons we have made of different cabinets, we find that the Robinson Cabinet, which is manufactured in Toledo, Ohio, by the Robinson Thermal Bath Company, is one of the very best cabinets on the market, on account of its simplicity and convenience in using. They have six different styles of cabinets, including a Reclining Cabinet, which is sold among physicians for giving patients baths in bed, who are too sick to set up and use the regular style cabinet. The Robinson Bath Company also carry a complete line of Health Appliances of every description, and we believe our readers would find it very profitable to put in a line of Bath Cabinets of the Robinson make. We call your attention to the half page advertisement of Robinson's Bath Cabinet on another page of this journal.

A man who cannot command his temper should not think of being a man of business.

A Distinction With a Difference.

Opinion is movable; judgment is fixed. Opinion is volatile, uncertain; judgment is a rock. Opinion listens to advice and is swayed by it like a leaf, first this way, then that. Judgment also listens to advice. It absorbs it and sifts it—it winnows wheat from chaff and then, usually stands unmoved. Opinion is the fleeting, momentary unsupported thought. Judgment is the daughter of mature consideration. Opinions ruin businesses. Judgment is the sheet anchor of enterprise.

—*Dry Goods Chronicle.*

A gentleman had five daughters, the first of whom married Mr. Poor, the second Mr. Little, the third Mr. Short, the fourth Mr. Brown, the fifth Mr. Hogg. At the wedding of the latter her sisters, with their husbands, were there, and the old gentleman said to the guests: "I have taken pains to educate my daughters, that they might act well their part in life and do honor to my family. I find that all my pains, cares and expectations have come at last to nothing but a Poor, Little, Short, Brown, Hogg."

CREATING CONFIDENCE.

The writer stood in a drug store once talking to the prescription clerk, a well-informed young man, intelligent and in all respects trustworthy. A customer entered and handed him a prescription. "Do you think you can fill this without making a mistake? The doctor told me it contained a very powerful poison, and would have to be put up very carefully."

The young man could have said: "Well, I don't know; I don't claim to be the best druggist in town, but I will do the best I can for you, and try to fill it right." In which case he would have been very foolish, done himself an injustice and the store a positive injury and made the customer wish he had the prescription back. Or, he could have done what he did, which was to look the customer squarely in the eye and say: "It is my particular business to do things right, and not make mistakes. If you think I am liable to make a mistake you had better get some one else to fill this prescription for you, for I would not touch it with a ten-foot pole if I thought you did not feel perfectly satisfied that I know what I am about."

"But you look so young," feebly urged the customer.

"I was not too young to pass the state board examination two years ago, and I am not too young to fill from thirty to fifty prescriptions here every day without ever hearing a complaint of them."

The customer said: "Go on and fill it," and the proprietor of the store came up to exchange a few words with the customer, who was an old friend of his.

"Guess that new clerk of yours knows what he is about, doesn't he, Bob?" said the customer. "I think he does, or he would not be here," was the answer.

"Well, I asked him just now if he could fill that prescription without making a mistake, and he answered me in such a way as to make me think that he knew what he knew, and that's the kind of a fellow I like."

The proprietor smiled. "Yes, he is a little sensitive on that subject, and I think I rather like him better for it. I used to have a man who would say when people asked him if he ever made mistakes: 'Well, I suppose I have made some in my life, for everyone makes mistakes.' I soon found that I wasn't filling as many prescriptions as formerly, and I decided to find a man who knew that he could and did do things right."

The reason people go to a druggist for their medicine instead of trying to fix it up themselves is to get it done right. That is the druggist's business—to make up medicine right. Consequently he must eliminate the possibility of mistakes. He must understand his business. He must employ only competent help. And these things done he must go to work to show people that he is worthy of their confidence. Mawkish self-depreciation is no less disgusting than braggadocio and there is a happy medium of self-respect and self-confidence that begets the respect and confidence of others. In no business in the world is it more imperative to possess public confidence and it is for you alone to say whether you will possess it or not.

—*The New Idea.*

AS THE GODS SAW IT.

From above the gods looked down upon earth and they saw a mortal in a surging crowd. And he pushed and strove with strenuous effort that he might make headway.

And Jove said unto Vulcan:

"See yon tiny mite. He is in a life and death struggle with a mob of his fellow-mites. By myself, but he fights well; doubtless he is on some errand of human mercy—his child is sick or the wife of his bosom is nigh to death. Shall I not part the crowd and make a clear pathway for him in recognition of his 'mitey' efforts?"

Vulcan roared a deep, bass laugh in recognition of the great Jove's joke, but he said:

"No, let the man attain his end by himself that we may see him puff with pride. It is more amusing to see them in that state."

"I think," said Jove "that a miraculous intervention in his behalf would be more like to make him puff with pride; however, as you will. Ah, see, he has of his own efforts reached the edge of the battling crowd. It was a noble fight'n faith! Three times I thought him crushed. Those mortals have courage in plenty. Now let us hear what he says to the mortal whom he has approached."

And the mortal said:

"I want a box of that 15c. Talcum Powder that is marked down to 10."

GLYCERIN SUPPOSITORIES.

From physician and pharmacist there has come, now and then, a criticism of the U. S. P. formula for glycerin suppositories, some stating that the bulk of the cone is too great and others that the proportions of the ingredients are such as not to give the greatest efficiency to the preparation.

The official formula is as follows:

Glycerin	60 grams.
Sodium carbonate	30 grams.
Stearic acid	5 grams.

To make ten rectal suppositories.

It will be seen that the official suppository of glycerin contains 6.8 grams of material, 6 grams of this being glycerin. We have found upon inquiry that this formula is frequently modified in different ways by various pharmacists, and we are inclined to think that it might be well, if the suppository is to be maintained, to have the formula revised for the next edition of the Pharmacopœia. Consultation with the committee on therapeutics could readily determine what proportions are best to secure the desired result—an efficient laxative.

One of our western pharmacists, who has made quite a name for himself, and who has a large demand for glycerin suppositories of his own manufacture, kindly furnished us with his formula, which reads as follows:

Glycerin	300 grams.
Sodium carbonate	6 grams.
Stearic acid	10 grams.

Mix the ingredients as directed by the Pharmacopœia and form into suppositories of suitable size.

The size usually prescribed as rectal suppositories instead of weighing 6.8 grams weigh less than 4 grams.

The Pharmacopœia directs that these suppositories, after molding, be wrapped in tin foil. This is considered quite objectionable. Our experience has been that it is far better to introduce them at once into dry glass tubes and then tightly cork the container. If it be desirable to wrap the individual suppositories, it is better to employ a strong paraffin paper for the purpose. Too much stress cannot be laid upon the fact that they should be freshly prepared when required. It does not take long for the glycerin to disengage from combination; it soon appears on the surface of the suppository and, being extremely hygroscopic, will rapidly attract moisture.

—*Prof. L. E. Sayre, in Drug. Cir.*

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid to anonymous communications, although the name of the sender of such news will not be published.]

—

COLUMBUS NOTES.

William L. Knuth has purchased the A. D. Newton Drug Store at Springfield, Ohio.

John D. Stimmel can now be found at T. B. Ellis' new pharmacy at Oak street and Ohio avenue.

John Brewer has accepted a position with the D. L. Burt Pharmacy at Broad and Front streets.

Mr. Fred Mebs, manager for the Standard Pharmacy, is taking a two weeks' vacation in the country.

J. E. Brown has purchased T. C. Haney's interest in the South Columbus Drug Store and is now the sole proprietor.

Tom Ryan, who formerly conducted a drug store on West Broad street, this city, is now with John Byrne & Co.

F. W. Christ has accepted a position with the City Hall Drug Store Company as salesman. Mr. Christ will call on physicians in the interest of the firm.

During the electrical storm on the 7th inst. lightning struck and considerably damaged the drug store of Oscar Rinker at Milo, Mr. Rinker narrowly escaping injury.

W. H. Grotthause has purchased the interest of his former parter, Mr. Shoupe, in the North Columbus Pharmacy. Dr. Grotthouse is the right man in the right place, and THE MIDLAND wishes him all kinds of success.

Mr. Will Wendt, the active secretary of the Columbus Druggists' Association and manager of the F. J. Heer Pharmacy, has become a proprietor, and will continue his active efforts as heretofore. We congratulate Will, and assure him of our best wishes for his success.

Herman Hoppe, the South Side druggist, has completed his course in medicine at the O. M. U. and is now a full fledged doctor. Dr. Hoppe will open an office on South Fourth street, a few doors north of his drug store. THE MIDLAND joins with his many friends in wishing him success in the new profession.

H. E. Pontius, corner Town and Third streets, is in the list of druggists that have put new onyx fountains in their stores this season. Mr. Pontius' fountain is a beauty, and will compare with any in the city.

We are in receipt of a communication from a proprietory medicine company which has been called forth by our invitation in our last issue to proprietors to make known reductions in their prices following the repeal of the stamp tax, through our columns. This company wants to know if those proprietors who did not advance their prices and have borne the burden of the stamp tax themselves are not entitled to a higher position on the roll of honor than those who did advance and who may now return to the old prices. We deem the point well taken and are free to admit that the class of proprietors who have not made any changes during these troublesome times are entitled to full credit for their action. We have in mind since the receipt of this letter the compiling of a list of the proprietors who are entitled to such credit, and may possibly at a future date publish it.

—

A. B. Painter, of Alexandria, Ind., has sold out.

C. C. Alexander, of Cleveland, Ohio, has sold out.

Ed Potter, of Augusta, Ohio, has lost his stock by fire.

F. G. Lee, druggist at Kalida, Ohio, has been burned out.

M. C. Clayton & Co., of Mannington, W. Va., has sold out.

H. G. Harter, of Helena, Ohio, has been succeeded by C. M. Jones.

H. T. Strine succeeds to the business of Strine Bros., of Waldo, Ohio.

Charles Lyons, of the firm of Dusenbury & Lyons, Conneaut, Ohio, is dead.

Ralph Q. Pugh, of Mt. Blanchard, Ohio, has suffered damage to his stock by water.

The firm of Theodore Hauck & Co., of Columbus Grove, Ohio, has been dissolved.

C. C. Ferguson, Roscoe, Ohio, spent several days at Cleveland the first of the month.

A. E. Benedict, Utica, Ohio, is the owner of a new total adder National cash register. Keeps "Bennie" busy punching the keys.

Digitized by Google

Clyde Morrey, formerly with F.A.Wheeler, of Mansfield, Ohio, has gone with B. F. Carter.

The S. H. Stockman Store was burned in the fire which nearly wiped out Loudonville May 1st.

The drug firm of Wallen & Goodale, of Versailles, Ohio, has been succeeded by Arthur Wallen.

F. G. Trembly, Frazeysburg, Ohio, has returned after several weeks at Vinton and Gallipolis, Ohio.

Joe Mulvain, former head clerk for Ira E. Finfrock, of Mansfield, has started a store at Newcomerstown, Ohio.

Will Parks, a former druggist at Nelsonville, Ohio, has embarked in the dry goods business at Danville, Ohio.

J. J. Van Alen, formerly with D. M. Odafer & Co., of Marion, is now with Ira E. Finfrock, Mansfield, Ohio.

O. H. Finnical succeeds to the business of O. H. Finnical & Co. at Cadiz, Ohio, Mr. Emmit Haverfield retiring.

Clem Rainbo, of Dugan & Co., White Cottage, Ohio, was a member of the last Grand Jury at Zanesville, Ohio.

Will Mahaffey, former manager of Mahaffey Drug Store, has resigned his position to practice his profession of optician.

Carl N. Lorey, formerly of Washington C. H., Ohio, is with Garrett & Ayers, of Hillsboro, Ohio, doing a little relief work.

"Mayor" Frye, of Pleasant City, Ohio, formerly of Scio College of Pharmacy, has disposed of his business at Pleasant City.

Jim Wilson, who has been with B. F. Carter, of Mansfield, Ohio, for several years, has accepted a position with Joe Osborn, of the same city.

W. A. Henry, of Greenfield, Ohio, is the proud possessor of two brand new cash registers that add considerably to his already attractive store.

Mr. George Whipple, of Athens, Ohio, at present attending Ohio Normal University, Ada, will be employed at Cline's Pharmacy, Athens, after June 1st.

A. H. Dean, of Waverly, Ohio, recently went to Columbus to meet his wife and daughter Marguerite, who have been on an extended visit to Arkansas.

George S. McCaw, Dennison, Ohio, has disposed of his "Woodward" Pharmacy at that place. The purchaser is, we understand, a lady from Pennsylvania.

J. H. Brinker, Bellevue, Ohio, has been busy putting in a new steel ceiling, painting and papering. The store makes a very handsome appearance in its new garb.

Herman M. Chany has accepted a position as manager of the Mahaffey Drug Store of Mt. Vernon, Ohio. Mr. Chany was formerly with Warning & Co., of Blanchester, Ohio.

Mrs. R. T. Hearson, who has been quite sick for the past few weeks, is reported considerably better. Mrs. Hearson is one of the oldest and best druggists in the northern part of the State.

Harry Christopher, of Greenfield, Ohio, has remodeled and newly papered his store, and now has a very attractive place of business. Harry is a hustler and deserves the patronage that is sure to follow.

E. C. Fleming, one of the oldest druggists in the state and a pioneer in the drug business in Xenia, Ohio, is very low at his home from a severe attack of heart trouble. His death is expected most any time.

James R. West, of New Vienna, Ohio, has been laid up for some time with a severe attack of inflammatory rheumatism. We hope to hear of his recovery soon and find him at the store again, greeting his many friends.

Will Dugan ("D") was out after frogs' legs last week, and as a result the price of this delicacy at Zanesville restaurants has dropped to half price. Say, "Billy," THE MIDLAND is fond of frogs' legs. Don't forget the address.

Harry Simons, of Squier & Simons, Greenfield, Ohio, is the recipient of a handsome new office chair, the present of one of his many friends. He says what few minutes he has for rest will be appreciated more than ever now.

R. H. Schrader, who has been in business at Nelsonville for a number of years, has purchased a half interest in the Dusenbury store at Sunbury, Ohio. The Star Drug Store Company starts out with every prospect of success.

A. W. Teters, the enterprising young druggist of Bainbridge, Ohio, has just put in a new soda fountain of modern pattern. It is up to date in every respect, and will serve the delicious and refreshing beverage during the hot months to come. His new enterprise is evidently appreciated by the people of Bainbridge, judging from the thirsty ones gathered around the counter.

Digitized by Google

Fred Klostermeyer, of the firm of Ort & Klostermyer, of Charleston, West Virginia, was a recent visitor in the "Windy City." He was called there by the sickness of a near relative, but while there he took in a few sights of interest and reports a very pleasant visit.

Chas. M. Ridgway, the popular druggist of Cedarville, Ohio, has recently returned from Hot Springs, Ark., where he went in search of a little health. He reports a very pleasant trip and stay. Charlie took a most severe cold, which almost caused him to lose his voice, but he is as good as new now.

Mr. George Lehman, the junior member of the Nipgen Pharmacy of Chillicothe, Ohio, has announced his engagement to Miss Mamie Meiers, a very beautiful and popular young lady of Portsmouth, Ohio. The wedding will take place June 19th. George is receiving the congratulations of his host of friends.

T. M. Burnett, of Wilmington, Ohio, who has been located across from the court house for many years, has shaken the dust of the old place from his feet and moved into a handsome new room further up the street, and, with new fixtures and a new soda fountain, is again ready to welcome his old friends and patrons and give them the best to be had.

We are in receipt of a copy of the second edition of Merck's Manual, which is just out of press. This little reference book has been greatly improved and contains much useful matter, which will be found a fruitful source of suggestion. Messrs. Merck & Co. are to be congratulated on their enterprise and thoroughness.

Mr. Arthur Howson, of Chillicothe, Ohio, favored the MIDLAND with a pleasant call on the 8th inst. Mr. Howson has been spending a few days in the Capital City, visiting his sister and nephew. His nephew is a student of the O. S. U. Mr. Howson expressed himself as much surprised and pleased at the rapid growth of our University.

Lamb & Co., of Kingston, Ohio, recently had a bottle of hydrogen peroxide that had rested very innocently for some time on the shelf, suddenly give way to its feelings and burst. It cleaned off all the other bottles on the shelf and blew some of the glass to the front end of the store. Doc. says hereafter he will keep this article by itself in the cellar.

The MIDLAND has been favored with recent calls from the following druggists: Dr. Squire, of Ashville; F. B. Tissot, of Mt. Vernon; Dr. Hempsted, of Croton, Ohio; James T. Blaser, Waverly, Ohio; Dr. Baird, of Baird Bros., Pataskala, Ohio, and A. F. Crayton, of Newark, Ohio.

Mr. Harry Fox, of Zanesville, Ohio, P. C. P. 1899, who has been with the Wm. H. Chappelear & Sons Co. at Zanesville since taking his degree, will leave June 1st for an extensive trip through the west, and particularly to visit Fred Shaw at Denver. Mr. Shaw was also one of "Chappelear's Boys." It is said that Fred is doing finely in his handsome pharmacy.

The regular meeting of the Columbus Druggists' Association was held at the pharmacy rooms on the evening of the seventh inst. The evening was spent in a general discussion of prices, the most important action being the removal from the list of fixed prices of all bulk drugs and chemicals. The next meeting of this Association will be held in the afternoon at some one of the public gardens and will mark the beginning of the summer outings.

The druggists of Ironton, Ohio, have been at war with each other for some time, it seeming most impossible for them to come to an agreement; but we had a tip from one of the prominent druggists of that place to the effect that they were talking it again strong, and hoped ere long to quit their foolishness. We sincerely hope they can all see the error of their way and get down to the N. A. R. D. agreement. We are sure every one of them has enough honor to stick to what they say.

Mr. A. B. Cowgill, of Zanesville, Ohio, Secretary and Treasurer of the Bailey Drug Co., will sever his connection with this company on July 1st. Mr. Cowgill has been in bad health for some years and hopes to recuperate by a change of employment. "Alva" has many friends throughout Central Ohio, whose best wishes will follow him to his new home. He will locate in Southern California and engage in the growing of fruits for the market. THE MIDLAND wishes you success, Brother Cowgill.

The recent high stage of water in the Ohio river did not spare any of the druggists it could reach, and last week they were just getting back to their quarters again and trying to clean off the high water marks. Some of them claimed that in spite of from fifteen to eighteen inches on the floor, that with the aid of a good pair of wading boots

Digitized by Google

they succeeded in doing business. Among those who suffered to some extent we mention John C. Hogan, of Catlettsburg, Ky., about fifteen inches on the floor; also Patton Bros. and Wellman & Creighton, of same place, about three feet on the floor; J. W. Slater & Co. of Ironton, had thirteen inches, and B. J. Fields, of Charleston, W. Va., reported about eighteen inches. Mr. Fields was a little disappointed, as he generally gets about six feet.

Frank Amann, of Porstmouth, Ohio, recently sold his Gallia street pharmacy to Win Nye. This makes three stores that Mr. Nye now owns in Portsmouth, and he is certainly pushing after the drug business in the "River City." Mr. Nye has leased the building on Sixth and Chillicothe streets, where extensive remodeling will commence at once. As soon as completed he will move the Amann stock into this room. He will then have three as up-to-date stores as can be found anywhere. Mr. Nye has retained Mr. John Kyle to manage this store for him.

Miss Minnie, the winsome and only daughter of A. W. Dugan, of White Cottage, O., was married March 14th to Mr. James Dunn. Mr. Dunn is a native of the South. He has been for some time traveling a central territory for the U. S. Card Co., of Cincinnati. Mr. Dunn has been transferred to a southern territory, and after a tour including Buffalo and other eastern points, the happy couple will make their permanent home at Atlanta. Mr. Dunn is to be heartily congratulated on winning this fair daughter of the North. Minnie Dugan has a host of friends in "Old Muskingum," whose best wlshes will follow her wherever she may be.

A recent statement has been made in an eastern journal to the effect that the government had rejected one million 2 gr. quinine pills which had been supplied for hospital service. The ground for their rejection is that they contained but one gr. of quinine, the requisite weight being made up by the addition of gypsum and flour. The name of the maker is not disclosed. We do not understand why the government should undertake to protect an unscrupulous manufacturer from exposure, but presume the officials have some grounds for their action. We are told that this piece of news has led Inspector Herbst to look to the quality of the quinine pills in our market. He has so far examined twenty-two different lots and is glad to say that as yet no irregularity has been discovered.

The MIDLAND is in receipt of an invitation to attend the commencement exercises of the Cleveland School of Pharmacy, which were held April 19. We notice that the school has sent out eight new recruits to the army of pharmaceutical workers. We are glad to welcome such as these, being assured that they come to the work with a better preparation than most of us who have preceded them, and it is to the addition to our ranks of such as these that we may look for the betterment of our professional condition. The Cleveland school has our congratulations on the close of a successful year and we wish for them continued and still greater success.

The wholesale merchants of Columbus, through the Board of Trade, recently made an experiment in the matter of bringing the outlying trade to the city. A free excursion was given to the merchants of the Hocking Valley and its branches, which resulted in bringing to Columbus something near five hundred of the best merchants of the valley. It was unfortunate that the time was just when the Ohio river was at its height, and it is reported that quite a number from the extreme points were cut off by the water. In spite of this fact, however, the excursion was deemed quite a success. On arrival at the city the merchants spent their time inspecting the stock of the wholesale houses in the particular lines in which they were interested, and we are advised that large transactions were made. In the evening a banquet was given at the Chittenden Hotel, where cordial expressions were freely made. The drug trade was well represented, and the MIDLAND was favored with calls from, E. L. Neal, C. D. Kerr, of Gallipolis; John Friedland, of Coalton; Dr. Jacobs and Dr. Hale, of Jackson, and Mr. Hickman, of Nelsonville. It is probable that the merchants will repeat this experiment, taking some other section for the next attempt.

RED CLOVER BLOSSOMS

And Fluid and Solid Extracts of the Blossoms.

CLEVELAND ITEMS.

Proprietor Shot at and Wounded.

One of the boldest and most successful "hold-ups" that has occurred in Cleveland for several months took place at the drug store of Albrecht & Meyer, corner of Central and Giddings avenues, Friday evening, April 26th, at about 9:30 o'clock. Four young desperadoes, armed with revolvers, walked into the store, shot and wounded Mr. Meyer, one of the proprietors, robbed the cash register of about $40, and then, flourishing their weapons in the faces of people outside the store, ran across the commons toward Brenton street and disappeared in the darkness.

Edward W. Meyer is a member of the drug firm of Albrecht & Meyer. Mr. Meyer was in charge that night. Shortly before ten o'clock four young men stopped in front of the place. One of them went inside of the store and asked permission of Mr. Meyer to look at the city directory, at the same time explaining that he and his companions outside were strangers in the city. While turning over the pages of the directory the young man asked a few commonplace questions, and while he was talking another member of the gang walked in. Mr. Meyer was standing beside the soda fountain on the right side of the store, near the front window. He was leaning carelessly against a glass counter case. The second young man had no sooner entered the store than he drew from his coat pocket a revolver and pointing it at Mr. Meyer, commanded him to "turn over the cash in the register or I'll bore you full of holes." With rare presence of mind, Mr. Meyer quietly allowed his hand to fall on the case and quickly grasping a large bottle he hurled it at the young man's head. The ruffian dodged the bottle and fired three shots at Mr. Meyer, who turned and started to run towards a door in the rear of the store. One of the bullets struck Mr. Meyer in his right wrist, coming out through the back of his hand. Another bullet almost burned his ear as it flew by, and lodged in the wall. The third bullet struck a bottle on one of the shelves.

While the shooting was in progress the two other men ran into the store and helped their companions to loot the cash register. They were in the store fully five minutes after the shooting was over.

Mr. Meyer ran out the back door and roused neighbors by his shouting. Others were aroused by the sound of the shooting, and when the four robbers started out of the store, they were confronted by several men and two or three women. One of the onlookers made a move toward the robbers and each one of the latter pulled out a revolver and commanded the people to stand back. Taking advantage of the momentary confusion, the robbers turned and fled. They ran across the street and across the commons at the corner of Central and Giddings avenues. On reaching the alley between Brenton street and Giddings avenue, they turned and ran south. No attempt was made to follow them, until policemen arrived on the scene.

Mr. Meyer called a physician, who dressed his injured hand. The wound is not dangerous. Mr. Meyer, in describing the robbers, said that the first man who entered the store was a young fellow, apparently about eighteen years of age, who wore a dark suit and weighed arout 115 pounds. The man who did the shooting was about twenty-two years of age, had a smooth face and was rather heavy-set. The other two men Mr. Meyer could not describe, except to say that they were about twenty years of age.

Cleveland School of Pharmacy Commencement.

The commencement exercises of the Cleveland School of Pharmacy were held April 22nd in Association Hall. The graduating class numbered eight. In presenting the class Professor Joseph Feil stated that it was a small one compared with the classes enrolled in the school at the present time. The address of welcome was delivered by Professor R. A. Hatcher, and President E. Schellentrager presented the diplomas and conferred the degree of pharmaceutical chemist.

The graduates are Miss Elizabeth L. Busher, Winfred B, Collins, Albert F. Hey, Samuel A. Klein, Charles A. Laub, William J. Mock, Everett S. Rubinstein and Carl Seward.

Professor H. B. Arny addressed the class and in his speech dwelt strongly upon the duty of each one to the profession into which he was entering, the care which must be taken to keep the profession unsullied by a dishonorable act, and the necessity of repaying the debt of gratitude which the graduate owes to his alma mater. The

Digitized by Google

class repaired to the Hollenden on the completion of the programme, where the banquet in honor of the occasion was held.

—

N. O. D. A.

We take the following from the report of the Board of Control of this association presented to the meeting at Cleveland on April 5th:

"It is of course impossible, and we believe that the members would not require of us to publish all intentions which we may have in mind. Space and time would forbid, even if inclination desired, though as an illustration of how results are being attained, we would ask you to revert to the articles which appeared in the Cleveland papers on March 27th, 28th and 29th. You all, perhaps, observed that sensational publicity became rampant. Efforts were put forward to destroy public confidence in our association. We ask you now, why these articles have been discontinued? We also ask, why a certain department store *was glad* to dispose of its drug department? Why did another department store advertise that it would no longer continue to sell drugs? Why has a third curtailed expenses by discharging its main drug salesman? Why has a fourth removed the drug department to an upper story, where floor space is less important? And why are all department store drug advertisements conspicuous by their absence? * * * And how is your Board of Control carrying out your instructions? Not by the blare of trumpets. Not by publicity in the press. Not by the circulation of slanderous lies. Not by tales of woe, banded from place to place by willing scandal-mongers. But by keeping everlastingly at it. By careful, concerted, consecutive moves."

—

A Costly Gift.

O. B. Hannan, for many years connected with the firm of Strong, Cobb & Co., and who leaves to go into business for himself, was presented on Friday with two elegant cut glass sets by his associates. One was for water, the other for wine. May he never get a *back set.*

—

Damages Claimed.

F. P. Schroeder, Jr., sues the owner of a building in Cleveland for $10,000 damages on account of being obliged to vacate a store-room on which he claimed to have a lease. The lease gave the owner the option of cancelling the same on April 1st, 1901, or 1902. Schroeder was notified to vacate that the building might be re-modeled, but instead it was rented to another druggist, and the evicted druggist brings suit for damages to his business by reason of being compelled to secure another location.

—

Miss Olinda Voss, the accomplished daughter of George W. Voss, a prominent pharmacist of Cleveland, and a member of the State Board of Pharmacy, gave a public vocal recital in the concert hall of the Cleveland Gesangvereins on April 24th. The recital was one of the musical events of the season and was a great success in every respect. Miss Voss graduates from the department of music at Oberlin college in June and is recognized as quite an artist in vocal music.

—

Miss E. L. Busher, of Cleveland, a graduate of the Cleveland School of Pharmacy, 1901, also a registered assistant pharmacist, was married on April 29th to a gentleman connected with the Lake Shore railroad.

—

Mr. E. R. Cooper, secretary of the N. O. D. A., has been authorized to attend the meeting of the Proprietary Association of America at Philadelphia.

Emulsions.

"An emulsion is a mixture of small particles of solid or liquid substances in a liquid vehicle, the particles kept from coalescing by means of a body called an emulsifier." In its commoner acceptance the term "emulsion" is reserved for fluid aqueous mixtures of oils or oleoresins. Of these latter, nature furnishes a few fine examples; milk is the most common. Cow's milk contains 3.6 per cent. of fats; yolk of egg, 30 per cent. of fats. The chief emulsions of oil from the dispensers' point of view are those of cod liver oil, castor oil, petroleum oil, and sweet almond oil. The principle involved in all emulsions is to get the substance into a finely divided state and to prevent these particles from coalescing. This is accomplished by coating or covering the particles with some viscid substance easily miscible with water. The most readily available method for cod liver oil, is the so-called "English method." Mix in a mortar one part by weight of powdered acacia with twice its welght of Ol. Morrhuæ, and add at once water equal to one-half their combined weights and stir briskly, flavor to suit. Other emulsifying agents have their merits.

Gum tragacanth does not divide the oil as minutely as acacia unless great mechanical force is employed, but its emulsions remain sweet a surprisingly long time. The yolk of a large hen's egg may be considered as equal to 10 gms. of acacia, or 1¼ gms. tragacanth.

Saccharated casein from milk is readily obtainable, or prepared. For a 4-oz. emulsion use about 2½ ozs. of the saccharated casein in the usual way (English method). The emulsions are more perfect and more stable than those obtained in any other way.

Irish Moss. ¼ oz. of washed moss makes 24 ozs. of mucilage. Moss mucilage, 6 dr.; cod liver oil, 1 oz.; water, 2 drs., produces an emulsion that does not readily separate, while if the same quantity of acacia mucilage be used the emulsion soon separates. Incidentally we may notice that moss mucilage is much superior to acacia for suspending copaiba, and for chalk mixture is fully the equal of acacia. It is not good for heavy powders, as bismuth subnit. Gelatin, on occount of its cheapness, recommends itself. It may be used in the proportion of 4 ozs. to one gal. of water. 12 parts of this solution with one part of carbonate or phosphate of soda or potash, will emulsify from 24 to 35 parts of animal or vegetable oils. Gelatin will emulsify chloroform in this way. It is especially good in the case of paraffin oils, soft soap being used instead of the alkali just mentioned.

Starch, milk, malt extract, and preparations of senega root, quillaja bark and resin soap have their varied uses.

For castor oil, yolk of egg is a popular emulsifier. For turpentine, triturate the yolk with twice its volume of water, gradually added and strained through muslin. Of this take slightly more than of the turpentine to be emulsified and shake them together in a bottle. Add more water if necessary.

With volatile oils the accepted way is to mix with some bland fixed oil and emulsify as fixed oils.

Essential oils may be emulsified by the English method by using at least 3 parts of powdered acacia to 8 of the oil as compared with 2 parts of acacia to 8 parts of fixed oil. Generally more acacia is required, depending upon the amount of water to be added.

We may consider one class of emulsions as "seed emulsions," that is those made from seeds having fixed oils, as almond, poppy, hemp, etc. The process consists in pulverizing the seeds in about 1-10 their weight of water, adding water slowly up to the required amount, and straining through a coarse cloth. If the seeds are pounded when dry the oil is expressed and is apt to rise as a cream to the top.

Let us consider a few specific cases which are apt to present themselves. It frequently becomes necessary to dispense in

Digitized by Google

an aqueous solution resinous or oleoresinous preparations dissolved in spirits, as Tr. Cannabis Ind., Tr. Asafoetida, Tr. Guaiac, etc.

Example:

Tr. asafoetida	½ oz.
Spts. amm. arom	½ oz.
Glycerin	3 drs.
Aquæ, ad	8 ozs.

Put into the bottle the glycerin, the aromatic spirits and 6 ozs. of water, and shake. Add the tr. asafoetida in a slow stream without touching the neck of the bottle, shake gently and add the remainder of the water. The rule in such cases is to mix all the ingredients except the resinous fluid, which add last and shake. This leaves the resinous particles in a finely divided state. If glycerin, acacia or some other viscid substance is present it prevents these particles from uniting and those particles which settle out are easily brought back into suspension with a little shaking.

Here is another example:

℞	Potassii Iodidi	½ dr.
	Tr. Cimicifugæ	1 oz.
	Tr. Guaiac Am	1 oz.
	Tr. Nucis Vom	1½ drs.
	Aquæ Chloroformi	9 ozs.

A good mixture can only be obtained by the addition of acacia. Make a mucilage of 2 drs. of acacia with ½ oz. of water. Dissolve the iodide in the remainder of the water and mix with the mucilage. Mix the tinctures and add to the aqueous mixtures with gentle agitation.

Here is a useful cosmetic. If properly made it is a perfectly suspended milky compound. Its French name is *Lait Virginal:*

℞	Tr. Benzoini	2 drs.
	Aq. Rosæ	6 ozs.

With this the mixture is sure to separate unless a few drachms of acacia mucilage are added.

It is sometimes desirable to prescribe oils with acids in the form of an emulsion.

Example:

Olei Morrhuæ	1 oz.
Glycerini	1 oz.
Succis Limonis	1 dr.
Tr. Quillajæ	2 drs.

This forms a very good emulsion. The value of this will be seen when one considers that the slightest tendency to acidity on the part of acacia will defeat the best manipulation. With oil of turpentine, tr. quillaja or tr. senega root form a good emulsion if used in equal parts with the oil. Chloroform is made into an excellent emulsion by using ½ dr. of tr. quillaja to every 10 m. of chloroform.

Salts, extracts or other solid bodies to be dissolved in emulsions should be separately dissolved in some of the water to be added. If mixed with the mulsifier a separation of some of the oil will occur. If spirits, acids, salts or tannin substances are to be mixed with emulsions they should be added in as dilute a solution as possible. Syrups should always be added last.

The foregoing examples are only a few of the many problems in regard to emulsions which come up for solution in the drug store.

E. N. WEBB.

Explosive Mixtures.

This subject is one in which every pharmacist has had some experience and of which we all know more or less. To one who is thoroughly acquainted with the underlaying principles and "who thinks twice before he acts" there need be no great fear.

The question now arises, what do we mean by an "Explosive Mixture?" According to Coblentz—"Explosive mixtures are certain chemical compositions which, when brought together under favorable conditions, either give rise to violent reaction or favor the formation of new bodies, which explode on application of mechanical force." The power of the explosive may be lessened by using dilute solutions, avoiding pressure or force, a low degree of heat, etc.

When a pharmacist has a prescription or recipe calling for a substance which is rich in oxygen or easily deoxided to be mixed with other substances, he should consider well the order of mixing, constantly bearing in mind that the substance should never be rubbed with the oxidizable bodies. Following are a few of the bodies which readily part with their O – Picric Acid, Chlorates, Iodates, Bichromates, Permanganates, Nitrates, Picrates, Oxide of Silver. These substances should be first rubbed in a mortar separately, then mixed with the safe ingredient, not in a mortar, but on a large area of surface, using a bone or wooden spatula to mix the powder, being careful not to rub too hard. A good example of this is the manufacture of the colored fires. The following is a recipe which forms an explosive compound if not properly mixed:

℞	Potassii Chloratis	2.0
	Sulphuris Praccipilati	3.0
	Antimonii Sulphidi	0.5
	Zinci Nalerianatis	0.5
	Sacchari	5.

M. Ft. pulv. Divide into 20 equal parts.

Digitized by Google

The K ClO_3= should first be rubbed to a fine powder, the other ingredients separately mixed, lastly K ClO_3 mixed on paper with bone spatula. Usual precautions. The same applies to Hypophosphites; never rub them too hard, and be careful how you apply heat to them, either when dry or in solution, especially in presence of glycerin.

All explosive substances are not capable of being rubbed in a mortar, for instance, who would want to rub gun powder or triturate nitro-glycerin or any of the fulminates? This class of extremely explosive substances should always be borne in mind. Coblentz divides "Explosive Mixtures" into three classes:

1. Spontaneously Inflammable Bodies. Phosphorus (also subsulphide) Compounds of methyl and ethyl with Al. Zn. B. As.

2. Bodies which explode on heating. Amm. Nitrate (when suddenly or strongly heated).

Oxides of Chlorine, Mercurous oxalate, Urea nitrate (when suddenly heated).

Most organic nitro substitution compounds containing nO_2 groups, Picric acid and Picrates when strongly heated in confined space. Hypophosphites, Silver Chlorite and Oxalate.

3. Bodies explode on percussion or when triturated. Substances which contain carbon and oxygen with nitrogen in feeble state of combination with the entire amount or a portion of the oxygen, when explosion takes place, the nitrogen is set free, and the oxygen unites with the carbon present to form Co and Co_2. If hydrogen is present, it forms water in the shape of greatly expanded vapor. Certain nitrogen oxides when substituted in place of hydrogen may form very explosive compounds, such as nitro-glycerin or gun cotton. Chlorates should never be prescribed in powder, mixed with organic or inorganic combustible or oxidizable bodies. Some of these compounds should never be mixed, but dispensed separately or in solution. When it is necessary that such be mixed, the greatest caution should be observed, and only small quantities be operated on at a time, with the precaution of pulverizing each ingredient separately and mixing without pressure —commercial K ClO_3 if it contains organic impurities will explode on trituration.

HnO_3 (fuming) with readily oxidizable substances, such as glycerin, alcohol, tinctures, volatile oils, resins, sugar, phosphides, etc. Permanganates, with organic extracts, organic powders, organic fats, acids and oils, hypophosphites reduced iron, sulphur, or sulphides, glycerin, alcohol, etc. These react in very dilute solutions, causing a reduction (decolorization) of the permanganate to the manganate. Permanganate when combined with organic compounds often cause violent explosions, owing to the loose state of combination of oxygen.

Oxide and nitrate of silver when combined with a reducing agent, as sugar, will not explode with violence but simply swell up and disintegrate. We are all familiar with the form of explosion when O_2 is liberated from a compound. The following are a few prescriptions which require great care in compounding:

℞ Potassii Chloratis, Acidi Tannici, Glycerini, Aquæ. M. Ft. Sol.

Dissolve the tannin in the glycerin and the chlorate in the water, then mix. Do not rub tannin, chlorate, glycerin together.

℞ Potassii Chloratis, Sodii (or Calcii) Hypophophitis, Aquæ. M. Ft. Sol.

The two salts must not be rubbed together or an explosion will result. They should be dissolved separately in water, then mixed.

℞ Olei Terebinthinal, Acidi Sulphurici, or Acidi Nitrici. M.

This should be cautiously mixed in an open vessel, as the reaction is quite violent.

℞ Argenti Oxidi, Morphinæ Hydrochlorates, Ext. Gentianæ. M. Ft. Pil.

This pill will burst on standing, owing to the decomposition of the silver oxide by organic extract.

℞ Potassii Permanganate.....1 dr.
Glycerini.....½ oz.

Will explode when brought together.

℞ Acidi Chromici.....10 gr.
Glycerini.....fl. 1 dr.
Sodi..... ½ oz.

Dangerous explosive.

℞ Linimenti Camphoræ Co .....
Linimenti Saponis.....aa fl. 2 ozs.
M. Ft. Linimentive.

This mixture has given rise to an explosion, owing to the formation of nitrogen iodide from the presence of the ammonia in the Lin. Camph. Co.

℞ Acidi Nitrici.....
Acidi Muriatici.....
Tincture Nucis Vomical.....aa fl. 2 dr.

This is liable to explode a few hours after being mixed, owing to chlorine being given off.

In the manufacture of Dobell's solution we have a small explosion caused by the glycerine acting upon the borax, forming boric acid and boroglycerine. The free

Digitized by Google

boric acid in turn acts on the sodium bicarbonate and evolves Co_2, carbon dioxide.

Spts. Nit. Ether when mixed with some substances, such as F. E. Bucher with evolution of nitric oxide. (N. O.)

These examples are sufficient to show that great care should be exercised in working with explosive compounds and it is evident that the pharmacist cannot know too much about the subject.

$5.00.
Excursion to Detroit,
VIA
Cleveland.

We can now give definite information in regard to our trip to Detroit. We will leave Columbus on Friday, May 31st, at 11:40 A. M. on the Big Four fast train, arriving in Cleveland at 2:55 P. M. The Graselli Chemical Company will be visited. The boat for Detroit leaves at 10:15, arriving in Detroit at 5 A. M. The pharmaceutical, chemical and bacteriological laboratories of Parke Davis & Co. will be visited in the forenoon, and Saturday afternoon will be spent sight-seeing in Detroit, or by taking a trip across Lake St. Clair to the flats. Boat leaves Detroit at 10:30, arriving in Cleveland at 5:30 A. M. Trains will leave Cleveland as follows:

8:00 A. M., arriving in Columbus at 12:25.
12:35 P. M., arriving in Columbus at 4:10.
8:30 P. M., arriving in Columbus at 1:45.

The trip on the Lake will be by moonlight. Fare for the round-trip, five dollars. Those desiring staterooms can make arrangements at usual rates, single berths, $1.00; stateroom, accommodating three, $2.50, for one night.

Any of our friends desiring to join us will please address W. A. Sandacre, department of pharmacy, O. S. U. Tickets are now on sale. There will be ladies in the party. In order to get the five-dollar rate we must get a party of fifty. At present about thirty have signified their intention of going. Let us hear at once.

—

Mr. T. A. Knowlton, with Frank D. Hall, Newark, expects to go with us to Detroit.

B. H. Slater, '95, from Chesterville, Ohio, was a caller at the University last week.

—

The O. S. U. Chemical Society has challenged the O. S. U. P. A. to play a game of ball. We have Atkinson, pitcher; and Snyder, catcher on the University nine, so we guess there is not much doubt as to the result.

—

Mr. H. L. Morris, of Springfield, Ohio, a junior in the four-year course in pharmacy, is at present chemist for the Low Moor Iron Company, Low Moor, Virginia. Mr. Morris is a registered pharmacist. Long course students, by electing metallurgical work, can fill such positions, and a number of our graduates are at present so employed. Success to you, Harry.

—

At the last meeting of the Association, following the suggestion of Prof. Kauffman, part of the evening was devoted to a general discussion. President Royer divided the society into two equal numbers and then stated the question: "Resolved, That drug stores should be closed on Sunday." The talks were impromptu and participated in by all but one or two members. Of course, the affirmative won. The negative accused the judges of being prejudiced, which they acknowledged, but claimed that the debate was fairly won. The judges were, Pres. Royer, Sec. McBride and Prof. Sandacre.

A teaspoonful of powdered alum in syrup is a good and safe emetic in croup. It may be repeated in ten or fifteen minutes if required.—*Medical Summary.*

FREAK LEGISLATION.

Every state legislature has to grapple with more or less of what may be termed "freak legislation," but it would seem that the New York state legislature the past session has had more than its customary share. It has had presented to it some of the freakiest of freak bills. Here is one, for instance: A Buffalo man claims to have discovered a wonderful remedy for rheumatism, and in virtue of this discovery he feels that he should be entitled by law to practice medicine without passing the regular medical examination and fulfilling the other requirements laid down, and he has induced a state assemblyman to introduce a bill for his relief in this respect. Another bill, which has been killed, however, was to permit an individual to practice veterinary surgery without fulfilling the requirements demanded by law.

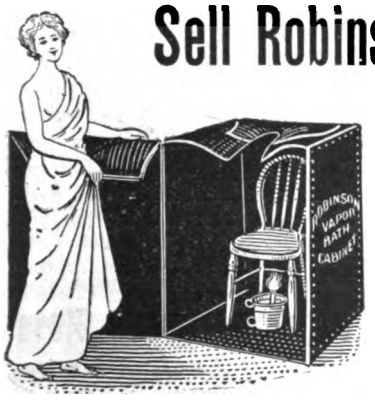
And then just think of the numerous bills affecting pharmacy which have been introduced, and with which readers of this journal are all familiar. It is no wonder that the average individual believes that there is altogether too much law making. Beside the passage of good laws, there is always danger of the enactment of measures of vicious character, or founded upon monumental ignorance, credulity or prejudice. The average legislator is none too well qualified to distinguish the varying shades of merit in proposed measures, and it is truly fortunate that there is generally in most legislatures a safety valve in the shape of a few well educated, broadly experienced and soundly reasoning senators who may be counted upon to head off and secure the defeat of ill-calculated legislation. This is not always the case, however, and nearly every industry, every interest, is obliged to keep its eyes open and be on constant watch to detect bills of the vicious, demoralizing character alluded to.

Time was, though not very recently, when pharmaceutical legislation was conspicuous by its absence. But of late years it has attained the rather unenviable position of occupying more than its proportionate share of attention from our state law makers. In this state it is believed that most if not all, the proposed pharmacy legislation will be defeated by the efforts of the progressive element in the profession.

—*Pharmaceutical Era.*

A MONEY MAKER FOR HUSTLING DRUGGISTS.

Sell Robinson's Turkish Bath Cabinets



Used and endorsed by the leading Physicians and Hospitals of the country, for all chronic ailments, la grippe, colds, kidney, liver, blood and skin diseases, rheumatism, etc.

From Firms Who Have Sold Several Hundred Cabinets:

"Nine-tenths of our sales are directly through the leading physicians, who prescribe the ROBINSON CABINET in preference to all others. At least FIFTY of the most PROMINENT physicians of Buffalo are recommending your cabinet. We have always given your bath the preference.

"STODDART BROS., Druggists, Buffalo, N. Y."

"I thank you for your complimentary remarks on our success in selling your vapor baths. It is no trouble to sell goods that are all right. Your baths are the only practical ones made, and that is why they sell. I have no person soliciting the trade; the goods sell on their merits. I have as competitors, three agents for different kinds of baths; I purchased one of each, and offer them at any price I can get.

"WILL H. MURGITTROYD, Druggist, Marysville, Mont."

For the next thirty days we will make a price that will astonish you. Drop us a card to-day. We are now selling through Druggists alone about 1,000 cabinets per month. One drug firm last year sold 650 cabinets: others averaging from 100 to 500 per year.

YOU CAN SELL OUR CABINET; WE WILL HELP YOU.

We want you to have one for your own use. Write us and we will tell you how to obtain one free. The best time to sell Bath Cabinets is now. Write at once. Do not delay.

Butter.

According to Herr Reinmann, there is no relation between rancid taste and the odor of butter and the quantity of free acid found in it. The greater the amount of casein and of milk sugar in butter, the more quickly does it become rancid. It does not appear that light and air exercise any direct influence upon the process. Butter made from sterilized cream will rarely become rancid, but if brought into contact with rancid butter it will turn in a few days.—*Scientific American.*

Chloral Hydrate in Lumbago and Sciatica.

According to Lafond-Grellety, the application of chloral hydrate, in the form of a liniment, in lumbago and sciatica gives great and immediate relief. The chloral is first dissolved in a small amount of water and then shaken up with olive or almond oil. Masse recommends the same, but uses lime water as a solvent, the formula being, oil 30 parts, lime water 30 parts to 30 parts of chloral hydrate. This should be rubbed over the affected part for at least ten minutes.—*Nat. Drug.*

CAFFEINE.

By Prof. G. B. Kauffman, O. S. University.

Read Before the Columbus Academy of Medicine, April 8th, 1901.

INTRODUCTION.

I confess to a good deal of trepidation in appearing before this Academy. So much has been said and printed concerning the relation of the physician and pharmacist and the invasion by each of the other's field that there has been engendered a condition of "strained relation," such as to induce a feeling that anything which might be presented by a pharmacist to a body of physicians would be received very largely in a spirit of criticism. I trust that this may not be my fate to-night. In presenting to you a very short paper on Caffeine I do not expect to tell you any thing that you did not know before, but I hope to present some facts in a relation such as has not occurred to you before, and thus attach to it a small degree of interest.

CAFFEINE.

This alkaloid body has within recent years attained a popularity in medical practice that has given it a position among those first in importance. Its very rapid growth in popularity is due almost entirely to its combination in use with the more recently discovered hypnotic agents—acetanilid, phenacetine, antipyrin, etc., more particularly with acetanilid. The numerous proprietary remedies for the relief of various forms of headache which have been so persistently advertised and which have attained a wide popularity are for the most part mixtures of these two bodies, the ethical preparation of which they are copies, being the well-known migrain combination. The consumption of caffein following the introduction of this formula has been increased many times and has at several periods taxed the source of caffeine to the limit and we have been on several occasions threatened with a shortage of this drug. It seems, however, at the present time that the supplies of crude material are ample and that we shall for some time to come have an abundance of the drug at reasonable prices, it being not probable that the demand will further increase. Seemingly the use of headache remedies has reached the limit and we may expect a gradual falling off in their use, due chiefly to the fact that the public is being slowly awakened to the danger attending them. It is my purpose to-night to give you a short review of the commercial condition at present existing and a history of the drug.

CHEMISTRY.

The chemistry of caffeine, like that of all organic bodies, is very intricate, and I will not attempt more than a general statement of it. Its chemical formula is, $C_8H_{10}N_4O_2$. A remarkable point about its composition is the amount of nitrogen which it carries, resembling more nearly in this respect the animal products rather than those of vegetable origin. It is very feebly basic, forming but few clearly defined salts. These are more readily formed with the mineral acids and some are claimed with a few of the organic acids. The United States Pharmacopœia does not recognize any of these combinations, the nearest approach being the citrated caffeine, and this is not, as its name implies, a definite chemical combination but a mechanical mixture, therefore, both physicians and druggists are in error in indicating it as Caffeine Citrate.

Chemists are inclined to refuse to rank caffeine among the alkaloids, but until they can give us some more definite classification than that of "a feebly basic proximate principle" it is most likely the trade circulars will continue to list it as an alkaloid. Chemically it is Trimethylxanthine and is capable of synthetic production. Its synthesis has been accomplished from Guanine, a basic body obtained from Guano. On treating Guanine with nitrous acid Xanthine $C_5H_4N_4O_2$ is produced. On adding a solution of silver nitrate to an ammoniacal solution of Xanthine an Amorphous silver derivative is formed; this, when heated with methyl iodide, is converted into dimethylxanthine, or theobromine. When the silver derivative of theobromine is heated with methyl iodide trimethylxanthine, or caffeine is produced. Its synthetic production, however, is not a commercial process, and the caffeine of the market to-day is from natural sources.

SOURCES.

Caffeine is obtained from the leaves and fruits of several plants which are widely separated in their botanical relation and widely distributed geographically. It was originally discovered in the seed of Coffea Arabica, our well-known coffee. Its discovery was made about 1821 and seems to have been noted simultaneously by several chemists. It was later found in the leaves of Camellia Thea, the very popular tea, and

Digitized by Google

later has been found in the leaves of several species of holly, more particularly in the leaves of the Ilex Paraguayensis, known more commonly as Paraguay Tea, or mate, also in the seed of the Guarana and of the Kola. It is also found in the Chocolate Nut in small quantities, associated with theobromine, which latter body, as I have already indicated, is a lower homologue of Caffeine. It is interesting to note the wide difference in the plants producing these alkaloids. The tea, coffee and cocoa are bushes, or small trees, the Guarana is a climbing vine, the Kola a large forest tree. These plants bear no botanical relation. Their distribution is also interesting to note. Both tea and coffee have been for so many years cultivated in most tropical countries that their origin has been somewhat obscured, but it may be generally stated that their habitat is India, China and the East Indies. The Theobroma Cacao, or Chocolate, is a native of Central America and Mexico; the Guarana is found along the east coast of South America, the Mate through Central South America, the Kola in Central and Western Africa, also another variety of Holly, the Ilex Vomitoria, is found in our own Southern states, particularly in Florida and Alabama, and is said to be still used by the few Indians remaining in that section. It is still more interesting to note the uses. There is a great similarity in the use of these products among the several nations, and it seems peculiar that the same stimulant should have been discovered in sources and by people so widely separated and that such a similarity in the methods of use should exist. I believe that it may be stated that the only people on the face of the earth to-day who do not make use of Caffeine as a stimulant are the inhabitants of the regions of the North, the Esquimos, the Alaskan Indian and the Laplander. We commonly think of alcohol in its various forms as being the stimulant most widely popular, but I am inclined to believe that Caffeine is more world-wide in its application. Nor is this general use of recent development but has been the practice for ages. Among Europeans the use of Caffeine is more recent, but its popularity is widespread. In Oriental countries the use of tea and coffee extends back beyond the bounds of history. When Cortez came to Mexico he found the Aztec taking his chococlatyl with a zest and relish which we have learned to imitate, and in South America the use of Guarana and Mate extends beyond the period of European occupation. Also in Africa the early explorers found the Kola highly prized among the savage tribes. The general use of this drug would seem to indicate that it is especially fitted for, or meets some special want of the human system. We know that the base Xanthine is a normal constituent of the urine and is found in small amounts in most of the organs of the body and we may assume that it serves some important function. Is it not possible that this base is more readily supplied as a decomposition product from Caffeine or Theobromine and thus account for the universal desire of the human family for these products? May we not consider it much the same as the desire of most animal life for common salt? We know that the digestive function must get chlorine from some where and finds it most readily in Sodium Chloride. In like manner it is possible that Xanthine is most readily supplied from tea, coffee and chocolate. The commercial source of Caffeine is tea; all the Caffeine found in the shops has been produced from tea, this being the cheapest source. As a matter of fact it is for the most part prepared from what is known as tea sweepings. At the great warehouses of New York and London, at stated periods, sales are held of waste and damaged tea. It not infrequently happens that whole cargoes of tea are damaged by moisture, becoming mouldy and thus unfit for market. Such goes to the manufacturing chemist, who extracts the Caffeine. The process of extraction is not a difficult one. An infusion is made by extracting the tea with boiling water and from this infusion the most of the organic matter is precipitated by boiling with litharge or sugar of lead, disposing of the excess of lead by treatment with sulphuretted hydrogen and concentrating the solution to crystalization. The per cent. of Caffeine varies greatly and does not seem to bear any relation to the market price of tea and coffee. As a matter of fact it frequently happens that the most inferior samples yield the largest per cent. of Caffeine, market prices seeming to be based on appearance and aroma rather than strength. Tea, coffee and mate contain like amounts, the per cent. varying from .5 to 2.5. Kola is richer, containing from 2 to 4 per cent., while Guarana very frequently contains as much as 7 per cent. Recently the Kola has been presented by the persistent efforts of a certain manufacturing house, as a drug possessing peculiar and valuable stimulating

Digitized by Google

properties, and many have come to accept this as a fact. Chemical and physiological experiments, however, go to show that it does not possess any marked properties to distinguish it from the other Caffeine bearing drugs and that its activity is due chiefly to its Caffeine. Some difference of opinion seems to exist among physicians and some doubt as to the absolute identity of Caffeine as obtained from the several natural sources, some claiming that a difference in the physiological action is to be observed between the Caffeine of coffee and the Caffeine of tea. A few years back this claim was strongly urged by Dr. May, of Philadelphia, who received so much support as to induce some chemists to market both products, Caffeine from coffee and Caffeine from tea. I believe, however, that at the present time the identity of the body from the several sources is fully established and that whatever slight variation in effect is to be observed is due to associated bodies. The action of Caffein is well-known to you all and it would be presumption on my part to attempt a statement of its physiological effect. I will, therefore close by merely suggesting that its most peculiar effect is the inducement of a remarkable condition of wakefulness and that where it is desired to combat drowsiness or dullness as physicians have frequent occasion to do, a cup of tea or coffee, or a good strong dose of Caffeine will be found more effective than any other stimulant.

An Irish officer addressing his men, who had just returned from a somewhat fruitless expedition, said, "You were, no doubt disappointed because this campaign gave you no opportunity to fight; but if there had been any fighting there would have been many absent faces here to-day.—*Tit-Bits.*

MILK AS A GENERAL ANTITOXIC.

A universal antitoxic, applicable to most cases of poisoning, has often been demanded. One exists, and it is very simple and well-known, the *Practical Druggist* asserts. This universal antidote is cow's milk. Milk, by its fatty matter (butter) and by its caseine, protects the mucous membrane against the corrosive action of acids, alkalies, and other caustic or irritant substances. The chemical role of caseine is here very remarkable and very valuable. It is able to fill the double part of acid and of base, in presence of compounds with which it is brought in contact. It not only coagulates under the action of acids, by combining with them, but it also yields a precipitate with most mineral bases, forming insoluble caseates. If precipitation does not immediately take place with a product having a given reaction (acid or basic), this precipitate will appear through the intervention of another substance of contrary reaction. This is a very important law in toxicology, which, as has been observed by its discoverer, Dr. Crowzel, has never before been formulated or even noticed. This chemist, therefore, proposes to add to the milk 5 per cent. of borate of soda. This salt is not toxic, and is employed because it precipitates as insoluble borates all the mineral bases, except harmless or slightly poisonous alkaline bases. The poisonous acids decompose it, seizing on the soda and setting free boric acid, which is less poisonous and less soluble. Borate of soda thus realizes very remarkable general conditions, which are sufficient to make it a general antidote, although unfortunately not a universal one.

No bit has yet been found to curb the mouth of the envious or the ignorant.

WINE OF CARDUI

FOR CASH IT COSTS ONLY:--
$7.84 in one dozen lots.
$7.60 in three dozen lots.
$6.84 in twelve dozen lots.
(THEDFORD'S BLACK-DRAUGHT may be included to make up the quantities.)

Presents the most attractive proposition to a retail druggist. The discounts are exceedingly liberal, and the best advertising makes sales easy. Every home needs Wine of Cardui, and a distribution of our advertising with your name on it will make a large proportion of the homes in your neighborhood your customers.

For a fine assortment of Ladies' Birthday Almanacs, Cardui Books, Weather Prophet Books and Show Cards, address THE CHATTANOOGA MEDICINE CO., Chattanooga, Tenn.

PROGRESSIVE PHARMACY

SUPERIOR CHEMICALS

The advancement in pharmaceutical education has widened the field for high grade medicinal chemicals, and has been an incentive for us to rigidly maintain the high standard of excellence of all our products. "M. C. W." conveys confidence to pharmacists and physicians alike, and when specified on orders to the wholesale druggists will get the best goods at lowest prices. We invite special attention to

"M. C. W." MORPHINE

If you specify the "M. C. W." Morphine you will get as good a product as can be made. It is white and beautiful in appearance, absolutely pure, and supplied through the wholesale trade as low as other brands.

Mallinckrodt Chemical Works,

Dangerous Counterfeit.

The traveling representative for Dr. J. A. McGill & Co.'s "Orange Blossom" reports from Washington, D. C.. that he has found a complete counterfeit of the specific "Orange Blossom," including the wrappers made by the Western Bank Note Co., circulars, boxes, in fact the whole outfit is a complete counterfeit. They are making arrangements with the Pinkerton Agency to capture the counterfeiters. The substitute is poisonous and very dangerous to the patient. They caution all to be careful in purchasing "Orange Blossom." Any "Orange Blossom" offered for less than the usual price will be dangerous to handle.

Sieker has published results bearing on the extraction of fats from drugs before preparing tinctures and extracts. He recommends the use of solid paraffin to remove fatty matter from extract of nux vomica. This is added to the residue, diluted with water after distilling off the alcohol from the product of maceration and percolation. about 8 to 10 per cent. of paraffin being used. The mixture is kept some time at a temperature of 70 to 80 degrees, with constant shaking. Then it is slowly cooled. By this method the fatty matter is said to be removed, but not the alkaloids. As a precaution, the paraffin may be washed with the aid of a little hot water, and this added to the extract, which is then evaporated.

MODERN METHODS.

The man who makes a study of business in general and his own in particular is bound to succeed, if he has the push and energy to put his ideas into execution and to keep constantly studying and improving. The success of such a man is considered remarkable, and is often attributed by their less prosperous competitors to luck, but it is the result simply of thought and labor, of the ability to see the trend of the times and to place themselves in harmony with it.

Business methods have changed greatly in recent years. The staid and dignified old customs have perforce been dropped, and more enterprising or perhaps we might say more spectacular methods have taken their place. Trade nowadays is so used to being coaxed and cajoled and startled into giving its attention to an establishment that advertising in one form or another has become a necessity. The first and most potent advertisement for a retailer is an attractive store—the stuffy, musty and old-fashioned store no longer gets attention, and customers are no longer satisfied merely with courteous treatment, however essential that is, but demand bright and pleasant surroundings—an artistic or striking display of goods. It may be said that the store window is accepted by the public as an index to the store, and that attractiveness of interior is in most cases futile without a bright and taking window. Too much time can hardly be spent in making this important adjunct to the store as attractive as possible, and it is wise to frequently change the display so as to continually challenge the attention of the passerby. It is also advisable to clearly mark the prices of at least some of the articles displayed, for in that way many a customer is gained who might otherwise be lost, and this is especially true if the articles marked are sold at a very close profit, as leaders always should be. Courtesy and fairness of treatment are, of course, essential. The chance customer should be made a friend, for it requires no skilled mathematician to figure out, that if old customers are held and new ones are made daily, success is more than assured. Let no amount of trouble deter you from serving your customer well. Make it a matter of pride to satisfy him and make him feel that his interests are your interests.

Keep your store well stocked up, but, order with discretion so as to avoid the accumulation of dead stock, which in time will kill a store. If you have any of this class on your shelves get rid of it at a reduced price, and if one reduction does not move it reduce the price again and again, and let the public know it. Stock which only serves to fictitiously swell the inventory is a very bad thing to have around a store. Take a leaf from the department store's book of practice and keep things moving. Try a little advertising in the daily papers, offer something of real merit and great demand at a taking price; no matter if you do not make a profit on that article, you will draw trade and sell other things. Advertising is simply making yourself and your goods known to the public, and must be done in some form. Use a bulletin with some bargains, changing it once or twice a week, but always making it a bargain. Then, for a change, talk quality, and be sure to give it, for a disappointed customer is a lost customer. In short, be enterprising, be alert, keep yourself in the eye of the public, treat them right, and they will do their share towards making you successful.—*Stationer.*

PHYSICIAN AND PHARMACIST.

BY A. M. STEINFELD, PH. G. M. D.

READ BEFORE THE COLUMBUS ACADEMY OF MEDICINE, APRIL 15th, 1901.

WHEN it was suggested several days ago that I prepare a paper for this evening on the subject, "How Can More Amicable Relations be Established Between the Physician and Pharmacist?" I must confess that I was rather non plussed, for I saw more threshing of the old straw and more winnowing of the old chaff in prospect.

There are everlasting charges and counter charges, the same old complaints by the physician that the pharmacist substitutes, that he refills prescriptions, that he prescribes and dispenses over the counter, and in other ways usurps the functions of the physician, who doubtless has good cause for complaint.

The pharmacist, on the other hand, has his tale of woe. He is often taken to task for substituting by physicians, whose main object in insisting upon the product specified is to push the specialty of some manufacturing concern. The pharmacist claims that he is driven to counter-dispensing and patent medicine selling by the habit many physicians have of carrying miniature drug stores with them on their rounds and dispensing at the bedside. He says further that prescription writing is becoming a lost art and those that are written are often so bad and ill-considered that he acquires something very akin to contempt for the physician who writes them. And so, pro. and con, backwards and forwards, *ad infinitum*.

Let us consider a few of these subjects, and I think the deeper we get the harder we will find the question.

COUNTER PRESCRIBING.

The reason for this we must seek somewhere about 250 years ago. There were no druggists then. He of the fancy shelf bottle, he of the percolator, he of the prescription case was then unknown. The doctor was the druggist and the druggist was the doctor, while the good word pharmaceutist was still safe on the sunny shores of Greece, and the term apothecary was beginning to make itself known in Elizabethan English. Then, when one was sick, he went to the doctor and in that doctor's office were all the compounds, chemicals and foreign drugs that were known. Household simples, it is true, abounded everywhere, but the physician alone knew how to mix them, and in him, too, lay the secret of making weird compounds from toads, flies and lizards. These were secrets that he would impart to nobody. He was the medical and pharmaceutical man, all in all.

Is it to be wondered at that a trace of this still lingers among us and that to the masses the doctor and druggist are the same; and that in their code of ethics they are doing the eminently proper thing in consulting the druggist, who is a "doctor" to them for the minor ailments of life?

Indeed, it is within the easy recollection of some of the men now living, that in communities by no means small, the doctor's office, ornamented on the outside by a stuffed and varnished lizard, was the only place where medical advice could be had, or drugs procured. So, when we rail at so-called counter-prescribing, we are finding fault with something that is ingrained in our nature by hundreds of years of association of ideas. Dr. Carpenter, in his physiology, will tell you how those things hang on.

SUBSTITUTION.

In the days of our forefathers it required three, four or five months to come from England to America in a sailing vessel. The captain, ordinarily a hearty old soul, had a chest of medicine in his cabin and with the chest a list, saying that No. 1 was good for fits, No. 2 for a broken arm, No. 3 for diarrhea, and possibly No. 10 for those sailors who were taking too much grog. Some time, unfortunately, in a long voyage and after much use No. 16 would run out. Woe unto the poor sailor who came for treatment, for he was the victim of the first substituter. And yet history does not record an alarming mortality among the old sailors, and lots of them died real comfortably, and no druggist was accused.

Substitution of to-day, in all seriousness, exists, I am inclined to think, more in the minds of the manufacturers of proprietary remedies than it does in actual fact.

"We are advertised by our loving friends," is the trade mark of one firm, and might really be adopted as a trade mark by a number of them, for their loving friends,

Digitized by Google

the half-educated physician and recipient of numerous sample bottles, is the person who in nine times out of ten specifies some proprietary; who make the most fuss about a substitution; and who, the chances are, wouldn't know the preparation written for when he saw it. Physicians are too prone to accuse the pharmacist of meretricious substitution. For that gentleman has been through college just as well; he knows the therapeutic value of drugs, and he has probably quite as keen a sense of right and wrong as the gentleman who wrote the prescription.

Is the substituter always wrong, then? Or does the physician never substitute when hastily called to a case he finds himself with an empty phial of some necessary article and uses the next best thing he happens to have? Is the physician always right and the druggist always wrong?

PATENT MEDICINES.

"If all the patent medicine advertisements were true, heaven would have to do something to encourage emigration." The trouble is, in too many of these discussions we are apt to leave human nature out of humanity and argue as if we had automata to deal with. Well, we haven't. Human nature is, after all, a moving entity and as long as men are men and women are women and the millenium has not come, patent medicines are to be reckoned with and have to be bought and sold.

It is said that Americans are fond of taking medicine, but when you have put it up in a package, added a few testimonials and charged four shillings for it you have produced something which is as dear to the Englishman's heart as "Rule Brittania." He wants it and is going to have it and someone is going to sell it to him, and there you are.

All the medical societies can't stop the demand, nor will they reciprocate the druggist for his self-denial if he does not sell them. Enough of his business has gone to department stores and he isn't to be blamed for holding on to as much of it as he can. Is there any reason why he shouldn't?

REFILLING PRESCRIPTIONS.

Refilling prescriptions is wrong, radically wrong. The pharmacist should not do it, and the physician should either write or print across his prescription blank a notice to the druggist that no prescription of his should be refilled unless specifically so ordered. Yet, from the patient's point of view, there is another side to the question. He has paid the physician for a consultation, he has had a two or four-ounce mixture which is doing him good and assisting him toward recovery. Shall he pay another fee for another prescription which he feels he does not need? Would you do it under similar circumstances?

The truth is, the further we get into these questions the wider becomes the field for discussion. The solution, however, is the one of the "Belly and the members."

The physician is not a thing apart from the druggist, nor the druggist a person apart from the physician. The two must work together for a common end, or neither will accomplish his purpose. As in the fable, "The birds said to the farmers who were about to exterminate them:"

"Since Heaven accepted our joint adoration,
Since earth was both an abode and a tomb,
Why could we not sojourn, oh, man, as one nation?
Were waste lands so precious? had mountains no room?
Or were you so wingless, so wanting in vision,
Ye saw not as we did the things of the sky;
But dooming the birds to your earthly ambition,
Forgot in vain glory yourselves were to die?"

Involved in these questions it is true is the ethical side, so generally discussed, yet really the dominating one is the bread and butter side, which is almost always ignored. If the pharmacist doesn't sell the patent medicines, which are so extensively advertised, and for which the manufacturer creates a demand, where is he to get even, and how? And besides, who guarantees us

PHENALGIN

that the patent isn't a good thing occasionally for the one who buys it?

The general public isn't a fool, and doesn't continue to put up its money for the pleasure of doing it. So, if the druggist does sell patents, he does it because the public wants them.

Here is another thing to consider; when the medical law was put into operation in Ohio, ten years practice of medicine without a diploma was deemed sufficient to put the unschooled practitioner in good standing in the state. Yet we question the right of the druggist to advise or dose his friends, although he may have had a much wider experience in many ways than some of the old style physicians got in a lifetime.

Well, there you have a few pharmaceutical and Esculapian nuts to crack. Gentlemen, get your nut-crackers and fall to work. In closing, I will say that the only solution for the conditions as they exist is a mutual understanding between members of both professions. Let each throw its society hall open to his brother,

"And the blending thus unending,
Will make the music of the sphere."

A Test for Peroxides.

A characteristic and easily applied reaction for the detection of a peroxide of an alkali or alkali-earth metal, which I have not noticed in any of the ordinary textbooks, is the addition of silver nitrate solution to a small portion of the powder in a test tube. In the case of an alkali metal brisk effervescence occurs at once, due to evolution of oxygen—easily recognized by a glowing match stick—and a black precipitate of metallic silver is at once deposited. With the alkali-earth metals the reaction takes place more slowly, a brown precipitate of silver oxide being first produced, soon followed by evolution of oxygen, the precipitate turning to black metallic silver. The reaction in this latter instance is hastened by the application of heat. The effect produced will no doubt be due to formation of silver oxide in each instance, and its decomposition by the peroxide, similar to its well-known reaction with hydrogen peroxide.

ARSENIC IN BEER AND FOOD.

[PROF. JOHN URI LLOYD, PH. D., CINCINNATI, OHIO.

Our cousins in England are having trouble and are in a world of worry. The facts are: Recently a large number of arsenical poisonings were found to be due to the presence of arsenic in the beer that was made by a particular brewery. On tracing this subject further it was discovered that this arsenic came from the glucose used in making the beer, and on turning to the glucose industry it was found that the arsenic got into the glucose from the sulphuric acid used in making the glucose, and on turning to the sulphuric acid it was found that the arsenic got into the sulphuric acid from the iron pyrites used in making sulphuric acid. Just then came in another problem. Selenium is one of the elements productive of compounds as poisonous as arsenic, and a noted English authority came forward and stated that not only arsenic but selenium was present in this sulphuric acid found in the poisonous glucose used in the poisonous beer which kill the English people. The affair became serious, and the chemists of England found their hands full, for, be it known, beer is one of the necessities in England.

Now comes a committee of investigation, and the subject at once assumed an importance that it had not done before. Five thousand five hundred and fifty-eight barrels of beer were destroyed in one brewery and the matter seemed to be settled, when, lo! and behold, it was discovered that not only did the arsenic come from the sulphuric acid used in making the beer, but also the malt employed contained arsenic, which, upon tracing, it was found to be obtained from the coke used in making the malt. It was found, furthermore, that hops also were contaminated with arsenic. Just how the arsenic got into the hops was not stated. Under these circumstances the question was not as to whether they could make beer free from arsenic, but how much arsenic they could allow to go into the beer, and it had been pretty well settled that, to make a quotation from the *British and Colonial Druggist*, "in beer brewed entirely from malt and hops he (that is, the analytical chemist) found one one-hundredth grain of arsenic per gallon." It seems that in standardizing beer in England the probabilities are that they will allow it to contain arsenic to the extent of one one-hundredth of a grain to a gallon; but just here comes in again the question of analysis, for it is concluded that, to make another quotation, "such a test was not known at present," and the Manchester section of the Chemical Society of England at its last meeting devoted its entire attention to that one subject. From the *Pharmaceutical Journal*, of London, we quote as follows from the report of the chairman:

"In order to fix the quantities of arsenic which might be allowable in different foods, it would be necessary to have command of a fairly quick and fairly accurate, simple quantitative test, and preferably one which should be adopted by the profession of analytical chemists and by the medical profession as a standard test. Such a test was not known at present, and he considered it worthy of the attention of their section to assist as far as it was in their power in finding such a test. He had on more than one occasion expressed his opinion that neither Reinsch's nor Marsh's test was originally intended for quantitative tests, and he saw no reason to alter his opinion; and, as these tests were used at present, they were liable to be extremely fallacious when used as quantitative tests. A combination of the two might, however, lead to satisfactory results. He suggested that a small committee of the section might be formed to fix a safe and reliable standard test."

As the matter stands at present the question is not whether arsenic is present in beer but just how much arsenic shall be allowed in beer made in England. The commission appointed on the inquiry is known as the Royal Commission, and has moved its sittings to different parts of England. It is going into the question thoroughly. It is composed of the foremost chemists of England and, in the end, we believe that a method will be devised not only to determine the presence of arsenic, but also that it will be found possible to exclude arsenic altogether from these beverages.

Let us change the subject now to one that more closely concerns the American physician. It is not unusual for us to be confronted with cases of blood poisoning where physicians or surgeons attending an operation become contaminated with virus through an abrasion of the skin of the hand. It is due to the surgeon and his friends that every precaution should be taken to avoid such a risk, and that no abrasion of the skin should be allowed to come in contact with the poison. An edi-

Digitized by Google

torial in the *Monthly Magazine of Pharmacy, Chemistry, Medicine, etc.*, London, has the following remarks, and, it seems to us, to be so important as to bear reproducing:

"It is suggested that when about to examine a septic case, or one where syphilis may be suspected, it is well that the hands should be washed in vinegar or dilute acetic acid, which by the smarting they set up will indicate any scratch on the hands that might become a starting point of infection."

—*Medical Gleaner.*

LIQUOR STRYCHNINAE IN BROMIDE MIXTURES.

To render liquor strychninæ certainly compatible with bromides, Sir William R. Gowers has been in the habit of prescribing hydrobromic acid in mixtures containing such a combination as in the following formula:

℞ Acid hydrobrom, dil.....m. xv
Liq. strychninæ.....m. iv
Liq. hyoscin. hydrobrom, (1 in 1000)...m. ij
Lith. brom.....grs. xij
Syr. aurant.....m. xx
Aqua, ad.....ʒss
Mitte ʒx. ʒss ex aq. ter die post cib. sum.

Chemists have occasionally suggested to him that such mixtures are incompatible, that "an insoluble(?) bromide" deposited. One suggested the use of hydrochloric acid vice hydrobromic acid, and another stated that "almost the whole of the strychnine is deposited as bromide in sandy crystals."

From experiments I have had tried by experts on my own staff and others, we fail to get any deposit. Strychnine hydrobromide is a very soluble salt of strychnine (soluble 1 in 55 of water), but it is possible that the acid or the lithium bromide might have the effect of acidulating or of salting it out of solution, as is sometimes the case when two salts are mixed in solution. Yet placed on ice for twelve hours no crystals formed in the mixture. If not acidulated with hydrobromic acid the mixture does not deposit crystals either. If the lithium salt were slightly alkaline, so as to separate the strychnine as alkaloid, the solution is so dilute and the quantity of strychnine so small that this would be still held in solution.

Probably the "sandy crystals" referred to were impurity in the lithium bromide. It is of importance that bromide and strychnine incompatible mixtures should be avoided; if such are prescribed, the use of hydrobromic acid appears to prevent the separation of crystals, even in mixtures of a much more concentrated form. I find the above formula can be concentrated to one-fourth its volume by omission of water, without any strychnine salt crystallizing out even when subjected to a moderately low temperature for twelve hours. i have tried this concentrated mixture, 4 in 1, substituting other bromides, those of ammonium, potassium, sodium and strontium vice that of lithium, taking care that they were practically neutral, and found that no crystallization occurred in any case at ordinary temperature. Further, in employing the lithium salt at least, the concentrated mixture does not crystallize even with the hydrobromic acid omitted. Impurity, such as the presence of carbonate in potassium bromide, seems to be necessary to cause the separation of strychnine as such.

—*W. Martindale, F.L.S., F.C.S., in Phar. Journal.*

Rubber stamps were used by the Moors one thousand years before Christ; and about the time Rome was founded the same ingenious race invented the self-registering turnstile, such as is used to-day to check the admissions to places of public entertainment.

(*a*) Gun Cotton. (*c*) Citrine Ointment.
(*b*) Blue Mass. (*d*) Glyconin.

3. How many grains of Cocaine Hydrochlorate must be added to 8 fluid ounces of distilled water to make a 4 per cent. solution?

4. Describe the official process for preparing Liquor Calcis, giving reason for each step.

5. What is Javelle Water? What are its principal uses? What official prepartion does it resemble?

6. How many grains of powdered opium are there in 250 grammes of Dover's Powder?

7. Name an official infusion in the preparation of which an acid is employed. State what acid is used and why.

8. Name a good solvent for each of the following:

(*a*) Phosphorus. (*c*) Camphor.
(*b*) Tannic Acid. (*d*) Chloral Hydrate.

9. What is the specific gravity of a crystal of Ferrous Sulphate which weighs in air 165 grains, and in oil of turpentine 120 grains? S. G. of oil of turpentine .870.

10. What is the strength of official Ether? State how an undue proportion of water may be detected.

11. State how the official Oleates differ from the so-called Oleo-Palmitates. Give the general outline of a process for the manufacture of the latter.

12. What is Carron Oil? Give its official title, state how it is prepared and name its chief uses.

13. Tartaric Acid: (*a*) What is its source? (*b*) How is it obtained from this source? (*c*) Give two tests which distinguish it from Citric Acid.

14. What is so-called Coal-tar Creosote? Give two tests which distinguish it from Wood-tar Creosote.

15. Criticise the following prescriptions:

℞ Quininæ sulphatis.....3i
Tinct. ferri chloridi.....f3ii
Spt. ammon. arom.....f3iv
Aquæ.....f3viii
M. Sig. 3i every 3 hours.

℞ Morphinæ sulph.....3ss
Tr. catechu comp.....f3ii
Tr. zingiberis.....f3iv
Syrupi ejusdem, an.....f3viii
M. Sig. 3i every 2 hours.

CHEMISTRY.

1. Define the following terms: (*a*) Haloid Salt; (*b*) Porosity; (*c*) Deliquescence; (*d*) Anhydrous.

2. What is a binary salt? Name two official ones.

3. What is the valence of Mercury in "ous" and "ic" compounds? Give an example of each.

4. Write the chemical formula of each of the following: (*a*) Red Precipitate; (*b*) White Precipitate; (*c*) Copperas; (*d*) Blue Vitriol.

5. Name two official salts which may be obtained by the process of sublimation.

6. Give the chemical name of each of the following: (*a*) $NaPO_3$; (*b*) $KClO$; (*c*) $KMnO_4$; (*d*) $MgSO_3$.

7. What change takes place in Sulphurous Acid when it is acted upon by oxygen? How would you detect such a change?

8. State what color each of the following imparts to a non-luminous flame: (*a*) Potassium; (*b*) Sodium; (*c*) Lithium.

9. How many grammes of Sodium Hydrate are required to exactly neutralize 68 grammes of official Nitric Acid?

10. When Ferric Oxide is acted upon by nascent Hydrogen what compounds are formed?

11. Why does turpentine burn with a yellow and Alcohol with a filue flame? In which case is combustion complete?

12. Give an outline of Marsh's test for Arsenic. State what materials are employed and how Arsenic is detected by it.

13. Are there any points of difference between Benzol and Benzin? If so, state briefly what they are.

14. Give the U. S. P. title of Tri-chlor Methane. Show its relation to Methane by graphic formula.

15. Complete the following:

(*a*) $2Na_2S_2O_3+2I=$
(*b*) $PbCO_3+2HC_2H_3O_2=$
(*c*) $FeCl_2+2KHCO_3=$
(*d*) $Hg_2(NO_3)_2+2LiI=$

MATERIA MEDICA.

1. From what are the following obtained: (*a*) Fel Bovis; (*b*) Paraffin; (*c*) Santonine; (*d*) Salicylic Acid.

2. Give the official titles of two drugs that belong to each of the following classes: (*a*) Diuretics; (*b*) Anesthetics; (*c*) Demulcents; (*d*) Hepatics.

3. Name three official drugs that belong to the Natural Order Compositæ.

4. Define the following terms: (*a*) Stigma; (*b*) Rhizome; (*c*) Tuber; (*d*) Biennial.

Digitized by Google

5. To what Natural Order does each of the following belong: (*a*) Conium; (*b*) Hops; (*c*) Wild Cherry?

6. Give the Botanical name and habitat of each of the following: (*a*) Buchu; (*b*) Black Haw; (*c*) Guarana; (*d*) Couch Grass.

7. What is Apomorphia? From what is it obtained? State process.

8. Give the official titles of three Fixed Oils, three Oleoresins, three Essential Oils.

9. Describe Camphorated Oil and Oil of Camphor. State the difference, if any.

10. What is the source of each of the following: (*a*) Acetic Acid; (*b*) Phenic Acid; (*c*) Resorcin; (*d*) Menthol.

11. Give the official name of each of the following and state the part of the plant from which each is obtained: (*a*) Hyoscyamus; (*b*) Chamomile; (*c*) Iris; (*d*) Lupuline.

12. Describe: (*a*) Antimony; (*b*) Bismuth; (*c*) Bromine; (*d*) Arsenic. How are they obtained?

13. Name two official drugs belonging to each of the following classes and give their official titles: (*a*) Alkaloids; (*b*) Seeds; (*c*) Gum Resins; (*d*) Oleoresins.

14. Describe: (*a*) Colocynth; (*b*) Phosphorus; (*c*) Amyl Nitrite; (*d*) Sal Ammoniac. From which is each obtained and what are its medicinal uses?

15. Give the official titles of each of the following drugs: Marshmallow, Bitter Almond, Sweet Flag, American Wormseed, Elder Flowers, Stavesacre.

TOXICOLOGY AND POSOLOGY.

1. Define: Chemical antidote, irritant poison, coma, dose, drug.

2. Name three emetics, with dose of each. Describe the stomach tube and method of employing it.

3. Name two stimulants of different character. When is artificial respiration applicable and how is it performed?

4. Name a poison which produces spasms or convulsions, also one which produces great stupor, and one which produces dilation of the pupil of the eye.

5. Name two poisons, for poisoning by which oils should not be given. Give reason. Name a poison, for poisoning by which Potassium or Sodium Carbonate or Bicarbonate should not be administered. Explain.

6. In what poisoning is starch the proper antidote? In what poisoning should albumen be employed and in what form?

7. What emergency treatment should be employed for poisoning by Alcohol? By Arsenic?

8. What emergency treatment should be employed for poisoning by Atropine? By Opium?

9. What emergency treatment should be employed for poisoning by Digitalis? By Phosphorus?

10. What emergency treatment should be employed for poisoning by Carbolic Acid? By Lunar Caustic?

11. State the largest dose it is usually safe to give of each of the following: Croton Oil, Diluted Hydrocyanic Acid, Corrosive Sublimate, Lead Acetate, Strychnine Sulphate.

12. What is the dose of Ammonium Chloride, Guaiacol Carbonate, Mild Mercurous Chloride, Salol, Sulphonal?

13. What is the dose of Extract of Aconite, Extract of Digitalis, Tincture of Belladonna, Tincture of Hyoscyamus, Tincture of Opium?

14. What is the dose of Creosote Carbonate, Morphine Sulphate, Phenacetin, Salicylic Acid, Santonin?

15. What is the dose of Chloral, Donovan's Solution, Potassium Acetate, Red Mercuric Iodide, Syrup of Lactucarium?

DR. W. H. LONG,
236 S. Tenth St., Philadelphia, Pa.

BINGHAMPTON DRUGGISTS DECLARE THERE WAS A COMBINE AGAINST THEM.

Several conspiracy actions were inaugurated at Binghampton, N. Y., April 5th, which, it is said, will break the combination now alleged to be existing in the retail drug trade in the United States. For the past ten years the retail druggists of the country have been endeavoring to form a combination that would increase the prices of goods and hold them there. This, it is alleged, was effected by the formation of the National Proprietary Association of New York, the National Wholesale Druggists' Association of Chicago, and the National Wholesale and Retail Druggists of Topeka, Kansas. It is stated that out of 1,500 drug stores in New York city, 1,125 signed the agreement, and it was asserted that others would come in, as they could get no stock when their present supply was exhausted.

Rourke Brothers was the only firm in Binghampton that refused to sign the agreement and they advertised drugs at cut rates. Thirty druggists of that city, with the national associations named, it is charged, combined to freeze them out. The firm's drafts and checks were returned with the statements from all wholesale houses that they had been blacklisted, and no goods could be furnished them. All papers were told not to accept their advertisements, as medicines and drug advertising contracts would be cancelled. One paper that published a page advertisement was bought up from the newsboys before it could be circulated. On Friday, papers in conspiracy actions against the thirty druggists and the three associations for $50,000 damages each was served, the Rourke Brothers being backed by druggists outside the trust, and two leading legal firms of the state have been retained.—*Press Report.*

Making One.

The driver of the patrol wagon looked at the procession that filed out of the gambling house and into his green and gold carryall, convoyed by the attentive police.

There were two ex-champion pugilists, four bruisers who aspired to be champions, one pugilistic manager, and several other gentlemen illustrious in the sporting world.

"Talk about your haul of fame!" he said, as he drove away with his load.

—*Chicago Tribune.*

The "Allcock" Plasters

ALWAYS GIVE SATISFACTION.

When a druggist sells the "Allcock" plasters he takes no chances and at the same time renders his customer the best service.

You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Porous Plaster has stood the test of over 40 years use by the public and is acknowledged everywhere to be the best strengthening plaster known.

The Allcock Belladonna Plaster is a new plaster but every druggist may rest assured that it is all that can be desired in a plaster containing as much belladonna extract as is safe to offer the public without the advice of a physician. It is the safest, quickest and most effective belladonna plaster made.

ALLCOCK MFG. COMPANY, (Successors.) Salesrooms—274 Canal St., New York.

SENSE AND NONSENSE.

"Of plain sound sense life's current coin is made."
—*Young.*

"A little nonsense now and then
Is relished by the wisest men."—*Anon.*

(*When origin is known credit is given.*)

The Seaside Landlord.

Full many a gem lies buried deep
Within the coral cave;
Full many a galleon rich must sleep
Beneath the ocean wave.

But what cares he for galleons great
Or caverns unexplored?
All he need to do is to sit and wait
While people pay their board.
—*Washington Star.*

▲ ▲ ▲

Well Heeled.

"Your medicine has helped me wonderfully," she wrote to the patent medicine house. "Three weeks ago I could not spank the baby, and now I am able to thrash my my husband. God bless you!"—*Smart Set.*

▲ ▲ ▲

Stranger—I noticed your advertisement in the paper this morning for a man to retail imported canaries.

Proprietor of Bird Store—Yes, sir. Are you looking for a job?

Stranger—Oh, no; I merely had a curiosity to know how the canaries lost their tails.—*Ex.*

▲ ▲ ▲

A Saffron Statement.

"This story may be reliable," observed the pressman of *The Daily Howler*, "but it will lack the color of truth."

So saying, he opened another can of yellow ink.—*Baltimore American.*

His Favorite Prescription.

Larrigan—Yer up, Grady?

Grady—I am; that Hennesy is a great doctor, sure. He prescribed whiskey and quinine fer meself and Mary Ann, the both uv us being down wid the grip, and, begobs, I drinks the whiskey and gives her the kineen. She's in bed yit, but anyhow that Hennesy is a wonduful doctor.

▲ ▲ ▲

An Atchison girl who can jump a five-foot fence and accomplish other athletic feats has put her affections on a young man who wears rubbers when there is a dew.
—*Atchison Globe.*

▲ ▲ ▲

An Irish lawyer addressed the court as "gentlemen" instead of "your honors." After he had concluded a brother of the bar reminded him of his error. He immediately arose to apologize, thus: "May it please the court, in the heat of debate I called your honors gentlemen. It was a mistake, your honors."

▲ ▲ ▲

Life's Colors.

There's many a hue and some I knew,
In the skeins of a weaver old;
Ah! there are the white of a lily hand,
The glow of the silky gold.
And the crimson missed in the lips I kissed
And the blue of the maiden's eye,
Just look at the strands in the web of life
And see—the weaver's dye.
—*Irving Bacheller in The Bookman.*

▲ ▲ ▲

Principally for Worse.

Scadds—What's become of your pretty typewriter?

Trayder—She and the bookkeeper both left me very suddenly.

Scadds—For good?

Trayder—No. "For better, for worse," I believe.

You Make Money
SELLING
BAR-BEN
By accepting our Special Offer.

With an order for three dozen "Bar-Ben" at $4.00, we will give you one dozen free, and mail you signs and window display. This enables you to double your money, without carrying a large stock, and every box you sell makes a customer for more. Order from your jobber at once or direct, but be sure and specify the wholesale druggist through which you want goods shipped. "Bar-Ben" is the best nerve, brain and blood builder on the market today.
Sell your customers a box and see if they do not tell you so.

The Bar-Ben Remedies Co.,
CLEVELAND, OHIO.

Duffy's Pure Malt Whiskey

The standard medicinal Whiskey of the age; a great tonic and stimulant; an invaluable remedy for Consumption and all affections of the lungs and bronchia; a specific for grip, coughs, colds, malaria, and all forms of indigestion and dyspepsia; the only Whiskey taxed by the Government as a medicine. "It makes the weak strong, and the strong stronger."

Sold and recommended by all Druggists.

The Duffy Malt Whiskey Co.,

Rochester, New York.

Must Keep It Up.

One step won't take you very far—
You've got to keep on walking;
One word won't tell folks who you are—
You've got to keep on talking.

One inch won't make you very tall—
You've got to keep on growing;
One little ad won't do it all—
You've got to keep them going.

Joliet (Ill.) Republican.

What is believed to be the largest field of quicksilver in the world has been purchased by a Scotch syndicate. The property includes 1,280 acres in Brewster county, 100 miles east of El Paso, Texas. The total value of the field has not been made public, but it is said that $122,000 in cash has already been paid. The syndicate now has control of nearly all the metal-laden area in the district.

WHOOPING COUGH

Midland Druggist Offer TO NEW..... SUBSCRIBERS.

"Midland Druggist" for one year regular price, $1.00

.....AND....

"The Bookman" of New York for one year, regular price, $2.

Both Periodicals for $2.00

The *Bookman* began in the April number a new serial to run throughout the year by Prof. JOHN URI LLOYD, under the title, **"Warwick of the Knobs."** Its typical characters concern a class of people diametrically opposite the principal characters of **"Stringtown on the Pike,"** Prof. Lloyd's book which was offered with the MIDLAND DRUGGIST last year.

The *Bookman* containing this new serial is offered with the MIDLAND DRUGGIST, as John Uri Lloyd is one of our most noted pharmacists as well as writers of fiction, and we believe the story will be of peculiar interest to the druggists of the central west, where Prof. Lloyd is so well known.

"Midland Druggist" for one year, regular price, $1.00

and

"Spatula Soda Water Guide"

Regular Price to the Trade, $1.00.

Both of the above for $2.00.

This guide gives in a condensed form all the necessary information and formulas to aid one in becoming a thorough dispenser. The book is worth many times its price to even an experienced man.

Entered at the Post Office at Columbus, Ohio as second-class matter.

COMMUNICATIONS.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

WOMEN IN EVIDENCE.

"And there appeared a great wonder in Heaven; a woman—"

A SOMEWHAT startling statement, and one which will not be credited by those of our feminine readers who are not familiar with the phraseology of the sacred book. We are not claiming to have quoted the entire paragraph lest our own knowledge of the book be called in question; we have not deemed it wise to reproduce it in full for the next word following our extract creates a still more sensational impression. Let those sufficiently interested to peruse it further turn to Rev., 12, 1, and read the quetation in its complete setting.

But, if in the vision of St. John the appearance of a woman in heaven was such a rare event as to call forth a special announcement of it—and this seems probable, for a little further on he says, "and there appeared *another* woman"—if he is still perambulating among the spheres he should visit the earth in its present stage of development, and become familiar with the spectacle of finding women everywhere. In 1849 Harriet Martineau, while on a visit to the United States, said she found *seven* occupations open to women—needlework, teaching, cotton spinning, book-binding, keeping boarders, type-setting and housework. Within a few more than fifty years this list has enlarged until it is now claimed by some that the number of employments

FIVE LADY PHARMACY STUDENTS OF THE ADA SCHOOL OF PHARMACY.

Miss KATE NEWTON, Ph. G., Sharon Centre, Pa. Miss CORA SPIECE, Quincy, O.
Miss MARY BARBRAKE, Mt. Olive, Ills. Miss OLIVE CARLER, Ph. G., Bowling Green, O.
Miss MARY KUHNS, Ph. G., McConnellsville, O,

in which women are occupied reaches four hundred. Indeed, there are not many places now into which she may not enter if she will, and one of the problems of the time is that suggested by the flocking of women into the vocations (professional and otherwise) once given over entirely to the stronger sex.

Into the social, the physiological, the moral phases of this question we do not design now to enter. This, as all other problems, has two sides, upon each of which much may be said, for or against. The appearance of five women for examination as pharmacists at the recent meeting of the board of pharmacy of Ohio emphasizes the fact that this vocation is receiving its full share of attention from the fair sex. There are, indeed, few, if any, examinations of this board at which there are not a number of young women present, when ten years ago the advent of a woman was so rare as to occasion special comment. They come now and take their places among the men, attend strictly to business, rarely ask any favors and expect no consideration that is not accorded men. The fact is, they are usually well qualified for what is before them and confidence in their qualifications is a striking accompaniment of the feminine mind. The majority of men, no matter how thorough their preliminary training or experience has been, enter upon an examination with more or less trepidation and there is rarely a cock-sureness as to the result. But if a woman has any fears as to the outcome in her case it is rarely visible in her countenance or demeanor. This, of course, is much in her favor, for self-possession is the strongest element toward success in any examination. There can not, however, be self-assurance without the foundation of knowledge upon which it must rest.

For ourselves, we see no reason why women should not enter pharmacy. That they will enter is evident, whether any one likes it or denounces it. It is a pleasing occupation to one possessed of a patient spirit and a contented mind—and these faculties are much more prominently developed in women than in men. That they will succeed is hardly questionable, the only factor of doubt being as to their possession of sufficient faculty for business, and a knowledge of business methods to insure financial prosperity. The most successful pharmacist in the city of Cincinnati, we are informed, is a woman, and she is the owner of four or five drug stores and is probably possessed with a fortune, large or small, which has all been made in the retailing of drugs.

We produce in this number portraits of five lady students in pharmacy at the N. W. University, in Ada, Ohio. We are not advised as to whether any of the quintet are graduates in pharmacy or not but if not, they will be, for a woman never lets up on any thing which she fully undertakes. One of the number at least attended the May examination in Ohio and made a very creditable paper.

LEGISLATIVE REVIEW.

THE close of the legislative season affords the opportunity for briefly reviewing the work of the legislatures of the different states, in so far as that work has to do with pharmacy or any of the interests connected with it.

Reports from all the states are not at hand and we have not been able to keep fully posted as to changes in pharmacy laws, as amendments were offered from time to time, or new bills introduced to supercede the laws already in force. But from the information obtained the changes that have been made, upon the whole, do not appear to be a distinct advance upon what has heretofore existed, indicating that progress among the members of legislative bodies, upon which the friends of new and better pharmacy laws are wont to build their hopes.

In Missouri a much desired change was secured, by which physicians are no longer permitted to register as pharmacists solely upon the ground of being physicians, without any regard to their fitness for the work of the pharmacist. That such an amendment was needed in order that the pharmacy law of that growing state might be of any real value was evident by the experiences of the previous year; but that a new and much better law in many other particulars was not attempted is possibly due to the doubt in the minds of the leading pharmacists of the state in their ability to secure its enactment.

In California a new law was made, and the opinions of pharmacists of the state, competent to judge, are in the main, that it is not an improvement upon the old. A feature that will be found in practice decidedly objectionable to pharmacists is the placing of wood alcohol in the schedule of poisons, which must be registered and labeled in the same manner as poisons of a more distinct and dangerous type. A provision which permits assistant pharmacists, who have been such for five years, to register as pharmacists without examination does not indicate that degree of progress in pharmacy legislation of which so much is prophesied. This ancient proposition seems destined, like the poor, to be always with us, but it is a surprise that pharmacists in this day are unable to prevent such privileges being incorporated in a law.

In Illinois a new law replaces the old, although the changes are hardly sufficient to warrant it being called new. The permit to general dealers to sell domestic remedies and patent medicines is abolished and dealers not pharmacists, may lawfully sell these without restraint. *The salary of the Secretary is raised to* $2,500 (the original draft of the bill stated $3,000.) This should cause the Secretaries of most boards to exclaim, "Gee-whiz, let's move to Illinois!" The *Western Druggist* deplores the fact that all proprietary medicines are placed on the free list, so to speak, and may be sold by any person, from a doctor in pharmacy to a junk dealer, but the *Great Western* must remember that the P. A. of A. *controls legislation in its interests* when it so desires and the editors and proprietors of that journal need not fret about it. The P. A. *might* get after the *Western* "ef et doan watch out!"

The Costello bill amending the pharmacy law of New York was passed and approved by the Governor, notwithstanding the fact that it was opposed by the pharmaceutical journals and the prominent pharmacists of the city and state. This action is a retrograde movement, pure and simple, and one not to be expected of the greatest among states. The New York law is conspicuously less efficient in its requirements than that of Ohio, enacted in 1898.

Pennsylvania is in a muddle. Pharmacists of this state scarcely know where they belong or what they are expected to do. It is hoped that an attempt will speedily be made to codify the laws relating to the practice of pharmacy in Pennsylvania. The law amended by the recent legislature abolishes the renewal feature, fixes examination fee at $3.00, registration fee at $12.00; total, $15.00; and recasts the section regarding the sale of poisons.

In looking over the work of the winter in the legislative field it does not appear that the model pharmacy law as adopted by the American Pharmaceutical Association of 1900 has received at the hands of pharmacists or legislators much if any consideration. Is this to be attributed to the indifference, not to say the opposition, of pharmacists as a class to the entire subject of legislation affecting their business? If it is, and if this spirit continues to grow they will arouse one day from their lethargy to find their harvests have not matured while they have slumbered.

THE PATENT MEDICINE MEN.

THE annual meeting of the Proprietary Association of America was held in New York on May 1st.

This assemblage was remarkable for several things, and perhaps the most remarkable thing connected with it was the studied effort to avoid any more intimate relations with the retail drug trade and at the same time to throw dust in the eyes of the latter and still hold its members to the notion that the proprietors were interested in their welfare. If there still remain a few leaders in the ranks of the retail druggists of the country, and still a few who are prominent in the association work of retail druggists, who imagine that any reliance whatever may be placed in the proprietors of patent medicines as to their love, interest and self-denial in behalf of the retailers, these unsophisticated friends should, after the spirit manifested in this recent meeting, be permitted to tarry at Jericho until their beards be grown.

The retail drug associations, national and territorial, had some of their ablest representatives at this meeting. They made some good addresses and among a body of sincere, fair-minded men ought to have made a strong impression, but they did not. The jury was packed in advance. The convention was not so large but that a perfect understanding could be reached in advance as to what should be considered and what should be put in cold storage. The Worcester plan, which was presented as the crown and scepter of the agreements hitherto reached among the three great drug organizations of the country as to the regulation of prices, was laid away in the morgue among the other unclaimed bodies of unfulfilled contracts, there to molder in forgetfulness. If any one does not think so let him read the following:

"*Resolved*, As the Worcester Enforcement Plan calls for such radical changes and necessitates such careful investigation of legal conditions, that it should be referred to the individual members of the Association; and

"Further, in order that each member may have a full and complete understanding of the plan and the legal conditions connected therewith, it is recommended that the plan be set forth in complete detail by the originator thereof and furnished by the secretary for the individual consideration and action of the members of the Proprietary Association of America."

Does any sane person with any knowledge whatever of the situation think for a second that the members of this body, who are among the shrewdest business men on the continent, had not made themselves thoroughly familiar with all the details, including the legal phases involved in the Worcester idea? What was to prevent the Proprietary Association from endorsing this plan at the recent meeting other than an agreement among themselves not to do it?

The MIDLAND has persistently argued that the retail druggists can not rely upon the proprietors for any aggressive action in the matter of controlling prices at which patents should be sold at retail. This body, collectively, and the members of it individually, are interested chiefly in selling their product, and beyond that they care little whether the price be one dollar or one cent.

There can be no reasonable objection to this as a business proposition, but why not boldly take the position that they are out for all there is in it and care not who buys nor who sells, so long as their business interests prosper?

The MIDLAND has insisted that any recognition given retail druggists by proprietors was such scant recognition as had been forced from them by threats of retaliation, and such recognition was grudgingly given through fear of what the retailer might possibly do.

We still insist that a stout club is more potent than an olive branch when representatives of the retail drug organizations are sent out to combat with the mighty Goliaths of the patent medicine trade. The most silly of all foolish fancies is for the representatives of the retail organizations to coquette with representatives of the proprietary association and suavely accept "donations" of money to aid them "in carrying on the good work." Beware of the Greeks who come bearing gifts.

* * * * *

An incident of this meeting which does not appear to excite the comment which we think its importance required was the election of W. C. Bolton, of New York, to membership in the Proprietary Association of America. This is the gentleman who was recently elected president of the Cutter's Association of New York. He is the same gentleman to state in this meeting of the proprietors that the cutters had sold at retail five million dollars of proprietary goods in 1900. He further said that the cutters' organization had 5,789 sources from which to secure supplies and that so far they had found it necessary to tap but one of them. Was that one the proprietary association? What was the object

Digitized by Google

any way of electing to membership the firm of W. B. Riker Sons & Co., in which Mr. Bolton is director, thereby giving him, the High Priest of the cutters, a seat in that body?

* * * * *

The report of the committee on trade interests, of which Mr. A. M. Hance, of Philadelphia, is chairman, in referring to the passage of the bill repealing the stamp act, made this frank and fair admission: "Although the committee worked diligently and persistently to bring about this desired result, we might still have had a revenue law in a more or less objectionable form had it not been for the great organization of retail druggists—the N. A. R. D." Now, what is the retail druggist to get for his labor? Apparently this, *to continue to pay the stamp tax into the pockets of the proprietors instead of into the U. S. treasury.* THANKS!

THE SUCCESSFUL PHARMACIST.

WHAT constitutes a successful pharmacist? The answer to that inquiry depends wholly upon one's idea of what constitutes success. Wealth is only relative. One man will feel that he is rich indeed if his income reaches a thousand dollars each year, while another with ten thousand would think he was miserably poor. Success is measured in the same way. Upon the whole there are as many successful pharmacists, proportionately, as may be found among the adherents of any other business of even magnitude. It is a business of small transactions. The necessary capital is not large, and the volume of receipts is never heavy. Out of such conditions money is not to be made in large amounts, and he who expects to grow wealthy from the proceeds of a retail drug store is surely doomed to disappointment. To have a well-located pharmacy, with sufficient stock to meet the demands of the patrons, and this all paid for. To have an income from it that will enable its owner to live and support those dependent upon him in comfort, to give proper educational advantages to his children, when he has any, and to lay by a modest competency against the time when age will no longer permit him to engage in the active duties of his business, is all the success any one need anticipate who engages in pharmacy. He is an ambitious man who hopes for more. He is seeing visions and dreaming dreams if he figures upon larger returns than are comprised in this generalized list of necessities.

Much is being said about the professional side and the commercial side of pharmacy. One is often exalted and the other debased. The professional view is jeered at by the man whose eyes are not open to behold that there is an essentially professional, and, indeed, a scientific side, to which he would do well to give some earnest thought, if he is to realize the portion of success which is on the way to meet him, if some more comprehensive mind does not intercept it in its flight and appropriate it for his own.

In an article on another page of this issue an "Old Druggist" bewails the passing of the professional pharmacist, but he is not more than half right. He is in danger even now of living solely upon the reminiscences of the past. An existence of that sort is precarious. "Old Druggist" must wake up. There is still sufficient fire in his eye and enough elasticity in his tread to enable him to keep step to the music of the band, no matter how lively the tune.

The successful pharmacist is the level-headed individual, who has prepared himself in advance to meet all the professional requirements which he is liable to be called upon to fulfill, and has sufficient business acumen to take advantage of all the commercial opportunities presented him. He must recognize conditions as they exist and make the best of them. If he finds himself in the midst of an evolutionary process, involving his occupation, he must evolute with the rest of it, or go out over the tailboard of the wagon. He must not be so tenacious of his theories that he can not let go of them when the rest of mankind have planted weeping-willows over their remains. The inability, or indisposition, to recognize ever-changing methods in the conduct of his business has been the doom of many a thoroughly well qualified pharmacist. The shoemaker who made shoes by hand belongs to another generation. The carpenter who used to dress all his rough material with his own plane is no longer in evidence in these days of planing-mills with their perfected machines for dressing and smoothing lumber; and so must the drug man lay aside his obsolete fancies and his old-time methods, and place himself in close contact with all that is useful and best in his own department, professional and commercial, if he hopes to be rated a successful pharmacist.

EDITORIAL NOTES.

JUNE.

The year is now a happy bride,
A bunch of roses in her hand,
Taking her place by her husband's side,
For good or ill, for aye, to stand.

* * *

THE Academy of Medicine in Cincinnati is reported to have recently refused admission to membership a physician in good standing because he was also a pharmacist and conducted a drug store. We should like to know the grounds upon which such a distinction should be so sharply drawn. A knowledge of pharmacy is certainly of great advantage to a physician, and the pity is that more of them are not possessed of at least sufficient information to enable them to prescribe more intelligently. But the writing of prescriptions, except for some ready-made, semi-patent, well advertised compound, is fast becoming a lost art with physicians, and the importance of an acquaintance with pharmacy is not understood. Then, it may be that an educated pharmacist in a body of physicians would be an embarrassing element. We congratulate the druggist that he was found unworthy.

* * *

TWO Sisters of Charity were present for examination at the recent meeting of the Ohio Board of Pharmacy. They were from the dispensing department of the Cleveland Charity Hospital. Neither of them had ever been in attendance upon a school of pharmacy nor had they been employed in a retail drug store. But they had studied pharmacy for several years and obtained their practical experience in the pharmacy connected with the hospital. That they had used their time and opportunities to good advantage was apparent in the character of the work they did when upon examination. It was refreshing to an examiner to note the clear, intelligent answers given the questions, in simple but accurate terms. Evidently they had learned the importance of doing their work well, and could patiently labor and wait for an examination until entirely confident of success. What an object lesson to some young men, if they would but profit by it. In their haste to become registered they adopt the quiz compend route to aid them in reaching the much desired result. Do they succeed? Not as a rule. An experienced examiner on a board of pharmacy can tell a quiz compend fellow by the time he has read his answers to five questions. A small wheelbarrow full of these worthless books may be gathered from the pockets of the young men who present themselves at every examination. The study of these kindergarten primers no more qualifies one for the duties of a pharmacist than the study of botany would fit a man to command an ocean steamship. Herein may be found a partial answer as to why 60 of each 100 applicants receive a notice "rejected."

The Nuns passed. They were worthy to become registered. They had toiled faithfully and their work was thoroughly done. They are the first of their order to appear before the Ohio Board, consequently the first Sisters of Charity to receive from it certificates of competency by examination.

* * *

ELSEWHERE we reprint an article, "Why do Syrups Spoil?" read at the pharmaceutical meeting of the Philadelphia College of Pharmacy, which we think is well worth reading by every pharmacist. There is no class of preparations which, in general, are so unsatisfactory as syrups; indeed, it is difficult to find in many retail drug stores a really fine preparation of this class. The impression seems to be too prevalent that any thing will do for a syrup so it is sweet, regardless of its appearance, its keeping qualities, or its medicinal value, when this is an important factor.

A great deal more care should be exercised in the selection of the material out of which these preparations are made and a great deal more attention given to the method of preparing them. If this were done there would be much less cause for complaint about syrups.

* * *

NOT long since a congress of medical and scientific gentlemen was held for the discussion of methods for preventing the spread of tuberculosis. One Dr. Ulrich, of Wheeling, West Va., strongly advocated in every case of confirmed tuberculosis that no effort should be made to prolong life; make the victim as comfortable as possible for the time, but since his doom is fixed the sooner the end is reached the better for those that are left behind.

That a proposition of this nature should receive much encouragement is not to be expected. Who is to determine when a victim of tuberculosis has passed beyond

Digitized by Google

the point of recovery? A great many cases have recovered which were pronounced hopeless by expert diagnosticians. Or a person may be afflicted with this dire malady and still be able to perform a man's work until within a brief period of dissolution. An acquaintance of the writer's early years having been attacked with pulmonary consumption heroically fought its ravages for several years, during which he managed to perform a great deal more labor than many an able-bodied loafer accomplishes in his lifetime.

If the principle of the survival of the fittest is to be applied let its extermination phase be operative on the morally as well as the physically unfit. The man who will not be a producer when he is able should go, as should also the man whose time, talents and toil are concentrated upon those enterprises which demoralize men and render them unfit for the strenuous demands of human life in its best sense.

No; this plan, apparently so intensely practical, is utterly impracticable. If the planet was rid of all those physically unfit to remain and all the moral degenerates were added to the long procession there would be a host of doctors of medicine in the ranks and the *good* doctors left behind would in consequence have to find some other work to do. An inscription on a gravestone in an old cemetery returns to memory at the moment and there is a half truth in it:

"God takes the good, too good on earth to stay,
And leaves the bad, too bad to take away."

And the good angel looking over my shoulder aptly remarks, "And that accounts for *your* being here!" Even so.

A Poison Sale Decision.

The principle of law laid down by Cooley to the effect that if an original wrong becomes injurious in consequence of the intervention of some distinct wrongful act or omission by another, the injury shall be imputed to the last wrong as the proximate cause and not to that more remote, has recently been held by a Cincinnati judge to be still good.

A druggist sold poison, which poison was used for an illegal purpose. The aggrieved party sued the druggist and lost, the judge deciding that the person who used the poison illegally was responsible for his acts, and not the druggist who sold it.

—*Drug. Circular.*

PORTRAITS.

We give those of our readers who have not had the esteemed privilege of attending an examination of the Ohio Board of Pharmacy during the past five years the opportunity of looking into the benignant countenances of two of the amiable members of that beneficent board.

Mr. Julius Greyer, of Cincinnati, has been a member since September, 1896. He appeared on this planet March 26th, 1852, in Hanover, Germany. Came to America in 1866, served his apprenticeship in pharmacy in the city of Cincinnati under Carl Jungk and the late Prof. A. Fennel. Began business on his own account in 1872. Four years ago he became interested in the manufacture of artificial mineral waters in the capacity of chemist, and for two years has given almost his entire time to the laboratory of a large manufacturing establishment of mineral waters in Cincinnati. Mr. Greyer is an adept in the oral method of examination of candidates and by his quick, incisive questions separates the essential from the useless, the good from the bad, the knowing from the ignorant. Those who are not thorough in the branch under his supervision do not find him re-assuring in examination, but to those who are fairly well informed he brings no dismay, for his is a kindly spirit, and his ideals as to his work are of a high order.

The other member is Geo. W. Voss, of Cleveland. Mr. Voss is known to many of our patrons, who are not personally acquainted with him, through his extremely interesting letters to THE MIDLAND during his tour of Europe in the summer of 1900. Born in Cincinnati, October 10, 1852. Entered the drug store of Thos. Dover, Dayton, Ohio, in 1867, remaining there three years, when he secured a position with Prof. A. Fennel in Cincinnati, with whom he remained for five years, receiving there that thorough training which has been of such value to him in his subsequent career.

In 1875 Mr. Voss bought a drug store in Cleveland, which he sold in 1881 and returned to Cincinnati, buying a store at Eighth and Depot streets, which he conducted for seven years, when he again went to Cleveland, where he is at present in business at Woodland avenue and Forest street. Mr. Voss became a member of the board of pharmacy in 1895 and was re-appointed in 1900.

IS THE DRUGGIST ONLY A MIXER?

The placing of a number of preparations on the market by the large manufacturers, from which the pharmaceutical preparations are to be made on the P. D. Q. method, which were formerly made by the retail druggist himself, does not contribute to the development of skill in the pharmacist. It is still another blow at professionalism. Is the pharmacist after all the cry simply to become a "mixer?" Is he to make his paregoric by simply adding so many parts of a ready prepared concentrated preparation to so many parts of alcohol and water and the thing is done? Is it to go on in this fashion until the prescriber begins to designate that his prescriptions must contain paregoric made from Hop & Gofetchit's concentrated solution?

Spirit of nitrous ether, tinct. ferric chloride, syrup of ferrous iodide, of ipecac, tolu, ginger, sarsaparilla, wild cherry and a host of other articles which we used to make in the laboratory of even the ordinary apothecary shop, and in which such pride was taken to secure a preparation of fine appearance and of certain medicinal value, are plain mixtures or diluted solutions, requiring no skill, or knowledge of pharmacy, contributing nothing to the development of the faculty for research, making naught of the pharmacist more than is required for one in any other branch of mercantile life.

It was the writer's privilege, early in life, to serve several years under, and associated with, an English pharmacist who had received his training in Apothecaries' Hall, in Liverpool, and it was our custom to make everything possible to be made without extensive apparatus. Tinct. ferric chloride was made in lots of ten gallons, and it was a source of great pleasure to have a fine preparation, of a rich color. About this time an acquaintance was formed with a German pharmacist, who also made all his own preparations, even to the calomel in his shop, for he thought there was no calomel quite equal to that prepared in his own laboratory. These men, if living to-day and following such methods, would be laughed at, even by our most advanced(?) pharmacists, who prate so glibly about the science and the profession of pharmacy.

"Say not that the former days were better than these, for thou dost not reason wisely concerning such things." That is a pretty good all 'round proverb, but there are exceptions even to a good proverb, and it some times appears to the casual observer that there is getting to be little use for a pharmacopœia, for all the machinery necessary to turn out pharmacists, for the long and laborious apprenticeship, and the subsequent education for the work of a pharmacist if, after it is done, he is simply to be a distributer of preparations made in large laboratories. This is not saying that these may not be superior to those which the pharmacist is able to prepare with the limited equipment to be found in most laboratories connected with retail drug stores, that is not the question under discussion at this moment. But, if the skillful manipulation is to be done in the large manufacturing establishments let us be candid enough to admit and accept it, and let the retail druggist be required to qualify himself only for that which he is expected to do.

The writer not long since, in conversing with one who has always been a strong advocate for the highest education of persons intending to engage in the occupation of pharmacist, the turn was made in the matter of assistants in stores, and he took occasion to speak in high terms of one who had no education whatever in any school of pharmacy and, indeed, was not registered at all in the state where he resided. The young man had been employed about drug stores in different localities for some time and had acquired a good deal of practical information and was a fair salesman. It was his qualities as a salesman that particularly impressed our scientific friend, and he was not certain but if a vacancy occurred in his pharmacy he would employ the man who was not even registered as an assistant pharmacist. This is consistency in full bloom and serves to show how insincere some men are. A theory that is not good for me ought not to be of value to the other fellow and—"What we *do* sometimes speaks so loudly that those about us can not hear what we *say*."

Let us look at the matter in its true relation to the conditions as they exist and not attempt to advance theories which we know are impracticable, and in which we have so little faith while we are heralding them.

OLD DRUGGIST.

OHIO BOARD OF PHARMACY.

The following is the official list of persons who passed a satisfactory examination as *Pharmacists* at the meeting of the Ohio Board of Pharmacy on May 14th and 15th, 1901:

DeLacy Clark, Cleveland.
Dewey F. Howe, Willoughby.
W. H. Tope, Bowerston.
George F. Garns, Montpelier.
Fred M. Hodson, Pioneer.
J. T. Campbell, Dayton.
Earl Hostetter, Ansonia.
John Eppes Wells, Meshoppen, Pa.
William J. McGarrity, Youngstown.
F. H. Whittaker, Camden.
Paul J. Roll, Carey.
J. S. M. Fitzgerald, Portsmouth.
Earl M. Crum, Liberty Center.
Michael Salzer, Cleveland.
Charles E. Green, Jr., Painesville.
T. H. Collamore, West Unity.
Herman R. Wild, Parkersburg, W. Va.
Delos Hull, McComb.
W. N. Johnson, Springfield.
Obed D. Green, Marietta.
Edward M. Wimmer, Coshocton.
H. A. Mohler, Middlepoint.
W. C. Bair, Martin's Ferry.
Mary R. Koons, McConnelsville.
Roy C. Eaton, Ada.
F. A. Rostofer, Columbus.
Fred A. Priebe, Cleveland.
Alfred L. Silberman, Cincinnati.
Walter H. Ayres, Geneva.
Walter E. Hoover, Ashville.
Orville S. Basehart, Zanesville.
Karl William Smith, Oxford.
Andrew E. Walleck, Cleveland.
C. H. Lefferson, Middletown.
Harry J. Haudenschield, Columbus.
Sam B. Bachrach, Plymouth.
Samuel A. Klein, Cleveland.
Earl J. Mansfield, Ada.
Charles C. Schambra, Dennison.
Clyde B. Cassaday, Alliance.
W. B. Collins, Akron.
Felix M. Smith, Wapakoneta.
John C. Mandabach, Columbus.
C. B. Inman, Rising Sun.
Sister M. Mechtildis, Cleveland.
Everett Rubinstein, Cleveland.
Rolland H. French, Salem.
C. W. Arthur, Massillon.
C. H. Young, North Lawrence.
Herman H. Schulze, Cincinnati.
William Merton Jackson, Cincinnati.
W. E. Cleave, Akron.
Homer H. Thrall, Xenia.
J. W. Whitehouse, Newport, Kentucky.
C. O. Hoffman, Arcanum.
Frank H. Moyer, Williamsburg.
Arthur D. Tritch, Cleveland.
Harvey W. LaChat, Apple Creek.
Harry F. Rigby, Cleveland.
A. H. Wohlgamuth, Cleveland.
Robert Clyde Henderson, Steubenville.
Ralph B. Nicholson, Byesville.
William P. Myers, Hamitton.
Norman Emerich, Hamilton.
Total, 64.

ASSISTANT PHARMACISTS.

Louis F. Fredrick, Bridgeport.
Charles E. Fiscus, Dalton.
Fred E. Wirschmeir, Cleveland.
John C. Wolfe, Zanesville.
J. Renick Brown, Mansfield.
Delmer K. Clippinger, Springfield.
Harry H. Evans, Cleveland.
A. P. Gegenheimer, Vermillion.
J. H. McElroy, Wellsville.
Carl Winter, Cleveland.
Charles F. Mascher, East Palestine.
Frederick W. Boldt, Cleveland.
Charles Hasse, Cleveland.
Alex. Steiner, Cleveland.
Edward N. Webb, Rome P. O.
R. E. Lodge, New Waterford.
Jacob Buckstein, Cleveland.
Robert G. Freeman, Columbus.
S. B. Crosson, Blanchester.
Harry B. Pope, East Liverpool.
Sister M. Marcelline, Cleveland.
Charles H. Beagle, Marietta.
S. H. Baehr, Cleveland.
S. S. Faulkner, Troy.
D. P. Argo, Cincinnati.
J. T. Haas, Cincinnati.
J. A. Kling, Cincinnati.
M. D. Wilson, Bowling Green.
Ray Royer, Columbus.
Total, 29.

Certificates will be issued to these in about two weeks. The next examination will be held in Columbus, Ohio, on Tuesday and Wednesday, October 8th and 9th, 1901.

OHIO PHARMACEUTICAL ASSOCIATION.

We have exhausted our resources in a fruitless effort to secure from those who are presumed to have the arrangements in charge for the annual meeting of the State Pharmaceutical Association an outline of the programme and other important information concerning the approaching meeting, which we wanted very much to place before our Ohio readers in this number of THE MIDLAND.

We have a faint idea of what constitutes enterprise. We started out a month ago to persuade the authorities to give us at least an idea as to what those who wished to attend the meeting at Dayton might expect. That such information is not given in this issue is no fault of ours. If there is remaining in the body known as the Ohio Pharmaceutical Association a single individual possessed with what is grossly termed "hustle" it is our devout and humble prayer that he be placed on exhibition at the meeting in July, if there is to be a meeting.

A rumor reached us several months' ago that there would be a gathering of the members in Dayton, Ohio, on or about July 16th, A. D. 1901. This, however, lacks confirmation. If any of our friends are interested we will answer any communications as to where Dayton is, and how it may be reached.

OHIO VALLEY DRUGGISTS' ASSOCIATION OUTING.

The outing given under the auspices of the Ohio Valley Druggists' Association was a grand success. June 4th was a beautiful day, and the Country Club, under such favorable conditions, was an ideal place for a picnic. The attendance in the morning was not large, but towards noon the druggists of Cincinnati, Covington and Newport and their families and friends came in droves, so that during the afternoon and evening the Country Club presented a very lively appearance. The people seemed to have come out for the purpose of enjoying themselves, and they participated freely in the festivities, with the result that this outing was the most satisfactory affair ever given by the druggists of this part of the country. It was a great success financially and otherwise, and no doubt was but the first of many enjoyable events in store for the members of the O. V. D. A.

Great interest was taken in the contests, which were freely entered, and a great deal of friendly spirit was displayed. The following are the winners of the different events:

Potato Race—For ladies; won by Miss Ethel Murray.
Sack Race—For gentlemen; won by Mr. R. Parrey.
Egg-rolling Contest—For ladies; won by Mrs. John Weyer.
Three-legged Race—For druggists; won by O'Maley Bros., Covington, Ky., first prize; and Walterman and Weissman, second prize.
Peanut Rolling Contest—For ladies; won by Miss Ethel Murray.
Appetizing Contest (Sausage)—For boys; won by Sidney Baxter.
Odor Contest—For ladies; won by Mrs. Chas. Weissmann.
Stone Throwing—For ladies; won by Mrs. Charles Herbert Jones.
Baseball—Between wholesale drug trade and retail druggists—won by wholesalers.
Horseshoe Throwing—For ladies; won by Miss Rapp.
Horseshoe Throwing—For gentlemen; won by Frank L. Grothe.
Fat Men's Race—200 pounds or over; won by George O'Maley.
Lean Men's Race—Won by William Fey.
Boys' Race—Won by Charles Murray.
Little Boys' Race—Won by Louis Weissman.
Ladies' Race—Won by Miss Cuscaden.
Cake Walk—Most graceful couple, Mr. J. M. O'Maley and Miss O'Maley. Most grotesque couple, Mr. D. Parks and Miss Koller.
Prize Dancing—(Quadrille, schottish, waltz and two-step,) most graceful dancer; won by Miss Hawkins.
Popularity Contest—(By ballot,) most popular member attending, Mr. Charles Weissmann; most popular lady attending, Miss King.

N. O. D. A.

The second annual convocation of this very active association was held at Turkey Foot Lake on June 12th. We are not advised as to the exact location of this spot bearing such a euphonius(?) title, but it is not a great distance from Akron, and since there is a club-house on the grounds, boats and appliances for fishing on the lake, and inasmuch as it can be reached only by a cross-country drive, necessitating the partaking of refreshments *en route* we fancy

Digitized by Google

it must be something nice in spite of its name.

The association appointed a rallying committee of at least 75 members from all the cities and towns in Northern Ohio represented in the organization, whose duties were to secure a large attendance. In some towns arrangements were made to close the stores, that the proprietors and assistants might be present.

We very much regret that the time of going to press prevents our giving a full account of this outing. The official notice of the affair closed with this important statement:

"N. B.—Owing to distance of travel, business, and probable lateness of hour in returning, it has been deemed best to invite only gentlemen. We shall be pleased to meet our lady friends at the annual outing, to be held later in the season."

Excellent Reading Matter for an Entire Year.

Our publishers this month announce a generous offer of a copy of *The Bookman* and THE MIDLAND DRUGGIST to new subscribers for one year for the price of a subscription to *The Bookman* alone—$2.00. *The Bookman* is a monthly magazine, devoted to literature, and containing each month in addition to a large amount of excellent reading matter a resume of the books of the times as they appear. Its contributors are among the most prominent literary characters in both America and Europe and its entire makeup is of a very high order. Prof. John U. Lloyd's story, "Stringtown on the Pike," appeared first as a serial in this magazine; his new story, "Warwick of the Knobs," was begun in the May number, 1901.

Those who accept our offer should have their subscriptions begin with May, in order to get the opening chapters of this new work of Prof. Lloyd, which promises to be even more fascinating than his first. We hope to add many new readers by means of this offer, which we are able to make through the liberality of the publishers of *The Bookman*. We do not think a more useful and entertaining combination of good reading matter for two dollars has been offered pharmacists than this, and those who have the slightest interest in current literature should not delay to accept this proposition.

A dentist says teeth are like verbs—regular, irregular and defective.

NEW SODA WATER GUIDE.

Mr. E. T. White, the editor of the soda water department of the *Spatula*, has prepared and published a book which, in condensed form, gives all the needed information and formulas to enable any one to become a thorough dispenser of soda water and its accessories. This book is full of suggestions for every phase of the soda business, including the care of the apparatus and all the numerous appliances connected with it. The formulæ for the manufacture of syrups and fancy drinks of all kinds is worth many times the cost of the book to any one who wants to make the soda fountain a paying part of his business. The title of Mr. White's book is "The Spatula Soda Water Guide," and the uniform price is one dollar, post paid. Those of our subscribers who wish the guide may send their orders to the MIDLAND DRUGGIST and the book will be promptly mailed. Those who are not already subscribers to the MIDLAND may send us $1.40, for which we will send a copy of "The Spatula Soda Water Guide" and the MIDLAND DRUGGIST for one year. A special arrangement with the Spatula Publishing Company enables us to make this offer.

For a number of years COCAINE HYDROCHLORATE has been offered by the manufacturers in the form of large, hard, definite crystals, and it is this form that is most familiar to pharmacists generally. The Mallinckrodt Chemical Works, however, have also introduced the hydrochlorate in the form of small, soft, lustrous, scaly crystals, most beautiful in appearance, absolutely pure, and much more bulky than the large crystals. The "M. C. W." cocaine is also offered in the powdered form, which is convenient for dispensing, and preferred by many pharmacists. When a thoroughly reliable and absolutely pure cocaine is desired the "M. C. W." brand should be specified.

GETTING THE WORLD OUT OF DEBT.

Jeremy Bentham, in whose teeming mental storehouse the origin of so many reform notions may be found, was, perhaps, the first to advocate the abolition of all laws for the collection of debt. No suggestion of this chief of the utilitarian school, from whom John Stuart Mill derived not a little of his inexorable logic and clarity of thought, is to be passed over with indifference. Let us see, therefore, what may be said in defense of so radical a proposition.

First: The minimizing of the universality of credit and the substitution of cash payment, which would result in consequent reduction of price to those who would benefit most by it—the poor. The elimination of bad debts would enable every grocer to sell at a smaller margin of profit—a condition which the inevitable laws of competition would bring about.

Second: The abolition of the instalment system, which compels the poor to pay three times the worth of an article.

Third: Something can be said for the probable tendency of the substitution of cash for credit to arrest panics. These spring largely from overspeculation—from straining the bonds of credit, always of problematic endurance, until they break. Sellers now rely, to some extent at least, upon court process to compel payment. Were such assurance removed they would be more careful in extending credit, and an important factor in the creation of that distrust which precipitates commercial panics would be removed in two ways: large substitutions of cash payments for credits, and the addition of increased conservation to that part of the credit system which remained.

This reform would do away with a great horde of court officers, judges, sheriffs and clerks, thus saving to the community large sums now worse than wasted; it would force great numbers of individuals who now add nothing to the wealth of the world into purely productive pursuits, and it would tend everywhere and in all lines to a minimization of profits and reduction of prices. It would benefit the class whose benefit is at all times most to be sought—that great unprivileged class whom we speak of as "the masses."—*Saturday Evening Post.*

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid to anonymous communications, although the name of the sender of such news will not be published.]

—

Carl Lorey was in the city Monday afternoon.

Dr. G. E. French, La Grange, Ohio, has sold out.

J. A. Swoveland & Co., Ohio City, Ohio, have dissolved.

F. G. Lee, druggist at Kalida, Ohio, has been burned out.

Pratt Brothers, of Delta, Ohio, have dissolved partnership.

Mr. Eber Hyde, Lancaster, Ohio, is visiting friends in Indiana.

The firm of Remage & Dix, Paulding, Ohio, has been dissolved.

G. W. Dunn, Forest, Ind., has been succeeded by Genry & Berry.

H. T. Kile has bought the J. A. Thompson & Co. store at Ostrander, Ohio.

The partnership of Laur & Balsey, Napoleon, Ohio, has been dissolved.

G. W. Griswell succeeds to the business of F. O. Lamberson & Bro., Greenfield, Ind.

"Jimmy" Wells is a pharmaceutical apprentice with Dr. E. Davis, at Middleport, Ohio.

R. P. Taylor, New Straitsville, Ohio, spent the latter part of April visiting friends in Cleveland.

J. E. Janney, of Waynesville, Ohio, has been laid up for over a week with a severe attack of grip.

Mr. Frank Gallagher, of F. M. Gallagher & Co., Racine, Ohio, is home from Louisville for the summer.

Linas Dittoe, of Somerset, Ohio, called on his friends in the profession at New Lexington last week.

We regret to state the death of G. W. Keams, of Cuba, Ohio, which occurred recently of blood poison.

The son of Joe Davis, Mt. Sterling, Ohio, was recently killed in the B. and O. railroad yards at Newark, Ohio.

Mrs. W. H. Nixon, at New Lexington, Ohio, has been quite ill of malaria, but is able to again look after her bright little tore as good-natured as ever.

Mr. Will Price, formerly with the Pontius drug store of Columbus, is clerking for W. J. Stuart, Nelsonville, Ohio.

Walton Parker, with W. R. Parker, Beverly, Ohio, accompanied J. H. Cline over a part of his district last month.

Mrs. E. S. Davidson, wife of the popular druggist of that name of Xenia, Ohio, is attending the Pan-American Exposition.

Fenner & Prame, of Shiloh, Ohio, are installing a soda fountain. They expect to be able to keep Shiloh cool this summer.

J. Halliday Cline, of Athens, made the inspection over his district last month as lecturer to Subordinate Lodges, F. & A. M.

Mr. Will Taylor, formerly with W. M. Stewart, Newark, Ohio, has accepted a position with the City Pharmacy of the same place.

Karl G. Ayers, of Perrysville, Ohio, was a delegate to the Republican convention at Medina the other day. Karl reports a great time.

Ray M. Beagle, of Beagle & Lytle, Marietta, Ohio, was a delegate to the Republican senatorial convention held at Athens June 4th and 5th.

Mr. Montague, formerly manager for the Caldwell Company Store of Xenia, Ohio, is now managing the store of E. G. Dabney, Proctorsville, Ohio.

W. A. Hilton, Perrysville, Ohio, stopped off on his way to the K. of P. convention at Springfield the latter part of May, and paid us a short visit.

Dr. B. M. East has bought a half-interest with W. M. Beatty at Newark, Ohio. The store will still continue under the style of "East Side Pharmacy."

It is said that Roush & Rowley, proprietors of East End drug store, Pomeroy, Ohio, will remove from the East End to Court street, down town.

W. F. Ashley, formerly with C. S. Ashbrook, Mansfield, Ohio, has accepted a position with J. H. Moody & Co., Lancaster, Ohio.

C. E. Schmauser, the West End druggist of Chillicothe, Ohio, has just completed the remodelling and papering his store, which has added considerably to his already attractive place.

Digitized by Google

W. E. Stansbury, of Middleport, was in charge of Lucy M. Harvey's Pharmacy, at Pomeroy, Ohio, during Miss Lucy's absence with the O. S. U. students on their excursion to Detroit.

B. F. Carter, Mansfield, Ohio, left on the 10th inst. for a three weeks' vacation at Arcanum. Mr. Carter is interested financially at Arcanum, hence will combine business with pleasure.

S. J. Penfield, of South Charleston, Ohio, has moved his store to Dayton, Ohio, where he can be found in Dayton View, again ready for business. We wish him success in his new location.

Carl N. Lorey, formerly of Washington C. H., has purchased the Mahaffey drug store at Mt. Vernon, Ohio, taking charge on May 23d. Mr. Lorey starts out with every prospect of success.

Mr. O. O. Older, of Browning & Older, Charleston, W. Va., has returned home from Cincinnati, where he just graduated from the College of Pharmacy in Pharmaceutical Chemistry with high honors.

Dr. E. C. Wisman, of Bryan, Ohio, has bought the drug store of Mrs. F. M. Carter. J. A. Neill, who has been manager for Mrs. Carter for the past fourteen months, will continue as manager for Dr. Wisman.

Mr. Frank Amann, of Portsmouth, Ohio, has just completed putting in a new front to his store and repainting and cleaning house in general. This will make his already popular store a "thing of beauty."

Carl Schmitt, a prominent druggist of Cleveland, resigned as steward of the County Infirmary on June 1st. Mr. S.'s stores were sufficient tax on his time, so that a political job was not to him a very desirable position.

Three of the four desperadoes who murderously assaulted E. W. Meyer, the Cleveland druggist, on the night of April 23, were sentenced to ten years each in the Ohio Penitentiary. Mr. Meyer has recovered from his wounds.

Charleston, W. Va., seems to be a sure thing in the way of floods. On May 23d, for the second time this year, many of the druggists of that city were forced to move their goods out of reach of the water, although the sun shone brightly and no rain had been seen for some time, yet the water kept getting higher and so did the druggists. We hope that they will not be forced to move again for many days to come.

Some of the orders received by druggists are certainly "Peaches." Here is one received by F. J. Shantz, of Kenton, Ohio: "Give me a nickles worth of Burker Endy Peach." Mr. Shantz supplied burgundy pitch. Guess he was right.

W. R. Frye, of Pleasant City, Ohio, formerly Ph. C. with Prof. Beal, of Scio, lately mayor of Pleasant City, has resigned his office to take charge of J. R. Downar's store at Cambridge, Ohio. Mr. Downar is fortunate in securing his services.

Among those to attend the recent examination in Columbus we mention: M. A. Thompson, New Holland, Ohio; Homer Thrall and P. M. Gillespie, of Xenia, Ohio; Homer Conn, of Washington C. H., and John Wood, of Mt. Sterling, Ohio.

L. L. Dittoe, Somerset, Ohio, was in Columbus Thursday, inspecting the products of the different buggy factories. Mr. D. expects to purchase a nice buggy for himself shortly, something that will make the inhabitants of Somerset take a second look as he passes.

The recent examination by the state board brought to the city a great many young pharmacists. Among those who called on us were: Mr. Thompson, of New Holland; Mr. Bower, with J. H. Brinker, Bellview, Ohio; R. B. Nicholson, with C. A. Heiner, Byesville, Ohio.

One ceases to wonder why Harman Ward, of Lancaster, greets his stamp customers in so cheerful a mood and hands out the city directory with a countenance beaming with smiles when he is informed that a visitor arrived at his home the fore part of the month in the shape of a bouncing boy.

The first of the summer outings of the Columbus Druggists' Association was held the afternoon of Monday, June 3, at Collins' Garden. The time was given chiefly to bowling and all were entertained, the "onlookers" having more fun than the bowlers. The programme for the next outing has not yet been announced.

We are in receipt of an invitation to the wedding of Mr. Homer Conn and Miss Bessie Sanderson, of Washington C. H., Ohio. Mr. Conn is the manager of the Hughey drug store at that place and a very popular young man. Miss Sanderson is the daughter of a prominent lawyer and one of the handsomest and most popular young ladies of the town. Our best wishes are with the happy couple. The wedding is set for Wednesday, June 19th.

Digitized by Google

A letter from a druggist:

SHIPSHEWANNA, IND., May 20, 1901.

Kondon Mfg. Co., Minneapolis, Minn.:

SIRS:—We have handled your Jelly for four months and find it a good seller and gives excellent satisfaction. Please send us free samples and window display.

Yours, SUNTHIMER & MAST.

See ad on page 885 of this journal.

Mrs. J. A. Foote, of Cannonsburg, Pa., has purchased the Woodard Pharmacy of George S. McCaw, at Dennison, Ohio. Mrs. Foote is the owner of a pharmacy at Cannonsburg and brings to the management of this store ability and experience. THE MIDLAND welcomes Mrs. Foote to the ranks of Ohio pharmacists.

Foote & Jenks, of Jackson, Michigan, the well-known perfumers, recently moved into larger and better quarters, where they will be in position to wait upon their growing trade to better advantage. They extend an invitation to their Ohio customers who may be travelling through Michigan to stop at Jackson and call upon them.

The Garfield Tea Company have removed from their old premises, 11 to 15 Sterling Place, to their newly built factory and office, at 145 Forty-first street, Brooklyn, N. Y. As this company made no advance in price of their remedies when the stamp tax was levied, there will consequently be no deduction in price when the repeal of the revenue law takes effect.

We are glad to make note that the suggestion made in last month's issue of THE MIDLAND to the druggists of Ironton, Ohio, has been taken up and acted upon to the satisfaction of all. They have organized an association, stopped cutting on all patents and report everything moving along nicely. It is to be hoped that nothing will occur to again disturb the good work.

The Pomeroy Bend recovers but slowly from its bath of mud and drift. The merchants lose a good six weeks' business. The veteran, Dr. Seebohm, in the old corner on Front street, estimates his losses from flood and fire during thirty-nine years' business at twenty thousand dollars. Certainly it requires some grit to go along under such circumstances. There's a fight in the Doctor yet.

With sincere regret we note the death of W. O. Lupton, of Delaware, Ohio. Mr. Lupton has been for more than twenty years identified with the drug trade of Delaware and was one of the most widely known aud popular men of the city. The early part of his experience was with W. T. Joyner, but for the past twelve years he has been with Geo. H. Carter. He was a prominent Odd Fellow, a member of the board of trustees of the Grand Lodge of Ohio, and of the I. O. O. F. Home at Springfield. He was also something of a politician and at the time of his death held the position of township treasurer. He was still in the prime of life, being not quite forty-seven years of age, and his death takes from the community one of the most active and useful citizens, whose loss will be long felt. Mr. Lupton was a bachelor, but made a home for his aged mother and his two nieces.

Charles Amann, of Portsmouth, Ohio, was the recent victim of a severe accident. While driving through the country near a small town called Idaho, in quest of business, his horse became frightened and ran away, throwing him out and bruising him considerably, besides breaking the buggy and everything in general. Charlie was forced to lay up for a couple of weeks, but is again ready for another.

Death of Charles Rice.

DR. CHARLES RICE, Chairman of the Committee on the Revision of the United States Pharmacopoeia, died in New York on May 13, at the age of 61 years. The funeral services were held from the chapel of Bellevue Hospital on Thursday, May 16, and was attended by many representatives from the professions of pharmacy, chemistry and medicine. American pharmacy has lost by death within a few months two of its most honored and distinguished representatives in Dr. E. R. Squibb and Dr. Chas. Rice. It is doubtful, indeed, if they have not contributed more to the scientific advancement of pharmacy in this country than any other men of their day.

DR. CHARLES RICE.

Dr. Rice was chairman of the Revision Committees of the Pharmacopoeia for 1880 and 1890 and the character of his service was such in that important work as to place him again at its head in 1900 without opposition. He was a member of many of the scientific societies the world over. The degree of Doctor of Philosophy was conferred upon him by the University of the city of New York in 1879. He was a member of the board of trustees of the New York College of Pharmacy, chairman of the committee on examinations and for quite a number of years conducted in person the examinations of the candidates for graduation from that institution.

Dr. Rice was associate editor of the *American Druggist*, and we have selected from that journal excerpts from the tributes paid him by the leading pharmacists of the United States who were associated with him in his extensive scientific labors, and many of whom knew him in person.

—

By JOSEPH P. REMINGTON, Pharm M.,
Philadelphia College of Pharmacy.

The death of Dr. Charles Rice, the chairman of the Committee of Revision of the United States Pharmacopoeia, has left a void in the ranks of American pharmacists that can never be filled. His thorough knowledge of chemistry fitted him to infallibly determine the value of the researches of others, to detect errors and outline processes. His long familiarity with books and his experience as an editor and author gave him special qualifications for editing the Pharmacopoeia. His executive ability and his marvelous industry enabled him to accomplish an enormous amount of routine work, and when to this is added his wonderful knowledge of ancient and modern languages, which he kept up through his connection with Oriental societies, one can understand why success crowned his efforts.

As a chairman, he was singularly fitted for the responsible and irksome duties connected with the position. Charles Rice knew men, and he knew how to manage men. It was impossible for him to be arrogant or dictatorial, and yet he was never weak. An experience of twenty years, with constant association with him, gave the writer unusual opportunities of character-study. Every one yielded to his wishes because of an unbounded trust in his judgment, honor and integrity. He

Digitized by Google

never had to use sledge-hammer methods, for so great was his skill and insight that they were never necessary; the hand was always gloved, and, it was thus that those who differed with him radically, in the beginning, and yielded owing to his persuasive methods, would eventually thank him in their hearts, when his judgment was vindicated, for saving them from mortification and loss of respect. His rule of life was the Golden Rule and consideration for the feelings of his fellow-men was one of his strongest attributes. To those who knew him intimately he was a lovely character, entertaining, instructive and never dull nor prosy; not by any means devoid of a sense of humor, he seemed to enjoy exquisitely the rare bits which came to him, and would often regale his friends when he had time for relaxation.

—

By Prof. J. M. Good, PH. G.,
St. Louis College of Pharmacy.

The expressions of the respect and the love of his associates come as spontaneous tributes to his memory. In him was symbolized the modesty which is characteristic of true worth. In his intercourse with men he showed the real gentleman by his kindly consideration for the rights and the opinions of others. His industry, his painstaking and conscientious devotion to duty were shown in the performance of any work which he undertook to do.

As chairman of the Committee of Revision of the United States Pharmacopoeia, these qualities were exhibited in a remarkable degree. The edition of 1880 marked an epoch in its history. The improvement was due, in large measure, to his scholarly attainments and his general scientific knowledge. When such men as Dr. Charles Rice are called hence, it is easy for us to believe that "there is no death; what seems so is transition," for their work abides.

—

By A. R. L. Dohme, PH. D., Baltimore, Md.

I have known Dr. Charles Rice for fully fifteen years, in fact, while he was connected with the *American Druggist;* but unfortunately I seldom came personally in contact with him. He was always of a retiring nature, and seldom left his haunts in the laboratory of the Bellevue Hospital.

Dr. Rice was a hidden mine filled with the richest ore, and no matter what the subject he was versed in it, and knew far more than in his modesty he would unfold. It was a great pity that a man of such profound knowledge should hide himself behind his apparatus, and not come out into the world, where by contact with his fellow men he could be aroused and enthused into giving others the benefit of that fund of knowledge which now lies still and cold, silenced forever. The Shakesperian adage,

> The evil that men do lives after them;
> The good is oft interred with their bones,

is both very true and very untrue of him, for he never did any evil, and none will live after him, but oh, how much of the good will be interred with his bones! Dr. Rice should have been a university professor, for in that capacity he could have passed along to hundreds and hundreds of others that great fund of facts and knowledge, and those many good principles of which he was the very embodiment. Due to his close confinement and close attention to his duties as Chemist of the Department of Public Charities of the City of New York, but few of his colleagues had the pleasure of his personal acquaintance, a fact which they all must regret. For twenty years he has wielded the scepter of the Pharmacopoeia, and it is no unjust praise to say that he was responsible for the fact that our Pharmacopoeia to-day stands pre-eminent as the best, most complete and most thorough of all Pharmacopoeias of the world. That he accepted the position again this year was a great surprise to me, for I knew his health was declining, and he ought not for his own sake take up the enormous labors of chairman of the Committee of Revision. That it hastened his demise can hardly be questioned.

Dr. Rice published but little, devoting all his spare time to the Pharmacopoeia, and to his own library, where he found such very pleasant companions in his books. The 1880 and 1890 Pharmacopoeias will, however, for all time stand as monuments to his indefatigable labor, unselfish devotion and unbounded knowledge. He was always a sincere and true friend of mine, and his advice and encouragement on many an occasion have been to me of inestimable value. In the work of so large a committee as the Revision Committee it requires as chairman a man who can pour oil on troubled waters, keep down personalities, and so placate all interests and all temperaments that the cogs always remain well oiled and the machine runs along smoothly and rapidly. In my judgment Dr. Rice should be classed as a philanthropist, for while he was not rich and could not found

Digitized by Google

universities, libraries or manual training schools, he offered what he possessed—his knowledge and his energy—at all times, freely and gladly for the benefit of his fellow men, for practically all his life's work was for the benefit of others, not himself.

—

By Prof. OSCAR OLDBERG, Ph.D.,
Northwestern University School of Pharmacy.

The name of Dr. Charles Rice will for generations remain inseparably connected with the history of the development of the American Pharmacopœia. The prodigious amount of work of a high scientific order accomplished by him is well known to those associated with him during the past twenty years in the revision of that work, which, under his guidance, has attained perhaps, the highest place among the Pharmacopœias of the world. His unselfish and untiring devotion to the cause of true scientific progress in pharmacy could not have been surpassed.

Dr. Rice was most at rest when most earnestly at work. He was never idle. Yet, busy as he was, he was ever ready, when called upon, to aid other workers with valuable, disinterested advice, and to give freely whatever they asked out of his treasury of knowledge and experience. Rich, indeed, were his mind and heart. His time, thought and work, more valuable to him and his profession than gold, were drawn upon beyond his physical strength; but he was unconscious or unmindful of it until too late.

My admiration and respect for Charles Rice and his services to pharmacy will remain with me to the last day with the affectionate remembrance of a departed true friend.

—

By ALBERT E. EBERT, Pharm. M., Chicago, Ill.

I have known Dr. Charles Rice many years, and have always looked upon him as one of the foremost men connected with the professions of medicine and pharmacy in this country. He was a man of integrity and generosity, self-sacrificing to a degree that was often painful to his friends. His mind was one of great clearness and force, and he was distinguished in more than one avenue of learning. As a philologist he had no superior, and as a linguist he was without a peer among the members of the medical and pharmaceutical professions of this country. My personal relations with him were always of the most agreeable nature, and his being taken away is a source of keen regret to me, as it must be to all his other associates and friends. On whose shoulders his mantle will fall I do not know, but I do not believe that we shall be able to find any one to fill his place so well as he has filled it. The death of Dr. Rice at this time, engaged as he was in the work as chairman of the Committee of Revision of the United States Pharmacopœia is a public calamity.

—

By W. S. THOMPSON, Ph. G.,
National College of Pharmacy, Washington, D. C.

I first met Dr. Charles Rice at the Pharmacopœial Convention of 1880, at which he was made chairman of the Committee of Revision of the United States Pharmacopœia. I served with him on this committee during the ensuing decade, and have kept in touch with him ever since. What first impressed me was his exceeding modesty. While his superior fitness for the chairmanship of the Committee of Revision was conceded by all who were aware of his ability, he alone appeared unconscious of it. I soon learned, however, that modesty was as much a part of his nature as was the tone of his voice. His capacity for work and his untiring energy were never excelled, perhaps, by any one. Whatever rest, other than sleep, that came to him was gotten by diversity of

labor, or that recreation one gets by change of occupation; no idle moments were his.

By A. B. LYONS, Ph. D., Detroit, Mich.

The news of the death of Dr. Charles Rice overwhelms me with such a sense of personal loss that I can scarcely command words to express my feeling. Although it has not been my privilege to come into relations of intimacy with Dr. Rice, I have been deeply impressed, on the rare occasions when we have met, with his personality, which seemed to me to realize the highest ideal of the scholarly pharmacist. Singularly modest and unpretentious, he yet commanded from every one the respect due to a superior.

When, a few months ago, Dr. Squibb was taken from us, we mourned indeed, but were consoled with the reflection that he had rounded out fully the allotted term of human life. It is hard for us to be reconciled to the loss now of one from whom we had reason to hope for yet many years of service. For such a loss we do well to mourn and refuse to be comforted. Yet the life thus suddenly ended has been a life of achievement. Its work is left unfinished, it is true, but yet so organized and planned that its main purposes will go on to their fulfillment in other hands, and as the years go on we shall each one of us do better service to our profession by reason of the inspiration we have received from the life and example of our fallen captain.

The Use of Oil of Wintergreen.

Rottnbiller (*Klin. Ther. Woch.*) finds that oil of gaultheria is a valuable adjunct with thermal baths in his treatment of different forms of arthritis. His belief is based upon the observation of 122 cases, the most being of the chronic polyarticular type. He finds that the pure oil is well tolerated by the stomach, and in most cases where it is disturbed it is due to impurities, as is sometimes observed in other oils. The artificial oil is apt to be purer than the natural one. He usually gives from six to eight grammes per diem in gelatine capsules, each containing one and one-fourth gramme, and in painful cases continues the administration through the night. His youngest case was aged six; oldest, seventy-eight. In cited cases nineteen, twenty-one to thirty, baths ten to fifteen minutes each were given in three or four weeks' time. In cases of anemia iron and arsenic were also given. Urine showed the test for the oil half an hour after administration, in some cases in twenty minutes. In ninety-seven cases of chronic polyarthritis only five had acute affection of the joints; 60 per cent. were due to influenza, 20 per cent. were hereditary, and the rest were due to traumatism. In three cases of arthritis deformans pain was relieved, but they were too far advanced to be cured. The oil being easily absorbed by the skin, when applied locally it gives relief to the affected part.—*Indian Lancet.*

JUST AS GOOD WEST OF THE MISSISSIPPI AS IN NEW YORK.

People everywhere are interested in the New York Rapid Transit Tunnel.

Give your customers a chance to get better acquainted with the greatest undertaking of the age. The progress of New York in the matter of Rapid Transit, is being watched by the entire world. This window display will give any one a clear idea of the most important station of the system.

C. Homer Young.

Mr. Young's preparatory work for college was done in the Wooster High School, graduating from that school in '96. He attended the University of Wooster, '96-'98, and entered the College of Pharmacy O. S. U. in the fall of '98 and will receive the degree of B. Sc. in Pharmacy on commencement day.

C. HOMER YOUNG.

Mr. Young has been an active member of the literary, musical and scientific societies of the University, a member of Athenean Literary Society '98, at present secretary of the O. S. U. Chemical Association, member of the O. S. U. Mandolin and Guitar Club '98, '00, and the first president of the O. S. U. Pharmaceutical Association, having done much during the year to make the association a success. Mr. Young was registered as an assistant pharmacist in '00 and has just passed the examination as pharmacist.

Charles H. Kimberly.

Mr. Kimberly was prepared for the Ohio State University in the N. Fairfield High School and in the O. S. U. Preparatory Department, '95, and entered the Arts College, fall of '95. In '97 Mr. Kimberly decided to take up the study of pharmacy and entered the Pharmacy College the fall of that year, graduating in '00 with the degree of

CHAS. H. KIMBERLY.

B. Sc. in Pharmacy, being the first student to receive that degree from the O. S. U. In '01 Mr. Kimberly was elected to a fellowship in general chemistry and in connection with his work in that department has completed his work for the degree of M. Sc., which will be received at the coming commencement exercises.

Mr. Kimberly received the Assistant Pharmacist's certificate in '98 and the registered certificate in '00. While in college he has been a very active worker in the societies connected with the science

Digitized by Google

partments, being a member, and filled all the offices of the O. S. U. Chemical Association and an honorary member of the O. S. U. Pharmaceutical Association.

☆☆☆

Personal Notes.

Mr. Carl Oshe, formerly with Cline & Son, Athens, Ohio, has accepted a position with Hatton Brothers, this city. Mr. Oshe will manage the Hatton Brothers' pharmacy, corner Fifth avenue and High street, recently purchased from Harrop & Co.

—

A letter has just been received from Mr. J. E. Seeds, who was with us earlier in the year, taking special work in pharmacy. Mr. Seeds is at Grove Hill, Ohio, having purchased a store in that place. He reports that he is getting along nicely.

—

Mr. B. G. Smith, '95, has severed his connection with the Columbus Pharmacal Co. and accepted a position as manager of a manufacturing establishment in the west. Mr. Rostofer, '99, formerly head prescription clerk, has taken the place vacated by Smith.

—

The game of ball between the O. S. U. Chemical Association and the O. S. U. Pharmaceutical Association, which was mentioned in the last MIDLAND, was played in due season, with the result, as we predicted, eleven to nine in our favor. Mr. Ray Snyder, our catcher, had his finger broken in the sixth inning, but pluckily played out the game.

—

The state board examination has come and gone and the O. S. U. boys have smiling faces. C. H. Young, W. E. Hoover, C. B. Cassaday and C. H. Lefferson passed the pharmacist examination; E. N. Webb, S. B. Crosson, H. B. Pope, Ray Royer and M. D. Wilson passed as assistant pharmacists. Mr. Royer will be with Prof. George W. Matson, corner Jefferson avenue and Long street. Mr. Crosson will be with Mr. Westervelt, corner Second avenue and Hunter street. Mr. Young will be found at Groff's pharmacy, on north High street. Mr. Cassaday will be with his father, at Alliance, Ohio. The other boys have not made definite arrangements as yet, but almost all have positions in view and hope to soon be located.

O. S. U. Pharmaceutical Association Excursion to Detroit.

The O. S. U. Pharmaceutical Association's excursion to Detroit, to visit Parke Davis & Co.'s plant, was a decided success in every way, from an educational standpoint, and it was with this object in view that the trip was planned. The time was well spent.

In times not so far remote instruction in colleges and universities was given mostly by lectures and recitations, and the present system of laboratory instruction was unknown. At present, the method of observation has so permeated our institutions of learning that even history and the classics are aided by maps, lantern slides and objects brought from the particular localities studied. Within the last few years, however, a custom has sprung up, in connection with the study of pharmaceutical, chemical, mechanical and other lines of laboratory work, of visiting large manufacturing establishments and of having the students see in active operation the various processes they have been studying. This method has proven of inestimable value to students and the instructors in the College of Pharmacy at O. S. U. realizing this fact have not been slow in adopting the custom.

The factory of Parke Davis & Co., Detroit, is the largest of its kind in the world. In no other country has the manufacturer of elegant pharmaceuticals reached such proportions as in the United States, and the various processes, and numerous pieces of apparatus, many designed and manufactured by the company itself, were well worth seeing by students of pharmacy and chemistry.

The students were simply amazed at the gigantic proportions of the different departments, for instance, when the visitors were looking at a small mountain of crude drugs, apparently all cascara from one point of view, and then were told by the guide that the stock here was only a small part of that carried in New York, they, no doubt, had the same thoughts that Dr. Bleile expressed in his after-dinner speech: "How does it come that any of us are alive, with so much medicine to take?" However, Ohio is only a small part of the world and we only get our share.

It would take a book to tell all that we saw, but several operations were of special interest, the machines used in tablet and pill making, the process of making pearls of oil of sandalwood, also their process of gelatine coating pills. One moment we were looking at the hard logs of sandal-

Digitized by Google

wood as they were received from India, another moment watching the pure odorous oil as it came from the still. The Biological department was of special interest to Drs. Bleile and Morrey and several students of veterinary medicine who accompanied us. The operations of injecting the toxine into the neck of the horse and of removing the blood after the animal had become immune were witnessed by the party. The cleanliness of the stables and the extreme care and cleanliness shown in the department where the antitoxines were bottled for the market was noticable. In fact, the cleanliness, order, convenience and perfect system of all departments were worth studying by those contemplating engaging in such work.

Now, in regard to the social side of the trip, too much cannot be said in praise of Parke Davis & Co. They certainly entertained the visitors royally. In the O. S. U. party there were fifty-two in all, pharmacy, chemistry and veterinary students, several professors and ladies. In the Scio party were thirty-six in all, including Prof. Beal and several ladies. On arriving in Detroit we were met by Mr. Helfman, a representative of the Company, and taken to the Russell House for breakfast; the factory was then visited and about ten o'clock the speed and efficiency of their private fire department was shown by having a stream of water playing on the adjoining roofs within fifteen seconds after the alarm was sounded. Refreshments were served and inspection continued.

After the visit to the factory a banquet was served at the Russell House. Songs, speeches, and music by the Russell House orchestra were in order for two hours. Prof. Kauffman and Dr. Bleile responded on the part of O. S. U., and Prof. Beal for Scio.

The latter part of the day was spent in an excursion up to the St. Clair Flats. The O. S. U. and Scio people, together with a number of the representatives and officials of the Company making up the party. Refreshments were served on the boat and the orchestra furnished music. Supper was taken at the Star Island House, after which speeches were in order, Mr. Harrold responding for the O. S. U. P. A. The return trip was made in time to catch the 10:30 boat for Cleveland.

The members of the party unite in saying that it was one of the most enjoyable trips ever taken.

Laboratory Notes on the Assay of Nux Vomica.

The students in the freshman class have just finished their laboratory work on the fluid extracts, and strange to say have succeeded in assaying Extracti Nucis Vomicæ Fluidi by the U. S. P. method, or by that method with such slight modifications that it can be said to be a practical method of assay, that is, with the particular lot of drug, from which the fluid extract was made.

Perhaps some of our readers will remember that an article was published last fall in THE MIDLAND, in which we recounted our trials and tribulations with this particular assay and that after we had tried several volumetric methods, using various indicators, we were compelled to resort to the gravimetric method. In a few brief sentences we will recall some of the difficulties encountered, and then let the reader think over the problem as we have been doing, and perhaps you can help us.

Several years ago, while manufacturing fluid extract of nux vomica, I attempted to assay it by the U. S. P. method with no success. After trying various modifications of the U. S. P. method, in which I was always baffled by the decomposition of the salt of strychnine, the salt being decomposed when the KOH solution was added, thereby failing to get any reaction with the indicator until all of the 10 cc of H_2SO_4 decinormal solution was neutralized, which, of course, required 100 cc of centinormal KOH. A trial assay of Powers & Weightman's strychnine was run with the same result. Meeting with failure by the U. S. P. method a direct titration was made with decinormal H_2SO_4, the alkaloid being held in solution with dilute alcohol, with the result that no difficulty was encountered. Last fall, however, when the students took up the assay in their laboratory work the U. S. P. method proved useless, as in my own experience, and the direct titration method was tried. Strange to say, that method would not answer, apparently not because of the decomposition of the sulphate of strychnine and brucine, but on account of the coloring matter, which could not be gotten rid of, even after repeating the extraction of the alkaloids with chloroform several times and also treating it with animal charcoal, and, as mentioned above, the gravimetric method was resorted to. Now, however, the assay can be accomplished with only one extraction and even filtering the solution of alkaloids to remove the oil and resinous matter.

Whether this difference is due to some property of the drug, to some difference in the process of manufacture, or to some impurity in the chemicals used, we are unable at present to say, but expect to investigate the matter and report at some later date. If any of our readers have had similar experience with the drug and have succeeded in locating the difficulty we would be pleased to hear from them.

Why Did I Fail to Pass the State Board Examination?

There are, no doubt, a number of reasons why the young man who asked the above question failed, and perhaps the shortest answer would be the well-known rejoinder to such questions—"You did not know enough." I would like to add, however, to the answer just given, that your knowledge was not properly classified. You, no doubt, had enough indivieual facts and abstract statements crammed into your head to have passed five or six such examinations, but the examiners did not happen to select their questions from your list, and not having developed your reasoning faculties you were unable to use the surplus knowledge, which was dead capital as far as that particular examination was concerned.

I can imagine some student who has been following the above plan of acquiring knowledge, saying, "Passing the state board is not like a problem in mathematics; if you don't know the answer to a question you don't know it."

The object of this article is to convince any one holding such views as the above, that there is a logical and scientific way to approach state board examinations, or any other examination for that matter, and a way in which seventy-five to eighty per cent. of your capital will not be idle while undergoing the operation.

I will say at the beginning that a first-class school of pharmacy is the place to acquire the necessary knowledge and four years should be devoted to the subject. It is not always necessary for a man to complete a college course to become an educated pharmacist; there are exceptions, but the exceptions are so few that the average student needs the discipline and oversight to be had in our colleges and universities.

I anticipate this objection to my advice to take a college course, namely: The colleges teach so many things that are not practical, they make the student spend time on botany, chemistry, mineralogy, geology, mathematics and what not, and not enough time on pharmacy. To any one making this objection, I would like to ask, what is pharmacy? Too many I fear limit it to a knowledge of how to make a mass and roll it into pills, spread a plaster, or make an emulsion, knowledge very essential to the pharmacist, but not of so much help in passing the examination, as some have no doubt learned. No one, however, would like to see the practical side of pharmacy included in our examinations more than myself, but I am dealing with present and not ideal conditions, and while our colleges of pharmacy attach due importance and give sufficient drill in practical manipulation, they do not neglect the theoretical side, which develops reasoners and thinkers, and it is from students who have received training in both these lines that we are to expect the uplifting and advancement of the profession of pharmacy.

With a thorough knowledge of the branches mentioned above, as chemistry, botany, mineralogy, etc., the student need

have no fear of what are called catch questions, and, by the way catch questions are those which happen to catch the student ignorant on that particular point. A few examples will illustrate what I mean by using general knowledge in the answering of questions, for instance: The drug journals have been publishing articles concerning the presence of arsenic in some brands of phosphate of soda found in the market. Now there are examiners that might ask what violent poison is sometimes found in phosphate of soda? We will assume that the applicant for a certificate has read in the journal concerning the presence of arsenic and jots it down in his note-book, also recalls to memory the official antidote for arsenic. But on examination day so many things had to be remembered that he was in doubt when that question was reached whether it was arsenic, antimony, barium, or some other poisonous substance.

The student of chemistry and mineralogy perhaps saw the article in the drug journal and perhaps he did not, however, he remembers that phosphate of soda is made from bone ash by treating it with sulphuric acid and neutralizing the phosphoric acid so liberated with sodium carbonate. He also remembers that sulphuric acid is made by the oxidation of sulphur and that in some localities where sulphur is scarce iron pyrites are used and that in some localities a sulphide of arsenic and iron is found, called arsenopyrite, and that sulphuric acid made from this ore is hard to free from arsenic, therefore, arsenic must be the impurity.

Again, the examiner might ask why tar is washed preparatory to making the syrup? The applicant forgets the simple statement, "Acetic acid," mentioned in the quiz-book, and consequently fails to answer. To the student having a knowledge of botany and chemistry and knowing the source of acetic acid, wood alcohol, etc., acetic acid would naturally suggest itself as the result of the destructive distillation by which tar is obtained.

One more example will suffice. Why do calomel and soda tablets turn black when brought in contact with water? The applicant may remember that black wash is made by mixing lime water and calomel, but lime water is alkaline and bicarbonate of soda is called acid sodium carbonate. The student of chemistry remembers the general action of alkalies on calomel and also that some acid salts may be alkaline to itmus paper, which is true in this case.

Examples might be multiplied indefinitely, but the above are sufficient to show the resources of the student having a general knowledge of the sciences. Unless the student approaches the profession of pharmacy with the determination to ground himself in the fundamental principles of the subjects constituting pharmacy he will continue to have difficulty with state board examinations, and in case he should succeed in cramming enough facts into his head to pass the examination, he will be hopelessly crippled for his life work, simply because he has no foundation upon which to build.

W. A. L.

Getting Rid of Rats.

Common green copperas, pulverized, and thrown pretty plentifully about where the rats travel and also into their holes so they must walk over it, will effectually drive them away, where traps, poisons and cats fail to dislodge the pests. The copperas makes their feet sore and they will speedily leave. This remedy has proven so entirely successful that it is a pleasure to make it known.—*Country Gentleman.*

FROM A TO Z

EVERY article we quote, from Acetanilid to Zinc Valerianate, is prepared with the greatest care, and will meet the most exacting requirements of the pharmacist and physician.

For dispensing physicians' prescriptions, the purity of chemicals is of the greatest importance. Impurities modify their action, and frequently mislead and disappoint the physician.

Medicinal chemicals should not be bought in bulk, but should be protected by the manufacturer's container and label. When the properties will permit, our goods are put up in cheap containers, such as cans, cartons and wooden boxes.

Our products may be obtained through all wholesale druggists at lowest prices, and we invite specification for **"M. C. W."** original packages when ordering.

EXAMINATION QUESTIONS—WEST VIRGINIA BOARD OF PHARMACY.

BOTANY AND MATERIA MEDICA.

1. Name three animal drugs.
2. State properties of each example given.
3. What is carmine, and from what is it obtained?
4. What is the difference between a root and a rhizome? Give an example of each.
5. Give the official and botanical name of dandelion.
6. State botanical name of plant from which gentian is obtained. Give habitat and state medicinal properties.
7. What is the chief constituent and medicinal property of rhatany root?
8. Give the official name, botanical name and natural order of ginger, also its chief constituents.
9. Name the two active principles found in golden seal.
10. What is the characteristic color of each.
11. What is monkshood? Name the active principle contained therein.
12. What characteristic physical property has this drug, and its fluid preparation by which it can be readily recognized?
13. What is squill? State its medicinal properties.
14. Name two varieties of cinchona and state what per cent. of alkaloid the bark should contain.
15. What are the important alkaloids found in cinchona bark?
16. Give the habitat and botanical name of wild cherry, also part used.
17. Give dose and use of alkaloid found in deadly nightshade.
18. What is opium? How is it obtained?
19. Name the principal alkaloid obtained therefrom, and state what per cent. the gum should contain.
20. Give the average dose of morphine, and antidote for same.
21. State the pharmaceutical names of the two chamomiles, and to what natural order they belong.
22. Which of the following are classified as seeds, and which as fruits: Anisum, fœniculm, amygdala, nux vomica?
23. What is mace, and for what used?
24. What is *Secale Cornutum?* Give its source.
25. How is gum kino obtained?

PHARMACY.

1. Define pharmacy.
2. State the number of grains in two fluid ounces sulphuric acid. Show your work.
3. How many grains in a gramme, and how is a cubic centimetre obtained?
4. What is specific gravity, and how would you obtain the specific gravity of a solid?
5. State the difference between an infusion and a decoction.
6. What are the principles of a Bunsen burner?
7. Explain the difference between evaporation and distillation.
8. What process is directed in the Pharmacopœia for making fluid extracts?
9. Outline the process for making Basham's Mixture. Should it be clear or cloudy?
10. Is the difference between crystalline and granular salts chemical or physical? State how each is obtained.
11. How is chloride of ammonia purified, and what is its commercial source?
12. Explain the principle of percolation.
13. What per cent. of opium is used in making tincture of opium? Deodorized tincture opium?
14. Why is the latter the more acceptable preparation?
15. Outline the preparation of same, giving ingredients used.
16. What are the ingredients in paregoric? Give the per cent. of opium in same.
17. How is hydrated oxide iron prepared? For what is it an antidote?
18. Give a simple test that will show the admixture of water with alcohol.
19. Of a volatile oil with alcohol.
20. Outline the process for making aromatic water, of the U. S. P.
21. Give the official name and ingredients in compound licorice powder.
22. Official name and ingredients in zinc ointment.
23. Official name and ingredients in soap liniment.
24. Official name and ingredients in Fowler's solution.
25. What takes place in tincture kino upon long standing?

CHEMISTRY.

1. State difference between organic and inorganic chemistry.
2. What do you understand by the term "chemical affinity"?
3. Define an atom, molecule, mass.
4. What is understood by atomic weight?

Digitized by Google

5. Explain molecular weight.
6. What is an element?
7. Mention four elements, and give their atomic weight.
8. How is hydrochloric acid prepared?
9. What is the source of phosphorus?
10. Give the symbols for sulphuric acid, hydrogen peroxide, corrosive sublimate and nascent ammonia.
11. What is a chemical antidote?
12. What is formed when the chemical antidote for arsenic is administered?
13. What form of iron is prepared for the manufacture of the scale salts of same?
14. What results from the mixture of a solution of sugar lead and white vitriol?
15. Give a test for a chloride in solution.
16. Give a test for a sulphate in solution.
17. How would you chemically ascertain the contamination of copper in a soda fountain?
18. How would you discover the contamination of iron in the steel or iron fountain?
19. Is chloride of gold and soda a definite chemical compound? If not, why?
20. Outline Marsh's tests for arsenic.
21. What effect has carbonate of magnesia and lime on copaiba?
22. How would you distinguish creosote from carbolic acid?
23. What is the difference, if any, between chloral and chloral hydrate?
24. State the difference between red and yellow oxide mercury.
25. How is iodide potassium prepared?

WHY DO SYRUPS SPOIL?*

By Alfred I. Cohn, Ph. G.

Why the syrups of the U. S. Pharmacopœia so frequently spoil is a question that has engaged the attention of many investigators. The spoiling has been ascribed to various causes, and almost as many means have been proposed for its avoidance; in fact, a search through the pharmaceutical literature of the past decade or two will bring to light a striking variety of expedients adopted for preventing or retarding decomposition in pharmacopœial syrups, not only individually, but collectively as well.

Among the causes which are prone to occasion deterioration in syrups the following are the most prominent:

1. Thinness of syrup—from insufficiency of sugar.
2. Constant or prolonged exposure at too high a temperature; as in a room heated too warmly, proximity to a heater, etc.
3. The presence of substances prone to ferment; such as acacia, albumin, gelatine, pectinous matter, etc.
4. Exposure to light; as in the case of syrups containing ferric salts.
5. The presence of substances which are naturally inclined to be unstable; such as hydriodic acid, hypophosphites, etc.
6. Fermentation due to the action of yeast or other agents.
7. Impurities in the sugar used in making the syrup; *e g.*, ultramarine, etc.

On carefully examining these causes we find that, with the exception of one or two, perhaps, they are all practically under the control of the pharmacist.

It is a well-known fact that a syrup of proper density is far less prone to spoil, provided it be made from proper materials, than a syrup made with insufficient sugar. On the other hand, a *too* concentrated syrup is just as likely to spoil as a weak syrup, because it is equally well-known that a very concentrated syrup will deposit crystals of sugar, and in doing so, will become weaker in sugar than if made with just sufficient sugar. In other words, the sugar, in crystallizing out, leaves the syrup deficient in sugar. A very concentrated syrup must not be kept in a place where the temperature is likely to fall much, because this favors the deposition of sugar and thus makes the syrup too thin and prone to spoil.

A constant or prolonged exposure to warmth is apt to be detrimental for practically the same reason as mentioned above—the warmth makes the syrup too thin, so to speak, and renders it subject to change.

The presence of easily fermentable substances, and those readily prone to decompose, cannot, of course, be avoided; hence it is all the more important that due regard be paid to the quality of the syrup used, in order not to increase their tendency to decompose, but rather to prevent or at least retard decomposition as much as possible.

Exposure to light, and the action of microbic agents, are also easily avoided and prevented.

We now come to what is, perhaps, the most frequent and most mischievous of all the causes from which syrups spoil, and that is, the impurities in the sugar from which the syrup is made.

Syrup made from sugar answering the requirements demanded by the U. S. P., is a very stable preparation, if of proper density. Experience, moreover, has shown such a syrup to be the best possible preservative of unstable chemicals, in the sense of its being able to prevent, or at least greatly retard the decomposition to which such chemicals are prone. Nevertheless substitutes for it have been proposed or highly recommended, among others the total or partial replacement of the syrup by glucose or glycerine, or even both. In certain syrups additional expedients, too, have been recommended, yet in my experience these substitutes and expedients are unnecessary; in fact, under certain circumstances they are likely to aggravate matters.

These substitutes and expedients have all been proposed or recommended, it is my belief, because syrup as ordinarily made is not prepared from suitable materials. We are all accustomed to consider the sugar we usually buy as so perfectly fitted for every use in our daily domestic lives, that the thought is scarcely likely to strike one that the spoiling of a syrup may be traced to the quality of the sugar used.

The pharmacist usually obtains his supply of sugar from the grocer; or he may, perhaps, in some instances buy it direct from the manufacturer by the barrel. In neither case, however, is he likely to order or receive *pure* sugar, simply because pure sugar has naturally a yellowish color, to correct

*Paper presented at the Pharmaceutical Meeting of Philadelphia College of Pharmacy, February 19.

Digitized by Google

which the manufacturer adds some blue pigment, usually ultramarine blue, to "whiten" the sugar—just as the laundress blues her linen, and for a similar reason—and thus renders it more satisfactory in appearance and hence more saleable.

Ultramarine blue, however, is an exceedingly mischievous substance when present in pharmacopœial syrups, and it is really the most frequent cause of the spoiling of the latter. The quantity of the pigment present in sugar is nowise sufficient to affect the eligibility of sugar as a daily food, yet it is quite sufficient to cause the decomposition of easily decomposable chemicals. This will be evident on considering how ultramarine blue is made, and what it is, chemically.

Ultramarine blue is prepared by heating together a mixture of fine white clay or silica with sodium carbonate, sulphur and charcoal; or a mixture of kaolin, sodium sulphate, sodium carbonate, sulphur and charcoal. According to the proportions taken of the several ingredients, ultramarines of various colors may be obtained. For instance, there may be prepared a deep blue, light blue, violet blue, green, white, violet, red, and also yellow ultramarine. All these pigments are of varying composition, and using one and the same formula, it is exceedingly difficult, if not almost impossible to secure uniform results, as the different lots are very likely to exhibit varying shades and have different compositions. No positive formula can hence be properly assigned to any one ultramarine.

According to some investigators, the ultramarines are considered to be compounds of aluminium sodium silicate with sodium sulphide; by others they are believed to be mixtures of aluminium silicate, sodium polysulphide and sodium sulphate, sulphite and hyposulphite; others again state them to be aluminium sodium silicates in which a part of the oxygen is replaced by sulphur; many again believe them to be compounds of aluminium-sodium silicate with aluminium sulphate.

Which ever of these views is taken, however, the broad fact stands out that an ultramarine is to all intents and purposes a sulphide; and whether of aluminium, silicon, or sodium makes little difference so far as its relation to our subject is concerned. When it is also added that ultramarine blue is capable of effecting all the disturbance of which a readily decomposable sulphide is capable, and that it is decomposed by all acids, even the weakest, as well as by acid salts, such as alum, for instance; when we consider that it is also decomposed by simply boiling (in syrup or water), we may apprehend what an important influence its presence may have in syrups containing salts inclined to be unstable.

The U. S. P. demands that sugar be free from ultramarine, yet it is more than likely that few pharmacists note this requirement with care, and fewer still are likely to test the sugar they buy to see that it is free from this pigment.

It would appear therefore expedient, and almost necessary, in fact, that a form of sugar be made official in the U. S. P. now under revision, which may always be depended upon as being absolutely free from all disturbing contaminations and impurities and which shall yet be within the reach of every pharmacist.

The sugar which will best answer all requirements is white rock candy. This sugar, because obtained by crystallization, can always be depended upon as being free from ultramarine.

Attention having thus been called to the mischievous properties possessed by ultramarine, it may readily be seen what reaction the pigment would effect in the individual syrups.

On allowing a simple syrup made by the cold process, to stand, a deposit forms after a while, consisting of sulphur precipitated as a result of the decomposition of the pigment; sometimes the pigment itself is also deposited, particularly if a large quantity has been used in "whitening" the sugar. The syrup is then likely to acquire a rather disagreeable odor. If the syrup is made by boiling, the ultramarine is decomposed by the continued heating and a blackish scum rises, which may be removed. A syrup made by boiling is hence more likely to keep better than one not boiled.

In syrup of acacia, the calcium gummate and ultramarine react, a calcium sulphide being formed. The syrup, which is naturally prone to decompose even under the most favorable conditions of preservation, is thus made to deteriorate with increased rapidity.

In syrups of citric acid, calcium lactophosphate, lemon and squill, free acids are present in sufficient quantity to decompose the ultramarine and render the syrups unfit for use.

In the case of syrup of hydriodic acid we have a naturally unstable chemical which requires all our art to properly preserve, and which must be particularly well

Digitized by Google

protected from the action of reducers. With such a chemical, ultramarine immediately gives a reaction. The syrup soon develops a red color, and becomes totally unfit for use. This syrup has been the subject of much experiment with a view to finding means of rendering it more stable. Among these means there have been recommended the partial or total replacement of the sugar by glucose or glycerine. Glucose as ordinarily found in the market is unfit for this purpose, as it nearly always contains appreciable quantities of free sulphuric acid, and is, moreover, very prone to ferment. Glycerine is totally inadmissible, as it enters into chemical reaction with the hydriodic acid, allyl iodide being formed. The syrup soon develops a straw color which rapidly deepens, while the preparation acquires a disagreeable odor and taste which render the syrup totally unfit for use.

In syrup of ferrous iodide we again have a readily decomposable iron salt subjected besides to the action of a sulphide. Naturally enough, ferrous sulphide forms an unstable iodide, from which free iodine is soon liberated. In this syrup glycerine would be a good preservative, were it not that pure syrup is very much better. Glucose is admissible because of the reasons already mentioned. To fully appreciate what effect the presence of ultramarine has on this syrup it is but necessary to boil a syrup made from ordinary sugar and one made from rock candy, That made with sugar turns brown when the boiling point is approached. On the other hand, that free from ultramarine may be boiled for a long time without the fine green tint of the syrup being in any way impaired. True, the particles of super-heated syrup adhering to the flask or evaporating dish above the surface of the liquid may carbonize, and may impart a color to the syrup when dissolved in the latter, but the color will not be due to decomposition of the syrup, as is the case when a sugar syrup has been used. If care be taken to avoid the solution of the carbonized particles, the boiling syrup retains its handsome, brilliant green color. Nor is it necessary to keep any iron wire in a syrup so made, as recommended by some. The syrup may be even freely exposed, and does not require keeping in well-filled bottles only, or in small, completely-filled bottles.

In the syrups containing hypophosphites, we also have readily changeable salts acted upon by a sulphide. The compound syrup of the National Formulary in particular spoils rapidly if any ultramarine is present, whereas if absent the syrup keeps perfectly.

Syrups of senega, senna, and rhubarb contain polygalic acid and chrysophanic acid respectively; syrup of wild cherry, hydrocyanic and tannic acid; syrup of blackberry root, tannic acid; in fact, an inspection of all pharmacopœial syrups will show that there are but few which do not contain one or more constituents incompatible with and fully able to decompose ultramarine blue.

To go a step further, syrup is a valued adjuvant, and, excepting water, is perhaps more largely used in prescriptions than any other substance. It is thus brought into contact with every kind and variety of substances, a fact which in itself furnishes sufficient reason for insisting that a pigment-free syrup be made obligatory in the next Pharmacopœia, to be prepared from white rock candy instead of sugar.

It is true the initial expense of preparing such a syrup is greater than when sugar is used, because rock candy itself costs somewhat more than sugar, and, besides, since it contains more water of crystallization than the latter, more of it must be used to obtain a syrup of proper density.

Notwithstanding the greater first cost, however, a syrup so made will be found cheaper in the end if there be taken into account not only the time wasted, but also the pecuniary loss entailed by having to throw away the spoiled material.

He who ascends the mountain tops shall find
The loftiest peaks most wrapped in clouds and snow;
He who surpasses or subdues mankind
Must look down on the hate of those below.

PHARMACEUTICAL FLOWERS.

On a number of the letters of invitation to the commencement exercises of our American pharmaceutical colleges we have noticed lately the words "No Flowers" conspicuously displayed. While the object aimed at in forbidding the presenting of flowers to graduates is most commendable, still one cannot without regret contemplate their absence during such occasions, not only because of the love they typify on the part of many of the donors, but also because of their beauty, their fragrance, and the lessons their presence impress upon the thoughtful. When they become mere messages of ostentatious display for the wealthy or of extravagant expenditure for the poor, the more quickly they are dismissed the better. If it were understood that all flowers sent to a commencement became the common property of the class, to be distributed among the graduates at the close of the exercises regardless of their source, there would be fewer and less expensive displays, and it would rid the occasion of many heart-burnings and jealousies.

There is certainly no college commencement more appropriate than that of the pharmaceutical college, for a display of flowers. A large part of the study of such colleges is botanic in character, and many of the most beautiful flowers in the world have their place in the Pharmacopœia. To students in other kinds of colleges flowers mean much less than they do to students of pharmacy. A bouquet culled from a pharmaceutical botanic garden or conservatory, even if confined exclusively to flowers from official plants, could be made into a magnificent present. If some future class in one of our colleges could arrange in advance with a good florist to have him supply them with bouquets made exclusively from the flowers of medicinal plants, it would be a fine object-lesson for students, and one which they would not soon forget. It would, of course, be difficult, and with some kinds impossible, to get the richest representatives of the Pharmacopœia together during April or May. The difficulty of getting them to blossom at that time, even in the best of conservatories, could not, except in some of them, be overcome.

NOTICE! TO AVOID COUNTERFEITS

"Orange Blossom" boxes are all wrapped in a handsome and intricate label made by the Western Bank Note Company.

BEWARE OF FRAUDULENT IMITATIONS.

THE FAMOUS SPECIFIC

ORANGE BLOSSOM

Is a positive cure for the following diseases:—Inflammation, Congestion and Falling of the Womb, Anteversion, Retroversion and Prolapsus, Dropsy of Womb, Ulceration, Polypus, Tumors, Leucorrhœa, Profuse and Difficult Menstruation, Ovarian Tumors, Fibroid Tumors, Inflammation and Congestion of the Ovaries, Cancers in their Earlier Stages, Laceration of Cervix (due to childbirth) Radically Cured.

3 and 4 Hubbard Court, - - - Chicago, Ills.

Notice:—To all retail druggists handling Orange Blossom we furnish (all charges prepaid) free samples and Orange Blossom circulars bearing the druggist's business card. Write.

Digitized by Google

The choice, however, is quite large; and a skilled florist can work wonders. The rose is always available. The convallaria he has already under control. The crocus has a representative in the vernal form. With calendula, aconite, cypripedium, digitalis, poppy, pomegranate and larkspur he would have little trouble. These would give a wealth of orange, blue, yellow, purple, crimson and scarlet. Could star anise or orange add their virgin white, and acacia or catechu give variety with their yellow, petalless spikes and their fine feathery leaves, such a bouquet would be charming. Now add a spike of blood-red aloe or carmine quassia, a blue iris, a yellow gentian, a red-budded clove, the spotted pink-white butterfly-like tamarind, a yellow to orange arnica, a crimson krameria, a lilac-like branch of pink flowered cinchona, and bind the whole with jalap vine covered with its bright red blossoms like morning glories, and there is beauty fit for the palace of an empress.

Not enough of our graduates in pharmacy are familiar with the faces of these, their friends. They know their names, can tell their orders, genera and species; are able to describe their structure; can tell the medicinal properties of the plants from which they come; but it is not uncommon for them to pass some of the flowers by on the street without being able to recognize them. Many of them would make magnificent window displays for drug stores, and thus become available as good advertisements. Some can be grown in the garden in summer, and many more can be cared for in a green-house, bay-window or conservatory. Druggists would do well to try cultivating the most hardy among them, if for no other reason than to become acquainted with their appearance. Many druggists have gardens in which they grow plants that have no particular interest to them aside from their beauty. Why not use some of the space for educational purposes as well, and give your friends a chance to admire the beauties of aconite, digitalis, arnica and others of the most common and hardy?—*Merck's Report.*

A young lady who was a little behindhand in her outfit, surprised her parents the other day by asking why she was unlike George Washington. When they gave it up she told them because she had no little hat yet.

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

WHEN ORDERING

BORAX and BORACIC ACID

SPECIFY STANDARD BRANDS OF THE

PACIFIC COAST BORAX CO.

Our "MULE TEAM" Brand BORAX in one, two and five pound packages will prove good sellers for the household trade.

Digitized by Google

SIX MONTHS' TREATMENT FOR ONE DOLLAR

Dr. BurKhart's VEGETABLE COMPOUND.

DR. W. S. BURKHART, Cincinnati, Ohio.

The Italian Chamber of Deputies has accepted a bill making the sale of quinine a State monopoly. It will be sold by pharmacists and by all sellers of other State monopolies (tobacco and salt), provided they are not within 500 meters of the nearest pharmacy. It will be put up in tablets of 20 centigrammes each, 10 tablets in an air tight tube, and sold at the rate of 40 centesimi per tube for the hydrochloride, and 32 centesimi for the sulphate. The profit accruing from the sale will be devoted to devising means for the prevention of malaria. A law is also under consideration to compel all employers in malarial districts to provide the latest remedies for curing it, and to give the necessary medicaments to their workmen free of charge. They must also see that proper dwelling places and sick wards are provided, and for this they will get loans at low interest from the public treasury and a reduction in taxes.

—*The Chemist and Druggist.*

Laxative Bromo Quinine

Is a Valid Trade Mark, And Must Not Be Imitated.

The Paris Medicine Company won a suit in the United States Circuit Court for the District of Indiana, establishing the validity of **Laxative Bromo Quinine** as a trade mark, and perpetually enjoining the defendant, Newton C. Davis, of Frankfort, Indiana, from using these or any similar words to describe a medicinal preparation of his manufacture. On account of the popularity of **Laxative Bromo Quinine,** it still has a few imitations put up under similar names, which are calculated to deceive the public.

A rank imitation is manufactured by a concern at Detroit, and suit against them is now pending in the courts, and the indications point to a favorable decision in behalf of the Paris Medicine Company. The Paris Medicine Company will bring suit at once against any and all infringes of their product.

There is no excuse for druggists handling imitations of **Laxative Bromo Quinine,** as long as the Paris Medicine Company deal with the Druggists on the same liberal basis as heretofore.

The Genuine LAXATIVE BROMO QUININE is for sale by all Wholesale Druggists.

THE BUSINESS MAN'S PLACE.

"Seest thou a man diligent in his business? He shall stand before kings; he shall not stand before mean men."—*Proverbs of Solomon.*

"That man is but of the lower part of the world that is not brought up to business and affairs."
—*Owen Feltham.*

THERE is a vast amount of pessimism abroad in the minds of men of affairs in the present day. Philosophers may reason of evolution, and divines proclaim the potency of the moral and spiritual forces forever at work in lifting men from a lower to a higher plane, persuading them to follow noble rather than ignoble ideals, and to cultivate a spirit of generous interest in the welfare of their fellows rather than one of selfish devotion to their own pursuits; but the men who are in the pit striving and contending one with another like wild beasts in the arena become saturated with the poison of cynicism, for which neither the philosopher's logic nor the theologian's dreams is an effective antidote. The truth is, there is a vast amount of meanness among men, and it is not restricted to any class or condition. No trade or profession is exempt from its inroads. There are mean men in business, in scientific pursuits, in literary work; there are small men in office, contemptible men in the pulpit, and on the bench, and even pharmacy, which ought to be chief among

Digitized by Google

ten thousand for the honor and high-mindedness of its followers is permeated with men of a type as little to be admired as Dante's Geryon.

We recently picked up a drug journal of last year and read therein a series of contributions from prominent pharmacists in different sections of the country on pharmaceutical substitution, and the perusal of these were enough to cause a decent pharmacist to heartily wish himself in some other sphere. Only a few years ago we knew of a pharmacist deliberately preparing an ointment to be applied to the soles of the feet in which he used red mercuric oxide in place of aristol, not from ignorance but from pure "cussedness," and the result—a frightful case of mercurial eczema, from which the victim was several months in recovering after weeks of intense suffering.

But such instances are rare. Demons who thus stalk in the guise of men are relatively few. The path of success in business is not only the path of common-sense, it is also the path of common honesty. Men more and more are coming to realize that there is no permanent prosperity in any pursuit except that whose basis is integrity. While on every hand the cry is heard, "What will it profit me?" the unanswerable echo to that cry is, "It pays to be upright." Bacon was accustomed to say that in business the nearest way was commonly the foulest, and if a man would go the fairest way he must go somewhat about. The journey may take a longer time, but there should be such pleasure in the labor by the way, and such enjoyment of the results as to more than compensate for the time spent in waiting.

Many, perhaps most men do not appreciate the fact that a daily task of even common drudgery enhances the joy and develops the sweetness of human life. If we consider the qualities which are necessary for the successful conduct of any important business undertaking it must become apparent that a business career is not one of narrow limitations in this age of the world. The largest demand for men with great mental endowment, with broad ideas comes to-day from the business world, and the successful men of great business enterprises are not only "standing before kings" but actually standing *above* them.

We may not all be Pierpont Morgans or Andrew Carnegies, feted by monarchs and receiving more attention in their journeyings than the kings and emperors of the Old World, but we can be kingly men, monarchs in our own domain, the masters of ourselves and the servants of our fellows. After reckoning with all the narrow selfishness of men, even in its most repulsive forms, the fact remains that the day is not distant, if it is not already here, when the foundations for any permanent business success must be laid upon the bed-rock principles of integrity and honesty. Once this fact is recognized men will follow in its lead, first because it is to their interests so to do, and after that in course from the gratification which inevitably follows from the sense of well-doing, for even the obnoxious traits in the characters of unrighteous men are but a fragment of their entire being, and the conflict between the good and the bad in most men is not so hopeless as many would have us believe.

SELECT ONLY THE BEST.

NOT every well educated lawyer will make a good judge; not every competent school teacher will make an acceptable superintendent of public schools; not every politician will make a satisfactory executive officer, nor will every skillful pharmacist make a useful member of a board of pharmacy. As a rule there is not sufficient attention given in the several states to the selection of men for this most important and responsible position. The cause of this is a lack of appreciation of the necessity for the best men obtainable for such service and an ignorance of the qualifications which go toward making a good member. In many of the states the privilege of nominating persons to the appointing power for vacancies in boards of pharmacy is accorded state associations of pharmacists, and this is a very wise provision, provided always that the members of these associations exercise the care which they should when making the nominations. The plain intent of such provisions is that the governors whose duty it is to appoint men to these places are not as conversant with the qualifications of aspirants for this honor as are those most intimately associated with them in professional and business affairs and an opportunity is therefore given the pharmacists to elect from their number those whom they deem competent to suitably discharge the duties which devolve upon them. Now, pharmacists ought to highly appreciate this opportunity so wisely afforded them and exercise the

Digitized by Google

greatest care in naming only those men whom they know will perform the work faithfully and well. Usually three to five men is the full complement of those nominated, from among which the appointment of one member is to be made. It is not sufficient that one or two of the nominees should be acceptable, for there is no method of foretelling whether the acceptable are to be the successful ones or not. A governor may take a list of five names which has been submitted to him by an association of pharmacists and assume, as he has a perfect right to do, that any one of the five is in all respects a proper person to receive an appointment at his hands and if there should be a difference in ability or adaptation his choice will just as likely fall upon the poorest as the best of the lot.

It is remarkable how many men are ambitious to become members of boards of pharmacy. The compensation is not commensurate with the work to be done, the honor is not a great one, the responsibility, to a conscientious man, is large, and the reproaches heaped upon him, even after he has done his best, are such as no self-respecting man can endure with complacency. One must have not a little of the spirit of altruism to covet a place of this kind in order that he may serve others rather than himself, for a man whose object is to become a member of a board chiefly for what he can get out of it, rather than for the purpose of putting something into it, is not a fit person to occupy a position of this nature. One must give a great deal for which he is to receive no compensation, nor must he expect any. One should be qualified professionally; he should be possessed of a temperate mind, be able, dispassionately, to weigh all sides of any case, and be of such moral fibre that he will intuitively do right because it is the right thing to do, and let the results take care of themselves. This is no fanciful standard, it is no impossible ideal. Such men are to be found in pharmacy, as in every other profession, and they should be sought for with all diligence by members of state associations, and when a list with three or five names upon it is submitted to a governor it should be with the satisfied feeling that no matter which of the lot is chosen he will do honor to the place he reaches and reflect credit upon both the appointing power and upon the intelligence of his associates, who have staked their confidence in his integrity by selecting him. Such a man will bring honor into any position he may be called upon to fill. The well-being of those who are to come in contact with him in an official capacity will be safe, and no matter what may be said of him by those who have failed to use him for their own selfish aims he will still command the respect of pure men everywhere, and, greatest of all, the respect of himself.

Work for the Ohio State Pharmaceutical Association.

THE Pharmaceutical Association of Ohio, which meets in annual session in Dayton concurrent with this issue of THE MIDLAND, has before it an unusual number of important matters for discussion and action. If the members will consent to put in one full day at hard labor they can accomplish all that is necessary to be done and have the remaining time for pleasure of any sort they may choose.

B. S. YOUNG, Ada,
President, Ohio Pharmaceutical Association.

The rapidity and energy with which the questions coming before the association may be disposed of depends a good deal upon the attention given them by the officers. Chief among the propositions is the Worcester Plan, familiar to all readers of drug journals, and which should be commended by the association without consuming longer time than is necessary to have it understood by any who may not have considered it. In connection with this the greatest caution should be used in the choice of delegates to the National Association of Retail Druggists, which is to meet in Buffalo in October. Whether this delegation be appointed by the president or elected by the association is a matter of little importance, but that only representative retail druggists, who are not in any manner tinctured with worshipful admiration of the proprietary medicine interests should represent the Ohio association is of more importance this year than ever before. Let us have men who not only "know their business" but are keen enough to measure the strength of the forces which are lined up against the retail druggists; men who are capable of injecting a little nerve force into the spinal column of their brethren who have been anæsthetized by the suave doctors of the P. A. of A.; men who will not be hypnotized into holding the sack by any honied promise of a "one dollar in ten" reward, the "one" to be paid into the treasury

Digitized by Google

of the N. A. R. D. to the credit of a fund known as the M. G. (magnanimous gift) to aid in "carrying on the good work"; men who will go to the place of meeting, attend

L. C. HOPP, Cleveland,
Secretary, Ohio State Pharmaceutical Association.

all sessions, and stay until the last dog is hung and the bugle sounded over his resting place.

This is also an opportune year in which the association may profitably take another step forward in the matter of pharmaceutical education. The first grip of this kind was taken five years ago and five years is long enough to hold on to one cable. It is time to put something on our hands and take another "holt."

Then it is high time that something be done with the poison laws of the state. The legislature will meet during the approaching winter. We are to congratulate ourselves over the prospect at this writing of having at least two pharmacists in the next General Assembly, and one of the two distinguished throughout the country for his fitness for work in legislation upon questions pertaining to pharmacy.

These are a few of the topics of commanding interest. Others will appear, and if wisely considered and judiciously acted upon will mark the twenty-third annual meeting as one of the greatest in the history of the O. S. P. A.

I put my heart to school,
In the world where men grow wise.
"Go out," I said, "and learn the rule;
Come back when you win the prize."

My heart came back again,
"And where is the prize?"
I cried.
"The rule was false, and the prize was pain,
And the teachers's name was Pride."
—Henry Van Dyke.

J. H. VON STEIN, Upper Sandusky,
Permanent Treasurer, Ohio Pharmaceutical Association.

EDITORIAL NOTES.

WE incline to the opinion that the indiscriminate use of potassium chlorate for internal administration is a very injurious practice. This article is one of the most common of the remedies in use in domestic medication and the probabilities are that it has been the cause of many cases of serious illness when administered as a cure for some insignificant ailment which would have recovered without a remedy in a brief period. A writer in the *Eclectic Medical Journal* says of this article:

"Chlorate of potassium is irritant to the kidneys and the danger attending its use is from this cause. Usually it is prescribed indiscriminately and often used by the laity, dose after dose being taken for sore throat; the urine becomes scantier and by and by uremic poisoning begins and we have serious trouble. In many cases of scarletina it is administered for the throat trouble, and the kidney trouble which follows is in almost every case due to this drug and not to the disease. In diphtheria albumin frequently appears in the urine. Chlorate of potassium aggravates the kidney congestion and from this cause the urine is often smoky and albuminous as well as much diminished in quantity. Chlorate of potassium is answerable for many deaths attributed to diphtheria."

It was our custom when in the retail drug business never to recommend chlorate of potassium for internal medication and to discourage customers from buying it when they would ask for it for sore throat. We have known persons to buy the tablets and use them almost as one would use a confection, and we have never known one using the drug after this fashion to be in good health.

* * *

THE recent explosion of a soda fountain in an Ohio city by which a druggist and his assistant were quite seriously injured recalls the need of a careful testing of soda fountains and generators, which should be done at least once a year. It is doubtful if the great majority of druggists who make their own soda water ever think of testing the generators or tanks, and every season we read of accidents from the letting go of some part of the apparatus, which might have been averted had the precaution been taken to have the outfit, which is subject to high pressure, properly tested. Men will go on using, year after year, founts and generators with no thought of having them carefully examined, until one day some one is badly injured or killed and a good deal of property destroyed.

* * *

THERE is such thing as being too progressive. It is not always wise to assume that new methods can wholly supplant those that have stood the test of satisfactory service in all sorts of emergencies. It is now claimed that the municipal authorities of Jacksonville had abandoned the use of steam fire engines several years ago, on account of their being superfluous when the water supply was abundant, the pressure strong and the number of feet of good hose in excess of any ordinary need. Fire engines were out of date and must go. However, the underwriters did not reduce insurance rates on account of the modern methods of combating fire and this certainly did not appear to endorse the new idea. It is openly stated that the great disaster might have been averted if two or three steam engines had been available at the breaking out of the fire. "Prove all things, hold fast that which is good."

* * *

EVERY druggist is supposed to know that on July first the stamp tax was taken off a number of articles sold by druggists, as proprietary medicines, perfumery and cosmetics, chewing gum. Also bank checks, promissory notes, money orders, express receipts, telephone and telegraph mssages. This is not the complete list but they are the ones in which the largest number of druggists are interested.

Unused stamps of all kinds, according to the circular issued by the Treasury Department, may be redeemed when presented in sums of $2.00 or over. Application for the redemption of these stamps should be made to the Collector of Internal Revenue in the district in which you reside, and a blank form (No. 38) will be furnished by him, upon which to enumerate the stamps to be redeemed. As yet no provision for the redemption of stamps which were affixed to packages on hand July 1st, 1901, and the statement is made by the Treasury Department that these are not redeemable. This is perhaps true, except as provision may hereafter be made for their redemption by future act of Congress. A New York firm is sending out circulars, accom-

Digitized by Google

panied by a blank form for inventory of stamps which were affixed to packages on July 1st, and advising those interested to take account of such, make affidavit to the statement, to be supported by the affidavits of two witnesses, which will form the basis for a claim for the amount of the unused stamps in the future. This is important to those who have a stock of unsold stamped goods on hand on July 1st. We append the closing paragraphs of this circular for the consideration of those interested:

"If the stock of proprietary articles in your hands on the 1st day of July is taken in the presence of two witnesses; and affidavits in the form suggested by us are made by you and the witnesses, the proof as to the amount of tax paid on goods unsold in your hands on the 1st of July will be as strong as that required from tobacco dealers.

"It is clear that in equity such a claim is as strong as that of the dealer in tobacco, and it is our opinion that if the necessary steps are taken to secure proofs of the stock of goods in your hands on July 1st, on proper presentation of the facts being made to Congress, legislation can be secured directing the Commissioner of Internal Revenue to examine and pay these claims.

"We send you herewith form of inventory, with blank forms for affidavits. (Two witnesses may be selected from the clerks in your employ.) Should you decide to take action to recover the amount of tax paid on goods which may be in your hands on July 1st, we will promptly forward as many of these blanks as you may require.

"After you have taken an inventory of the stamped goods in your possession on July 1st, a claim for the value of the stamps should be filed in the Internal Revenue District in which the stamps were purchased and affixed. It will be necessary in order to file this claim that you should co-operate with the manufacturers of the stamped articles, and we have no doubt that satisfactory arrangements can be made by you with the manufacturer of the goods which you will have on hand. These details can be arranged later. *The most important matter for the present is that a complete inventory should be taken of all the stamped articles in your possession on the first day of July.*"

* * *

THE Pharmaceutical Association of Pennsylvania held its annual meeting June 18-20. The state board received a pretty general shaking up over its ill-considered efforts toward the enforcement of the pharmacy law. After a number of the members had expressed their views upon the action of the board in prosecutions a committee was appointed to prepare resolutions expressing the sentiment of the association in regard to the methods of enforcing the law. The report, of course, pledged the association as in favor of the judicious exercise of authority in suppressing all violations of law, but regarded the manner in which the work had been done as subject to "grave criticism." In brief, the resolutions adopted places the association in favor of law, "but recognizes the peril confronting the best interests of pharmacy when sound judgment is not exercised in the enforement of law." Very true! But why not go straight to the root of the matter by bluntly stating that druggists are not in favor of the strict enforcement of pharmacy laws, and that boards of pharmacy must not take their duties in this respect too seriously?

* * *

THE state associations of Massachusetts and Pennsylvania have endorsed the Worcester enforcement plan. Ohio is next in line and will follow suit.

* * *

THE following is a fair sample of what is encountered more than once in attempting to enforce a pharmacy law. In September, 1900, a firm in a town of northern Ohio was reported as conducting a drug store illegally. A member of the Board of Pharmacy visited the town, found the report correct and caused the arrest of the principal, who was arraigned before the Mayor of the village, found guilty of the charge and fined $20 and costs of prosecution. Thinking it cheaper to pay fines than employ registered pharmacists, the store was afterward conducted in like manner, when a few weeks ago a second complaint was sent from the village. The attorney for the Board visited the town, arraigned the offender again before the same Mayor, who this time granted a continuance of the case for one week, thereby putting the State to double expense for the return trip. The second trial occupied an entire day, the facts were clearly shown, even more strongly than in the first instance, but the decision of the court was that the defendant *was not guilty of the charge, but must pay the costs!* Of course such a brilliant decision could not stand, since if the accused was innocent he could not be fined in the amount of the costs or any other sum, and the method by which the learned (?) Mayor reached his decision would form an interesting study if there was any method in it. We have heard of towns and even cities in which at the time of election the voters thought they were choosing a mayor, but after he became *installed* they discovered that he was an ass.

Life is mainly froth and bubble,
Two things stand like stone;
Kindness in another's trouble,
Courage in your own.

BOOK NOTICES.

A REVIEW—"ETIDORHPA."*

The eleventh edition of Professor Lloyd's "Etidorhpa" has made its appearance. It comes to us freshly, as the earlier editions had not met our attention, and we are fascinated, if not wholly charmed.

It is a marvelous tale of the impossible journey of a mystical personage, told with the calm assurance of established truth, until our amazement at his presumption usually ends in an—"After all, why not?" It is full of marvel, rife with suggestions, and truly fine in description. It is a scientific work, imbedded in charming fiction. Those of us who belong to the class of ordinary readers will be unable to grasp the significance of much that is important, but we catch glimpses of open doors now and then, which promise much and stimulate inquiry. It may leave us a little earth-bound and weary at times, but just as we are growing faint the strain is sure to be lifted while we sail on toward greater promise.

We have read nothing finer than the description of the drunkard's hell, with its contrasting vision of Etidorhpa. The whole journey is typical of the brave man's struggle toward the highest, and that it leaves us unsatisfied and baffled at the close is due to the fact that there are realms into which even Professor Lloyd's imagination cannot penetrate, upon which he, with the rest of us, may gaze only when the hindering body is dissolved and this mortal shall have put on immortality.

*Dodd, Mead & Co., New York, publishers.

Prof. James H. Beal has recently issued a second edition, revised and enlarged, of his work, "*Equation Writing, Chemical and Pharmaceutical Arithmetic.*"

Students of chemistry and pharmacy will find in this little volume a great deal of instruction of a very valuable character. Prof. Beal is not only scientific but thorough in all his work. This book is not after the manner of the quiz compend; its purpose is not to inject in the mind of the reader a mass of statements, accurate or inaccurate as may happen, but it aims at putting him in the way of securing the information he is in need of for himself, through methods which are not only scientific but which are so clearly elaborated as to be easily comprehended by any person possessed of sufficient brain to be fit to study pharmacy or chemistry. The book is to be warmly commended. The Calumet Publishing Co., Pittsburg, Pa., are the publishers.

The Delineator for July.

It would appear that magazine illustration had about reached the climax of perfection judging from the pictures of the Pan-American Exposition buildings in the *Delineator* for July. The publishers claim to have had the advantage accorded no other magazine of working directly from the original color-sketches of Mr. Turner, Director of Color to the Exposition. There are in all fifteen of these illustrations, of which five are in color. The entire group is artistic in the highest degree and the color pictures are marvellous for their delicacy and harmony. The edition for July was 625,000 copies.

Books and Pamphlets Received.

Etidorpha, revised edition, By John Uri Lloyd; Dodd, Mead & Co., New York.

Equation Writing, Chemical and Pharmaceutical Arithmetic, second edition, revised and enlarged, by J. H. Beal, Sc. D. Ph. G.; Calumet Publishing Co., Pittsburg.

F. H. KING, Delphos,
President, Ohio Board of Pharmacy.

Mr. F. H. King, whose genial face greets the readers of THE MIDLAND this month, is at present the President of the Ohio Board of Pharmacy. Like a host of men who have honored a thousand vocations, he was born in Ohio, on a farm in Putnam county, in 1864. Received a portion of his education in the public schools of Dayton. Entered the drug store of Evans & Evans, in Delphos, in 1883. Entered the Cincinnati College of Pharmacy in 1885, whence he graduated in 1887. Registered as an assistant pharmacist by examination in Ohio in 1886 and as a pharmacist in 1887. In 1887 he and his brother bought the drug store of Sherrick & Co., Delphos, and during the following year that of Reul Bros., when the two stores were consolidated. In 1898 they removed into one of the handsomest rooms to be found in Northwestern Ohio and everything connected with the store was put in the finest possible condition. The room has tiled floor, the ceiling of steel; the counters of cherry wood, with bases of Tennessee marble. An elegant office and prescription case adorn the rear, arc and incandescent lamps furnish the light, plate-glass show-cases line either side of the main room, and plate mirrors extend across the rear end.

These gentlemen deserve a great deal of credit for their enterprise in giving to a small city such as theirs an establishment which would be a credit to any large city in the country. The end has justified the outlay, for they are doing a large and profitable business.

KING'S PHARMACY, Delphos, O.

N. O. D. A. NOTES.

The following officers were elected at the last meeting: President, J. A. Bartlett; Vice-President, C. B. Harper; Secretary, Wm. F. Kuder; Treasurer, Geo. W. Voss.

Following members constitute the present Board of Control: L. C. Hopp, Cleveland; W. S. Voit, Warren; C. F. McBride, Youngstown; Chas. R. Roth, Canton; Henry J. Eady, Elyria; E. A. Schellentrager, Joseph Albrecht, Henry Kuhlmeier, C. F. Buescher, M. G. Tielke, John Krause, Cleveland; Summit County vacancy will shortly be filled.

Owing to climatic conditions the July monthly membership meeting has been postponed until further notice. Board of Control meetings will continue to be held on Thursdays of each week.

Annual meeting of the Ohio State Pharmaceutical Association will be held in Dayton, July 16, 17 and 18. It is hoped that all Nodas who can attend will bear in mind the Worcester Plan of price enforcement.

In making your arrangements for the Pan-American, your attention is called to the fact that the National Association of Retail Druggists will convene in Buffalo during October.

Treasurer Voss desires to impress members with the importance of saving time and money by remitting ahead for several months.

WM. F. KUDER,
Secretary N. O. D. A.

THE regulation number of complaints are now being received by the Ohio Board of Pharmacy regarding the sale of paris green and london purple by persons not registered as pharmacists. Be it known to all such that in April, 1900, the Ohio legislature made it lawful for any person to sell paris green when put up in packages and labeled in conformity to the poison-label law of the state. The sale of paris green, which is not so labeled, is a violation of law and the Board of Pharmacy will prosecute any dealer making such sales when sufficient evidence is furnished to warrant such action.

Examination Reverberations.

Give synonym for Inula. Ans.: Mistura Hydrgia et Precipitate Carbonate of Chalk.

—

Name the official alkaloids of Opium. Ans.: Tar, Rosin and Burg. Pitch.

—

MATCHES IN TROUSERS POCKET FORBIDDEN.

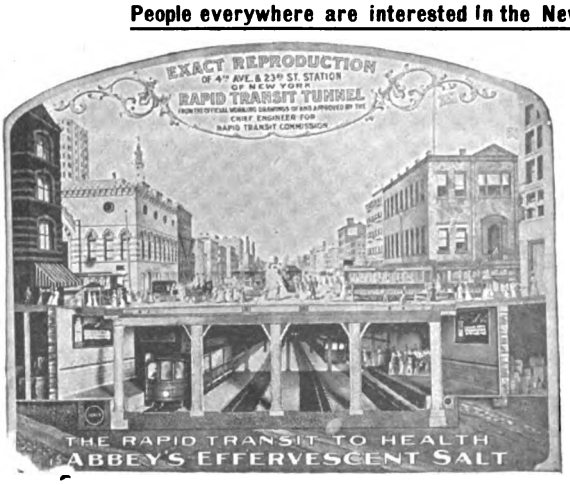
Is Lycopodium a good dusting powder for suppositories? Give reason for your answer. Ans.: It should never be used, as the gas in the bowels might ignite and cause an explosion.

—

Describe the method of preparing Sulphuric Acid. Ans.: Prepared mostly at a gas company by the gas going through lead pipes and acting upon the lead, forming H_2SO_3.

JUST AS GOOD WEST OF THE MISSISSIPPI AS IN NEW YORK.

People everywhere are interested in the New York Rapid Transit Tunnel.



Give your customers a chance to get better acquainted with the greatest undertaking of the age. The progress of New York in the matter of Rapid Transit, is being watched by the entire world. This window display will give any one a clear idea of the most important station of the system.

Our facsimile of the 23d Street Station of New York Rapid Transit Tunnel is the most remarkable window display ever offered the retail drug trade. If you care to increase your trade this window display will do it for you.

In actual size this window display cut out is five feet long by three feet high. It is an exact reproduction in fourteen colors of the 23d Street and 4th Avenue Station of the New York Transit Tunnel.

Send us an order through your wholesaler for one gross of small size Abbey's Salt, or its equivalent in the larger sizes, and we will include in the order one of the cut outs.

ABBEY'S SALT is sold in three sizes, retailing at 25c., 50c., and $1.00 per bottle.
Trade List on application.

THE ABBEY EFFERVESCENT SALT CO., 9-15 Murray Street, New York.

O. S. P. A.

The Twenty-third Annual Meeting of the Ohio State Pharmaceutical Association will be held in Dayton on Tuesday, Wednesday and Thursday, July 16, 17 and 18. The first session will be called to order promptly at 4 p. m. Headquarters will be at the new Algonquin Hotel, in which all sessions will be held. Rates have been reduced to $2 per day. The Druggists of Dayton have arranged an elegant programme for the entertainment of all visiting druggists and a large attendance is expected. A great many matters of unusual importance will be up for discussion and every progressive member of the retail drug trade should endeavor to be present. State Associations of retail druggists have been found to be the most powerful instruments yet devised for promoting and protecting the interests of all members. This meeting should break all previous records in numbers and enthusiasm.

MISSOURI PHARMACEUTICAL ASSOCIATION.

The Missouri Pharmaceutical Association held its twenty-third annual meeting at Pertle Springs, Warrensburg, June 18-21. President Paul L. Hess read an able report covering timely topics.

Secretary Dr. H. M. Whelpley reviewed the work of the organization for the past year. The Association has 329 members in good standing.

Treasurer Wm. Mittelbach reported an expense of $486.68 for the fiiscal year, leaving a balance of $245.90 on hand.

Thirty new members were elected.

H. H. Barth and S. C. Wilson reported as delegates from the Nebraska Pharmaceutical Association.

The A. Ph. A. meeting at St. Louis, September 16-21, was discussed, and the following committee appointed to interest the pharmacists of Missouri in the convention: Wm. Mittelbach, Boonville, Chairman; R. L. Hope, Centralia; J. V. Murray, Warrensburg; Chas. L. Wright, Webb City; Paul L. Hess, Kansas City.

Interesting reports were made by Ambrose Mueller, on "Drug Adulterations;" Prof. J. M. Good, on "U. S. P.;" Dr. H. M. Pettit, on "N. F."; J. L. Love, on "Legislation."

Dr. H. M. Whelpley introduced a resolution, which was adopted, asking the Missouri Medical Association to use its influence in popularizing the writing of prescriptions in the metric system.

The following officers were elected: Dr. O. F. Claus, St. Louis, President; First Vice-President, R. L. Hope, Centralia; Second Vice-President, W. B. Kerns, Bunceton; Third Vice-President, H. C. Wesner, Windsor; Treasurer, Wm. Mittelbach, Boonville; Permanent Secretary, Dr. H. M. Whelpley, St. Louis; Assistant Secretary, St. John Umbrite, Liberal; Local Secretary, J. V. Murray, Warrensburg; Council—Dr. H. M. Pettit, Carrollton, Chairman; Paul L. Hess, Secretary, Kansas City; H. F. Hassebrock, St. Louis; J. F. Llewellyn, Mexico; R. S. Vitt, St. Louis.

August T. Fleischmann, Secretary of Missouri Board of Pharmacy, reported that during the past twelve months 138 candidates have been examined, of whom 88 were registered; 88 persons had also registered on pharmaceutical diplomas, while 2,242 physicians were resistered on medical diplomas during the few weeks in which such diplomas were recognized.

As candidates for the Board of Pharmacy appointment to be made July 1, the Association endorsed Paul L. Hess, Kansas City, and Chas. Gietner and H. W. Friedwald, St. Louis.

Dr. D. W. B. Tevis, Lexington, and Dr. F. L. James, St. Louis, were made honorary life members.

Medical colleges in Missouri were asked by a resolution introduced by Dr. H. M. Whelpley, to give special attention to the teaching of the metric system.

Through the able management of August Breunert, Chairman of the Entertainment Committee, the Association will receive a balance of $150 from the entertainment fund. Heretofore the committee has been short and called upon either the Association or its members for an assessment. A special vote of thanks was extended the exceptional Chairman for his good work.

J. F. Llewellyn introduced the following, which was adopted: *Resolved*, That any manufacturer who added war tax to his price will be considered unfriendly if he continues to collect war tax after July 1, 1901.

The next annual meeting will be held at Warrensburg, second Tuesday in June, 1902.

The Missouri Pharmaceutical Travelers' Association elected Clay W. Johnston, President, and O. H. Ott, Secretary.

H. M. WHELPLEY, *Secretary.*

IN THE MIDDLE AGES.

The offences of apothecaries in the Middle Ages were numerous and the punishment in some cases a whipping. The worst was the improper sale of poisons—that is to say, except when not duly prescribed by a known physician of reputation—and even then not to put down in a register the name of the doctor and person to whom such prescription containing poison was delivered was punishable likewise. The sale of poison for drugging fish was prohibited, and also that of inferior drugs by any apothecary. To prescribe himself (unless a doctor could not be found) was an offence punishable by a whipping, and all preparations sold by him had to be made up in the presence of the doctor or of another apothecary. A barber surgeon might only prescribe for exterior applications "according to surgery," but we are not told what was the penalty in such a case. Upon the question of remuneration it is hard to speak with precision, as the relative value of money then and now is so very difficult to fix and the sol Morlaas was worth three times the sol Tournois. Anyhow, the doctor got the statutory fee of nine sols Morlas and his expenses a day when he had to leave his town, and 1 sol 8 deniers for each visit in town. Also 1 sol 9 deniers for a prescription. In Navarre the fee was half a franc a visit in town, and 3 francs a day out. Every member of the profession was a privileged creditor when death ensued, as such bills as theirs formed part of the funeral expenses, and even the sacred dot of a wife could be depleted to pay them to an extent not exceeding a fixed amount.

—*Spatula.*

A Novelty in Stoves.

Stoves of the Bolivian Indians are curious things. A hole is dug in the ground about eighteen inches deep and a foot square, and over this is built a roof of clay, with holes of different sizes to receive the various cooking pots. Roasting is done on spits passed through the holes.

Special courses of instruction for female pharmacists are to be established in Russia at the Moscow Medical Association, where a two years' course will be given.

NOTICE! TO AVOID COUNTERFEITS

"Orange Blossom" boxes are all wrapped in a handsome and intricate label made by the Western Bank Note Company.

Personal and Trade Notes.

[Items of interest, personal and otherwise to the drug trade, are solicited. No attention paid to anonymous communications, although the name of the sender of such news will not be published.]

Columbus Notes.

Carl M. Oshe, of Zanesville, has been engaged as manager for Hatton Brothers Fifth avenue pharmacy.

Stanley Crossen has accepted a position as clerk with H. D. Westervelt, at Second avenue and Hunter street.

Green & Co. have purchased the W. A. Lutz pharmacy, at the corner of Dennison avenue and Goodale street.

J. C. McElroy, formerly with Filler's pharmacy, has accepted a position as manager of T. B. Ellis' Oak street store.

Fred Sweet, manager for W. P. Gault, at Oak street and Grant avenue, is taking a few weeks of much needed rest this month.

C. H. Lefferson, formerly of Middletown, has taken charge of Green & Co.'s new store at Dennison avenue and Goodale street.

Charles Kreiger, of the drug department of the Kauffman-Lattimer Co., is spending a two weeks' vacation with his family in the country.

Among the Columbus druggists that journeyed to Kansas City last month, to attend the conclave of the Mystic Shriners, were A. W. Kiler and H. D. Westervelt.

A game of base ball was played last week between the office clerks and order clerks of the Kauffman-Lattimer Co., which resulted in a victory for the office force by a score of 18 to 9. Errors too numerous to mention.

Bruno Schreiber, the head clerk at Fred. Schueller's, found a visitor at his house the other evening—it weighed twelve pounds and was a boy. Bruno looks happy and is setting up the cigars. Another druggist will soon be in the ranks.

M. Steinfeld met with a very painful accident last month, while trying to adjust a new knife in a spring cigar clipper. The spring flew out of place, striking Mr. Steinfeld on the right hand, cutting and lacerating that member in a terrible manner, which will deprive him of the use of it for several weeks.

Quite a number of Columbus druggists are expecting to attend the annual state meet of the Ohio Pharmaceutical Association this month. The Dayton committee that have the entertainment features in charge, have left nothing undone to assure every one a good time.

▲ ▲ ▲

Canfield & Co., Chardon, Ohio, have sold out.

T. J. Price, Farmington, W. Va., has sold out.

John A. Spero, Helmer, Indiana, has sold out.

Francis H. Foster, Princeton, Indiana, is dead.

J. W. Nace, Deshler, Ohio, has closed his store.

A. S. White, of Sidney, visited Delaware July 4th.

McClelland & Co., Ashland, Ohio, have sold out.

J. N. Stoner & Co., Garrett, Indiana, have dissolved.

L. L. Koch, La Rue, Ohio, has been burned out.

Newt. Liggett, of Marysville, visited Buffalo recently.

J. J. Strome & Son, Millersburg, O., called a short time since.

The Long Drug Company succeed J. P. Long, Bryan, Ohio.

D. C. Norman, Roseville, has been succeeded by C. M. Norman.

Mason Brothers succeed De Hority & Murphy, Elwood, Indiana.

C. E. McCorkle, Niles, Ohio, has sold his store to C. E. Bradshaw.

L. C. Dehmel, Lockland, Ohio, has been succeeded by H. S. Kendrick.

H. M. Widney, Zanesville, Ohio, has returned from a trip to Pittsburg.

C. A. Heims is making progress on his new building at Byesville, Ohio.

Charles E. Andreas, Canal Dover, Ohio, has put in a new soda fountain.

L. M. Liggett, of Gallion, visited Buffalo, New York, and Washington, D. C.

Evans Brothers succeed to the business of Frizzell, Evans & Brother, Dayton, Ohio.

Digitized by Google

J. P. Taylor, of Mechanicsburg, Ohio, was among the recent visitors to Columbus.

Sherman Naylor, Canal Dover, Ohio, has been visiting friends in Wheeling, W. Va.

L. A. McCuen, Massellon, O., is rejoicing over the arrival of an eight pound girl, July 8th.

R. J. Peters, Canal Dover, Ohio, has purchased one of the best stores in Newark, Ohio.

R. H. Valentine, of Belle Center, has been spending a few days in the Capital City.

Dr. Harry Bertolette, Shreve, O., was in attendance at the Republican State Convention.

Jimmy Hanna is with O. H. Finnical, at Cadiz, Ohio. Jim looks well in a white duck coat.

Claude Deems, of Hamilton, Ohio, has accepted a position with W. L. Ary, at Sabina, Ohio.

Morg Williams, with the Davis pharmacy, at Mt. Sterling, Ohio, was a recent visitor in Columbus.

W. E. Pelley & Bro., Mingo Junction, Ohio, have completed their new drug store. It is a beauty.

A. P. Gergenheimer, of Vermillion, Ohio, has accepted a position with William Graetz, Bucyrus, Ohio.

Will Goldcamp, with C. J. Lordiers, Ashland, Kentucky, expects soon to see the sights at Buffalo.

C. T. Larkins, East Liverpool, Ohio, is building two beautiful homes, for his mother and himself.

Walter Hoover, Ashville, Ohio, has accepted a position with T. N. Boggess, Huntington, W. Va.

J. H. Brinker, Bellevue, O., is one of the northern Ohio druggists who will take in the O. S. Ph. A. at Dayton.

T. J. Webber, Plymouth, O., was a member of the Richland County delegation to the Republican Convention.

C. M. and Ben Ridgeway, druggists of Cedarville, Ohio, recently spent a week in Buffalo taking in the sights.

J. Warren Shaff, Cambridge, Ohio, has improved the old Wall store by putting in Silent-Salesmen show cases.

Clyde Larkins, graduate in medicine at Philadelphia, Pa., college, is expected home in East Liverpool, Ohio, June 15th. He will assist Larkins, the drug man.

Ed. Bell, Utica, O., is making preparations to journey to San Francisco with the Epworth Leaguers this month.

H. H. Iler has resigned his position with Edgar Crute, Mansfield, to accept a place with W. J. Stuart, Nelsonville, O.

Harvey La Chat, who recently passed the State Board, has accepted a position in one of the best stores at Youngstown.

E. M. Stier, of Xenia, was attending to business for Ben Ridgeway, of Cedarville, Ohio, while Ben was at Buffalo.

Cecil, son of A. L. Fouts, West Lafayette, a "classic" of Ohio Wesleyan University, is spending the summer vacation with his father.

Ralph Nicholson, of Byesville, Ohio, is with W. T. Perry at Zanesville for a short time, looking over the business as a possible purchaser.

Myron Browning, of the firm of Browning & Older, Charleston, W. Va., is away from business for awhile, rusticating around Covington, Va.

Thomas A. Collamore, West Unity, Ohio, has returned from Ada College of Pharmacy and resumed his position with Dr. William Denman.

Karl Rudolph, Youngstown, Ohio, has disposed of his soda fountain, thereby making room for a new wall case for display of fine stationery.

Mr. F. L. Whitmore and wife, Conneaut, Ohio, are taking a three weeks' pleasure trip, visiting Chicago, Denver and the principal western cities.

Clyde P. Koogle, Ohio City, recently with the Bergman Pharmacy, Findlay, Ohio, has accepted a position with the Woodward Pharmacy, Norwalk, Ohio.

Charles Hosey, who has been in Kansas City recently, has returned to Ohio, to accept a position with the Ball-Warfield Drug Company, of Ironton, Ohio.

Ben Fields, of Charleston, W. Va., recently attended a shooting-match at St. Marys, W. Va., where he succeeded in in bringing home some prizes.

Joseph Mulrane, recently clerk in a drug store in Mansfield, Ohio, has opened a new store at his old home, New Comerstown, Ohio, with Dr. McElroy as partner.

Will Moss and the irrepressible Warner, of P. D. & Co., are visiting the physicians in the Cambridge district. Warner says he did not write "Alice of Old Vincennes," but he was there at the time.

Digitized by Google

Mr. Charles A. Ensign, the popular West Side druggist, Youngstown, Ohio, has been confined to his bed for a week. We are glad to say he is back again.

Joe Steele, of Chillicothe, Ohio, has been laid up in bed with an attack of fever. We trust nothing serious will arise and that he will soon be about as usual.

Ed. Brown, formerly with the Ball-Warfield Drug Company, Ironton, Ohio, has accepted a position with the Hubbard-Williams Company, Charleston, W. Va.

Joe Shaw, with Lee Cassady, Dresden, Ohio, will enter for pharmaceutical course at Ohio Normal University, Ada, Ohio, for the Fall term, beginning in September.

H. L. Day, of Blanchester, Ohio, was a recent visitor to the Buffalo Exposition. On his way back he stopped and took in the Republican convention at Columbus.

The father of F. J. R. Pfiiffner, of Delaware, was quite badly injured recently by being thrown from a carriage. The old gentleman is seventy-seven years of age.

Stanley Baltzly has returned from the O. S. U., where he is taking a course in pharmacy, and can be found behind the desk in his father's store at Massillon, O.

Murray Schaefer has purchased a drug stock at Quincy, O., resigning his place with Okey Wyker, Fredericktown, O. Mr. Garnes has taken Mr. Schaefer's place with Wyker.

John Horming, of Dresden, Ohio, has purchased a farm a short distance from that thriving town, where he goes every night during the summer. This is a very good scheme.

Edgar Crute has purchased the store of Will Martin, Mansfield, O. After twenty-four years of service behind the prescription case, Mr. Martin will now take a much needed rest.

Frank Wilson, of Hamden Junction, Ohio, has completely remodeled and refurnished his store. He has modern oak fixtures and he says he now feels as like he was running a drug store.

Alva B. Cowgill, late of The Bailey Drug Company, Zanesville, leaves this month, to take up his residence in California. Willis A. Bailey succeeds him as manager of the Drug Company.

George A. Beers, at New Comerstown, Ohio, has in course of construction a fine new residence in the suburbs of that progressive town, which he hopes to have completed by October.

Clark & Steen, Youngstown, Ohio, succeed Clark & Stover. Under the able management of Mr. William Clark the Hazel street pharmacy is enjoying a very prosperous career. Welcome to the profession, Mr. Steen.

We are glad to state that Mr. James R. West, of New Vienna, Ohio, who has been sick for several months with inflammatory rheumatism, is again able to get about and attend to business. We hope nothing may come to give him a backset.

Wade Miller, a recent graduate of Ada Normal School, and who has been for a few weeks with T. N. Boggess, Huntington, W. Va., has accepted a position with the Hubbard-Williams Company, of Charleston, W. Va., as travelling salesman.

Harrison & McGhee, of Wellston, Ohio, always to the front in everything, have added a beautiful new soda fountain to their store which catches the eye and nickles of all passersby. They can be justly proud of their new addition.

Mr. Austin Chestnut, the popular East End, Chillicothe, Ohio, druggist, has just added to his already attractive store a beautiful new onyx soda fountain and can now cool off the "hot ones" these warm days and send them away rejoicing.

H. W. Brink has recently opened a new store at Lancaster, Ohio. Mr. Brink was for some years connected with the Beck pharmacy, of the same city, and has a wide acquaintance with the trade. He has a good location on North Columbus street, and good prospects for success. He has the best wishes of THE MIDLAND.

George Ort, of Ort & Klostermeyer, of Charleston, W. Va., recently fitted up a new rowboat in the most approved style to go gigging for frogs. He expects to catch many of them napping this summer along Elk river. Why he named the boat "Lunette" you will have to learn from Mr. Ort. We are sure he has a reason.

We record with regret the death of Dr. Andrew Davidson, of Lancaster, Ohio. The Doctor has been engaged in the drug business of that city since 1866. Previous to that date he had been engaged in the practice of medicine. He was widely and favorably known and was active in business until the last few years, when his infirmities compelled him to turn over the cares of trade to his son, James, who will continue the business. The day of his death completed his eighty-second year.

Digitized by Google

Mr. Gadis Henry, who has been in Cincinnati, working in the lumber business for some time past, has returned to Greenfield, Ohio, to accept a position with his father, who is desirous of getting away from business cares a little more. We feel sure that Gadis is the right man in the right place.

John F. Friedland, of Coalton, Ohio, is just emerging from a cloudburst, which occurred in that city not long ago. John lives close to the bank of a small stream which ordinarily hardly runs, but after the cloudburst it rose so rapidly that it succeeded in flooding his house and store to the depth of about 15 inches before he could remove anything. It also tried to carry away all movable things and he has been gathering them home ever since.

The firm of Fischer & Streich, of Portsmouth, Ohio, have dissolved partnership, Mr. Fischer retiring. Mr. Phil Streich is well-known to the people of Portsmouth and needs no recommendation, as he has managed successfully the present business, and we can predict a bright future. We are sure his old friends will be glad to hear of his success, and we join with them in expressing our best wishes for his future success.

Mr. Homer Conn, with the Hughey drug store, at Washington C. H., Ohio, recently met with a severe accident while charging a soda fountain. It appears that he was bending over the fountain when one of his helpers carelessly lifted the lever of the acid chamber, forming gas, which caused the apparatus to explode, nearly killing the helper and bruising Mr. Conn's right leg severely. He is getting around slowly, but thinks, considering the exposure and the fact that he has just been married, he is a lucky fellow.

As noticed in the last issue of THE MIDLAND, Mr. George Lehman, the junior partner of the Nipgen Pharmacy, Chillicothe, Ohio, and Miss Mamie Meier, of Portsmouth, Ohio, were united in marriage at 8:30 A. M. June 19th, at St. Mary's church. The wedding was very elaborate and beautiful and was certainly an event long to be remembered. After the ceremony the couple went to the home of the bride's parents, where a reception was held until about 7 P. M., when the happy couple took the boat for a down-river and return trip. They were the recipients of many beautiful presents and the best wishes of a host of friends.

Another beautiful wedding in Washington C. H., Ohio, was solemnized at 8 P. M. June 19th, when Mr. Homer Conn led Miss Bessie Sanderson to the altar. It was one of the big events in that city. Many out-of-town guests were there to extend their congratulations besides their many home friends. The house was beautifully decorated and the wedding supper was of the best. The happy couple immediately went to their new home, which Mr. Conn had already prepared, where they are now "at home" to friends and acquaintances. Our best wishes are with the happy couple.

Mr. F. B. Tissot, Mt. Vernon, O., is the victim of a piece of petty spitework at present. Sometime since he sold ten cents' worth of strychnia to a lady residing in the country, registering the same in accordance with the Ohio law, with the exception of recording the lady's age. About the same time, Mr. Boyle, a telegraph operator, had a valuable hunting dog poisoned. In looking over Mr. Tissot's register he noticed the omission and called Mr. T's attention to it. Mr. B. being a very excitable man, and not having a great deal of love for the druggist, is proceeding to make a test case of it, calling it an evasion of the law. The trial comes off Friday the 12th inst. Mr. Tissot has engaged a lawyer and will fight it to a finish. The drug trade of the town are with Mr. T. in his fight and will render him all the assistance possible.

C. D. Harlow, a prominent druggist of Washington C. H., Ohio, recently gave his many friends the slip and went to Ashland, Kentucky, where he was met by Miss Helen Steece, of Ironton, Ohio, one of the society girls of that city, and they were married and took the train for Cincinnati. The marriage had been opposed by Miss Steece's parents, but the old saying, "Love laughs at locksmiths," again came true. After sojourning in Cincinnati for a day or two the happy couple went to their new home, in Washington C. H., where they were met by a host of the groom's friends and given a rousing reception. We trust ere this they have been forgiven by the parents and we extend our heartiest congratulations, wishing them a long and happy life. They were married in Ashland, Kentucky, in the Presbyterian church at 1:30 P. M. June 22d.

There were many places where people had a good time on the Fourth of July, but it is safe to say none had a better time than the people of Clarksburg, Ohio, all owing to that genial druggist, W. D. Jones.

We clip the following from the daily press as an illustration of the hold the "summer beverage" has on the people:

SOLD SODA WATER

ON SUNDAY AND THE MAYOR BOUND THEM OVER.

BELLEFONTAINE, July 4.—The arrest of James McFarland and J. M. Cromer, druggists of Quincy, on the charge of selling soda water on Sunday and the fact that Mayor William Lamb of that place refused to give the men a hearing, but instead bound them over to Probate Court under bonds of $100 each, has caused no end of indignation there. Last night Mayor Lamb was requested to resign in a petition signed by sixty persons, and the petitioners threaten to duck hizzoner in the Miami river if he fails to take the requested action.

The same petitioners have also asked Rev. Jacob Kirk, pastor of the Brethren Church, to resign, they alleging that he has been selling milk on Sunday.

We have received the following voluntary tribute to the value of advertising in THE MIDLAND. Advertisers should take notice:

OFFICE OF
KONDON MANUFACTURING CO.

MINNEAPOLIS, MINN., June 22, 1901.

Midland Druggist, Columbus, Ohio.

GENTLEMEN:—We have received this morning from three druggists in your state requests for advertising matter as per our ad. in your book, which will go forward promptly, prepaid. We wish to say we have had more replies from our ad. in your book during the two months it has run than we ever did from any other ad. of like nature we ever run for a whole year in a trade journal. Very truly yours,

KONDON MANUFACTURING CO.,
Per T. N. Kenyon, Manager.

Extra Money in Castoria.

The kind of Castoria that you have always bought, as The Centaur Company calls it, is being offered in large lots at a special discount. The lots are not so large that they are beyond the reach of the average retail druggist, and the inducements in the way of discounts is large enough to pay the trade to exert itself a little to dispose of the increased quantity.

To be exact, a discount of five and one-half per cent. is offered on gross lots, through jobbers. At the rate of three bottles a week a druggist could dispose of a gross of Castoria in less than a year. By getting the discount he might be able to "job" a quantity of his stock to his neighbors and thus turn his money over still more rapidly and at no mean profit to himself.

The Centaur Company, 77 Murray St., New York City, will furnish you with all the advertising matter you can use, free of all expense. See their adv. on another page.

Infection by Pets.

A case is narrated in *La Medecine Moderne* of a seamstress who was in the habit of allowing her dog to lick her face. Her right eye was attacked with inflammation which became so severe as to endanger the safety of the left one. Enucleation of the right eye became necessary, and it was found a tape worm, which the dog had probably picked up while licking some less pleasant object. The danger of the transmission of parasites by dogs in this way, owing to the prevalent custom of allowing dogs to lick the hands and faces of their masters and mistresses, is a great one. The wonder is that accidents similar to the one narrated do not happen oftener than they do.

GARFIELD TEA CO.

Paid the Revenue Tax on their goods, therefore no Reduction was made July 1st, when the repeal of the Revenue Law took effect.

THE GARFIELD REMEDIES ARE:

Garfield Tea. **Garfield—Tea Syrup.**
Garfield Relief Plasters. **Garfield Headache Powders.**

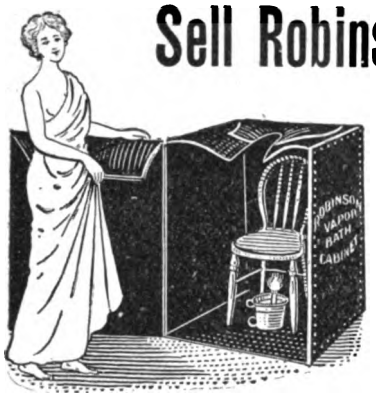
A MONEY MAKER FOR HUSTLING DRUGGISTS.



Sell Robinson's Turkish Bath Cabinets

Used and endorsed by the leading Physicians and Hospitals of the country, for all chronic ailments, la grippe, colds, kidney, liver, blood and skin diseases, rheumatism, etc.

From Firms Who Have Sold Several Hundred Cabinets:

"Nine-tenths of our sales are directly through the leading physicians, who prescribe the ROBINSON CABINET in preference to all others. At least FIFTY of the most PROMINENT physicians of Buffalo are recommending your cabinet. We have always given your bath the preference.

"STODDART BROS., Druggists, Buffalo, N. Y."

"I thank you for your complimentary remarks on our success in selling your vapor baths. It is no trouble to sell goods that are all right. Your baths are the only practical ones made, and that is why they sell. I have no person soliciting the trade; the goods sell on their merits. I have as competitors, three agents for different kinds of baths; I purchased one of each, and offer them at any price I can get.

"WILL H. MURGITTROYD, Druggist, Marysville, Mont."

For the next thirty days we will make a price that will astonish you. Drop us a card to-day. We are now selling through Druggists alone about 1,000 cabinets per month. One drug firm last year sold 650 cabinets; others averaging from 100 to 500 per year.

YOU CAN SELL OUR CABINET; WE WILL HELP YOU.

We want you to have one for your own use. Write us and we will tell you how to obtain one free. The best time to sell Bath Cabinets is now. Write at once. Do not delay.

ROBINSON THERMAL BATH COMPANY, 573 JEFFERSON STREET TOLEDO, OHIO.

How Many of Our Friends Will this Fit?

If we were to announce that you could get this paper thirty days for three beers, every descendant of Adam would know that meant fifteen cents. But if we were to say that it would be sent three months, for the price of a gospel hymn book, half of them wouldn't know whether we had raised the subscription rate or were giving the paper away.

I doubt the wisdom of being too wise and I see much wisdom in some folly.

I wish I could get you at least to agree
To take life as it is, and consider with me
If it be not all smiles, that it is not all sneers;
It admits honest laughter, and needs honest tears.
Do you think none have known but yourself all the pain
Of hopes that retreat, and regrets that remain?

—*Owen Meredith.*

If you'd content and happy be,
Then heed the maxim old,
And neither give yourself away,
Nor let yourself be sold.

Communications.

Editor of Midland:

THERE is a disposition on the part of the retail merchants to extend the time over the period usually fixed by jobbing houses as the term within which they will accept payment for bills at a discount. The rule for discounts should be scrupulously adhered to by the retail merchant, as any extension over the period named by the jobber is an injustice and not particularly advantageous to the merchant. It is just as easy to discount within the limit named by the jobber as to allow them to "run over," after you once get started in the way. Since a discount for cash is named for the sole object of inducing prompt payment, it is not fair to your jobber to insist on a discount long after the period has expired. It can be claimed that a day or two makes but little difference which is true, but the day or two creates a new limit in the expectation of the retailer which he is prone to further extend, thus continuing concession to himself until he has gone beyond reason. To discount is quite the proper way to conduct your business, as the amount realized in twelve months on ordinary purchases is quite a handsome sum. Take advantage of your discounts promptly. If you cannot do so within the period, do not expect your jobber to remit the amount of the discount, which is his only emolument for "carrying" the account.

A TRAVELER.

☆☆☆

A Modern Job.

The writer was a quiet observer of the following:

In a town in eastern Ohio, on July 4th, a retail druggist, famous for his courtesy, was busy with one of his regular patrons, while another stood patiently awaiting his turn; the clerks had all been released for the holiday, and our friend had enough to do—enter a lady, who immediately tackled the busy druggist with, "Got any postal cards?" "Yes, madam." "Well, gimme one." "Presently," was the quiet answer, "just as soon as I get through with this customer." She muttered her displeasure, and regaled me with her views of the unaccommodating attitude of the druggists in general. Meanwhile our patient friend had finished, and smilingly came forward with the postal. "Can't you wrap it up?" she snapped. Unperturbed he neatly wrapped the card and secured it with twine and presented it with his best bow. She handed him a five dollar bill; he smilingly counted out $4.99, and with a "Nothing else, to-day, madam? Call again, please," he courteously bowed her out, and turned to me with a smile. A friend of yours, Billy? I inquired. "Never saw her before," said he. Don't you think patience sometimes ceases to be a virtue? "Oh, its nothing when you get used to it," said Billy, and turned to draw soda for a customer and found that the fount was exhausted. With an apology to his customer, and to me, "Watch the store a minute," off came his duck coat, and with a cheerful whistle he hustled to the cellar. Truly this disposition that will endure through this hot weather is better than great riches.

JAP.

Monsel's solution, placed under the ingrowing edge of a toe-nail, will tan the inflamed tissue and tend toward a cure. The application should be kept on for a number of days. The nail should be scraped very thin in the middle line.

Department of Pharmacy, O. S. U.

Since the last issue of THE MIDLAND the University has passed through another commencement week, with its reunions, banquets and addresses, a time looked forward to with longing eyes by the freshmen who entered four years ago.

Commencement week means certain ends attained and naturally brings joy to the students who have worked faithfully to accomplish their purpose, but it also brings sadness because it means separation.

Commencement week also presents an opportunity for old students to return and renew past friendships, and we were glad to see some of the old faces again.

At the last meeting of the O. S. U. Pharmaceutical Association, Prof. Kauffman gave the students a farewell address and spoke feelingly of the pleasant association of the past years, wishing those who were going, for the last time all possible success, and for those who expect to return, a pleasant summer and safe return in the fall.

After his talk he presented the retiring members of the Association the handsome diploma which has been adopted by the Society.

One year's history of the O. S. U. P. A. was ended with these exercises and we only hope that the succeeding years of the Society may be as prosperous and beneficial to the students as the last one has been.

☆ ☆ ☆

At the twenty-fourth annual commencement of the University the address was delivered by Edward Everett Hale, D. D., LL. D., on the "Duties of the New Century." Diplomas were presented to one hundred and thirty-one graduates. In the college paper, *The Lantern*, is a complete list of the graduates and the subjects of their theses. Those in which we were specially interested were advanced degrees:

Master of Science—Charles H. Kimberly, B. Sc. (Pharmacy), Columbus. Thesis—"The Determination of Arsenic and Strychnine in the Presence of Organic Matter."

First Degree—Bachelor of Science in Pharmacy, Cyrus H. Young. Thesis—"A Direct Titration Method for the Assay of Nux Vomica."

In the short course the Certificate of Pharmaceutical Chemist was presented to Clyde B. Cassaday, of Alliance, and Walter B. Hoover, Ashley, Ohio.

☆ ☆ ☆

The usual quiet of the vacation season is being rudely disturbed in the laboratory and lecture room of the Pharmacy Department. Two classes are in progress and will continue throughout the summer in charge of Prof. Landacre. One class in Chemistry and one in Materia Medica and Pharmacy. The work is done in the forenoon, and it is surprising how much laboratory work can be accomplished when the student gives all his time to one subject. We understand that the question of summer school will be taken up by the University proper next year.

☆ ☆ ☆

We had the pleasure of a handshake with Mr. Ned Blair, class of '95. Ned is a prosperous druggist in Shawnee, Ohio, but always remembers his old friends and visits them during commencement week.

—

Mr. C. H. Kimberly has accepted a position with the Columbus Pharmacal Co.

—

Mr. Harrold, '95, manager of the chemical store room, will spend the month of July traveling in the East. The store room will be in charge of Mr. Funk, his assistant, and a senior pharmacy student, by the way.

—

Mr. John Brewer, '96, formerly with Mr. Geo. H. Matson, but at present with Mr. Bert, on West Broad street, has joined the ranks of those who believe in sharing the joys and sorrows of life with a mate. May he work with added zeal and roll pills faster than ever before, thereby increasing his annual income, because it makes no differ-

Digitized by Google

ence by what method of reasoning he convinced himself that two could live as cheaply as one, he will find that he is mistaken.

☆ ☆ ☆

Clippings from "The Lantern."

The presence with us on commencement day, of Edward Everett Hale, ought to arouse an interest and enthusiasm in our graduating exercises which we have not had, perhaps, in full measure for several years. Dr. Hale stands for so much that is good and great in the literary and educational history of the United States that hosts of his friends who have never seen him will surely crowd our chapel on Wednesday. And because the presence of an author almost always stimulates the sale of his books, I doubt not that while he is our guest we shall see the bookshop windows blazing forth the merits of "The Man Without a Country," one of the few short stories fated to live and retain its interest for every American reader. Personally, I shall be extremely glad to see Dr. Hale make our commencement address, because he stands first for the academic side of university training, the exemplar of the liberal and culture elements in college work, things which are always very much in place at a modern State university, to put it mildly.

—

POSSIBILITIES FOR O. S. U. IN THE NEAR FUTURE.

The Hon. D. M. Massie, in his toast at the commencement luncheon, said some things which should be of interest to all to whom the University has endeared itself. What we need here is more ample provision for the young ladies who attend the University. Nothing has ever been done in the way of offering inducements for young ladies to attend college here, and as a consequence they form only fifteen or twenty per cent. of the student body. Mr. Massie says that the trustees have in mind a Woman's building, to be devoted exclusively to their interests. The writer believes that a dormitory should be erected and such other arrangements made as will give women as good advantage here as they can find anywhere. This seems wise because it will make it possible for the young women of Ohio to have the advantages of the State-supported school, bringing hundreds here who cannot afford to pay the high tuition, etc., charged at other places. A dormitory would pay good interest on the money invested, and every dollar spent in this direction would result in increased attendance and do more than any other one thing to bring O. S. U. to the front among the colleges of America.

Another advanced step is being contemplated by the board, and that is the matter of increasing the salaries of various professors. We must, in order to have the best university, have the best possible men, for the quality of the faculty determines much more than buildings and equipment the quality of the university. More money is necessary in order to retain the strongest men. This fact was emphasized by a New York University being able to give Dr. Gordy, a man whom O. S. U. could ill afford to lose, almost twice the salary he received here. We alone are not suffering in this regard, however. The University of Michigan daily fears that the high salaries paid by other universities will deprive U. M. of many of her more able men.

Mr. Massie urged the students to feel free to come to the board with requests and suggestions. The closer the board keeps in touch with the student body the better will it be able to solve the problems and see the needs of the University.

There are some things in Mrs. Siebert's paper which should be considered, and some plan evolved from the suggestions of that paper would keep the alumni more vitally interested in the welfare of their alma mater. What a university as well as an individual needs is friends, and everything possible should be done to make more intimate the relations of the alumni to the University.

—

OHIO, THE EMPIRE STATE.

Everyone who attended the commencement exercises was struck by the fact that Edward Everett Hale spoke of Ohio as the "Empire State." In commenting upon this later, Dr. Hale said several very nice things about Ohio to justify the title he had given her. He said that a State which had given so many statesmen, writers, financiers and other great men to her country as Ohio has done is justly entitled to be called the "Empire State." It might be added that we Ohioans have thought that for quite a good while.

I verily believe there is an Olympus in every human soul, a serene region, high above the strata where struggle and sorrow and passion abide; a region unshaken by storms; where rains never descend and snow doth not fall.

DISCRIMINATION

Is the safeguard of all pharmacists and physicians in buying or prescribing medicinal chemicals.

There are different qualities of chemicals, just as there are different qualities of wines, perfumes, cigars and other articles of merchandise. If you want the best you have to discriminate.

Our aim has always been highest purity, and the generous support we have received from the drug trade during the past 34 years has encouraged us in our determination to supply only the best.

If you are not already using the **"M. C. W."** chemicals, we invite you to make a trial order for our **Bismuth Subnitrate, Cocaine, Morphine, Carbolic Acid ("Gilt Label"), Potassium Iodite, Sodium Salicylate C. P., Hypophosphites** and **Pure Granulated Salts,** feeling sure you will be convinced of their superiority.

Mallinckrodt Chemical Works,

ST. LOUIS. NEW YORK.

Patents in the Grocery.

This is the way they do these things in Great Britain, according to the *Chemist and Druggist:*

At Greenock Sheriff Court on November 19th, John Sinclair, grocer, 90 Roxburgh street, Greenock, admitted selling a cough mixture called Kerr's horehound, honey and tamarinds, which contained a quantity of morphia. Mr. P. Morrison, S. S. C., Edinburgh, prosecuting on behalf of the Pharmaceutical Society, said that Sinclair, not being licensed as a chemist, could not sell medicines which contained poison. Sheriff Begg said that the case was not a very bad one, and imposed a fine of £1, with £1 2s. costs.

Sealing Corks With Copper.

One of the most interesting ideas in the sealing of corks is to reinforce the cork by a metallic armor, thus rendering it entirely impermeable (*Scientific American Supplement.*) The filled and corked bottles are hung, neck down, into a copper solution, and by means of the electric current a fine copper coating is precipitated on the cork, which is rendered conductive, and the mouth of the bottle. The copper entering into the finest pores of the cork prevents most effectively any escape of carbonic acid. The copper deposit may now be given any desired coloring, by electro-silvering or gilding.

THE NATIONAL CASH REGISTER COMPANY AT DAYTON, OHIO.

THE movement for systematizing a plan for industrial conciliation met with a serious setback in the shutting down of the works of the National Cash Register Company, at Dayton, Ohio. The National Cash Register Company has been conspicuous for its intelligent and liberal efforts to maintain a community of interests between the employer and employes. It has done a great deal to make the material, social and intellectual surroundings of the employees far superior to those of factory people generally. It has done this at considerable expense. People are not fond of being taken care of by a benevolent despotism, as the residents of the town of Pullman showed, but it has been supposed that the Cash Register Company was as judicious as it was liberal, and it has appeared as if the end aimed at were attained and a community of interests established. A few days ago four moulders were discharged. The foundrymen struck for their reinstatement. They were joined by the polishers in their demand. The officers of the company said that if the polishers struck they would shut the factory; the strike occurred and 2,300 persons are out of employment. The men say that the four moulders were unjustly discharged, but if the Dayton experiment as an industrial Eden has failed there is little room for hope that such an experiment might succeed anywhere. A committee representing the employers of the English spinning mills has been seeking for nearly two years to come to an agreement with the representatives of the labor organizations for an automatic plan of adjusting wages to rising and falling prices. This committee in May, 1899, suggested arbitration pure and simple, or, second, a conciliation board representing both sides, starting with the wages of 1898, and providing for increases or decreases of wages if profits increased or decreased 2 per cent. or more during a year. These variations were to be 2½ per cent. for each 2 per cent. change in profits, the maximum increase or decrease to be 10 per cent. and a process was suggested, which seems fair enough, for ascertaining the amount of profits. The representatives of the labor unions declined both. The operatives then proposed starting from a net margin of profit, and no one objected to making this 5 per cent. on the investment, but there was immediate difficulty in ascertaining profits. The operatives proposed to take the mills at a valuation, averaging the old and the new at 8 shillings a spindle, and the working capital at 3s 6d per spindle. The owners insisted that the least valuation should be 15s per spindle for the mills and 5s per spindle for the working capital. The operatives said that the margin of one-fourth penny per pound between raw cotton and yarn would pay 5 per cent. on the capital. The employers denied this. The employers proposed to consult the books of the mills and the operatives refused to accept the books. They urged the employers, however, to select the mills and make their investigation. The employers declined to do this, on the ground that if the results disappointed the operatives they would say that the mills had not been fairly selected. The labor leaders went off and consulted their constituents and reported that "so satisfied are we in our own minds that the afore-named amount (one-farthing) would fully give that profit (5 per cent.), that under no circumstances can we recommend our members to accept any increase on the ¼d per pound margin." The employers replied to this that they did not believe a farthing was enough, "but we are prepared on the point to abide by the decision as any independent inquiry to be mutually agreed upon." They proposed to take mills of various ages, reckon the original investment at 25s per spindle and the depreciation at 1s 3d per spindle per annum, and to determine by the books what amount of margin was needed to give 5 per cent. on the capital. The operatives responded, "The more we discuss the matter of profit the more we feel convinced that one farthing margin per pound of cotton worked would give 5 per cent. profit on the amount of capital required in working it, and we feel that to engage accountants to prove it would be a waste of energy." In December last the employers notified the operatives that they could not agree to anything that was not "based upon properly ascertained results of the cotton spinning industry," and the operatives' committee again refused to join in ascertaining results from books of mills. Both sides have reported a deadlock to their constituents and the public.—*The Stationer.*

Late press reports indicate that the Cash Register Company seriously contemplate moving their plant to some country where the labor troubles are not such a grave menace to the welfare of a great enterprise. But where will they go?—[Editor.]

A WISE VIEW.

I can see good reasons for the adoption of the idea of including courses in business methods in colleges of pharmacy, and can see no reason against it. It can do no man any harm, whatever his vocation in life, to know something about affairs and the usual rules and practices of business transactions, and it appears to me that it would serve many a pharmacist to good advantage to know these rules and practices.

There is no doubt that the pharmacists of the type of William Proctor, Jr., whose pharmacy was more a laboratory than a salesroom, are dying out, and it is quite natural that they should, due to the development of the profession and the daily increasing competition. There is not the money in the business to-day to justify a man to run a pharmacy on anything else but business principles. It requires business acumen and strict attention to dollars and cents to make a success in pharmacy to-day, and the salary of an extra clerk frequently represents a great percentage of the total profits.

You will find as a rule that the pharmacists who have been the most successful are those who possess the ideas of trade and the elements of business training most pronounced in their make-up. The man who spends his spare moments at his test tubes and flasks is not in the race with the man who spends these at his books, and at seeing what his competitors are doing, and how he can enlarge his trade and increase his profits. If prosperity and financial success are the aim of the pharmacist, and it seems natural to suppose that they are, then I think there can be no doubt as to the advisability of incorporating a course of business methods in the curriculum of the college of pharmacy. To demand it as an entrance requirement would not be satisfactory in my judgment.

PHARMACEUTICAL SOCIETY OF GREAT BRITAIN.

The annual dinner of this society was held in London May 21. In response to the toast, "The Pharmaceutical Society," Sir J. Crichton Brown, F. R. S., delivered the following spicy address, which we reprint from the *Chemist and Druggist:*

He said he recollected reading that St. Dunstan was one of the earliest chemists in the country. He flourished in the tenth century, and then retired to Glastonbury Abbey in order that he might the better pursue his experiments and his search after love-philtres, elixir vitæ, and other useful preparations—(laughter)—and when there he shut himself up with his gallipots in a small cell, so small that he could not stand upright in it nor stretch his limbs, so as to mortify his flesh. (Laughter.) While carrying on his pharmacological researches in this small cell St. Dunstan was much annoyed by the devil, who has always been peculiarly jealous of chemists and druggists. (Laughter.) The devil kept thrusting his head in at the window to ascertain what St. Dunstan was doing, until at last, his patience exhausted, the Saint seized his red-hot pincers out of his little furnace, caught the devil by the nose, and held him firmly until his bellowings filled all the country round. (Laughter.) When he contrasted St. Dunstan in his cell at Glastonbury with the members of the Pharmaceutical Society dining in the Whitehall rooms, where mortification of the flesh is not specially practiced—(laughter)—or when he contrasted him with the pharmacists in their spacious well-appointed laboratories, surrounded by all the appliances of modern science, he recognized the enormous changes which had been achieved. But still he recognized their direct apostolic succession in two respects, at any rate, for, like St. Dunstan, they were still engaged in striving to perfect, so improve, and to disseminate the means of alleviating suffering and prolonging life, and, like him, they were still opposed by the devil—(laughter)—only their devil is not a corporeal whose nose might be tweaked, but hidden insidious powers of evil—ignorance and prejudice—to be overcome by diligenee and education. (Applause.) St. Dunstan's conflict with the devil filled all the country with bellowings, but the pharmacists' struggles with evil fill it with praises, for all men acknowledge the excellence of the pharmacists' work. It was not necessary to go back so far as St. Dunstan to appreciate the pharmacist. In the middle of the eighteenth century Dr. Cullen, who did so much to raise medicine from an art into a science, bestowed his unqualified benediction and eulogiums upon the Edinburgh Pharmacopoeia of that period, which was in great demand all over Europe. What did that Pharmacopoeia contain? Directions for the preparation of vipers, eggs of ants, of human skull, powder of mummy, crabs' claws, juice of wood-lice, and many choice compounds of that character—(laughter)—as well as a concoction which ran as follows: Take six live frogs, put them in an earthenware pot, place them in an oven moderately heated, and when they are dried sufficiently to be pulverized, administer with aqua ' vita. (Loud Laughter.) What, gentlemen, was the Anti-Vivisection Society doing in those days, when pharmacists were making such horrible physic? (Loud laughter.) They drew remedies largely from the animal kingdom to-day, and some of them were not appetizing when they thought of the sources from which they were derived; but they were daintily prepared, and, above all, they had scientific warrant, whereas those compounds of bygone days were all empirically arrived at. Pharmacy has advanced just in proportion as it has become more and more scientific and less and less empiric. Medical science and pharmacy were always united; they have not been divorced, but they have agreed to a judicious and judicial separation. (Laughter.) It is science that has elevated the occupation of a pharmacist out of a trade into the profession status, and pharmacists have amongst them to-day men whose scientific attainments ought to make them proudly owned by any profession in the country. (Applause.) The work of the Pharmaceutical Society in aiming at the education of chemists, in encouraging *esprit de corps*, and maintaining discipline amongst them is one which is an advantage to the whole community, and deserves public recognition and support. (Applause.) After an amusing reference to the many new German remedies, Sir James, continuing, said he was glad to be able to congratulate the Pharmaceutical Society on its success in representing the great body of chemists and druggists throughout the country. Legitimate pharmacy was day by day becoming more popular, and never had there been

Digitized by Google

such a consumption of recognized remedies as at the present day. The modern methods of dispensing drugs in tabloids, by palatinoids, and in cachous had largely conduced to it. At the same time, he thought there were difficulties and drawbacks connected with the exhibition of drugs in those forms. He had the kindliest feelings towards all members of the pharmacist profession, and he turned to them frequently when he wanted useful information. He was in sympathy with them, and he knew that notwithstanding their profits, their success, and the success of the Pharmaceutical Society, some of them had a very hard struggle. He held, therefore, they should be protected as far as possible from all undue competition, and in this respect he thought the Society might well direct its attention to the sale of drugs in hospitals, as he was of opinion that out-patients who could afford to pay for their medicines ought to go to the druggist's shop for them, and not be supplied free by the hospitals. He thanked them for the way they had accepted the toast of "Science," and in return he had the pleasure of proposing "Success and Prosperity to the Pharmaceutical Society of Great Britain," coupling with it the name of the Vice-President.

HOW SHOULD DRUGGISTS OBSERVE SUNDAY?*

By Julius M. Farnsworth.

Many people will maintain that druggists should observe Sunday as other reputable business firms do, by closing their stores and taking a day of rest. The long hours and the responsibilities entailed upon the modern pharmacist would seem to especially entitle him to one day in seven. The practice of pharmacy in large cities is by most members of the profession carried on more actively on Sunday than on week days. The mechanic, the clerk, the professional man, all nurse their ailments or forget them until Saturday night or get sick on Sunday from Saturday night's dissipation. Therefore, on Sunday they want medical treatment, or think they do, which is much the same thing.

Those who smoke want a good cigar or two on Sunday, and where else can they find that kind except at the druggist's? During the summer many druggists sell more soda water on Sunday than on any other day. The writer had that experience in Chicago, and for several years worked harder on Sunday than on any week day, and seldom spent a Sabbath with his family or friends.

In smaller cities and villages these objections to Sunday closing do not weigh so heavily; in some small places where there is only one druggist, and the terrors of competition are eliminated, our worthy craftsman who prefers long life to great riches (?) will close his store all day Sunday and let the public worry along with a quinine pill box and the camphor bottle or some other bottle as the only solace.

It is charged that in certain States some stores are kept open in order that the owners may make money by the illegal sale of liquor; of course this charge could not lie against the druggists of the old Badger State.

As a compromise between an open and a closed Sunday, probably a majority of the profession outside of the larger cities adopt the plan of keeping open a portion of the day, usually a few hours in the morning and an hour or two at night, enabling them to take the most of the afternoon and evening for rest or recreation. Some arrange to have their stores closed during the hours of divine service, thereby enabling themselves and their clerks to attend church if they desire.

In one prominent city on the shore of Lake Michigan, there is an arrangement whereby all the stores except one are closed from 12 to 6 Sunday afternoon, a different store remaining open during those hours each Sunday in turn, and the closed stores have a sign in the door or window directing the public to the open store; this plan has given good satisfaction.

In regard to the goods that should be sold on the Sabbath, the writer believes it is difficult to refuse to sell salable goods. There is not much labor involved in handing out cigars or sundries, and if one's store is open it is well nigh as difficult to refuse to sell these things as it would be to refuse to sell a package of headache powders. It is different with the soda fountain, however. Soda water is a refreshing and delicious drink only when great care is taken in serving. This involves a great deal of labor which the writer has found by experience may be avoided by telling his customers who call for soda water, that on account of the labor necessary in serving it satisfactorily, he has decided to dispense with the soda water business on Sunday.

In one prominent city in the State the writer is informed that the injunction, "Six days shalt thou labor and do all thy work," is literally obeyed, at least as far as business is concerned, by all the druggists in the place, who keep their stores closed all day. Doubtless there are other places where it is also done, and it only confirms the theory that in organization for mutual benefit and protection, lies the only salvation for the overworked druggist in a physical and moral sense as well as in a financial one. The only valid excuse for keeping a drug store open on Sunday is the one that lies on the surface, namely, that those who need medicine may obtain it. In those places where the physicians dispense drugs along with their advice, a large part of this need is no longer apparent.

Extended arguments are not necessary to prove the druggists' special need of a weekly day of rest; I think everyone will concede it. There are many, also, who doubtless feel that it is wrong to do unnecessary work on the Sabbath, and it is only because of the apparent necessity of relieving the immediate needs of those who may be sick, that they consent to open on Sunday at all.

To both of these classes a way is open, and it is not an untried one. It depends, like many other plans for our well being, on the faithful co-operation of those interested. Let us suppose, for example, that in the thriving city of X——, there are five druggists. We will designate them as Ayer,

Digitized by Google

Hood, Davis, Pierce and Paine. They get together and decide that one of them can take care of all the business on Sunday that is now divided among them; they therefore arrange that on the following Sabbath only Druggist Ayer will open his store, and each of the others will have a printed card hung in a conspicuous place in his door or window stating that his store is closed on this Sunday, but that Ayer's store is open. On the next Sunday, Druggist Hood is open and each of the others is closed, with a card as before announcing that Hood's store is open. On succeeding Sabbaths the others keep open in turn. Neither of them has an undue advantage over the others, the public is well served and the druggists will live longer.

The only serious objection I have heard to this plan is possibility of refills. To my mind this would not be sufficient to defeat the plan. There could only be a small portion of the community who would need refills, and they could attend to that on Saturday. Everyone has to eat, yet we are familiar with the fact that but very few groceries or meat markets are open on Sunday. People purchase their supplies on Saturday. By the above plan there is always an open drug store in case of an emergency.

This plan, I am informed, has been tried in several places, and has worked satisfactorily. It is in operation, I am told, in some parts of Chicago, where the owners of a cluster of stores act together as in a village or small city. I am not the originator of the plan, but I am a firm believer in it, and think it is well worth trying in any community.

*A prize paper read at the last annual meeting of the Wisconsin Pharmaceutical Association.

If you have a voice sing about your work. It is like the boy's whistle, it keeps up your courage.

Sterilizing Cocaine Solutions.

The growing use of cocaine for producing anæsthesia by inter-spinal injections has caused a demand for a method of sterilizing the solutions without the use of heat, which sometimes acts unfavorably on this alkaloid. A simple method is recommended in the *New York Medical Record:* Place the desired amount of cocaine salt in a graduate that has been recently sterilized, then add an ounce of dry ether and stir the mixture constantly with a sterilized glass rod until the ether has completely evaporated. Pour on the cocaine the requisite quantity of recently boiled (and cooled) water, stir to effect solution and use at once. This method contemplates the preparation of only the actual amount of cocaine injection needed at the time; hence there is no danger of using a solution of cocaine that has become "spoiled."

REFLECTIONS UPON LIFE.

There is no real courage unless there is real perception of danger. The man who does not comprehend the perils which surround him, and is therefore calm and collected, is not courageous; he is simply ignorant. The highest courage is manifested only by the man who knows what he faces and fully realizes it.

In all deep affection there is a passion for possession which is never satisfied, because there is something sacred and incommunicable in the personality of one we love; and there is a passion for speech which is always denied, because we cannot find language for the deepest that is in us. Our souls are greater than our vocabularies; we cannot put into words that which is too deep and inclusive for human speech. At the best we can only make signs to one another; if we could speak adequately there would be no mystery and immortality in love.

To live cheerfully with ourselves is among the most difficult tasks which life lays upon us. When one thinks of it, there is something appalling in the necessity of spending all one's time for 50, 70 or more years with the same person. This inevitable companionship with ourselves, this necessity of seeing always with the same eyes, thinking with the same brain, doing work with the same faculties, passing through all manner of experience with the same temperament, makes life one long, monotonous imprisonment unless every resource for enlargement and enrichment is used.

It is this blighting monotony rather than "the slings and arrows of outrageous fortune" which drives some men and women to the mad folly of suicide—that futile effort to break away from self instead of emancipating self. For monotony is far more difficult to bear than misfortune, as the fury and perils of the storm are easier to endure than long weary weeks of dull gray weather.

The changes and the dangers of the tempest may terrify us at times, but they take us out of ourselves, they make us forget ourselves, they fasten our thoughts on the movement of the world about us. To mix with action, to feel the stir of the world, to be in the vortex of change, involves great and inevitable risks, but life itself is a constant risk.—*Hamilton Wright Mabie.*

A LONG-FELT WANT.

WANTED—A Pharmacist and Policeman. Apply at ..... Ave.
—*Louisville Courier-Journal.*

The *Era* inquires if the Chicago hold-up man has gone to Louisville. No, he is in Cleveland doing a thriving business. A few months ago four of them held up a Cleveland druggist, seriously wounding him in the effort. On the evening of June 29th, three other masked men entered the drug store of H. F. Toedtmann, in the same city, and under cover of their guns demanded the cash receipts of the day's sales. The proprietor refused to comply at first, but since the robbers were about to break the cash register he concluded it would be better to open it and let them secure its contents, which amounted to about 40.00. This is the third raid on Cleveland drug stores within a brief period and the frequency of the occurrence is getting to be a serious matter. Four of those who attacked and wounded Mr. Meyer in April last were apprehended and are now in the Ohio Penitentiary. Those raiding Toedtmann's store were completely masked, and but little description of them is possible. Pharmacist and policeman may appear to be a queer combination, but it might be a convenient one for city druggists.

Time Proves all Things.

Cole's Carbolisalve

has been sold and used in all countries and climates for a quarter of a century, and its reputation as "The Great Skin Remedy" increases with the years. It is put up in attractive style and is ornamental, either to the shelf or the show case. Druggists like it because it always pleases—and satisfied customers are the best advertisements.

DRUGGISTS—You take no chances in recommending Cole's Carbolisalve, for if a customer is not satisfied with the results we will refund the money.

Queer Affinities in Names.

The mysterious affinity sometimes existing between a man's name and his trade is a peculiarity often noticed by those who have to do with business directories.

A Canadian town boasts of an undertaker named Death, and in an English town the firm of Foot & Stocking manufactures hosiery. In another town in England Mr. Toe is a shoemaker, and Mr. Heel a clogmaker. Philadelphia has several lawyers named Law, one named Lex and one Judge. Among the teachers in a well-known boys' college preparatory school the music master is a Professor Scales; and it follows as a matter of course that in a western town Mr. Corner is a broker and Mr. Pie a pastry Cook.

—*Saturday Evening Post.*

A southern city boasts of a saloon owned by a firm styled Neal & Pray. Columbus, Ohio, has a confectioner named Candy. A western town can show a dealer in vehicles named Wagonseller. We once saw a sign over a wholesale establishment, "Ketcham & Cheatam." We know a carpenter named Wood, a stonecutter called Marble, a minister Church, a physician Pukes, a pharmacist Mortar, etc., etc.

Conundrum.

Why is Carrie Nation like rheumatism? Because she is h—l on joints.

To Recognize Erased Writing.

In examining handwriting, Comphuis, army apothecary at Malang, Dutch East India, succeeded in making erased letters reappear by means of a silver nitrate solution. When an erasure was suspected, a one-tenth normal silver nitrate solution was applied and exposed to direct sunlight for a short time. The letters appeared on the resulting background. The cause is probably the ingredients contained in the ink, which retard the reduction. In the reducing of the silver nitrate solution, impressions of the hands, etc., were also plainly visible.—*Pharmaceutische Centralhalle.*

WORKING FORMULÆ FOR PEPTONATES AND THEIR COMBINATIONS.

The various combinations with peptone, such as the solution of peptonate of iron, peptonate of iron and manganese, and these again in combination with arsenic, quinine, strychnine, mercury, etc., enjoy a varied and extensive use in the practice of medicine.

The practice of medicine and pharmacy has kept pace with the modern advancement in all lines. It is the aim of the pharmacist to produce preparations not only elegant in appearance, but at the same time palatable and effective. The originators of the various combinations of iron and manganese with peptone claimed for them easy absorption and assimilation by the human economy on account of the predigested form of the peptone. Since the peptonates have become so important an item for the pharmacist, greater familiarity with their composition and mode of manufacture should be of interest to him. The peptones are the product of the action of a digestive ferment upon some form of an albuminoid, such as egg-albumen, fibrine or casein.

This soluble peptonate is then combined with iron, manganese, etc., to form the various peptonates used in medicine. The most simple formula for, e. g., 1 liter of a solution of peptonate of iron and manganese would be: 15.5 grams of dry peptonate of iron and 0.4 grams of manganese sulphate are dissolved in water. To this solution is added a mixture of aromatic fluid extract, 2.3 grams; tincture of vanilla, 2.40 grams; oil of sweet orange, 0.06 grams; glycerine, 62.5 cc.; alcohol, 62.5 cc., and acetic ether, 0.06 grams. Sufficient water is then added to make one liter and the solution filtered. If the simple peptonate of iron is wanted, the manganese salt is omitted, otherwise the formula is the same.

These solutions form the basis for the many combinations with the peptones, the required amount of quinine, strychnine, arsenic or mercury being added as the case may call for. However, it is difficult to obtain a standard preparation of dry peptonate of iron, inasmuch as it does not appear to be a definite chemical compound. It is advisable, therefore, to make your own peptonized iron solution and then add aromatics to make it palatable. In the preparation of the peptonized iron solution, great care and attention must be paid to all details. For the preparation of five liters the following formula may be employed. It is a slight modification of Dieterich's original formula, and is the one employed in the laboratory of the Wisconsin Pharmcal Company:

Fifty-one grams of dried egg albumen or 400.0 grams of fresh material, are dissolved in a solution of 0.5 grams pepsin and 82.0 grams hydrochloric acid in four liters of water. This solution is then kept at a temperature of 40° C., preferably on a water bath, for from twelve to twenty-four hours. The solution is tested from time to time to ascertain whether all of the albumen has been converted into peptone. This is done by adding to a small portion of the liquid a few drops of nitric acid. If the liquid remains clear and shows no cloudiness, albumen is no longer present. Allow the liquid to cool, filter and neutralize carefully with sodium hydroxide solution. To this neutral solution 586.0 cc. of solution of iron oxychloride (Ph. Ger.), previously diluted with four liters of water, are added, and the resulting liquid is again neutralized very carefully with sodium hydroxide. The precipitate is now washed until free from chlorine. The magma is then placed in a porcelain dish, 7.0 grams of hydrochloric acid are added and the mixture heated on a water bath, while stirring, until the precipitate is dissolved. Then enough water is added to measure four liters, and subsequently a mixture composed of aromatic fluid extract, tincture of vanilla, oil of sweet orange, glycerin, alcohol and water enough to make five liters. Finally filter.

—*E. G. Kaeuber in Phar. Rev.*

Sensibility of Plants.

A note by H. Henri Coupin in the *Academie des Sciences* deals with the sensibility of the higher plants to very small quantities of toxic substances in a state of extreme dilution, and the remarkable character of the work lies in the almost infintesimal quantity of such substances needed to cause serious disturbances in the health of the plant organism. The most deadly substance discovered by M. Coupin was sulphate of copper, of which only one seven-hundredth-millionth of its weight in water was sufficient to react upon plants disastrously. The foregoing amounts, poisonous as they are to plants, are altogether too small to be detected by chemical analysis; and the research raises the important question as to whether or not the character of the vegetation of a country is largely influenced by minute quantities of such substances contained in the soil.

Allcock's POROUS PLASTERS

always give satisfaction.

When a druggist sells them he takes no chances and at the same time renders his customer the best service. They have stood the test of over 40 years' use by the public and are acknowledged as **the standard plasters of the world.** You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Corn and Bunion Plasters are made from Allcock's Porous Plasters and are **equally reliable.**

ALLCOCK MFG CO. (Successors.) **Salesrooms—274 Canal St., New York.**

PROGRESS IN KNOWLEDGE OF THE GASES OF THE ATMOSPHERE.

A valuable contribution to the study of the inert gases of the atmosphere is made by Professors Liveing and Dewar in a recent paper read before the Royal Society. The gases were obtained by liquefying air by contact with the walls of a vessel at atmospheric pressure cooled below 20 degrees C. Some 200 ccm. of liquid air were thus condensed, and the more volatile portion was then distilled over into a receiver cooled with liquid hydrogen. This portion, consisting of about 10 ccm., was then passed into spectrum tubes, first, however, traversing a U-tube immersed also in liquid hydrogen. In this manner the gas was completely freed from every trace of nitrogen, argon and compounds of carbon. The tubes showed the spectra of hydrogen, helium and neon with great brilliancy, but also a large number of lines which could not be referred to any known origin. This shows conclusively that a sensible proportion of hydrogen exists in the earth's atmosphere, a point which has been much disputed in the past. If it be true, as has been shown mathematically, that owing to the velocity of the hydrogen molecule, the earth cannot retain this gas in its atmosphere, then there must be a continued accession of hydrogen to the atmosphere from interplanetary space. If this is the case, it is probable that there must be a similar transfer of other gases, and therefore the authors of the paper sought in the spectra evidence of the presence of the characteristic lines of the spectra of nebulæ, of the corona, and of the aurora. Nebular lines were found in the tubes as above prepared; but in one, the gas of which had not been passed through the U-tube, and which contained traces of nitrogen and argon, a line was found very close to the principal green nebular ray, which did not appear in the other tubes, and which may indicate that the substance that is luminous in the nebulæ is really present in the earth's atmosphere. Several lines were found which may possibly be referred to coronal rays, but further study is necessary before this can be established. Still, more doubt attaches to the auroral rays, one of which seems to be identical with a strong ray of argon. The ingenious method devised for the collection of the gases, the demonstration of the presence of hydrogen in the atmosphere, and the possibilities opened up by this manner of attack render this research notable.

—*Invention.*

M. Marie has been investigating a process for estimating phosphorus inorganic compounds so as to avoid the employment of a sealed tube. He makes use of permanganate of potash in nitric solution so as to destroy the organic matter. He dissolves the organic matter in an excess of concentrated nitric acid, heats on a waterbath, and adds a little quantity of finely powdered potassium permanganate. As the solution is discolored more permanganate is added until the solution remains red for some minutes. After cooling a 10 per cent. solution of nitrate of soda or potash is added drop by drop. The oxide of manganese previously formed is dissolved, and the liquid becomes clear again. After boiling to free from nitric acid the molybdic solution is added in the quantity thought to be required for the quantity of phosphorus present, say, about 4 cc. per milligramme of phosphorus. After this the estimation proceeds as usual, taking care to wash the phosphomolybdate precipitated and the ammonio-magnesium precipitate thoroughly.

OXYGEN GAS IN OPIUM POISONING

The writer of this article once witnessed a case of opium poisoning at the Cincinnati Hospital, which had a fatal ending. So long as the patient manifested any signs of life the physicians in attendance employed the usual remedies, and were unremitting in their efforts. In reviewing the incident it has occurred to me that the administration of oxygen gas, conjoined with artificial respiration, might possibly be of some utility in this particular and unfortunate class of cases, seldom encountered outside of city hospitals, where "quick action" is the rule and the means of resuscitation always at hand.

In opium poisoning, as in drowning, the immediate cause of death is the same, and just why magnetic induction is preferably used in the former and artificial respiration in the latter is one of those things no fellow can find out. In the case I saw, when the electrode was applied over the phrenic nerve the only result noticed was a tossing of the upper extremities, while the patient's breathing grew shallower and he slowly, but surely, passed to the "great beyond."

If in either or both cases I had to select one of the two measures mentioned, I would choose artificial respiration every time, and all the time. The writer recalls reading a paragraph in some one of the secular journals that a number of receptacles containing oxygen were stored at the Cincinnati Hospital, some of which had been used experimentally in the treatment of pneumonia, and it was this item that perhaps first suggested the advisability of displacing a deadly gas in opium narcosis with another, which is justly regarded as the life of the blood.

One other remedy theoretically indicated in opium toxemia is the intra-venous injection of the common salt solution, employed not tentatively, *cum grano salis*, but q. s., for life is a serious business, and admits of no trifling.

In this connection no invasion of chemistry's "metes and bounds" is contemplated, but numerous trials of late have demonstrated the value of salt in solution when forced into the circulation, and where carbonic acid is present (free or in excess) the supposition is not unreasonable that some reaction might possibly result from absorption, and the sodium chloride changed to a carbonate. Unfortunately and for obvious reasons, no "clinical proof" is available, and I must per force appeal to my brethren of the "staff," should the subject ever come up (on the elevator) and is found to be *viable.*—*W. P. Orr, M. D., in Lancet-Clinic.*

Better has been making experiments to check Mr. Rutherford Hill's discovery of copper in nux vomica seeds. He tested several samples of tincture of nux vomica. After evaporating and incinerating the residue and treating the ash with dilute sulphuric acid he added ammonia to the liquid, but he did not observe the greenish-blue color noted by Rutherford Hill. He then made use of more sensitive reactions for copper salts. Trying that of Klunge, which depends upon a reddish-violet coloration with aloin, he found that the preparations of Strychnos nux vomica, S. gaultheriana, S. ignatil, S. potatorum, gave the copper reaction with aloin. No coloration was produced with the preparations of S. laurina. Schonbein's test was also tried (blue with tincture of guaiacum resin mixed with hydrocyanic acid). With this all the preparations named, including those of S. laurina, gave the blue color.—*Berichte der Deut. Pharm. Gesellschaft.*

WHOOPING COUGH The Great Guaranteed Remedy for Whooping Cough is . . . .

Dr. Drake's German Croup Remedy

ONE DOSE gives instant relief from the most violent coughing. It never vomits. Sold for over ten years under a positive guarantee to prove satisfactory. WHEN ORDERING

BORAX and BORACIC ACID

SPECIFY STANDARD BRANDS OF THE

PACIFIC COAST BORAX CO.

Our "MULE TEAM" Brand BORAX in one, two and five pound packages will prove good sellers for the household trade.

A Sad Story.

I hear the swell of the ocean and the echo in the hills;
The music of the rivers and the rolling of the rills.
I hear the woodbirds carolling within a tangled maze,
And I feel the lazy languor of approaching summer days.
They give an invitation so seductive and so sweet
Anticipation fills my soul and makes my joy complete.
Oh! gladly would I pack my trunk and steal off in a trice,
But to tell the truth I cannot—for I haven't got the price.

At the Seaside.

Maud—What are you reading?

Pimmie—"A Man Without a Country." It's such a painful story.

Maud (looking drearily up and down the beach)—It isn't half as painful as a country without a man.—*Chicago Tribune.*

"What is the action of disinfectants?" was asked of a medical student.

"They smell so bad that people open the door and fresh air gets in," was the reply.—*American Druggist.*

Duffy's Pure Malt Whiskey.

The standard medicinal Whiskey of the age; a great tonic and stimulant; an invaluable remedy for Consumption and all affections of the lungs and bronchia; a specific for grip, coughs, colds, malaria, and all forms of indigestion and dyspepsia; the only Whiskey taxed by the Government as a medicine. "It makes the weak strong, and the strong stronger."

Sold and recommended by all Druggists.

THE OPEN WINDOW.

"It is only since the introduction of glass for use in windows that such a disease as consumption has become a scourge; before that time life had generally to be lived in window-open, ventilated houses." So pregnantly remarks, in a modest foot-note, the author of a very able and suggestive article in the *Westminster Review*. We are doubtful whether this statement can be verified statistically, but we have no doubt whatever as to the truth of the lesson it teaches. As to the value of the Nordrach treatment there can no longer be any doubt whatever. It, however, labors under the disadvantages inherent to all "systems" of treatment. It has been vigorously taken up in England, but still as a "system," and the author of the article in question will have performed a real service if he succeeds in making the public understand that the virtues of the treatment reside in the *raison d'etre* of the system, and not in the particular institution or physician charged with its administration. The point, too, must be emphasized that the open-air treatment is no specific treatment for tuberculosis; it is of far wider application. Briefly, the method is an amplification of the old-fashioned treatment—put the patient in the most healthy conditions available and trust to nature. This can be and should be the object of every one, not only in the treatment of disease, but in every-day life. The policy of the open window is capable of universal application, but it will not, we fear, be generally admitted without much insistence, for the prejudices which exist against draughts are very deep-rooted, and invested with all the hereditary awe of our grandmothers' teaching. The germ theory of disease has done much towards giving us an intelligent appreciation of many of the mysteries of infection and contagion, and is in a fair way towards giving us the master key to treatment, but at best it is only half the matter. A seed cannot grow without suitable soil, nor can a patient harbor a bacillus to his own detriment unless he is in a fit condition to do so. Typical diphtheria bacilli exist in perfectly healthy throats without causing any pathological condition, and virulent tubercle bacilli are ubiquitous, yet we are not all tuberculous. In other words, for disease two factors are necessary, the infecting organism and a soil capable of supporting its growth. The distribution of the organisms in our habitations has been to a certain extent controlled by modern sanitary methods, but sufficient attention is not paid by the public to control the condition of the soil. A rich man will spend his money in making his sanitary service resplendent with glazed bricks, lined and jointed pipes and polished copper tubing, but will give no attention to procuring sunlight and fresh air—that is, he will guard against infection, but will take no trouble about safe-guarding the condition of the soil the infection is to grow upon. For health both are necessary and equally important.—*Med. Press and Circular.*

ABOUT CHECKS.

Endorse across the back—not lengthwise.

The top of the back is the left end of the face.

Sign your name just the same as it appears on the face. If "C. Smith," write "C. Smith;" if "Chas. C. Smith," write "Chas. C. Smith;" if "Charles C. Smith," spell the first name in full. If erroneously spelled on the face, endorse both ways; first the wrong way, then the right.

If you merely wish to show that the check has passed through your hands, write only your name.

If you wish to make it payable to some particular person, write above your name, "Payable to ——— or order."

If you wish to deposit the check, write above your name "Pay to the order of" and the name of the bank you wish to make the deposit in.

Don't give your blank check to a stranger, as this is an open door to fraud.

Don't draw a check unless you have the money in the bank or in your possession to deposit.

Don't test the courage and generosity of your bank by presenting or allowing to be presented, your check for a larger sum than your balance.

Don't draw a check and send it away, expecting to make your balance before it can possibly get back.

Don't exchange checks with anybody; this is called "kiting" and is soon discovered by your bank. It does your friend no good and discredits you.

Keep your accounts carefully balanced on the stub of your check, and be sure you add and substract it at the right place, i. e., should you draw an amount on check, don't add the amount drawn to your balance. This is often done.—*Spatula.*

Non-Permanence of Weight.

Science has the following remarks upon some experiments by Heyd-Weiller which, like others by Loudolt, seem to show that some chemical reactions are accompanied by a slight change of total weight. These experiments have been interpreted by some reviewers as throwing doubt upon the axiom of the conservation of matter. This axiom is not, however, incompatible with variation of total weight in chemical or even in physical changes. If it should be found, for example, that weight of a given amount of lead and of a given amount of oxygen varied with physical and chemical conditions, a standard state of lead and a standard state of oxygen would have to be adopted, in which state these two substances would always have to be weighed, and the principle of the conservation of matter would have to be restated in this form: Given so much lead and so much oxygen measured by weighing under standard conditions, then, whatever changes these substances undergo, the amount of each is found to be unchanged if both are brought back to standard conditions and weighed. Variation of weight with physical and chemical conditions would, no doubt, throw light upon the nature of gravitation.

Tinned Foods.

When a tin is purchased it should be examined externally before use. If the ends of the tins bulge outwards instead of being somewhat sucked in, the article should be rejected, for the tin is "blown"; the gases generated by the decomposition of the food have collected and are exerting pressure on the tin. The dishonest manufacturer and dealer know this sign of decomposition and when the effect is noticed they prick the ends, and after allowing the gases to escape they reseal the tin. Such pricked tins usually have two dabs of solder on the end of the tin in place of the ordinary one. The odor and appearance of the food should always be very carefully noted when a tin is first opened. Any taint of decomposition, however slight, should be sufficient to condemn the tinned food.

—*British Medical Journal.*

It is said that the word "money" has as many synonymns as any other in the English language. Among them are: Bills, bullion, capital, cash, coin, currency, funds, gold, notes, property, silver, specie. Some of the slang terms used for money are: "Dough," "dust," "stuff," "long green," "boodle."

A HAPPY THOUGHT.

"I had a very happy thought to-day," said a Philadelphia druggist who enjoys a very profitable prescription trade. "I had one of those prescriptions in which strychnine was prescribed in connection with tincture gentian compound, and, as usual in this class of mixtures where an alkaloid is combined with a tincture containing tannin, there was formed after standing a while an unsightly muddy precipitate, which I found on testing to be mostly strychnine tannate. I generally put a 'shake label' on this class of prescriptions, although I don't like to send them out, as the precipitate is apt to stick to the bottom of the bottle, and was about to do so with this particular one when it occurred to me to try the effects of a few drops of hydrochloric acid. Say, the effect was magical, the mixture cleared up at once and all the precipitate dissolved perfectly. Now I don't think that this addition of a few drops of an acid in this class of prescriptions will be contrary to the physician's instructions, for I find that two or three at the most will be sufficient, and the advantage of having a perfect solution of a powerful drug like strychnine instead of a 'shake mixture' is great enough to outweigh any objections. As far as I can say the solution will keep for some time, at least until all the medicine is taken; I have a bottle of it made up three weeks ago and it is still clear."—*Era.*

According to Frerichs, bismuth can be accurately determined by the following volumetric process. The solution of the salt of bismuth is freed from other heavy metals in the usual manner, and the bismuth is precipitated by sulphuretted hydrogen. The precipitated sulphide is collected on a filter, and the washed precipitate and the filter paper are introduced into a flask marked rt 100 c.c., together with a definite volume of decinormal silvor nitrate in excess. To this is added 10 c.c. of dilute nitric acid, and the whole is well shaken for several minutes. The liquid is then filtered and 50 c.c. is collected, and, after adding a few drops of iron alum, the liquid is titrated with a standard solution of ammonium thiocynate until the red color of iron thiocynate is apparent. From the amount of thiocynate required to precipitate the siluer salt left after the double decomposition between the sulphide of bismuth and the nitrate of silver, the amount of bismuth is easily calculated.—*The Chemist and Druggist.*

John Wanamaker on Busin ss Methods.

In a letter to the *Buyer and Dry Goods Chronicle* John Wanamaker says:

"The word that I am glad to say is that there is better promise of business in the twentieth century because mercantile methods are no longer head-over-heels tricks mixed with pink and yellow sensationalism. Business men are learning that there is no short-cut to prosperity and that steadiness and straightforwardness harness up the only team that wins in the race. Good business is not going to be done with bad faults in morals or methods. There is no every-day market for dishonesty in mercantile practice no matter how meritorious the goods, or for dishonest merchandise no matter how meritorious the practices."

"Well, that's enough to try the patience of Job," exclaimed the village minister, as he threw aside the local paper. "Why, what's the matter, dear?" asked his wife. "Last Sunday I preached from the text, 'Be ye therefore steadfast,'" answered the good man, "but the printer makes it read, 'Be ye there for breakfast.'"

(*When origin is known credit is given.*)

Preparing for a Siege.

Wife—The last time I asked you to give me some money you couldn't, because the cashier was sick—now you say it's the treasurer.

Husband—I know it; he caught it from the cashier, and now I'm afraid the secretary will get it.—*Life.*

▲ ▲ ▲

A good story is told of the Bishop of Atlanta, Ga. He recently addressed a large assembly of Sunday school children, and wound up by asking in a very paternal and condescending way:

"And now, is there a-a-n-y little boy or a-a-n-y little girl who would like to ask me a question?"

A shrill little voice called out:

"Please, sir, why did the angels walk up and down Jacob's ladder when they had wings?"

"Oh, ah, yes—I see," said the Bishop, "and now is there a-a-n-y little boy or a-a-n-y little girl who would like to answer little Mary's question?"

▲ ▲ ▲

A naughty boy one day evaded punishment by creeping under the bed, where his mother could not reach him. Shortly after his father came, and, when told of the state of affairs, crawled on his hands and knees in search of his son and heir, when, to his astonishment, he asked: "Is she after you too, father?"

A Tardy Acknowledgment.

Wife—I never knew any one that was so indisposed to action as you are. I don't believe you were ever in a hurry in your life.

Husband—You are wrong, madam. You seem to forget the time when I proposed to you.—*Richmond Dispatch.*

Bac eria.

There may be bugs in butter
And bugs in butterine,
Bugs in the air,
Bugs everywhere,
In everything unclean.
But there are no bugs or parasities,
Or germs, or microbes frisky,
In the choicest of all articles—
Just plain old-fashioned whiskey.

NO?

There are no bugs! Ach du mien herr,
There are no bugs—gee whizz!
I've seen a blarsted doodle bug
A floundering in a phizz,
And katydids, and jobberwocks,
And tadpoles from the bogs;
Whirring insectivorousness
From miasmatic fogs,
And many things zoological,
And animalcules frisky
And snakes galore I've often found
In plain old-fashioned whiskey.

SYNOPSIS OF OHIO LAWS RELATING TO PHARMACY.

PHARMACY LAW.

There are two grades of licentiates, pharmacists and assistant pharmacists. Every pharmacy or store where drugs are sold at retail or where medicines are compounded or dispensed must be under the immediate supervision of a registered pharmacist. An assistant pharmacist can only perform the duties of a pharmacist in a store which is under the supervision of a registered pharmacist. A pharmacist can not have supervision of more than one drug store or pharmacy, nor can he be regarded as being in charge of such when he spends a portion of his time in another occupation.

Physicians may compound or dispense their own prescriptions and keep a stock of drugs for that purpose, but they can not legally sell drugs in the same way as a druggist, nor compound the prescriptions of other physicians.

The following articles may be sold by persons not registered: Copperas, borax, blue vitriol, saltpetre, sulphur, brimstone, licorice, sage, juniper berries, senna leaves, castor oil, sweet oil, spirits of turpentine, glycerine, glauber's salt, cream of tartar, bicarbonate of sodium, quinine, rochelle salts, epsom salts, alum, gum camphor, oil of cinnamon and oil of lemon.

The following articles may be lawfully sold by persons not registered, if put up in boxes, vials or packages by a registered pharmacist or wholesale druggist, and bearing the name of the article, the directions for its use and the name of the firm or person who prepares them: Paregoric, essence of peppermint, essence of cinnamon, essence of ginger, hive syrup, syrup of ipecac, tincture of arnica, syrup of tolu, syrup of squills, spirits of camphor, number six, sweet spirits of nitre, compound cathartic pills, quinine pills and paris green when put up in bottles or boxes, bearing the name of a legally registered pharmacist or wholesale dealer, and labeled as required by Section 4364-54 of the Revised Statutes.

Registration is secured by examination only. Examinations are held in Columbus on the second Tuesdays and Wednesdays of January, May and October. The fee is $5.00 for pharmacist and $3.00 for an assistant pharmacist. Applications must be filed at least five days in advance of any examination.

Applicants for first grade certificates must be at least 21 years old and have at least four years experience in the study and practice of pharmacy.

Assistant pharmacists must be at least eighteen years old and have at least two years experience.

Certificates are issued for three years and are then renewable if the holder is engaged in the practice of of pharmacy in Ohio.

Certificates obtained through fraud or misrepresentation are subject to being revoked.

The board of pharmacy may grant certificates to those registered as pharmacists in other states by examination, if their grades are high enough in the state where the examination was taken, but only when such state recognizes on like terms the holders of Ohio certificates. But few states however interchange with Ohio.

Penalties for violation of the law are from $20 to $100 fine and from twenty to one hundred days imprisonment or both. Each day constitutes a separate offense.

POISON LAW.

Whoever sells or gives away, any quantity of arsenic less than one pound, without first mixing therewith soot or indigo in the proportion of one ounce of soot, or half an ounce of indigo to the pound of arsenic, or except upon the prescription of a physician, sells or gives away any quantity of any article belonging to the class usually denominated poisons, to any minor, or sells or gives away any such article to any person, without having first marked the word "poison" upon the label or wrapper containing the same, and registered in a book to be by him kept for that purpose, the day and date upon which it is sold or given away, the quantity thereof, the name, age, sex and color of person obtaining the same, the purpose for which it is required, and the name and place of abode of the person for whom the same is intended, shall be fined not more than two hundred nor less than twenty dollars.

LABEL LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That whenever any pharmacist, druggist or other dealer in poisons, chemicals, medicines and drugs, whether wholesale or retail, shall sell any drug or chemical, an indiscriminate or careless use of which would be destructive of human life, such dealer shall affix to each bottle or package of such drug, chemical or poison, a label printed in red ink, having on it the name of the article by which it is commonly known, the cautionary emblem of the skull and cross-bones, the words "caution and poison," and in addition thereto at least two of the most readily obtainable effective antidotes to such poisonous article.

SEC. 2. Whoever violates the provisions of section one (1) of this act shall upon conviction thereof, before any court having competent jurisdiction, be fined in any sum not exceeding one hundred (100) dollars, nor less than ten (10) dollars.

MORPHINE LAW.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That it shall not be lawful for any person, other than a wholesale druggist or other dealer in drugs and medicines, to sell or offer for sale at wholesale, or for any person other than a registered pharmacist or a registered assistant pharmacist, to sell or offer for sale at retail, morphine or any of its salts, in this state, and it shall not be lawful for such person to sell or offer for sale, morphine or any of its salts, in any bottle, vial, envelope or other package, unless the same shall be wrapped in a scarlet paper or envelope, and all bottles or vials used for the above purpose shall contain not more than one drachm each, and shall have in addition to said scarlet wrapper a scarlet label lettered in white letters, and the same must be upon both vial and wrapper, when vials are used, plainly naming the contents of said bottle; and further, that no person shall have the right to change any preparation of morphine from its original package to any other receptacle whatever for the purpose of retailing or dispensing therefrom, but it must be retailed or dispensed only from the original package with scarlet wrapper and scarlet label as aforesaid.

SEC. 2. That any one violating the provisions of the above section shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than ten or more than fifty dollars, at the discretion of the court, for each and every violation of the preceding section.

SEC. 3. That all laws and parts of laws in conflict with this act be and the same is hereby repealed.

"M. C. W."
MORPHINE.

There is probably not a druggist in the country who does not know the meaning of **"M. C. W."** and thousands of them know that by specifying **"M. C. W."** on their orders they will get chemicals of the highest purity, at the lowest ruling prices. Morphine being now one of our leading staples, we invite our friends to lend us their encouragement by specifying the **"M. C. W."** brand. In the manufacture of our Morphine, as in all of our chemicals, quality has been the first and foremost consideration.

SPECIFY "M. C. W."

Mallinckrodt Chemical Works,

ST. LOUIS. NEW YORK.

"Our Favorite" Gold Enamel

WASHABLE.

Not a Gold Paint, but an Enamel which goes on any surface, brilliant and smooth as Gold Leaf. Don't wash off or rub off. Price, regular size, $1.50 per dozen.

Japanese Gold Paint, the best and most brilliant, ready mixed gilding on the market. Favorably known throughout the country. Price, regular size, $1.50 per dozen.

Midland Druggist Offer TO NEW..... SUBSCRIBERS.

"Midland Druggist" for one year regular price, $1.00

.....AND.....

"The Bookman" of New York for one year, regular price, $2.

Both Periodicals for $2.00

The *Bookman* began in the April number a new serial to run throughout the year by Prof. JOHN URI LLOYD, under the title, **"Warwick of the Knobs."** Its typical characters concern a class of people diametrically opposite the principal characters of **"Stringtown on the Pike,"** Prof. Lloyd's book which was offered with the MIDLAND DRUGGIST last year.

The *Bookman* containing this new serial is offered with the MIDLAND DRUGGIST, as John Uri Lloyd is one of our most noted pharmacists as well as writers of fiction, and we believe the story will be of peculiar interest to the druggists of the central west, where Prof. Lloyd is so well known.

"Midland Druggist" for one year, regular price, $1.00

and

"Spatula Soda Water Guide"

Regular Price to the Trade, $1.00.

Both of the above for $1.40.

This guide gives in a condensed form all the necessary information and formulas to aid one in becoming a thorough dispenser. The book is worth many times its price to even an experienced man.

Communications on all questions pertaining to the Trade and Profession are wanted. Stamps should be enclosed if rejected communications are desired returned.

QUESTIONS SOLICITED.

We solicit questions on all points of general interest to the trade. Technical questions will be answered by the editor, W. R. Ogier, or Prof. Geo. B. Kauffman. Correspondents must send their names, not for publication, with each query. No attention paid anonymous questions.

Editorial.

RESPONSIBILITY OF DRUGGISTS FOR SALE OF POISONS.

MANY of our readers doubtless remember the suits for damages brought against two Cincinnati druggists on account of having sold poison to persons who used it with the purpose of committing crime. In one case the sale was made to a colored lad, under age, and in the other to a servant maid, who placed it in food prepared for the family, all of whom were poisoned.

The claim of the plaintiffs in these suits is in effect that the druggists did not exercise the proper caution in selling poisonous drugs to irresponsible persons, such as minors, or to unknown persons, such as the servant was stated to be, and that if due care had been used the articles by which the crime was committed could not have been obtained.

The defendant druggists filed a demurrer to the petition as not constituting a sufficient cause for action and disclaimed all responsibility for the acts of the purchasers of the poison. The court overruled the demurrers, and in so doing expressed the opinion that the complaints did constitute good cause for an action, and that the druggists were responsible for damages caused by another, provided that any negligence was shown in the matter of the sale of poisons. The case will be tried upon its merits. The opinion of the court in these cases would appear to be good law,

Digitized by Google

as well as good sense. In many cases there is not sufficient care used by druggists in selling poisons. Many of them do not regard such sales as specially hazardous. Many do not keep any record of the sales of poisons. Druggists have been known to sell such articles as strychnine and arsenic for many years without the exercise of greater care than they would in selling cream of tartar, and the fact that they have done so without accident has rendered them exceedingly indifferent to the possibility of serious trouble through such negligence. The result of the hearing in the Cincinnati cases will be watched with interest, not only by Ohio druggists but by druggists in general, since, the points at issue are of general application.

THE SPRINGFIELD AND OTHER CASES.

THE Common Pleas Court of Clarke county, Ohio, has reversed the decision of the Probate Court in the Caspar case. One Norris, a detective, applied to the Probate Court to certify to the county treasurer that T. J. Caspar, a druggist of Springfield, should pay the Dow liquor tax of $350. The action was brought under the notorious Middleton supplement to the Dow law. The judge of the Probate Court denied the request, holding that the assessment and collection of taxes was an executive act, to be performed by executive officers, specially provided for by law, and chosen for the discharge of such duties and that the performance of executive functions by judicial officers was antagonistic to the constitution of the state. This opinion, apparently so sound in its legal aspect, was reversed by the Common Pleas Court, and the case will go to the Circuit Court on appeal taken by Dr. Caspar.

There seems to be a tendency in some sections, on the part of courts to transcend the sphere within which their powers are supposed to be exercised, and assume authority originally vested solely in executive officers. Two illustrations, different entirely as to points at issue from the Springfield case, have recently come to our notice; one the act of a state court in Connecticut in issuing an injunction against one hundred and fifty machinists in the city of Derby, accompanied by an attachment upon their property to secure the enforcement of the injunction, which enjoins the defendant machinists " from in any manner interfering, by threats, persuasions or any other means calculated to prevent persons from entering or continuing in the employ of the plaintiff." The Federal Court in Cincinnati has granted an injunction against strikers for " picketing." Now picketing is supposed to be posting of members of an organized body of strikers at the approaches to a factory, in order to induce workmen to leave the employ, or not to enter into employment with the concern against which the strike is ordered.

It does not seem to be either just or proper for courts to hold injunctions in such cases. If violence occurs the executive officers are the proper persons to suppress disorders and arrest disturbers of the peace. If peaceful methods are used to persuade men to work, or not to work, it is an unwarranted interference of the freedom of speech and action, so much prized by freemen, to restrain by judicial process such reasonable methods. " Government by injunction " may be necessary in seasons of great emergency, when the safety of a large number of people may be involved, but courts of even minor jurisdiction are becoming alarmingly familiar with the practice of exercising their weapons of authority in cases where restraint is wholly unnecessary or wherein power may be properly used only by an executive.

ARE STATE ASSOCIATIONS PASSING?

THE recent meeting of the Ohio State Pharmaceutical Association suggests the question, " Are the state associations of druggists passing away? "

In Ohio there are about 4,200 persons registered as pharmacists or assistant pharmacists, and approximately 2,500 drug stores. The treasurer's report showed 365 members in good standing in the Ohio association. Not many years ago the cry was for one thousand members, and this number was almost reached. For several years the decline in members has been rapid and continuous, until the number has fallen so as to include but one in twelve of the persons registered as pharmacists or assistant pharmacists in the state. This condition of itself need not promise disaster, for 365 active, energetic members of an organization can be a mighty power in any state, no matter how large. But the attendance of members at the Dayton meeting we do not think exceeded sixty. This is one in six of the actual members, and one in seventy of those identified with the retail

Digitized by Google

drug trade of Ohio. The total attendance was not greater than should be found in a meeting of a local association of druggists in either Cincinnati, Cleveland or Columbus. Nor is Ohio alone in the list of states which is witnessing the steady disintegration of associations of pharmacists. These associations have done a noble work in the past. They have contributed in large measure to all the progress which has been made in pharmacy for fifty years. They are in the main responsible for all laws relating to the practice of pharmacy in the several states, and such at this moment exist in every state save one.

The members of these associations have labored long and hard for the welfare of their associates; they have given freely of their time and resources; they have endeavored to show by all possible means to their fellow-craftsmen the importance of aggregation; they have devised plans for entertainment and contributed liberally to a fund for the enjoyment of those who will come and partake thereof. Yet all this has been to little purpose. Will some one please stand up and explain why?

This condition will not continue much longer. There must be either a revival of interest, far-reaching in its effects, or the end of the Ohio State Pharmaceutical Association is in sight. If the district organizations, such as the Ohio Valley and the Northern Ohio, are to absorb the talent, energy and resources of the pharmacists in the territory covered by them, and the members and officers of such bodies are to withdraw their support from the state association then let there be organized a Central Ohio Association of retail druggists, in order that those in the large territory which is contiguous neither to Cincinnati, in the southwest corner, nor to Cleveland, in the northeast, may have some equally strong organization, within which to labor for the benefit of its adherents. We are not advocating such a plan as a matter of choice. We believe the district organizations are seriously mistaking the scope of their activities, if the result of these is to be the loss of the old Ohio State Association with a record of power and influence in the past, of which all earnest members have just reason to be proud, but we are alert to what is going on about us and do not propose to sit weeping at the grave of lost hopes when there is so much work yet to be done in behalf of those retail druggists who apparently are "dead in trespasses and sins" of neglected opportunities.

INTERCHANGE OF CERTIFICATES.

THE *Bulletin of Pharmacy* discusses the question, "Is the general interchange of certificates of registration desirable?" and reaches the only wise conclusion which anyone at all familiar with the subject can reach under the conditions now existing in the several States, namely, that such interchange cannot be made general and sustain even the degree of competency among pharmacists which now exists. This is one of the perennial questions. It is being agitated by that class of individuals who are forever seeking something to talk about.

In the Ohio Association of pharmacists is a gentleman who is regarded as one of the most progressive pharmacists, who thinks that a person registered in any State should be at liberty to practice pharmacy in any other State without regard to the difference in standards established by laws and Boards of Pharmacy of the several States. At the same time he holds that no person ought to be permitted to take an examination before any Board of Pharmacy until he has obtained a degree from a regular school of pharmacy. If he could secure the universal establishment of his second proposition, his first one might be hitched to the second with some degree of reason. Sec. 4409 of the Ohio law meets the exigencies regarding interstate registration in the best possible manner to our thinking.

It provides for reciprocity in the exchange of certificates, and requires the Board of Pharmacy to ascertain that the standard of qualification for pharmacists in any State is fully equal to that established for those registered by examination in Ohio. Under this section there have been but eight persons registered in Ohio since April, 1898. The Board of Pharmacy was fully satisfied that these persons were as well qualified to practice pharmacy as if they had passed the regular Board examinations, and it is only upon this basis that any recognition should be afforded licentiates of other State Boards.

Some time during the present century there will be an approach to uniformity of pharmacy laws in all the States, and when that period arrives the matter of an interchange of certificates will take care of itself. Pending its advent all well equipped pharmacists will be able to pass the examination of any Board of Pharmacy.

HARD ON THE DRUGGIST.

COURTS do not appear inclined to show much clemency when dealing with the responsibility of druggists for mistakes, whether in person or through their agents. The Iowa Supreme Court has confirmed a verdict of the lower courts in which heavy damages were obtained against a drug firm by reason of an error by a clerk in their employ in compounding a prescription for an eye lotion, the application of which caused the patient to lose an eye.

The firm held that they were not responsible for the mistake of the employe, since he was a registered pharmacist, and they had used all necessary precautions in the selection of an assistant whom they believed competent to perform the acts of a dispenser. Cases were cited in defense in which railways were not held responsible for negligence of surgeons in their employ, nor banks for the errors of notaries after it had been shown that they employed only those who were apparently fully competent to perform the duties required of them, etc. But the high court did not see it in that light, and held that there was a difference in this, that railway corporations were not in the business of rendering surgical aid nor banks in the business of furnishing legal service for pay; and that the filling of prescriptions is in the direct line of the business of the drug firm defendant in this case, and that accuracy in the compounding of medicines is what their patrons have a right to expect from any person or firm engaged in this occupation. The judgment of the lower court was consequently affirmed and the damages must be paid.

This is perhaps good law, but it is placing heavy responsibility upon those engaged in the retail drug business. It would appear that a proprietor has no relief whatever from the eternal vigilance necessary to protect him from serious financial loss or positive ruin through the negligence or errors of his employes. The disposition on the part of the public generally is in the line of showing little mercy toward a druggist that commits an error which is serious in its results. An engineer or other employe of a railroad will ditch a train or run it into another, killing or maiming a score or half a hundred, and not as much comment will be made in regard to the accident, no matter how careless the act which caused it, as the sale of some article by an apothecary which gives some one person a pain in the region of the belt without serious results. No tolerance is shown for the liability of human beings to make mistakes when the druggist is concerned. The people expect him to be infallible, to have all wisdom, all foresight, all skill and to be eternally on guard. Do they pay him for such attainments? Not if they can help it. The price of a section hand on a railroad is enough for the man in whose hands rests the welfare of his patrons. And the judges in the courts have caught the contagion. If any druggist is unfortunate enough to commit an error, or an employe does it for him, and a suit for damages is entered, he would better settle it out of court, if he can, and save attorneys' fees.

IT SHOULD BE A GREAT ASSEMBLAGE.

THE Southern Hotel, Broadway and Walnut street, in the city of St. Louis, will witness the first meeting of the American Pharmaceutical Association in the twentieth century. The dates of the meeting are September 16-21. It should be a great meeting. The pharmacists who are actively in the practice of pharmacy should be there, as well as the teachers in schools of pharmacy, representatives of journals of pharmacy, and scientific gentlemen whose lifework is in the sciences with which pharmacy is identified. Every effort has been put forth to make the meeting not only highly profitable but enjoyable as well. It is proposed to revive an old attraction in an exhibition to be held in Exhibition Hall of the Southern Hotel, in which will be displayed objects of interest to druggists. Exhibitions in former years took the form which was undesirable and which led to their discontinuance, but a novel method will be inaugurated at this meeting. A committee was appointed to take charge of the exhibition. No preparation of a secret or proprietary character will be admitted. Drugs, chemicals, pharmaceutical preparations, apparatus, books, charts, diagrams, dispensing requisites and conveniences, labels, etc., will be accepted and placed on exhibition, to which one session of the association will be entirely given, and at this session exhibitors will be asked to explain briefly whatever may be of interest in their respective displays. The committee on exhibits will subsequently prepare a report to the association, which will be published. It is the purpose to make the exhibition feature one of the most useful phases of the meeting, and the manner in which the committee has

Digitized by Google

taken hold of the project gives great promise of success. The attention of exhibitors of the better class is earnestly directed to this feature, and Dr. H. M. Whelply, Local Secretary, St. Louis, will cheerfully furnish all needed information.

We give a sketch of the design for a sterling silver badge which has been adopted as one of the souvenirs of the St. Louis meeting of the American Pharmaceutical Association, September 16 to 21, 1901.

THE OHIO ASSOCIATION AND PHARMACEUTICAL EDUCATION.

THE Ohio Association of Pharmacists is in advance of that in any other state on the question of the education of pharmacists. In 1896 it adopted a minimum standard of requirement of students who were candidates for degrees of pharmacy, and requested the schools of pharmacy to meet this requirement. With cheerfulness and alacrity the persons in control of these schools promptly advanced their curricula to, and in most cases went beyond the demands expressed in the resolution adopted by the state association. We think the standard adopted in 1896 has not been equalled by any other state so far as any position by an association is concerned. A distinct advance over that of five years ago was taken this year in adopting the report of the committee on course of study in colleges of pharmacy, which recommended an entrance qualification and some reforms in the manner of conferring degrees. The prominent points in the report are given on another page of this issue.

We regard this as a practical method of bringing pharmacists now engaged in the practice of pharmacy up to the point of support for the better education of pharmacists. Any defect in such education may not be justly laid altogether at the doors of the schools. The schools in the past have given just what was wanted, and more, indeed, than was expected. If pharmacists want better educated young men all that they are required to do is to demand a higher course of the schools and the response will be prompt and hearty. Now, if the pharmacists will look a little more carefully into the attainments of the apprentices which are taken into their stores, the avenue to the best education of pharmacists will be wide open. Here is the place now demanding the most vigorous action. It is said that a silk purse cannot be made from a hog's ear, no more can a competent pharmacist be made from much of the material which is taken into retail drug stores, and from thence pushed into schools of pharmacy to be made up into qualified pharmacists. It is unwise to set up lofty standards for the schools and then fill them up with young men from which naught can be made.

Ohio has done all that it is possible for a state to do in the way of establishing a standard for the schools, and it is now for the retail druggists of that state to do their share in getting good pharmacists out of these schools, and the only manner by which this may be done is to send into them the material out of which the right sort of men may be manufactured.

EDITORIAL NOTES.

W. F. VOLK, the proprietor of a drug store in the local option town of Westerville, Ohio, is getting the worst of it in his contest with the local authorities over the sale of intoxicants. The fight has been going on for two years or more and in the first case Volk carried the contest as far as the Circuit Court, which decided against him, and he paid a fine of $50 and costs. In the second case the Mayor of the town assessed a fine of $450, and to this Volk appealed to the Court of Common Pleas of Franklin county, but Judge Evans sustained the magistrate in a decision rendered a few days ago, and the fine will have to be paid, together with the costs, which it is reported amount to $200. He, however, may take an appeal again to the Circuit Court; but in face of a former decision upon the same issue it does not look favorable for his securing a reversal of the verdict. Mr. Volk is not a registered pharmacist himself but employs a pharmacist in compliance with the state pharmacy law.

* * *

WE have received the report of the Missouri Pharmaceutical Association for the year 1901. It is a complete report of the proceedings of the annual meeting, held June 18-21, and is mailed out within thirty days after the meeting was held. This is commendable promptness and shows what may be done in this line if all the officers of any state association are imbued with the determination to get the proceedings in the hands of the members as quickly as possible. This sort of enterprise is commended as an example which may with profit be imitated in other states.

The Ohio association directed that the annual report should be issued not later than November 1st, and the secretary expressed his hearty approval of the resolution, but this is a month or two more than is necessary, and we hope the officers of the Ohio association will see how much they may anticipate the time limit granted them.

* * *

THE department store occasionally gets it as well as the druggist, for the New York Court of Appeals has recently given a decision against a corporation conducting such a store, holding it liable for unskillful dental work performed by a dentist in charge of a department of dentistry. The New York *Commercial* is authority for the following statement:

> This corporation represented that it carried on the practice of dentistry in connection with various other "departments," and it so advertised. A woman customer, or patient, having undergone treatment in the "dental department," brought suit for alleged resultant injury and got a verdict. The defense set up by the corporation was that the dental business was not, in fact, carried on by it, but was owned by the dentist himself.
>
> But the Appellate Court held that the company, having held itself out as carrying on a dental department, and the plaintiff having been ignorant of the fact that the company was not the real owner of the dental department, the corporation was estopped from making such a denial. For, under the circumstances, the court said, "the plaintiff had a right to rely not only on the presumption that the company would employ a skillful dentist as its servant, but also on the fact that if that servant, the dentist, whether skillful or not, was guilty of any malpractice, she had a responsible party to answer therefor in damages."

This decision, it will be noted, is in direct line with that of the Supreme Court of Iowa, in the druggist's case mentioned on another page, and goes to show the disposition of the higher courts in widely separated districts to hold to the point of responsibility of proprietors for all acts of subordinates in the rendering of service for which the principals have announced themselves competent to perform.

If department stores in great cities which sublet space to professional or semi-professional individuals in order to have a large aggregation of shows under the same tent, and advertise medical, dental or pharmaceutical service to the public, are held responsible for all the performances of their "tenants," they may conclude that the game is hardly worth the candle. As a rule thoroughly skillful men are not found in such places, and those seeking or accepting them may be extra hazardous to the proprietors.

* * *

THE choice of delegates to represent the Ohio association in the Buffalo meeting of the N. A. R. D. was left to the incoming president, Mr. Firmin. This action places upon him an important duty and the utmost care should be used in the selection of delegates to this important meeting. Fortunately the new president has been attending state association meetings for so many years that he is well acquainted with the qualifications of those who take an interest in matters pertaining to the welfare of the pharmacist and is therefore well qualified

Digitized by Google

to make judicious appointments. We confidently believe he will take the necessary time to determine upon whom to send, and that the association will be well represented in the National meeting.

QUERY—Fly Dispeller.

H. L. D., St. Marys, O.—Wants a preparation for keeping flies off horses and cattle. The following have been recommended:

1. Oil Garden Lavender, one ounce; Alcohol, Water, each one pint. Dissolve the oil in the alcohol and add the water gradually with agitation. The mixture will have to be shaken before it is applied.
2. Oil Cloves, 3 parts; Oil Bay, 5 parts; Tr. Eucalyptus, 5 parts; Alcohol, 150 parts; Water, 200 parts. Mix.
3. We have seen it stated that a strong infusion of Quassia would keep flies off animals, but have no knowledge as to its efficacy. It has the merit of being cheap and is worth the experiment.

Books Received.

The Bookman for August, containing chapters XI–XIII of John U. Lloyd's new serial, "Warwick of the Knobs," and other interesting literary matter.

Proceedings of the Missouri Pharmaceutical Association, June 18–21, 1901. Dr. H. M. Whelpley, St. Louis, Mo.

Sixteenth Annual Report Minnesota Board of Pharmacy for the year 1900. H. Gordon Webster, Secretary, Minneapolis, Minn.

There are those who spend the time grieving for the past which should be used in preparing for the future.

Blow to Counterfeiters.

Vice-Chancellor Reed, in the Court of Chancery, at Trenton, N. J., has rendered an important decision in the case of the Centaur Company against the C. W. Link Drug Company.

For a year or more Charles H. Fletcher, president of the Centaur Company, manufacturers of Castoria, has been fighting, through the courts, counterfeiters and imitators of goods, in which class, it was claimed, the defendant company belonged.

In his decision the Chancellor said, in part- "Every one of the packages put in evidence by the defendant show a persistent adoption of the size of the bottle and the label of the complainant, knowing that, if the bottles were distinctively larger or smaller, or if they were so differently wrapped as to at once arrest the attention of the purchaser, the sale of the remedy would at once become substantially reduced. Injunction granted."—*New York Journal.*

FAITH.

Fain would I hold my lamp of life aloft
Like yonder tower built high above the reef;
Steadfast, though tempests rave or winds blow soft,
Clear, though the sky dissolve in tears of grief,
For darkness passes, storms shall not abide;
A little patience and the fog is past.
After the sorrow of the ebbing tide
The singing flood returns in joy at last.
The night is long and pain weighs heavily,
But God will hold His world above despair.
Look to the East, where up the lucid sky
The morning climbs! The day shall yet be fair!

—*Celia Thaxter.*

JUST AS GOOD WEST OF THE MISSISSIPPI AS IN NEW YORK.

People everywhere are interested in the New York Rapid Transit Tunnel.

Give your customers a chance to get better acquainted with the greatest undertaking of the age. The progress of New York in the matter of Rapid Transit, is being watched by the entire world. This window display will give any one a clear idea of the most important station of the system.

BOARDS OF PHARMACY.

KENTUCKY.

At the meeting of the Kentucky Board of Pharmacy, held in Owensboro, July 9th, the following, out of a class of twenty, passed:

A. A. Adcock, Carrollton; G. J. Boeckman, Louisville; R. F. Friedman, Owensboro; R. L. Jetton, Mayfield; G. H. Kelly, Bardstown; M. F. Scott, Ashland; Miss Agnes Burr, Earlington; C. H. Drane, Henderson; Geo. B. Geiger, Ashland; J. A. Kelley, Louisville; C. E. McCurdy, Winchester; M. D. Taylor, Hiseville.

The next examination will be held in Richmond, Kentucky, October 8th. Applications should be filed with J. W. Gayle, Frankfort, ten days before the meeting.

MINNESOTA.

The result of the examination by this board, held in July, is as follows:

Registered as Pharmacists—Philip L. Adams, Joseph A. Cox, Hans Dahl, Charles E. Geisel, Adolph W. Johnson, Emil E. Kiesling, all of St. Paul.

John A. Browne, Edward W. Lansing, Jr., Albert C. Peterson, Guy C. Clark, Albert H. Errickson, all of Minneapolis.

John H. Beutner, Jr., Winona; Westwood D. Case, Stewartville; J. Gunner, Elmquist; Gunder W. Larson, Stillwater; Walter O. Flodin, Duluth; Bernt M. Hanson, Albert Dea; Hattie M. Hitchcock, Redwood Falls; Victor M. Moffatt, Hendrum; Paul V. McCoy, Dassel; Henry G. Seifert, Louis C. Heiman, New Ulm; Frank W. Smetana, Hopkins; Jennie L. Philips, Clearwater; Mary M. Jones, Frazee.

The following were granted the certificate of assistant pharmacist: Adolph F. Burmeister, Wesley A. Britzius, Charles F. Clough, Walter F. Dreis, Ludie D. Carlson, Orley E. Couch, Alburtus Hanson, Emil T. Schmid, Edna B. Stultz, Ernest C. Wipperman, Henry M. Wilson, Edwin W. Buzzell, Manley B. Cook, Evan G. DeLander, Herman Haueter, Christian A. Hawkins, Avery L. Johnson, Julius E. Liepold, Henry H. Scarf, Nilson P. Westberg.

OHIO.

The next examination of this board will be held in Columbus, on Tuesday and Wednesday, October 8th and 9th, 1901. All prospective applicants will please note that they must file applications in the office of the board not later than Thursday, October 3d, or they will not be accepted for the October examination. Those entitled to a second examination without the payment of a fee must file applications the same as for first examination, but affidavits as to experience, and certificates of graduation need not be duplicated and sent with the applications.

W. R. OGIER, *Secretary*,
Columbus, Ohio.

Napthalan is the substance which Voges calls an antitoxin for mosquito bites. He states that its action on the poison from the bite is as effective and specific as that of an antitoxin on the bacterial toxin. Voges is at the head of the National Department of Hygiene of the Argentine Republic.—*Medical Times.*

Columbus Notes.

Larry St. Clair now has charge of T. B. Ellis' store, at Main street and Champion avenue.

John L. Herpich, with his daughter, leaves the latter part of August for Buffalo and other eastern cities.

C. Schwint, clerk for C. F. Lentz, on the West Side, has returned from a two weeks' visit at Ada, Ohio.

Orloff Schuller, formerly proprietor of the South End Pharmacy, is doing relief work at W. C. Wendt's.

Charles Naddy, head day clerk at the City Hall Drug Store, leaves on a two weeks' vacation the 14th inst.

Henry Beck, the jolly clerk for William Wendt, on south Fourth street, is now enjoying his regular summer vacation.

Mr. and Mrs. T. C. Haney, of Schiller and Third Sts., enjoyed a delightful trip to the Buffalo Exposition and other eastern cities.

Walter Brodbeck and wife have returned from a few weeks' trip up the Lakes to Montreal, Buffalo and other points of interest.

Fred Barrick, with Kiler's pharmacy, has returned from a two weeks' vacation, pleasantly spent with his wife, at Mt. Gilead and Newark.

Mr. Fred Sweet, the genial manager for W. P. Gault, has returned from a month's tour to the Buffalo Exposition and around the Lakes.

Carl Beck, the popular druggist at High and Fulton streets, left on the 5th inst. for a two weeks' hunting and fishing trip to Drayton Plains, Michigan.

Fred Mebs has severed his connection with the Standard Pharmacy, and after a few weeks' rest will be open to engagement, either permanently or relief.

The many friends of Mr. Bruno Schriber, chief clerk for F. W. Schueller, were pained to hear of his sad bereavement in the loss of his wife last month. They all extend their deepest sympathy to him through THE MIDLAND.

Hann & Griffith, Niles, Ohio, have dissolved.

J. L. Roller, Toledo, Ohio, has sold his drug store.

D. Harpster & Co., Toledo, Ohio, have sold their branch at Rossford.

Win Nye and wife, of Portsmouth, Ohio, visited the Pomeroy Bend in July.

George Fismer has secured a position with G. M. Frazer, Bellefontaine, Ohio.

The drug firm of McKim & Riley, Celina, Ohio, has been succeeded by R. E. Riley.

Mr. Frank D. Hall and family, of Newark, Ohio, are visiting friends in Indiana.

W. L. Price will hereafter be found in the store of J. W. Field, Marysville, Ohio.

T. J. Miranda recently purchased the drug store of E. C. Cole, New Carlisle, Ohio.

Mr. Harry Garwood, of Springfield, has just returned from a two weeks' trip to the Lakes.

Mr. Mark Livingston, of Springfield, spent a day in Columbus, attending the races.

Ten Eick & Davis, Tippecanoe City, Ohio, have succeeded the firm of Ten Eick & Bryant.

James T. Blaeser, Waverly, Ohio, recently called on his way to the Buffalo Exposition.

Henry Zissler, Sidney, Ohio, has accepted a position with F. J. R. Pfeffner, at Delaware, Ohio.

M. E. Hale and wife, of Jackson, attended the O. S. P. A. meeting in Dayton last month.

John Niely, with William Moss, at Cambridge, Ohio, has returned from his summer outing.

Mr. Eber Hyde and son, of Lancaster, Ohio, spent a pleasant week at Buffalo and Niagara Falls.

R. S. Wheeler, West Liberty, Ohio, has employed as clerk H. M. Miller, formerly of Sherwood, Ohio.

The Roseman Drug Company, of Cleveland, has been incorporated with a capital of $10,000. It is reported that the company intends to operate a number of drug stores in Cleveland.

Digitized by Google

R. S. Wheeler, of Arcanum, Ohio, has purchased the drug store of Feather Bros., West Liberty, Ohio.

C. S. Gibson, of Gibson Brothers' Pharmacy, McConnelsville, Ohio, has returned from a trip to Chicago.

George C. Lautenschlager and family, of Dayton, are spending the summer vacation at Mt. Clemens, Michigan.

Mr. A. F. Crayton and family, of Newark, are spending their summer vacation at Lake Chautauqua.

Carl Brennan, for a long time with H. Fred Curtis, Marietta, Ohio, has accepted a position at Pittsburg.

The editor enjoyed a call from J. C. Weaver, of Greenville, Ohio, one of our most progressive pharmacists.

H. C. Meachem, of Pleasant City, Ohio, is temporarily employed at the Temple Pharmacy, Cambridge, Ohio.

Mrs. Henry Roth, wife of the Springfield druggist, and son are spending the summer with relatives in southern Indiana.

Mr. Sam Gibson, wife and family, of McConnelsville, Ohio, have returned from a two weeks, visit to Columbus and Cincinnati.

Mr. Richard Collins, of Newark, who has been suffering for the past two weeks with a sore hand, the result of a cut from a broken soda glass, is rapidly recovering.

C. H. Anthony, of Canton, Ohio, for a time with C. B. Henderson, at Athens, Ohio, has returned to Canton, where he has a position.

Ralph Nicholson, of Byesville, Ohio, has gone to Richmond, Indiana, where he has secured a finne position in the Adams pharmacy.

Tom F. Gaitree, of Marietta, Ohio, has resigned his position at Dr. Mason's "Tiber Way" drug store and is open for employment. Here's a good man for somebody.

The many friends of Harman Ward, of Lancaster, will regret to learn of the death, on the 5th of this month, of his youngest child, a boy, aged three months.

Dr. George A. Newton, of Springfield, who sold out several months ago to W. L. Knuth, is furnishing a new store at corner of High and Yellow Springs streets.

Miss Mamie Koons, of McConnelsville, Ohio, lately registered as a pharmacist by the Ohio Board of Pharmacy, has accepted a position with Miss Lucy M. Harvey, at Pomeroy, Ohio. The young ladies are to be mutually congratulated.

Mr. and Mrs. Ernest Johnson, of Newark, Ohio, have just returned from a pleasant trip of two weeks to Buffalo, Montreal and other northern potnts.

The drug stores of H. A. Frankman and A. Wallin, both of Versailles, Ohio, were damaged in the recent extensive fire in that town.

William Farquhar, Bucyrus, Ohio, and M. Amstutz, Pandora, Ohio, have both been in attendance recently upon the Pan-American Exposition, at Buffalo.

Jas. T. Blaser, of Waverly, Ohio, and M. T. Sturtevant, with the Kauffman-Lattimer Company, have been spending a week at the Buffalo Exposition.

Mr. George Barry, representing Orr, Brown & Price, recently spent a short vacation with his family at Lakeside on Lake Erie.

We regret to learn that G. M. Frazer, of Bellefontaine, Ohio, was obliged recently to go to Chicago for a surgical operation. We sincerely hope that the same was successful.

Among the recent visitors at Dayton to attend O. S. P. A. we mention, H. L. Day, Blanchester, Ohio; George W. Brown, Wilmington, Ohio; Homer Thrall and W. D. Lazier, Xenia, Ohio.

Mr. Price, of Kreig & Price, Charleston, W. Va., has been spending a very pleasant two weeks at Lakeside, on Lake Erie. Soon after his return Mr. Kreig will take a short vacation and visit his old home in Ohio.

J. Charles Schaffer, Zaleski, Ohio, has sold his drug store to Mr. John Huhn. Mr. Schaffer expects to move to some larger place and engage in the wholesale business, if satisfactory arrangements can be made.

Baldwin & Blackmer, of Washington C. H., Ohio, have recently refitted their already attractive drug store with a complete set of new floor cases, which makes their store a thoroughly metropolitan pharmacy.

George W. Cramer, Urbana, Ohio, has taken a partner. His former clerk, Mr. Charles Downey, has returned and gone in with Mr. Cramer. We feel sure that the combination will result to the benefit of both parties.

George L. Saunders, of G. L. Saunders & Co., Sistersville, W. Va., called on his friends at Athens, Ohio, last month. George was formerly employed at Cline's pharmacy, at Athens. George is originally a Buckeye and Lancaster claims him.

Digitized by Google

The mother of Mr. George W. Voss, of Cleveland, died at her home, near Milford, Ohio, on August 2nd. Mr. Voss was present and had been in constant attendance for several weeks during her illness. Her age was seventy years.

Mr. Fred Davis, with E. Davis & Co., Middleport, Ohio, with two companions made a trip to Cincinnati in July. The boys rowed and floated down the Ohio in a skiff to Cincinnati, where they sold the craft and returned by steamer.

Will Mcss, proprietor of the Temple Pharmacy, Cambridge, Ohio, has returned from a trip to New York. The prime object of his journey was to meet his father and mother, of Liverpool, England, on their first visit to America. Will incidentally "took in" the Pan-American and reports a good time.

J. A. Morhart, with W. E. Stansbury, at Middleport, Ohio, will visit Yellow Sulphur Springs, Virginia, this month. Adam will certainly be benefited by this outing, as you always find him putting in "good licks." He will be accompanied by his brother, Dr. Fred Morhart, of Washington, D. C., late surgeon U. S. A. at Manilla.

A. B. Howson, of Chillicothe, Ohio, was a recent visitor at the Pan-American Exposition. While en route the train on which he was travelling was wrecked, but Mr. Howson escaped with only a slight shaking up. He thinks the reason he was not injured was owing to his carrying an accident policy.

Rev. D. R. Miller and J. P. Michael recently purchased the drug store of Mrs. E. C. Hoover, 1446 West Third street, Dayton, Ohio, and have moved same to northeast corner Third and Summit streets, in same city. They have added considerably to the Hoover stock, and have at present one of the best stores in Dayton.

A number of our Ohio druggists who are lovers of horses attended the Columbus races recently, and witnessed the great Creceus trot the world's record in 2 minutes and 2¼ seconds. F. B. Tissot, of Mt. Vernon; James Davidson, Lancaster; J. P. Taylor, Mechanicsburg; Will Martin, Mansfield, and others were noticed greatly enjoying the sport.

The Cleveland papers recently reported quite an extensive strike among the fruit juice packers employed by Benton Myers & Co. The strikers claimed that they were required to work too long hours, and that their pay was insufficient. The positions were filled by other men at the same wages paid the old employees, and the work of the firm is at present running along smoothly.

Another drug store robbery was attempted in Cleveland on the night of August 7th. Two men entered the store of E. Opperman, 725 St. Clair street, one of them pointing a gun at Mr. O. and the other attacking him with his fists. Mr. Opperman threw a large bottle containing some liquid at one of the men, hitting him on the head and breaking into pieces from the force of the blow. The druggist's resistance was a little too strong and the men beat a hasty retreat.

Pure granulated salts manufactured by the Mallinckrodt Chemical Works should prove of special interest to critical dispensers as well as physicians. These granulated salts are vastly superior to the ordinary crystals and cost but a trifle more. Druggists when ordering should always specify "M. C. W."

Great Britain's revenue from the Chinese opium trade amount to $40,000,000.

Does it Pay to Study Pharmacy?

Judging from the number of inquiries reaching this office from prospective students over the State, and in fact from other States, the attendance in the College of Pharmacy will be increased this fall along with the other departments of the University.

Among the many questions asked by prospective students is one which we deem of sufficient importance to answer in a public way through the MIDLAND.

Pharmacists will not unanimously agree with us on the subject, nevertheless we will give our opinion and let the students judge for themselves. The question is, "Does it pay to attend a pharmacy school and spend several years in study in order to become a successful pharmacist?"

Students write us that they have asked Mr. A., and have been advised not to enter pharmacy, it is overcrowded, no money in it, the business is not what it used to be, etc. Mr. B. says go ahead, go to college and make yourself as proficient as possible, and if you have the other qualifications necessary for success in a business and professional career like pharmacy, you will undoubtedly succeed. Mr. C. says to keep out of it. "I entered the drug business after spending several years in college, and with cut prices, physicians filling their own prescriptions, competition, etc., I almost starved to death."

Of course the young man is in a quandary and writes to us for our opinion. We do not, as some of our friends might suppose, advise everybody to study pharmacy and picture to them the enormous profits accruing to those who enter the business, the high social position they will occupy and many other allurements. Neither do other departments of the University advise all to learn civil, mechanical or electrical engineering, veterinary medicine, ceramics, etc. We try to determine their preliminary education, adaptability and general fitness for the work and then advise them accordingly.

In pharmacy, just as in other lines of work, many are called, or rather think they are called, but few are chosen. Something like the young man who thought that he was called to the ministry, and after several years of failure was asked by a friend if it was not some other noise he had heard instead of a call to the ministry.

We remember reading several years ago a long article in one of the daily papers advising young men not to study law, that the profession was overcrowded and that they would have to give it up and go at something else. We have not noticed any decrease in the number of applicants for admission to the bar. On the contrary there has been such eagerness to be admitted that for the last two years we have seen newspaper reports of wholesale attempts to secure the questions before the examination and pass by fraud, something we have not heard of in connection with our pharmacy examination.

How many physicians, ministers, lawyers, engineers, business men and in fact men in all the walks of life have found that their work was not congenial and have taken up other callings. This does not argue that the various professions abandoned should be shunned by all, only that they had mistaken the noise.

But to consider the drug business particularly. We all know that since the world began people have been getting sick and dying and will continue to do so till the end of time. There will also be a demand for trained men to manufacture and dispense drugs and medicines. In older times the handling of medicines was carried on by comparatively ignorant people, and a great deal of superstition was connected with the business, but as time went on the druggist and doctor became more highly educated, until at the present time the pharmacist and physician are in many cases, and should be in all cases, the most highly educated and trained men of the community. The motive impelling them to higher education

Digitized by Google

is a noble one, not the mercenary motive which impel so many in their struggle for advancement, but the saving of human life.

When the study of pharmacy is taken up with a natural love for the subjects which go to make up the study, as chemistry, botany, mineralogy, materia medicine, therapeutics, etc., together with the high ideal that one is relieving the suffering of the human race, the student will not question about the advisability of thoroughly preparing himself.

True the conditions surrounding the drug business are changing, and it is the mission of the educated pharmacist to guide these changes.

We have not referred to the self-made men who have achieved success in pharmacy without the aid of college training. With the advance in all lines of learning it will be more difficult for such in the future, and the question may be asked here, as in many other cases where self-made men have made success, "Would they not have made a greater success with the aid of a college training? W. A. L.

☆☆☆

Personals.

Mr. E. E. Harrold, '95, manager of the chemical store room, returned about the first of the month from his vacation trip. This vacation trip turned out to be a wedding journey, as the following annonnce-ment indicates:

MR. ELWOOD ERNEST HARROLD,
MISS CLARA CAMPBELL FARQUHAR,
Married,
Wednesday, July 24th, 1901,
Washington, D. C.
At Home, Columbus, Ohio.

—

Mr. Roy Funk, assistant manager of the chemical store room, is away on his vacation.

—

The overcrowded condition of the chemical supply room has been relieved by removing a section of the wall and dispensing directly into the hall. Old students will notice this change with pleasure since it is more convenient for all concerned.

—

Prof. Kauffman has been roughing it for several weeks up among the northern lakes beyond the bounds of civilization and comfort. He will, no doubt, appreciate more fully the blessings of civilization, such as rapid transit, porterhouse steak, etc., when he returns. Sour grapes.

Mr. Ernest Bradford, '92, assistant chemist to Prof. Lord, surprised his many friends by quietly slipping away on July 30th and taking unto himself a partner in the person of Miss Ida Grace Basterdes, of Marion, O.

—

Work on the new law building is progressing rapidly, also the grading for the new entrance to the University grounds, just north of Prof. Kauffman's residence, is being pushed rapidly.

A good story is told of a young gentleman who was at a social function the other night where it fell his lot to entertain a girl, and as she was pretty and full of life he enjoyed himself very much, thank you. She had on a short-sleeved gown and he thought he had not seen such beautiful arms, but she seemed ill at ease and finally said: "I was vaccinated the other day and it took beautifully, but I could almost scream, it hurts so." He gazed at her faultless arms in astonishment and asked: "Why, where were you vaccinated?" "In Milwaukee," she said with a smile, and the young man fell off his chair.—*Ex.*

Documentary Stamps.

A movement has been begun among the wholesale drug houses to secure a refund of its amount of the documentary stamps attached to goods in their possession on and after July 1, last, when the war revenue reduction act went into effect. While the rulings of the Department of Internal Revenue at Washington have not given any specific ground for the success of such a movement, still from some quarters comes the belief that such a refund may be obtained. Issues will be pooled, it is believed, and if a strong enough showing is made, hopes for the refund may be realized. The amounts involved are understood to be not large in any case, the usual amount being about $500 for the largest firms, because the wholesalers were, of course, prepared for the going into effect of the amendment. It is believed that there will have to be a special bill introduced in Congress in order to effectuate the refund, if at all.

The manufacturers having stamped goods on hand, which are to be refunded upon are getting their schedules and certificates into shape, so that there will be no hitch in the process. It is believed that the recent order of the Department giving United States depositories the power of accepting and disbursing for returned stamps will accomplish an easy, satisfactory and quick settlement. Prior to this ruling it was feared that six months' time would be needed for the work of refunding.

PROCEEDINGS of the Twenty-Third Annual Meeting of the Ohio State Pharmaceutical Association, Held at Dayton,

Tuesday, Wednesday and Thursday, July 16th, 17th and 18th, 1901.

THE twenty-third annual meeting of the Ohio State Pharmaceutical Association was called to order at the Hotel Algonquin, Dayton, Ohio, July 16th, at 4 o'clock P. M., by the President. The Mayor of Dayton, Hon. J. R. Lindemuth, extended a cordial welcome to the visiting society, which was responded to by Mr. A. DeLang, of Cincinnati, on behalf of the Association. Short speeches were made by Mr. Adam Schmidt and Dr. Casper, of Springfield, after which the President read his annual address. The address was referred to a committee for consideration.

The second session was called at 9 A. M., July 17th. The privileges of the floor were extended to Mr. C. H. Jones, organizer of the Ohio Valley Druggists' Association, and to Mr. E. R. Cooper, organizer of the Northern Ohio Druggists' Association.

The reports of the various committees were read and accepted. The chairman of the Committee on Course of Study in Colleges of Pharmacy made the following recommendations, which were adopted by the Association:

ITEM 1.—That this Association requests the Schools of Pharmacy located in Ohio to require on entrance admission, leading to a degree, of at least one year's instruction in a standard high school, which should include algebra and natural science.

ITEM 2.—That this Association re-affirms its position of 1896, that Schools of Pharmacy should have a fixed time for the admission of students who are candidates for a degree in pharmacy, which should be at or near the opening of the school year; and a definite time when the course leading to the conferring of a degree shall close.

ITEM 3.—That the Ohio Board of Pharmacy be, and is hereby requested to adopt a rule that after September 1, 1902, it will refuse to recognize as in good standing any School of Pharmacy within or without the State of Ohio which fails to require and enforce an entrance qualification equivalent to that proposed in Item 1, or that fails to comply with the conditions relating to the admission of students and the conferring of degrees in pharmacy set forth in Item 2.

Reports were read by the delegates to the National Wholesale Druggists' Association and the National Association of Retail Druggists.

The Association ordered its affiliation dues in the National Retailers' Association paid for another year.

Mr. E. R. Cooper explained in detail the working of the so-called Worcester plan for the prevention of price-cutting, in connection with which this Association passed the following resolutions:

WHEREAS, An expression of our sentiments in behalf of price-protected goods is deemed essential; and,

WHEREAS, The retail drug trade would be benefited without injustice to any one by price enforcement under the Worcester plan, now, therefore, the Ohio State Pharmaceutical Association does hereby endorse said plan; and as a further expression of our interest and as an incentive to manufacturers of proprietary goods to adopt it, do urge our members to give preferential consideration to the goods of manufacturers that are sold under said plan, whenever they can do so without injustice to any other goods or discrimination against their own.

Resolved, That the Secretary of this Association be instructed to forward the following resolution to one or more members of this Association in each Ohio town, with request that they obtain druggists' signatures thereto; and,

Resolved, That all signatures so secured be returned to the Secretary of this Association and embodied in fac-simile memorial to proprietary manufacturers, as also for the presentation at the proposed Massachusetts Fall Conference. (And adopted the following):

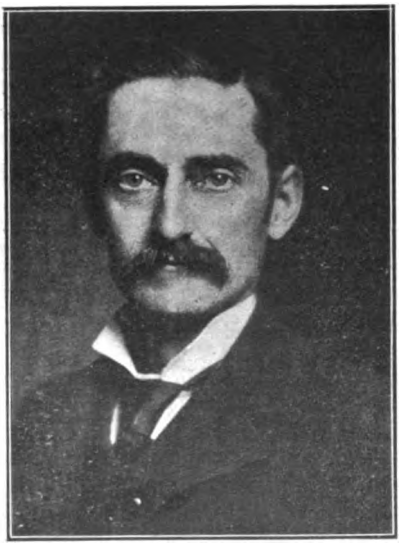
WHEREAS, the retail drug trade would be benefited without injustice to any one by price enforcement under the Worcester plan; now, therefore, the undersigned do hereby endorse said plan, and as a further expression of our interest, and as an incentive to manufacturers of proprietary goods to adopt it, do promise to give preferential consideration to the goods of manufacturers that are sold under said plan, whenever we can do so without injustice to any other goods or discrimination against our own. And we promise to sell the price-protected goods whenever called for by name, without

Digitized by Google

effort to sell our own, or to sell them in place of such price-protected goods.

On Wednesday afternoon the Dayton druggists tendered the Association a carriage ride and a trip through the National Cash Register Company's model factories, where were seen the detailed processes of manufacture, the system by which employes suggest their own ideas, and the artistic lunch room, where the girls and ladies are each day, served the essentials of a good lunch for five cents per week. These works certainly suggest an era of higher aim and culture among factory operatives.

The following officers were elected for the ensuing year: President, J. C. Firmin, Findlay; 1st Vice-President, Charles Freericks, Jr., Cincinnati; 2nd Vice-President, G. C. Himmelman, Akron; Permanent Secretary, L. C. Hopp, Cleveland; Treasurer, J. H. Von Stein, Upper Sandusky; Executive Committee, F. W. Herbst, Chairman, Columbus; J. P. Harley, Warren; John Kutchbach, Cincinnati.



JOHN C. FIRMIN, Findlay.
Elected President, O. S. P. A., July 18th, 1901.

The initiation fee for new members was abolished.

The Association commended the Board of Pharmacy on the fact that the number of assistant registered pharmacists had been increased in the last two years.

The following names were recommended to the Governor from which to select a new member of the Board of Pharmacy: W. R. Ogier, Columbus, John Von Stein, Upper Sandusky; John Byrne, Columbus; Adam Schmidt, Springfield; Geo. W. Brown, Wilmington.

A vote of thanks was tendered to the Dayton druggists and the Entertainment Committee for their generous efforts.

An auxiliary section was formed and put on an active basis, the object of which will be to protect those members who may be unjustly persecuted or prosecuted under the existing or future laws of this State, to take care of any cases against them, both in the lower and appellate courts, without individual expense to the druggist beyond his per capita fee for membership. Membership to be restricted to members of the Ohio State Pharmaceutical Association. A central committee of five was appointed by the President to have full charge and discretion in doing the work.

The matter of time and place for next year's meeting was left to a central committee, the preference of the committee being for a boat ride to Mackinac, holding the meeting on board; the next preference to be given to Put-in-Bay.

LEWIS C. HOPP, *Secretary.*

NOTES.

The report of the Special Committee on Course of Study in Colleges of Pharmacy brought forward considerable discussion. The report re-affirmed the position taken by the State Association in 1896 on the course of study in Schools of Pharmacy, and recommended that some advance steps be taken in the matter of entrance requirements.

The Association adopted the recommendation that all Schools of pharmacy require an entrance admission equal to one year in a standard high school.

The Board of Pharmacy was requested to refuse recognition to all Schools of Pharmacy, either within or without the State of Ohio, after September 1, 1902, which do not enforce the entrance qualification. The Board was also requested to decline to recognize schools which do not have a regular time for admission of students as candidates for degrees in pharmacy, and a stated time when such degrees should be conferred.

The Dayton druggists did all and more than could have been expected of them in making the visitors welcome, comfortable and happy. The ladies of the city identified with the druggists were present at the evening entertainments and made themselves

Digitized by Google

particularly agreeable. It is no little tax upon the fraternity in any city or town to prepare entertainment for a State Association. They have no means of knowing whether the attendance will be large or small, hence they must prepare for the larger number, and this involves no little expense in money as well as time. The Dayton pharmacists are not slow nor small, but did things with a generous hand.

—

The report of the Board of Pharmacy showed a total of 4,176 persons registered in Ohio. Of these 1,331 were pharmacists registered by law, 8 registered on certificates from other States and 2,074 registered by examination. Assistant pharmacists—609 were registered by examination and 154 by law; total, 773.

Pharmacists examined during the year, 295; passed, 140. Assistant pharmacists examined, 105; passed, 66. Assistants passed on pharmacists' examination, 20.

Total receipts from fees and penalties, $2,743.50; total disbursements, $3,100.16.

Number of prosecutions during the year, 13.

The Association adopted a resolution introduced by Prof. Beal strongly supporting the action of the Board in its efforts to increase the number of registered assistant pharmacists by offering certificates as such to those who take the pharmacist's examination, but whose grades do not warrant their registration as such. The rule of the Board is to register as assistant pharmacists those who make 55 to 60 per cent. in general average on pharmacist's examination, while a higher standard is required to pass as pharmacist.

—

Columbus had, as usual, a good delegation. The Capital City is always in evidence, and can be relied upon to perform her share of hard work, and there is usually plenty of it to be done. Such old reliables as Byrne, Kauffman, Herbst, Matson, Kiler, Wendt, Ackerman and others were there, and stayed until the lights went out.

—

The permanent secretary took the brakes off his mouth, without intending to do so, in a small attempt to belittle THE MIDLAND. Don't worry, Brother Hopp, THE MIDLAND has been generous to you and is not "mad" over your feeble effort. When you want a favor ask us and we will grant it if within our power. Be frisky as the years go by, but don't get *too* gay.

Cleveland had the astounding number of two representatives, one of whom was the permanent secretary. There was a period when this great lake city would have twenty to thirty of her best pharmacists in attendance, all of whom were ready to take an active interest in everything going on. Is this the result of the N. O. D. A.? We hope not. Whatever the cause, it is shabby treatment, for the State Association has done much for Cleveland pharmacists, and has honored the members of that city above those of any other city or section of the State.

—

The time and place of next meeting was referred to a committee, which reported in favor of holding it on board a boat in a lake trip to Mackinac, the alternative given being Put-in-Bay. This probably means that the meeting will be at the Bay. A proposition of this kind was entertained a few years ago, but the plan was abandoned because a sufficient number could not be secured to guarantee either the charter of a boat for the trip nor a low rate of fare on a regular trip vessel. Moreover, we do not think a plan of this sort a good one. A boat is the last place on sea, or earth or sky within which a deliberative body can hold a successful and profitable meeting. The expense will also prevent a good many of the plain people from attending even if they desired to go. But we shall waste no "gray matter" in discussing a problem which is so remote of fulfillment. If the effort to increase attendance and interest in meetings of the State Association are not more successful a canal boat on the Miami or Erie canals will accommodate all the attending members at a minimum cost. Later we may agitate the canal boat voyage.

—

Among the lady visitors we recall Mrs. DeLang, Mrs. Freericks and Mrs. Wetterstroem, of Cincinnati; Mrs. Von Stein and daughter, of Upper Sandusky; Mrs. Matson, Mrs. Frank Bauer and Mrs. Ogier, of Columbus; Mrs. Kear, of Wharton; Mrs. Tobey, of Troy, and others. Sorry we cannot give the names of all the Dayton ladies, since we did not meet them all, but they were there, handsome, well gowned and entertaining.

—

All the members of the Board of Pharmacy were present except Mr. Voss, who was at the bedside of his mother in probably her last illness.

Carbolic Acid Poisoning.

Carbolic acid poisoning is so frequent that every case of recovery is of interest. Dr. Conally, in *South. Pract.*, September, 1900, reports the case of a child two years old who had taken about one-half ounce of carbolic acid mixed with one ounce of glycerine, which had been prescribed as a local application. Convulsions rapidly supervened and followed one another in rapid succession. Upon arriving, the doctor at once administered two ounces of cider-vinegar; the dose was twice repeated at intervals of an hour, so that in all six ounces of cider-vinegar were taken. Nothing else was given, except water to relieve the thirst. The next morning the child was practically well.—*Merck's Archives.*

A Chemical Epitaph.

He had an all-consuming thirst,
Drank everything in sight,
And this same thirst caused
Weary Bill's
Tired soul to wing it's flight;
He found a jug and quenched his thirst,
His face no more we'll see;
He thought it $C_2 H_6 O$,
It was $H N O_3$.

"How did you get rid of that unsightly bowlder?" ask the tourist, while the change of horses was being made.

"Easy enough," responded Amber Pete. "We just started a little yarn about an Injun battle bein' fought aroun' the rock, an' the souvenir hunters chipped it all away."—*Chicago News.*

ADDRESS of the President, B. S. Young, at the Annual Meeting of the Ohio State Pharmaceutical Association, July 16, 1901.

Mr. President, and Gentlemen of the Association:

I CAN scarcely realize that a year, with its joys and its sorrows, its successes and its failures, has flown since you honored me with the presidency of your association. 'Tis needless for me to say that I have appreciated your kindness in thus electing me to so honorable a position, although I may have questioned the judgment manifested in the selection made.

I am not unmindful of the manifold duties and the requirement demanded of the one who would carefully and diligently look after the welfare of the association during the interim between our annual meetings. When we assumed the office of president it was with the determination to use every effort to advance the best interests of the association, in every way possible. Such demands as have been made upon our time has been met willingly, and the few sacrifices made in the interests of the work were granted, feeling that the effort was entirely inadequate and but a poor return for the honor conferred.

The year has been one of great interest to the trade; the N. A. R. D. has been active and is proving itself a strong factor in the betterment of trade conditions in many localities; the "Worcester Plan" is meeting with the approbation of many and is being endorsed by numerous associations; the volume of trade has never been excelled; the National "Pure Food and Drug Law" met with such opposition as to kill it in the last days of the National congress, but the repeal of the burdensome "Stamp Tax Law" brought joy to the hearts of the faithful, and now, in imitation of the prophets of "Allah," in contentment we will "lick salt" instead of stamps, and will make our "Salam" to a result, evidencing what "Organization" will accomplish when earnestly carried forward.

One fact which impresses itself most deeply, is the knowledge that *too many* of our druggists and fellow-tradesmen are not identified with, and are, seemingly, in no way interested in the success of the association, and the question was how to reach them and gain their support and influence; too many have failed to grasp the fact that "Organization"—local, county, state and national, is the one thing necessary to circumvent the conditions which threatens our very existence; too many have not only failed to show any interest in the work of the association, other than to stand back and declaim against the efforts of those who do believe that the association has some claim on their time and resources. Another element dislikes the poison law—they don't like the liquor law; they are dissatisfied with the pharmacy law; in fact, nothing suits them. If business is bad for this element, by some peculiar alchemy known only to themselves, they arrive at the conclusion that the unfavorable condition is the direct outgrowth of the work of the association.

What are the facts?

There is not a druggist in the state who does not owe a large part of his success and prosperity, be it great or small, to the work of the association. In spite of themselves, they are receiving the benefit of the association's work. I remember having been present during a conversation with one of our fellow-druggists, in which he most severely condemned an act, as he supposed, of the association. The question was asked: "Are you a member of the association?" and the reply: "No; and I never will be!" The next half hour was devoted to showing that erring brother just where he stood, and that if the association was not conducted along the lines which he felt were in the best interests of the drug trade, he was standing in his own light and was not true to either himself or his fellow-druggists in not immediately affiliating and giving them the benefit of his intelligence and experience together with an adequate financial support; that his proper place was "In the ranks," and his duty was to assist in directing the affairs of the association, so that the greatest good would redound to the greatest number. To-day he is enrolled upon our roster of membership.

The "excuse" offered most frequently for non-affiliation is "Your *fees and dues are too high!*" Did you ever hear it?

The question as to the correct amount to charge as "fees and dues" is one to which I have devoted much thought. There is no doubt in my mind that the statement, $3.50 *in advance*" has kept many a member from our rolls.

I know the argument of having a "high fee with a few members" as being better than a low fee and a great association. A "*Financial*" sieve, to me, is one of but little merit, and, as I have said, the motto of the association, if it would flourish, should be "The greatest good to the greatest

Digitized by Google

number," and the question naturally arises: Do we benefit the 3,500 Ohio druggists, who are non-affiliated, *most* by placing our fees where many of these fellow-compounders feel that they are prohibitive? It is a two-sided proposition, but the preponderance of evidence is on the side of low fees and large membership. I admit that we should not put the fees where we would lack in funds to properly carry on our work. There is surely some middle ground, and we should strive to gain it. Compare, if you will, our fees and dues with those of other state associations and you will soon realize that ours is a false position. Again, compare our attendance for the past few years with the attendance during the era of low fees and large membership if you would know whither we are drifting.

Ten years ago, when we last met in this beautiful city, we had about four hundred in attendance, although at the time our association was suffering from the results of an abiding confidence in the acts of a careless, if not dishonest, official.

Last year about one hundred members were in attendance; the year before about the same number; three years ago not to exceed fifty members were present at any session for the transaction of business, although about one hundred and fifty were enrolled as being in attendance.

This apparent lack of interest in the association on the part of our fellow-tradesmen cannot be attributed to any indifference on the part of the officers in control, who have put forth every possible effort to advance the association's best interests, but it can be attributed to a policy in the matter of fees and dues, regarded by a great majority as excessive, and we cannot expect non-affiliated druggists to attend our meetings, although they are always most heartily welcomed.

Believing as I do in the very close relationship between the matter of dues and fees and the question of membership, I submit the following tabulated statement, as received from our most worthy treasurer. The Ohio State Pharmaceutical Association was formed in 1879 with forty-five members present, and for ten years each year shows an increase in membership. The records are as follows:

YEAR AND MEMBERSHIP.

1879..... 45	1884.....826	1889.....928
1880.....194	1885.....920	1890.....860
1881.....335	1886.....920	1891.....979
1882.....482	1887.....959	Highest
1883.....601	1888.....962	Enrollment.

From 1892 to 1901 the records are as follows: In '92 our membership fell to 911, in '93 to 906.

At the Cincinnati meeting, in 1894, the by-laws were so amended that the words, "*Three dollars and fifty cents in advance,*" which, to my mind, are so potent in our association's welfare, were inserted, and this is the record:

Year.	Memb'rs.	New Memb'rs.	Suspensions.	Net Loss.	Net Gain.
1895.....	825	51	115	64	...
1896.....	741	19	63	44	...
1897.....	665	18	112	94	...
1898.....	637	...	...	24	...
1899.....	572	17	60	53	...
1890.....	565	40	34	...	6

These figures point to a plain, unpleasant fact confronting us, and we should hesitate to further pursue a policy fraught with so much danger. We should apply the same business methods in the work of our association as characterizes our own private affairs. The prudent and successful druggist is always in closest touch with every detail of his business affairs, and when he is confronted with a question of business policy, which may mean ultimate future success or failure, that question receives his immediate and most careful attention.

As an association we are confronted with a question which is most vital. The records show that our decadence commenced with our increased dues and fees. Shall we continue under the present arrangement, or shall we, without delay, try to reach the "middle ground," whereon we will be able to supply sufficient funds to carry forward the legitimate work of the association, and yet place our fee for membership within the reach of all?

How to renew or add to the interest in our association so as to result in an increased attendance at our annual meetings is another question which has been earnestly considered, and one of the methods presenting itself for consideration is that of restoring *the exhibits of pharmaceuticals* as held in former years.

The editorial in *Merck's* touching the matter of exhibits at the St. Louis meeting of the Am. Ph. A. so nearly expresses the writer's views that we quote almost entire:

"One particularly new feature that is bound to draw is the unique kind of exhibition which they are planning. Heretofore the exhibitions at pharmaceutical meetings have been chiefly made up of displays of patent medicines and goods that doctors were more interested in than druggists.

Digitized by Google

"This year the association proposes to set an example to the state pharmaceutical and other societies by excluding absolutely everything that is of a secret nature. * * * *They propose to make it educational to every druggist who attends*, by showing him the latest and best novelties in labels, the most recent and best books on pharmacy and kindred subjects, the newest laboratory, and labor-saving device and accuracy-producing apparatus of his art, novelties in the methods of filing and caring for prescriptions, objects of historical interest to pharmacists, fine pharmaceutical preparations, drugs and chemicals, and a host of other interesting things collected from many sources for this occasion. A visit to such an exhibit will be sure to suggest to every keen-witted pharmacist who inspects it a multitude of ideas that he *carry home and coin into cash*. In order to keep him from overlooking or forgetting a single essential or valuable feature the representatives of the various exhibits will be given an opportunity at one session to describe the article they have on exhibition, their uses and advantages. * * *

"This new departure cannot but prove of advantage to the members in many ways, and who ever fails to attend will surely miss a treat he is pretty certain to regret in the future when he meets those who did attend. To stay at home when a chance is open to learn what progress pharmacy is making around us, and to acquire many "wrinkles" that would be for the permanent good of our business and our pockets certainly does not seem the part of wisdom in any one. We may read all that is said at the meeting, but we cannot read into our consciousness nor engrave upon our memories the *feelings* and deep convictions that come from actual seeing and handling."

We feel that the American association is setting an example that our association can follow with profit. The advantage of interesting our manufacturers and their representatives in our meetings cannot be overestimated; true we have had a few each year who have added to the interest of our meetings in this manner, but there has been no organized effort on the part of the association to induce others to take advantage of our outings. Every representative of a firm about to make an exhibit at the association meeting would immediately become an enthusiast, and every druggist on whom he calls is urged to attend. The association will feel the effect of the constant effort and the benefit will be three-fold.

LOCAL AND COUNTY ASSOCIATIONS.

Effort was made to effect as many local and county associations as possible. With this end in view, by-laws and constitution were obtained from the Allen county association, which is known to be most successful in its workings. These were published in THE MIDLAND, with blanks for name of city or county, and reprints of the form were also placed in every county where no organization existed and immediate action urged. We have a number of these reprints with us and will be pleased to place them in the hands of anyone desirous of furthering this work.

The following letter was received from the Secretary of the N. A. R. D. The plan of this association to prevent cutting and to improve trade conditions was thoroughly discussed in the President's address at Put-in-Bay last June, and we will have with us a representative of the association, who will claim your indulgence later on in the consideration of this important matter.

[The substance of this communication has already appeared in THE MIDLAND, and is omitted here for want of space.—Ed.]

COMPLAINTS.

Only one complaint was received, and this was relative to a small grocery dealer, engaged in business near one of our centers of population, in which were two representative wholesale drug houses, trying to secure a large invoice of staples from a wholesale house in a distant city. The matter was taken up and it was found that the party trying to receive the goods had been refused the supplies by the local wholesale houses, as he had never handled patents and was more than likely acting as purchasing agent for some cutter.

APPOINTMENT OF AUDITING COMMITTEE.

The following auditing committee was appointed:

G. W. Kenan, Upper Sandusky.
F. Berg, Upper Sandusky.
W. T. Tschanen, Upper Sandusky.

A communication was received from James M. Good, member of the sub-committee of revision of the U. S. Pharmacopœia, asking that a special committee be appointed from the Ohio association, whose duty it should be to assist in determining what substances should be omitted from, and what should be added, that the work would be thoroughly representative of advanced science. In response to the commu-

Digitized by Google

nication we appointed the following committee. (Special):

Prof. J. U. Lloyd, Cincinnati.
Prof. H. V. Arney, Cleveland.
Prof. G. H. Matson, Columbus.
Prof. J. H. Beal, Scio.

DR. CHARLES RICE.

Not in a decade has the news of the death of a member of the American Pharmaceutical Association been received with so universal an expression of sorrow and regret as that of Dr. Charles Rice, the chairman of the committee on revision of the U. S. Pharmacopœia.

Dr. Rice was a man of rare attainments and he has left the impress of his personality upon pharmaceutical interests in a manner most vivid and lasting. A scholar and linguist of superior ability, he was in every way fitted to successfully direct the work of the Pharmacopœia revision, as is so well shown in the Pharmacopœias of 1880 and 1890, which were issued under his personal supervision as chairman of the committee. At the time of his death the work of the revision of the Pharmacopœia for the first decade in the new century was far advanced.

Dr. Rice was personally known by many members of the O. S. P. A. and his personality was such as to impress all with his generous nature as well as his superior genius.

We would earnestly recommend that a committee be appointed to draft suitable resolutions and that the same be spread upon our minutes and a copy be given the pharmaceutical press for publication.

WILLIAM PROCTOR, JR.

It has been proposed that the A. Ph. A., at its Fiftieth Anniversary, in 1902, memorialize the life and work of Prof. Proctor in such manner as will honor both him and the cause of pharmacy.

Prof. Proctor was a pioneer in pharmaceutical research and the committee in whose hands the matter was placed by the American association request, and we would recommend that some action be taken at this meeting that our delegates to the St. Louis meeting may be instructed as to the wishes of the Ohio organization. The communication and printed matter received will be placed in the hands of the committee, to whom the recommendation may be referred.

We desire to express our gratitude to the editors and managers of THE MIDLAND for the very great interest manifested in the success of the association and the able and earnest efforts made in forwarding our work. The druggists of Ohio are to be congratulated on having published in our midst a journal whose columns are always open to the defense of drug interests, and whose every effort is in the direction of a united stand against the many and varied antagonistic forces with which we are being surrounded. Its columns are filled with matter of personal interest and value to every druggist in the state. We desire to acknowledge our fullest appreciation of the interest it has manifested in the prosperity of the O. S. P. A.

In conclusion, we trust that the association meeting in this beautiful city may prove so successful, and our presence so agreeable that the druggists of Dayton may be brought closer together and result in a great and continuous prosperity for them.

To each of you who have put aside the cares of business for a few profitable days with your fellow-workers I extend congratulations that your lot is cast amidst such pleasant surroundings and may you return home feeling that it was good to have been here, and may you carry home with you new ideas and new inspirations which will result in a greater enjoyment in your work, and success most gratifying.

Bromide of camphor is especially valuable in diminishing the attacks of epilepsy, and undoubtedly diminishes the vertigo which accompanies this condition. Where the temperature falls below normal the remedy should be immediately withdrawn.

SPEECH Delivered at the Annual Meeting of the O. S. P. A., July 17th, 1901, by Charles Herbert Jones, Organizer of Ohio Valley Druggists' Association, Cincinnati.

IT is on two occasions only that I feel any regret at not being a druggist; one is such an occasion as this, when the cream of your profession is gathered together for business and social purposes, and the other is when I stand in your enticing stores and see a vast amount of our circulating medium disappearing into your capacious coffers. I was not born a druggist, and somehow my education since has not been of a character to develop me into one, but I am beginning to feel that I had better look well to my surroundings and connections, for it would certainly be dangerous to disregard the influence that environment has upon one. I had often heard it said that the profession I chose was not so dissimilar to yours, the only difference being that the class to which I belong has the reputation of being engaged in legally "holding up" the public. But it would seem to me, if I have anything like a proper conception of the matter, that my class only assumes the burdens of a few unfortunates who unwarily fall into our meshes, while the apothecary holds up his entire community without regard to race, color or previous condition of servitude. However, since my advent into the drug business, or rather the druggists' business, I have come to believe that the great advantages the druggists have been supposed to enjoy are largely exaggerated. Indeed, instead of the Augustus who lays tribute upon the whole world, I find the druggist to be a mere servant of the people, and an under-paid one frequently at that. Instead of large and magnificent landed estates to leisurely roam over, I have generally found modest apartments, just large enough to meet the bare necessities, located near the workshop, and these knowing their masters but a few hours out of the twenty-four; instead of a position of ease, with servants running at his beckon to meet the whimsical demands of luxuriousness, I find him coatless and hatless and with disheveled hair, performing all manner of service down to the most menial and undesirable; and instead of a few hours daily that the wealthy and cultured devote to business merely for a salutary effect upon the mind, I find a man overwhelmed with laborious duties and unceasing cares for such extended periods that the only wonder is that the great strain does not reduce the mind to a blank and leave its owner a helpless public charge.

It is true that there are druggists and druggists, as well as there are stars and stars; some will have that degree of enterprise, cleverness and practicability that overcome all obstacles, while others, lacking in these qualities, must fail. Some time ago, a gentleman remarked that a druggist who failed of success was not entitled to sympathy. I do not know his definition of the word success, but at any rate his observation was an extreme one and too harsh. It is true that some men in the drug business fail; and so do men in other lines of business. Sometimes it is not the fault of the man, but it is due to circumstances over which the man cannot have control.

What we are interested in, however, is not the equal distribution of talent or tact, but the betterment of conditions which every druggist must face and the elevation of the business to a plane where the average man—the man who has a fair degree of brain, industry and conscience can make a comfortable living and provide something for the period known as the "yellow sear of life."

I have often heard it said, and so have you, that the "cut rate" evil, the bane of the druggist's life, is the child of the retailer, and indeed he is asked to acknowledge it without any question.

It may be that the charge is a proper one and that he has been guilty of errors and indiscretion in the past. But he is told that he must remedy the evil or grow accustomed to it, live with it and maintain it. This is said without regard to any consideration of his ability for the task. Equity does not presume to compel the specific performance of an impossibility, and indeed we do not always look to the origin or source of trouble or mistake for its remedy or correction. If we did, we should be compelled to ask Adam and Eve to purge the world of sin and to restore lost happiness, or perhaps we should be obliged to resort to the Old Serpent who it was that brought death into the world and all our woe. It would be capital if we could make Satan bear all our infirmities, and it would certainly be just and equitable if we could compel the "cut rate" angels to shoulder and enjoy the chaos they have produced. But this is not the order of things, and man has been charged to go into the highways and byways to preach the gospel of light and truth and bring every creature within

Digitized by Google

its saving grace. We have maintained that the ability to apply a remedy lay with the manufacturers, and the courts of the country, in a long line of decisions, have confirmed our contention. They have declared in no uncertain tones that the proprietary manufacturers of special preparations not classified among the necessities of life, have the absolute control over their products. The Worcester Plan, which has been so clearly and eloquently explained to you by Mr. Cooper, is that principle carried to its logical conclusion, that in order to establish such conditions as the manufacturer desires with reference to the disposition of his goods it is not necessary to resort to a written contract. Of its feasibility and legality there is no question, and it now remains for the manufacturers to adopt and enforce it, and thus relegate the word "cut rate," more hideous than any nightmare, to the peacefulness of merciful oblivion, and if any vestige of it should remain in the form of memory, it will serve only as a monument to a few ill-becoming natures that sought an undue advantage at the expense of their fellow-men.

Under the present commercial and industrial system we have grown accustomed to see men looking sharply to their own interests without regard to the rights of others; indeed, we sometimes question if it has not become a virtue to do so. We have no quarrel with the manufacturers for waxing rich and great in the business in which they are engaged. But the retailer has more or less to do with that same business, and he has contributed his labor and personality to make that business a success, and the only question is whether he has enjoyed his full share of the product of his labor. If not, is he not entitled to it? Suppose he has waived it in the past, that concerns only the past and that fact does not stop him from demanding its enjoyment in the future. You are advertiser and distributer for the manufacturer. You devote your valuable space for advertising purposes, you contribute your labor as distributer and you lend your personality and your reputation for truth and veracity and honesty to help sell the goods of men you never saw and goods you know very little about. It is all right if, for the value you give, you get an adequate consideration in return. If so, it is right; if not, it is wrong. We would not want the manufacturers to take any step that is not just and equitable. It is universally admitted that the "cut rate" evil is injurious to the retail druggist, and the manufacturers themselves admit that it is injurious to them, that it tends to throw discredit upon their products and bring them into disrepute and eventually hurt the sale of them. But they are not asked to bear the full burden of a departure from old methods, but merely asked to co-operate in the effort to bring about better conditions that must necessarily result beneficially to them as well as to us. Why if the product of any manufacturer must be sold without profit, is it not reasonable to suppose that whenever possible it will be cast aside and preference given to that which does afford a fair profit? Remove the incentive to substitution and you remove the thing itself. Some ninety odd manufacturers have said, "We are in sympathy with your effort to extirpate cut rates and are willing and anxious to do all we can to assist you." With the present conditions, although very great good has been accomplished and many of these manufacturers have made a sacrifice to carry out their agreements, yet it is difficult and almost impossible to ascertain with absolute certainty the degree of their sincerity and honesty. It is about time that we should know, and a system that reduces the matter to a certainty has accomplished wonders without going any further. If a thing is presented to a man guaranteed to do exactly what he says he wants done, he is neither sincere nor honest if he refuses it. The socialistic reformer will tell you that if you will but remove the existing environment of men, you need not change their nature to make them better or worse, that if the fear of want and the lust for gain be removed you will find men loving and sympathetic where before they were cold, selfish and cruel. We do not strive to change the conditions so that the hearts of men shall contain nothing but the milk of human kindness, but we do want to remove the temptation from manufacturer, wholesaler and retailer, to take away the incentive for lying and deception, and to reduce the matter to a business basis, where we shall know what every man is doing and have the means of compelling him to do what is right. This applies just as strongly to the retailer as to the others, for in much of the deception and nefarious conduct he has played an important part. There are some retailers who will sell their reputation and their honor for a very small price—men like Esau, who will barter away their birthright for a temporary enjoyment of a mess of pottage. These are the most despicable

Digitized by Google

of all—traitors to their cause, enemies of their fellow-men, and not worthy of sympathy or respect.

Someone has suggested that if we reduce the whole matter to a legal basis, that even then it would not afford us absolute security. We admit that there are but few things in this world that can be counted on as sure. He who violates the laws of nature must expect to pay the penalty, that is certain, and while the laws of man may be evaded or violated, the fault is not that of the laws but of him whose duty it is to enforce them. But any existing law that is constitutional can be enforced if a sufficient number of people really want to see it enforced. A legal basis is the only one that is reasonably sure. There are laws against theft, but it is argued that some men will steal, and so they will, but because some men do steal in spite of the law, and are willing to take chances on suffering the penalties, is that any substantial reason why all the laws against theft should be repealed? I dare say that if this were done, your love for this country would soon be on the wane and your patriotism would fade like a desert flower. If the repeal of laws can produce chaos, then, sirs, the enforcement of adequate laws can bring peace and order out of chaos.

Three years ago, as an answer to an appeal for the adjustment of grievances, we were told to go home and organize, and that we would be considered. We have organized, and have accomplished much good. The N. A. R. D. and its affiliated bodies are to-day looked upon as a power in the land. That fact was amply demonstrated recently at the time of the repeal of the War Revenue Tax, and it is being demonstrated daily in different localities by the establishment of better conditions in the drug trade. Everything so far accomplished has been the work of organized druggists, not individual druggists. It is the strength of united, systematic effort that tells in the battle, and not the impotent wail of isolation and division. The spirit of organization is now sweeping over this country like a tidal wave, because men are coming to feel that the many can accomplish what to the few would be an impossibility. They know that inactivity means impotence and retrogression, while organization means enterprise and progress and the securing of that which is proper and just.

We must continue our work of organization until we arrive at that degree of strength and importance where we can speak for the whole legitimate retail drug trade of the country, and our voice will be heard. We ask you to co-operate with us in this great movement upon the principle that all those who will be benefited thereby should contribute their mite toward the labor that must necessarily be bestowed and the expense that must necessarily be incurred. We need numerical strength as well as financial strength. There are quite a number of associations in Ohio, the largest being the Northern Ohio Druggists' Association at Cleveland, and the Ohio Valley Druggists' Association at Cincinnati. The N. O. D. A. is a powerful organization, with Mr. E. R. Cooper, an able and progressive man, at its head, and back of him are other able men. The O. V. D. A. is also a splendid organization, with a very efficient board of control and very enthusiastic members. I believe that it is of the highest importance to all druggists in the state of Ohio, if not throughout the whole country, that these two associations should go on increasing in strength and effectiveness. I believe that every druggist in the northern part of the state should become a member of the N. O. D. A. You can help them and they can protect you. And I also believe that every druggist in southern Ohio will be advancing his own cause and that of his fellow-druggists by joining the O. V. D. A. It is these large affiliated bodies that are transforming the N. A. R. D. from a thin line of battle, weak and vacillating, into a strong, invincible army that will sweep away all opposition from its path to victory.

Now is the time to take advantage of what the courts have declared to be a fundamental principle, and see that it is given universal application; to take advantage of the spirit of organization that is astir in the land; and to take advantage of our own strength to restore the profession to its time-honored place, that you may reap the rewards that you have merited, but which have been so long denied you. This is a matter that affects you vitally in your business, in your home, in your happiness, and you cannot afford to remain indifferent and inactive. You have a work to perform; it is to uplift, not to pull down; it is to build, not to destroy. And let no one for any fancied grievance of his own, trample upon that which is built. Let him not in his unbridled rage, like some blind Sampson, unmindful of his own welfare and that of others, grasp the pillars of our magnificent structure, N. A. R. D., built by

Digitized by Google

the earnest efforts of honest hands, and attempt to pull it down to destruction and ruin. Let us work in unison, each one doing what he honestly can, and everything that savors of difficulty will disappear before the morning sun.

CURE FOR THE NOSTRUM EVIL.

Germany has solved the nostrum problem easily. In Germany every "patent medicine" must have the approval of an examining board before it can be offered for sale. It can neither be advertised nor sold until the board has incontrovertible evidence that it is beneficial for the purposes claimed. Even after it has been passed by the board, the formula must be printed on every bottle or package offered for sale. They have solved the problem. No American citizen would pay a dollar for a solution of Epsom salts, colored with caramel, and guaranteed to heal all the ills to which the human flesh is heir, if he knew what he was doing; he would buy the salts for a nickel, but he would likely consult a doctor before buying it. No people in the world have more confidence in their doctors than the people of the United States have in us.

Our political machines are more easily influenced than those of Germany. Our people would stand by us if we would make a manlike effort to fight the dragon, and also educate our clientele. No opportunity could be more propitious. The 100,000 doctors in the United States can get any legislation they wish. He must be a very poor and unsuccessful doctor who could not influence twenty votes; and two million votes would do anything. Five hundred votes per doctor could be counted on if every physician worked. But before the voting comes the "wire-pulling." We have the strength here, too, if we but use it. Note how the *doctors* defeated a candidate for the United States Senate in one of our Western States, only because he had abused them.

We may well afford to follow the plan evolved in Germany. The doctors of the United States can do it without perspiration, if they will. Let every physician write to his Assemblyman and State Senator; let him get ten of his friends to do the same; let him repeat the dose at least three times in each session, and each State will soon have such a law. Such a united effort will defeat the lobbying of the nostrum vendor.

TRADE PAPERS.

The question is often asked, "What good are trade papers, and what influence do they exert, and of what importance are they to the trade or to the advertiser?" The answers to these questions are:

First—The trade paper reaches a man and has an influence over him that the daily paper does not exert.

Second—The trade paper contains news of peculiar importance and benefit to him.

Third—The trade paper is apt to be more truthful in its statements regarding its particular line than any other publication.

The first reason submitted, as to the influence of a trade paper will be admitted by all. As a rule, trade papers have no axes to grind, are not prejudiced, and, with very few exceptions, have no rivals in the field. Therefore, they are in a position to influence their readers and give them information in such a way that the reader cannot fail to be impressed.

Trade news is of especial importance to the man in the trade. It tells him what is going on and the latest improvements in his line of business, and other news of equal importance.

The third reason, truthfulness, is embodied in the first two reasons, all of which make the trade papers of essential benefit to the reader. The question of advertising in trade papers has never been given the attention that its importance commands. But there is no disputing the fact that the trade papers, in proportion to their size, circulation and character, contain more advertising than any other class of publications on earth. These advertisements are not always models of neatness nor of the highest order of the printers' art, but the fact remains that very seldom is the failure or suspension of a trade paper reported. Trade papers are supported because they are valuable, and because their advertising columns are used by people exclusively in the trade to which the paper caters, and, therefore, the value of the trade paper to its trade is immense, and cannot be overestimated.—*The Advisor.*

Attend to trifles to-day and the important matters will come along in due time.

Northern Ohio Druggists' Association Notes.

And first of all let us again caution you in regard to John T. Norris, the "Springfield Detective." who employs two women to gather evidence. We quote the following from a pamphlet which he is now circulating:

"In issuing this booklet I desire to call your attention to the provisions of the Middleton Law, which provides a manner by which drug stores, railroad companies, houses of prostitution and all others who evade paying the Dow Tax, can be compelled to pay their share of the same or quit the business. I have given this matter considerable attention and am prepared to enforce the same against any and all persons, and in so doing I assume all responsibility. Should you desire my services, I would be glad to serve you to the best of my skill and ability."

This party has boasted that he will make $75,000 from the druggists in Ohio; we will see. The Middleton contortion is clearly unconstitutional, and although upheld in the Common Pleas Court of Clark County that $75,000 is further off than ever.

The Ohio State Pharmaceutical Association meeting (held at Dayton, July 16th–18th), developed some very interesting action. Your organizer was in attendance as delegate from the N. O. D. A.; the Ohio Valley Druggists' Association was also represented. O. S. P. A., O. V. D. A. and N. O. D. A make a rather heavy combination for anyone to go against.

The Ohio State Association has adopted the Worcester plan and recommended it to the N. A. R. D.; so also has Maine, Massachusetts, Kentucky, Pennsylvania, New York and the New England States.

The memorial on preferential consideration of price-protected goods is now being circulated over Ohio; hundreds of signatures have already been secured. Cincinnati and Columbus have signed and lists are coming in daily from corresponding associations in other States. We name a few localities that have taken hold: Jersey City, Indianapolis, Milwaukee, Scranton, Nashville, Peoria, Ann Arbor, Binghamton, Los Angeles, Lynn (Mass.), Evansville, Savannah, etc.

Right in connection with this movement, the following extract from an editorial in *National Druggist* for July is important:

"In the latest case, that known as Carrington & Co. vs. Walter & Co., Mr. Justice Kekewitz. of the Court of the King's Bench, laid down the broad principle that 'the proprietor of an article, in selling the same, may lawfully make any conditions that he pleases;' further, that as 'the owner is not obliged to sell, and in selling can put such a price on his wares as would be to the buyer unremunerative or even altogether prohibitory, so he 'has the right to make a bargain with the buyer (to sell again), that he, the buyer, shall not sell the goods below a fixed or stipulated price, and moreover, that this buyer shall obtain a similar stipulation from those to whom he sells."

Yes, the new Board of Control is pushing right along with the work as outlined by President Bartlett in his review of the situation and message to them. His words have a true ring; the closing sentence was as follows. "It is for you to carry on the work as begun. To its completion, and in your hands, I leave the interests of our Association, believing that your policy will be as of the retiring Board—aggressive, wide-awake and always to the front."

There is now under consideration the adoption of a new system, under which salesmen's cards are to be issued. A certificated for price-protected goods will no doubt be a feature before long.

Important data is being secured regarding firms who sell goods adverse to retail interests, but plans are not yet sufficiently matured for publicity at this time.

Oh, yes! the card system. Do you demand it? Do you make sure that it is shown to you? Strange that there should be found some business men willing to pay in their good money to maintain an organization and keep up a system, and, at the same time, by an act of omission do their level best to destroy it. A great deal depends upon upholding the card system. The salesmen, and the manufacturers through them, are in that way impressed with the strength of the Association; policies have been changed through a universal demand for the card; you cannot overestimate its importance. We believe that a great majority of the members are careful and do ask for the card in each and every instance, but we are sorry to say there are some who do not. We are finding out who they are, and if the time ever comes when they shall ask us *what we have done*, they must not forget

Digitized by Google

that it may be necessary for us to propound the same question to them.

The loyalty of our members is indeed phenomenal. We have no Esaus, and the vapid utterances of such as cavil is deserving only of compassion; there were many such in the dark days of forty years ago.

At a meeting of the Lorain County Druggists' Association attended by your organizer, July 24th, the following resolution was adopted- "*Resolved*, That the Lorain County Druggists' Association affiliates itself with the N. O. D. A., and that we co-operate for the betterment of conditions."

Treasurer Voss' report at annual assembly in June shows total receipts for eleven months amounting to $2,792.20, with approved expenditures of $2,773.78. The sum of $462.00 in dues has since been added to the treasury.

There will be no membership meeting in August, though the Board of Control will continue its regular weekly session at 512 Arcade, where any and all complaints will receive prompt and courteous attention.

No rebate is possible on the Turkey Foot outing. A financial statement of receipts and disbursements will be furnished later.

The annual N. O. D. A. picnic is in contemplation, and all arrangements for a successful event will be made by membership committee appointed for the purpose.

Do not forget that the N. A. R. D. is dependent upon the support of retailers. The N. O. D. A. will shortly be called upon for a per capita remittance. Send in your dues now if not already paid.

The National Association will meet in October at Buffalo. N. O. D.s should make arrangements to attend in a body. It is believed that the "White Caps" will prove fully as attractive in Buffalo as they were in Detroit.

President W. C. Anderson of the N.A.R.D. writes: "Bring Ohio to Buffalo, *solid for the Worcester plan.*"

Buckeyes are always solid for anything they endorse.

E. R. COOPER,
Organizer.

Spared By Morgan.

Shall I sing you a song of a world so fair,
Wherein men are like angels in kindess;
Wherein women are sweet and quarrels are rare,
And God Love is most wise in his blindness?

But, my child, such a song, if have it you must,
In your church it is played by the organ;
So sweet and so free, so fragrant with trust,
Ah! the only trust spared us by Morgan.

—*Los Angeles Times.*

DIVIDE THEM UP.

There is some discussions among the members of the American Pharmaceutical Association relative to starting a weekly publication to supercede the ponderous and usually one-year-behind-the-times volume of Proceedings that is published annually and eventually distributed to its members. There is much that we might say in favor of the paper scheme, especially as some one else is to pay the bills. The printers and paper makers would, no doubt, find it profitable. But the suggestion is a very bold one and a very grave one and should not be adopted without the most careful and searching consideration, notwithstanding the generally accepted proposition that "anyone" can run a hotel or a paper. If the weekly journal idea is not followed out it would be possible for the Association to get its "papers" printed and distributed many times more widely than they are now, nearly a year more quickly and at comparatively no expense at all. This could be done by dividing up the papers read before the Association among the various legitimate pharmaceutical journals of the country, giving to each a number of papers which would not be published elsewhere until they had been printed in that journal. This would make them "original matter" with each publication, and we believe there is no drug journal that would not be glad to print them under such an arrangement. A copy of the number of the journal containing the "papers" could be sent to each member of the Association for a merely nominal expense, or the papers could be reprinted in pamphlet form from the standing type and distributed to all members for but a few dollars. If the Association does not care for such wide publicity to be given to its papers it is eminently selfish, has not the general good of pharmacy at heart, nor is it deserving the support of anyone who is not a member of the organization. We do not believe, however, more than an insignificant minority of its members, at most, would take such a stand.—*Spatula.*

A man hath need, if he be plentiful in some kind of expense, to be saving again in some other; as if he be plentiful in diet, to be saving in apparel and the like; for he that is plentiful in expenses of all kinds will hardly be preserved from decay.

Patent and Proprietary Medicines.

In the oration on State Medicine, before the recent annual meeting of the American Medical Association, George M. Kober, M.D., discussed the laws regulating the sale of drugs and poisons, and also the number of patent and proprietary medicines manufactured. By the term patent medicine, as properly employed in this country, England and Europe generally, it must be understood that the composition is known and can be seen at the patent office. The proprietary medicine is a secret preparation protected by trade-mark in this country, and, hence, preferred by the owner, but both are vaguely termed by the public patent medicines. Up to December 10, 1900, the United States Patent Office had issued patents on: disinfectants, 321; extracts, 250, hair dyes and tonics, 48; insecticides, 180; internal remedies, 376; plasters, 56; topical remedies, 371; veterinary, 78. Trade marks: drugs and chemicals, 319; medical compounds, 5,974, and increasing at the rate of about 250 per year.—*Era.*

The enterprising firm of Foote & Jenks, Jackson, Michigan, manufacturers of extracts and perfumery, recently moved into their new plant. The building is 40 x 100 feet, two stories and basement, and constructed with special reference to the wants of the business, There are twenty-four rooms, or departments, each fitted for its special purpose, and containing all the latest and most improved machines and appliances. The products of the firm are perfumes and flavoring and fruit extracts. They started in business in 1884 and one of the first products placed on the market was the celebrated "Linden Bloom," which still retains its great popularity. They are now established in their new quarters and will be pleased to have their friends call upon them when in Jackson.

Time Proves all Things.

Cole's Carbolisalve

has been sold and used in all countries and climates for a quarter of a century, and its reputation as "The Great Skin Remedy" increases with the years. It is put up in attractive style and is ornamental, either to the shelf or the show case. Druggists like it because it always pleases—and satisfied customers are the best advertisements.

DRUGGISTS—You take no chances in recommending Cole's Carbolisalve, for if a customer is not satisfied with the results we will refund the money.

J. W. COLE & CO.,
Black River Falls, Wisconsin, U. S. A.

*NOSTRUMS.

By Theo. D. Wetterstrom, Cincinnati.

WEBSTER says, "A nostrum is a medicine, the ingredients of which are kept secret for the purpose of restricting the profits of sale to the inventor or proprietor; a quack medicine. Any scheme or device proposed by a quack." According to the same authority, "A quack is a boastful pretender to medical skill; an ignorant practitioner."

By the term "nostrum" I wish to include all preparations of private formula and known only by their trade-mark name, and such preparations in which the individuality of the owner or proprietor is made more prominent than the preparation itself, and such preparations in which the formula stated is a dream and a snare to the unwary doctor. If this don't include everything outside of the U. S. Pharmacopœia, the National Formulary or other standard work on pharmacy, then this definition is at fault.

The hybrid nature of the Apothecary is becoming a thing of the past, and in his place is the Pharmacist, who compounds or prepares medicines, and the Druggist, who buys and sells drugs and their preparations.

The druggists, by permitting the introduction of the so-called patent medicines into their stores a number of years ago, are now in the throes of a commercial struggle to establish and maintain the prices that are stipulated on the labels of these patents, which is the only distinguishing feature between them and the nostrums of to-day. This struggle for the maintenance of price will be but a circumstance to that which will ensue for the life of the pharmacist, if this evil of the nostrum is not blotted out. For the patent is to the druggist as the nostrum is to the pharmacist. The retail druggist can and will sell other things, while the art of the pharmacist, unless he becomes a manufacturer, will be gone. Then of what use will the teachings of the Pharmacopœia be to the student, and of what need is he fitted to operate a pharmacy when any unskilled person can dispense the ready-made nostrum that does the thinking and treating of disease for the average doctor of to-day. Furthermore, for what purpose is the Committee on Unofficial Formulæ appointed to ransack from one end of the State to the other for formulas when the merit of these preparations is unknown to the doctor of medicine?

The nostrum is the outcome of the lack of energy, indifference or too much attention to other matters on the part of the pharmacist. He has been asleep the past five years, and unless he wakes up to interest and educate the doctor to the merit of the preparations of one book in common, as the U. S. Pharmacopœia, and sinks his own individuality in the interest of true pharmacy, he will have a hard time to keep up with the multitude of nostrums that each day sends him to his rear room, out of earshot of his prescription customer, to cool off.

The manufacturer claims he is making business for the apothecary by creating the demand, so he is for the druggist, but he is killing off the art of the pharmacist. The manufacturing house cares nothing for you. His interests lie in the direction of the doctor, by getting him to prescribe such preparations that bring him the greatest return. The manufacturing house no longer extolls the merits of the standard formulas, as competition among themselves has brought such standards to a minimum working profit, and to meet expenses they have drifted into the preparation of specialties of their exclusive make, or, in other words, the manufacture of nostrums. It is not an uncommon sight at present to see the fair name of a firm, whose reputation for scientific work has taken years to build, tarnished by the foisting of nostrums upon the market. All hail and praise to the manufacturing pharmacist who has been able to withstand the seductive nostrum, and may he continue to ever interest the physician in the high grade preparations of the U. S. Pharmacopœia is the wish of every pharmacist.

In a recent exhibit of U. S. P. and N. F. preparations by pharmacists before the convention of the Ohio State Medical Society, held in Cincinnati recently, it was clearly shown that the average doctor is not familiar with the virtue of these preparations and seemingly took a great interest in the attempt to illustrate what the pharmacist could do if the demand were made upon him. As a result the specification on prescription of the U. S. P. preparations, instead of Smith's, Jones' or the other fellow's nostrum is already becoming evident. This encouragement is supplemented by the plea of our ablest and most influential speakers on therapy, for a more extended use of the standard preparations of the U. S. P. that must conform to the purity, quality and

* Read at the Ohio Pharmaceutical Association, July 18, 1901.

Digitized by Google

strength laid down therein, instead of the nostrum whose standard is always peculiar to itself.

I hold that the average pharmacist is better qualified to perform the work required in making pharmaceutical products than the usual untutored help in factories.

If it is coming to the pass that these nostrums are to crowd our pharmacopœial products of standard formula from our shelves, and if it be necessary that we obtain these innumerable preparations of like composition but made in as many factories, since we are by duty bound prohibited to violate the doctor's express wish or prescription, and since we feel a certain responsibibilty for their conformity to the formnla stated, then it is time that these nostrums be taken in hand by an aggressive committee of this Association to examine their composition.

I will not deny that some of these nostrums have undoubted merit, yet the success of these has given cause for the production of others of less value and some of no value. When a firm of seemingly high repute will purposely omit the principal ingredient from one of their exclusive remedies in order to make the preparation more stable, when a tasteless quinine sulphate nostrum fails to show more than one-eighth of the sulphate stated on the label, when a large percentage of the nostrum syrups show undoubted signs of the presence of glucose, when cod liver oil cordials and elixirs are of doubtful cod liver content, and when tasteless cascara preparations depend upon their name and other ingredients for their activity, then it is high time that the pharmacists assert their rights and bring this state of affairs to the attention of the medical profession.

Since the manufacturer finds no "pay dirt" in the Pharmacopœia, as before stated, and since our salvation is to interest the prescriber in the "material" as well as the "spiritual" value of one set of formulas in common, then it is necessary that we follow the same method pursued by the nostrum foister in introducing these unknown products of the Pharmacopœia to the doctor and attempting to elevate his status to that of the physician.

The idea of co-operation in manufacture by pharmacists has been agitated a number of times by this Association. A very able report and outline was submitted by a former presiding officer. Nothing resulted from this on account of the financial liability that each member would incur for the whole. A plan is already in working order in our city in which the pharmacists work for each other's interests, but have no financial connection. The work is parcelled out, and what each one makes is his own, profit or loss. We all use one label in common. Everyone who has the energy to do the work for which he is fitted as a pharmacist is invited to join in the movement to popularize the Pharmacopœia. As chairman of the Committee on Unofficial Formulæ you are all invited to trot out your formulas, which will be submitted to the tender mercies of the Committee on National Formulary, and if they survive they will be admitted to a position in the National Formulary, and later possibly promoted to the Pharmacopœia. But without some practical demonstration of the value of these formularies all this work will be for naught; therefore it is necessary for you to act at once if you wish to conserve to yourself the name of pharmacist.

If this Association deems the matter of co-operation in manufacture by pharmacists in order, then a committee could be appointed to draw up suitable plans on practical lines for action.

Valuable suggestions are offered by Dr. F. E. Stewart in his recent paper on "How Can Pharmacy Secure Recognition as a Profession?" The following is an excerpt from this interesting paper: "Another move in the right direction would be co-operative buying and co-operative manufacturing on the part of the pharmacists. Not co-operative nostrum manufacturing, for that would not be pharmacy. It is only another form of 'patent' medicine business; but co-operative manufacturing of pharmaceutical preparations for the use of the medical profession. To carry out the co-operative principle still further, the products might be manufactured under the auspices of a bureau of materia medica or board of control composed of physicians and pharmacists. For their standardization by chemical and physiological assay the board could employ the experts connected with the medical and pharmaceutical schools. The laboratories of these institutions would be thrown open to such work. A local organization started on these lines would probably in time grow into a national board of control or bureau of materia medica, under the supervision of the general government at Washington, and by its evolution pharmacy would be gradually elevated to the dignity of a profession."

While I have such advanced ideas as the

Digitized by Google

writer quoted, yet I am fully convinced that such activity on the part of the pharmacists would be welcomed and encouraged by the medical profession and result in the elimination of the nostrum.

The Worcester Plan.

It is new only in its adaptation to present day methods to prevent a present day evil —namely, price cutting on proprietary goods, and the sequence thereof—substitution.

One has a natural right to reap the rewards of one's own labor, provided no injustice results to any one else, therefore, patents, secret compounds, and copyrighted goods may be sold with price restrictions.

To render the restrictions enforceable Notice of the Conditions of Sale must be provable. Notice of the Conditions of Sale should, to render proof thereof easily obtainable, be on the bill-heads used by the wholesale agents and on the packages containing the goods, otherwise it might be necessary to send notices by registered mail or have them served by an officer of the court.

There is a judicial decision to the effect that it is not necessary to be able to trace goods.

No records of numbers need be kept by wholesalers. No orders from cutters need be refused. The acceptance of the goods is an assent to the conditions of sale and the acceptor is liable in case he "disposes of the goods in breach of the conditions of sale to him." The conditions of sale can not be evaded by buying through an ally.

HOW IT CAN BE DONE.

By J. W. T. KNOX, 242 Bellevue Ave., Detroit.

Several men of sound judgment have written to me asking how they could join the A. Ph. A., how much it would cost, etc. I have started these men on the right track and am now anxious to do the same thing for as many more as will write to me this summer. It will cost you only the annual fee to become a member, and the same amount each year afterwards to keep up your membership. For this five dollars you get a copy of the Proceedings, which contains all the scientific papers read before the Association, the discussions of them by experts, and in addition a very exhaustive resume of the world's literature of pharmaceutical chemistry, pharmacy, and pharmacognosy. At the same time you have the honor of being a member of one of the leading scientific organizations of the world, an organization that has had since its foundation fifty years ago, and continues to have, the foremost men in pharmacy among its active working members. A pharmacist might spend five dollars a year to better advantage, I suppose, but I think it would be a pretty big problem for him to find a way to do it. Probably the best thing to do would be to try membership for a few years. Most of the people who join think it is a mighty good thing; a few drop out, but most of them stick for twenty or thirty years—or longer. Five dollars a year is not much to spend for educational purposes, and some of the best pharmacists in the country say they get a good deal more than five dollars' worth of education out of each volume.

I should like to hear from all pharmacists who are interested in this subject.—*Spatula.*

How Money Makes Money.

When Mr. Morgan formed the billion-dollar steel trust there were many prophecies that it was too big to last. Prophecies always have a long time to come true, and so it would not be wise to discount them any more than the prediction in the almanac where a typographical blunder brought snow in June. But in the first three months of its life the new trust is said to have earned about $25,000,000, and it is prophesied that it will make $100,000,000 during the year.

We have reached the period in which great aggregations of capital make fortunes in a few months. The new century has burst into financial bloom. It is as if a hundred years had been preparing for the display. It is not that the average of prosperity has advanced so far, but that those who have investments and property have come into the blessings of a new golden age. For instance, a rich man left his children $70,000,000; within five years the sum has grown to $140,000,000. Some of the wealthy men of the country have seen their millions double within a couple of years. One of them said to the writer of this that it is no longer necessary to make money, for money is busy making itself. All this means the billions in bank clearances, the hundreds of millions in stock speculations, and the vast enterprises which take in most of the opportunities in the world, from underground railways in London to the lumber trade of the Philippines.—*Sat. Eve. Post.*

Some Applications of Hot Water.

Headache almost always yields to the simultaneous application of hot water to the feet and back of the neck.

A towel folded, dipped in hot water, wrung out rapidly and applied to the stomach acts like magic in cases of colic.

There is nothing that so promptly cuts short congestion of the lungs, sore throat or rheumatism as hot water when applied promptly and thoroughly.

A towel folded several times and dipped in hot water, quickly wrung out and applied over the painful part in toothache and neuralgia will generally afford prompt relief.

A strip of flannel, or napkin folded lengthwise, dipped in hot water, wrung out and then applied around the neck of a child that has the croup will sometimes bring relief in ten minutes.

Hot water taken freely half and hour before bedtime is helpful in the case of constipation, while it has a most soothing effect upon the stomach and bowels. This treatment, continued a few months, with proper attention to diet, will cure any curable case of dyspepsia.—*Med. Age.*

Allcock's POROUS PLASTERS

always give satisfaction.

When a druggist sells them he takes no chances and at the same time renders his customer the best service. They have stood the test of over 40 years' use by the public and are acknowledged as **the standard plasters of the world.** You never knew them to fail. You never had a customer bring one back dissatisfied.

Allcock's Corn and Bunion Plasters are made from Allcock's Porous Plasters and are **equally reliable.**

ALLCOCK MFG CO. (Successors.) **Salesrooms—274 Canal St., New York.**

Back Action Philosophy.

When I muse on Pierpont Morgan,
And his trust,
I reflect that, after all, he's
Made of dust,
And will turn to dust again—
Which is natural, but then
I should like to be Pierp. Morgan
With his dust.

When I think of Albert Edward
With his throne,
To comment upon his worries
I am prone;
And I cite the restless bed,
And uneasy royal head,
But—I'd like to lose some slumber
On a throne.

It is easy, very easy,
To observe,
How one's philosophic notions
Strike a curve.
Gold and Glory are not all,
But we listen for their call.
To decline such things we haven't
Got the nerve.

THE MEDICINES PRESCRIBED BY 105 ST. LOUIS PHYSICIANS.*

By HENRY M. WELPLEY, Ph G., M. D., St. Louis.

It was while teaching Materia Medica to medical students that I determined to find out just what medicines are actually used by the leading physicans of St. Louis.

The Number of Medicines Used—The price lists contain thousands of medicines, but it is evident that they are by no means all used by the regular practitioners. The 105 physicians contributing to these statistics use 777 different medicines. Of these 82 are patent or proprietary preparations. Thirty-three doctors do not use any preparations of this class.

Popular Medicines—The ten most popular medicines are the following. The figures after each indicate the number of physicians out of 105 using each one:

Acid, boric, 102; acid, carbolic, 101; chloroform, 103; morphine sulphate, 103; phenacetine, 100; glycerin, 99; iodine, tincture, 100; opium, tincture, 97; silver, nitrate, 99; strychnine sulphate, 100.

Drugs and Chemicals in Many Forms—Among the medicines given in the greatest number of forms are the following: Ammonium, 11; glycyrrhiza, 7; ipecac, 7; iron, 27; magnesium, 8; mercury, 16; potassium, 13; quinine, 14; sodium, 17; zinc, 9.

Pharmaceutical Preparations—The number of different officinal or stock pharmaceutical preparations used and their relative popularity is indicated by the following list. The figures after each preparation designate the number of drugs given in that particular form:

1. Cerates 1.
2. Collodions 2.
3. Confections 1.
4. Decoctions 1.
5. Elixirs 20.
6. Emulsions 3.
7. Extracts 26.
8. Fluid Extracts 62.
9. Glycerites 2.
10. Infusions 9.
11. Liniments 3.
12. Liquid extracts 1.
13. Masses 2.
14. Mixtures 5.
15. Mucilages 1.
16. Oleates 1.
17. Oil sugars 3.
18. Ointments 18.
19. Pills 4.
20. Plasters 1.
21. Powders 11.
22. Solutions 20.
23. Spirits 11.
24. Suppositories 1.
25. Syrups 36.
26. Tablets 2.
27. Tinctures 50.
28. Waters 17.
29. Wines 6.

The above statistics in no way indicate the extemporaneous prescriptions for pills, powders, etc.

Among the individual preparations I find twenty-nine of the National Formulary, two of the German Pharmacopœia, and two of the British Pharmacopœia.

Of the one hundred and five physicians fifty-seven use wafers and sixty gelatin capsules.

*Read at the annual meeting of the Illinois Pharmaceutical Association, June, 1901.

Liquid Air as a Blasting Agent.

The problem of the exact field of usefulness of liquid air has been simplified by the elimination, for the present at least, of one class of work for which it was claimed that the new liquid would prove highly efficient. We refer to its use as a blasting agent. A paper recently read before the British Institution of Mining Engineers by Mr. A. Larsen described some tests recently made in the Simplon tunnel with cartridges which consisted of a wrapper filled with a carbonaceous material, and placed bodily in liquid air until it was completely saturated.

The cartridges were kept in the liquid, at the working face of the rock, until they were required for use, when they were lifted out, quickly placed in the shot holes and detonated with a small gun cotton primer and detonator. It was found that, owing to the rapid evaporation, the useful life of the cartridge was very short. The cartridges, which were three inches in diameter by eight inches in length, had to be fired within fiteen minutes after being taken out of the liquid air; otherwise there was danger of a misfire. It was chiefly on this account that the tests were discontinued. The disruptive effects, however, were said to be comparable to those of dynamite.—*Ex.*

Circumstantial Evidence.

Papa—Where's my umbrella? I'm sure I put it in the hall stand with the others last evening.

Willie—I guess Mabel's beau took it when he went home last night.

Mabel—Why, Willie! The idea!

Willie—Well, when he was sayin' good night to you I heard him say: "I'm going to steal just one."—*Philadelphia Press.*

"THAT'S THE STUFF"

So says the man who drinks Meredith's Diamond Club Pure Rye Whiskey. And surely, the whiskey that satisfies the consumer is the only kind a dealer can afford to handle. There is a limit to whiskey goodness, and that limit has been reached in Meredith's Pure Rye. It's simply impossible to make a better whiskey. It's everything that a really first-class whiskey should be—pure, rich flavored, delightful and satisfying. Its pleasing mellowness, richness and delicate boquet are distinct characteristics of Diamond Club that the most skillful imitator could not equal. Our prices are as low as you ought to pay to insure first class stuff and a good profit. Get a trial order and see the result.

PRICES.

Cases, 1 dozen Quart China Jugs . .	$11.50
1 dozen Quart Bottles	$10.50
2 dozen Pint Bottles	$11.00
3 dozen Half-pint Jugs	$11.50

G. W. MEREDITH & CO.
